THE PARLIAMENTARY DEBATES

OFFICIAL REPORT

IN THE SECOND SESSION OF THE FORTY-NINTH PARLIAMENT OF THE UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND

THIRTY-FOURTH YEAR OF THE REIGN OF HER MAJESTY QUEEN ELIZABETH II

SIXTH SERIES **VOLUME 80**

FOURTEENTH VOLUME OF SESSION 1984-85

House of Commons

Monday 3 June 1985

The House met at half-past Two o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

PRIVATE BUSINESS

C-POULTRY COMPANY LIMITED BILL
Considered; to be read the Third time.

DURHAM CITY COUNCIL BILL *[Lords]*
Read a Second time, and committed.

Oral Answers to Questions

ENERGY

British Gas Corporation

1. **Mr. Wallace** asked the Secretary of State for Energy when he next expects to meet the chairman of the British Gas Corporation to discuss the proposed privatisation of the corporation.

4. **Sir William van Straubenzee** asked the Secretary of State for Energy when he expects to be in a position to announce a target date for the privatisation of British Gas.

6. **Mr. Nellist** asked the Secretary of State for Energy what representations he has received on the future of British Gas.

18. **Mr. Parry** asked the Secretary of State for Energy if he will make a statement on progress with the proposed privatisation of British Gas.

The Secretary of State for Energy (Mr. Peter Walker): I have regular meetings with the chairman of the British Gas Corporation. Government policy on the privatisation of BGC was set out in my statement to the House on 7 May.

Mr. Wallace: Does the Secretary of State accept that many of us fear that if, and when, the British Gas Corporation is privatised it will seek to maximise sales and push up demand to increase profits? Will the right hon. Gentleman discuss with the chairman of the corporation possible statutory duties on any privatised board to take full account of conservation efforts and, in particular, to consider demand management as much an option as other sources of supply?

Mr. Walker: The British Gas Corporation would have a vested interest in ensuring that there were sensible policies to ensure that the supply of gas was always available. That would be very much in the corporation's mind.

Sir William van Straubenzee: Does my right hon. Friend appreciate the fact that my request for a target date illustrates the impatience that many of us feel and our hope of seeing his industry in the private sector? Will he therefore do all that he can to bring the date forward, in the hope that there will then be widespread ownership among those who work in the industry?

Mr. Walker: I very much admire my hon. Friend's volunteering to serve on the Committee stage of this legislation. I know that he will help us to expedite the passage of the measure. The proposal has been widely welcomed by employers, customers and others. I hope that it will reach the statute book and be implemented as quickly as possible.

Mr. Nellist: Is this not just the latest action in all the all-too-long line of handouts and bribes to the millionaire backers of the Tory party and which has absolutely nothing to do with increased efficiency, increased democracy or a better deal for gas consumers? Is it not a fact that £5 billion has been raised through special gas price increases and that it is due for transfer from the public purse to the bank balances of the sharks and speculators represented by

the Secretary of State for Energy? Those people will lose that money on renationalisation of the British Gas Corporation.

Mr. Walker: In my reply to the previous question I expressed the hope that my hon. Friend the Member for Wokingham (Sir W. van Straubenezee) would remain a firm supporter of the proposal. I also hope that the hon. Member for Coventry, South-East (Mr. Nellist) will remain a firm opponent of it. The hon. Gentleman's opposition is, as always, primitive and totally incorrect. He should talk to some of the employees of industries which have been privatised and see how many of them have any desire to go back to nationalisation.

Mr. Skeet: I congratulate my right hon. Friend on his privatisation proposals. However, will he bear in mind, as the monopoly moves into the private sector, the need to safeguard the raw materials of the chemical industry—ethane and other materials—so that they have a ready flow and are competitive on world markets?

Mr. Walker: I do not think that there will be any difficulties about that. The British Gas Corporation is anxious to do that in connection with its customers. The 1982 legislation and the proposed legislation will enable such organisations to make those supplies.

Mr. Hoyle: Has the Secretary of State any plans to meet the chairmen of other nationalised industries, especially the chairman of the United Kingdom Atomic Energy Authority? Will he discuss with the authority's chairman the Exclusive Office Cleaning strike? Women cleaners' wages are being reduced by 21p an hour and their holidays are being reduced from four weeks to one week. Will the right hon. Gentleman take up this question with the authority?

Mr. Walker: That question is clearly a wide abuse of Question Time.

Mr. McQuarrie: While I delight with my right hon. Friend in the fact that privatisation is to go ahead as quickly as possible, may I ask whether he intends that Scottish gas should be a separate entity within that privatisation?

Mr. Walker: No, Sir.

Mr. Wrigglesworth: Does the right hon. Gentleman agree that the regulatory arrangements for the prices charged by a denationalised corporation are of great importance not only to consumers but to the whole of the energy industry? Will he give a clear statement of how the regulatory framework and criteria for prices will work? Will they, for instance, be similar to those applying to British Telecom?

Mr. Walker: I hope the hon. Gentleman will understand that at this stage it is not possible to give detailed proposals, but there will be an effective regulatory system that will both protect the consumer and encourage the industry to improve its efficiency.

Mr. Watts: As no gas has been supplied direct from producer to customer making use of the common carrier provisions in the 1982 Act, is my right hon. Friend satisfied that no further measures are required to make those provisions more effective before the corporation is privatised?

Mr. Walker: I have said that we will keep this matter under review. Certainly the 1982 provisions are important and can be used to advantage, and I believe that that will happen in a number of cases. However, there is no doubt that the bulk of gas distribution will be through the present system operated by the corporation.

Mr. Orme: As this is a highly controversial matter, is the Secretary of State contemplating producing a White Paper before he produces a Bill?

Secondly, what consultation has the right hon. Gentleman had with employees of the corporation through their trade unions?

Mr. Walker: The answer to the first point is no.

On the right hon Gentleman's second point, representatives of an organisation representing all the unions involved asked to see me when our proposals were first made known, I wrote to them immediately after my announcement and asked if they would like to have a meeting—I should be only too delighted to have such a meeting—and I am awaiting a reply.

Heysham and Torness Power Stations

2. **Mr. Proctor** asked the Secretary of State for Energy what are the anticipated commissioning dates of the Heysham 2 and Torness power stations; and if he will make a statement.

The Parliamentary Under-Secretary of State for Energy (Mr. Alastair Goodlad): The anticipated commissioning dates for the two reactors at Heysham 2 power station are mid-1987 and mid-1988, respectively. Matters relating to electricity supply in Scotland are for my right hon. Friend the Secretary of State for Scotland.

Mr. Proctor: Will my hon. Friend consult our right hon. Friend the Secretary of State for Employment concerning the disposal of Her Majesty's Nuclear Installations Inspectorate to Bootle against its wishes, which coincides with the receiving of the station safety reports from the CEGB to the inspectorate? Will he ensure that the safety aspects are considered in depth and that there will be no delay in the commissioning of power stations, because any delay will cost the nation about £250,000 per day per station?

Mr. Goodlad: I am advised by the Health and Safety Commission that dispersal of the inspectorate will not have any implications for the anticipated commissioning dates of Heysham 2. The Government are conscious of the need to maintain the high standards of the inspectorate. The detailed arrangements for dispersal are a matter for the Health and Safety Executive. I understand that it does not believe that dispersal need have serious consequences for the effectiveness of the inspectorate.

Mr. Crouch: Will my hon. Friend assure us that before the Government reach a decision on the type of nuclear generation for the future they will wait to see the successful results of those two power stations in operation?

Mr. Goodlad: The relative merits of the AGR and PWR were exhaustively rehearsed at the Sizewell inquiry. In view of my right hon. Friend's quasi-judicial position, it would be wrong for me to comment further.

Mr. Andy Stewart: Can my hon. Friend confirm that the National Coal Board took into consideration the commissioning of those two nuclear power stations when it set its target for the production of coal last year?

Mr. Goodlad: I believe that that was the case.

Wind Power

3. **Mr. Yeo** asked the Secretary of State for Energy what steps his Department has taken to promote the use of wind power for energy purposes.

The Minister of State, Department of Energy (Mr. Alick Buchanan-Smith): My Department has spent over £13 million, since 1979, on research and development into the use of wind energy for electricity generation.

Mr. Yeo: Can my right hon. Friend say whether the expenditure has revealed any useful applications for wind energy and, if so, whether such applications have any export potential?

Mr. Buchanan-Smith: Yes, it is one of our most promising areas in using a renewable energy source. The work done so far in the Orkney Islands has proved effective. In relation to the second medium-sized aero-generator that we have there, the firm concerned is already exploring the possibilities of selling its equipment overseas, so there are good opportunities.

Mr. Colvin: Is my right hon. Friend aware that there are firms in my constituency which are now well into wind power technology, both ashore and afloat, through wind-assist schemes for ships? Will he take the opportunity to pay credit to Gifford Technology, which is already exporting epoxy timber composite windmill blades to the United States of America, where it is said that one of the main incentives to people buying the new technology is the tax credit system which the Americans use, which might be a better form of encouragement to British firms to invest in wind power than the present encouragement given by our right hon. Friend the Chancellor of the Exchequer?

Mr. Buchanan-Smith: A considerable number of firms are involved in the Orkney Islands development and in Carmarthen Bay, and the developments are of benefit to them. My hon. Friend's point relates to the responsibility of the Chancellor of the Exchequer, but I take note of what he said.

Coal Industry

8. **Mr. Beith** asked the Secretary of State for Energy whether, when he next meets the chairman of the National Coal Board, he will discuss the future potential for coal extraction under the sea off the north-east coast of England.

The Parliamentary Under-Secretary of State for Energy (Mr. David Hunt): I am aware of the prospects for further development of coal mines under the sea in north-east England, and expect to discuss these with the chairman of the National Coal Board from time to time as the board's plans develop.

Mr. Beith: Does the Minister agree that the closure of old pits with expensive production costs will prove to have been a disaster if it is not accompanied by new investment in areas with high potential, such as the North sea? Will he note that the sinking of a new pit in the Amble area could give access to enormous reserves and be of tremendous value in creating employment in that area?

Mr. Hunt: I agree with the first part of the hon. Gentleman's question. I was very pleased when, on 26 April, the north-east area of the NCB announced approval for a £3 million drilling rig for Westoe, Wearmouth and Ellington collieries. I was very pleased to hear about that when I went underground at Ellington just over two weeks ago.

Mr. Kenneth Carlisle: Does my hon. Friend agree that there is good potential for the extraction of coal in the north-east only if there are markets for that coal? In that respect, the coal conversion scheme is very important. Can he say how that scheme has been progressing since the strike, in the hope of expanding markets?

Mr. Hunt: Sadly, the shadow of the NACODS position still hangs over the coal industry. Nevertheless, there is still a very good argument for industry to convert to coal, and there is still a useful amount of money in the coal conversion scheme. My hon. Friend is absolutely correct in what he said.

Mr. Mason: When the Minister next meets the chairman of the National Coal Board, will he draw his attention to the severe breakdown in industrial relations in the coalfields, caused particularly by the stupid and outdated attitude of the chairman and his deputy, Cowan? Will the Minister also mention the reports that local trade union officials are working five days a week underground and are put on a three-shift system, which makes it difficult to have good trade union relations at the pithead?

Will the Minister note that, having disturbed and misled NACODS, the country is now hovering once more on the brink of a national strike? What will the Minister and the Secretary of State do to rectify and get a grip on the position?

Mr. Hunt I hope that when the right hon. Gentleman is able to consider carefully what he has just said he will recognise that it was extremely wrong and in bad taste for him to use that inflammatory language at such a crucial stage—*[Interruption.]*—in the present situation. I ask him to take time to go underground, as I have done at Point of Ayr, at Ellington and at Selby—*[Interruption.]*—and he will hear from the men underground that all that they want to do is to put the tragic strike behind them and to work together for the future of the industry.

Mr. Speaker: Order. It would have been more appropriate if the right hon. Member for Barnsley, Central (Mr. Mason) had asked his supplementary question after the next question. However, he has his answer now.

Mr. Dormand: Is the Minister aware that the multi-million pound drilling project in the north-east has been generally welcomed? Will he urge the National Coal Board, when it talks about pit closures, to give full consideration to the fact that the reserves in the Durham coalfield have been established for some time? Some of that coal will easily be obtained. When the chairman of the National Coal Board talks about the economic aspects of pits, surely that is a matter that should receive the utmost consideration before further pit closures are thought about?

Mr. Hunt: The hon. Gentleman is right to talk about extensive coal reserves, because last year the National Coal Board located at least 200 million tonnes of new reserves off Westoe and Wearmouth collieries and has spent about £15·5 million in the past 12 years drilling for coal in the North sea. A further £3 million will be spent this summer. He is also right to stress that the coal industry's future lies in the development of low-cost

productive pits, such as the massive Ellington complex. Of course, that has to be taken into account when allocating resources in the future.

National Coal Board

9. **Mr. Pike** asked the Secretary of State for Energy if he has any plans to change the membership of the National Coal Board.

Mr. Peter Walker: No new appointments to the board are imminent.

Mr. Pike: Does the Secretary of State not recognise that, despite the answer given a few moments ago, most people in the industry and in the country are convinced that the National Coal Board was largely responsible for causing last year's dispute and is likely to cause a further dispute because of its apparent failure to comply with agreements that it has reached? Is it not time that changes were made so that the industry can start to go forward again?

Mr. Walker: No. I believe that most people agree that last year's strike was politically motivated and that it was one for which no ballot of miners took place.

Mr. Bowen Wells: Is my right hon. Friend aware that it is essential for the present membership of the NCB to be maintained and supported by him and the country in order to put the industry right? Will he take this opportunity to explain the difficulties which have arisen between the National Coal Board and NACODS?

Mr. Walker: After NACODS had a meeting last week, I was asked whether a meeting could take place with the National Coal Board. I conveyed its message to the NCB and a meeting took place at the invitation of the NCB. In accordance with its wishes, the matters that NACODS had asked to have clarified at its meeting with me were clarified completely at the meeting with the NCB. I hope, therefore, that NACODS members will quickly return to work.

Mr. Foot: Does the right hon. Gentleman appreciate that what was said by my right hon. Friend the Member for Barnsley, Central (Mr. Mason) represents the widespread feeling throughout all the coalfields that Mr. MacGregor, the chairman of the NCB, is utterly distrusted and that he is making a major contribution to the present dispute? We are all aware of the fact that the Secretary of State has had his disputes with Mr. MacGregor. Mr. MacGregor was insulting at the end of the dispute when he said that the Secretary of State had had nothing to do with the conduct of the dispute. That was misleading the country. We know that the Secretary of State never wanted him. Therefore, can he not now intervene and get rid of him?

Mr. Walker: No. At the majority of coalfields production has returned to normal levels and at many of them it is high. It is giving a completely distorted picture to say that there is great discontent throughout the coalfields. I am pleased to say that coal production and deliveries are reaching good levels at present. I am only sorry that damage is being done to the full recovery of the industry, which is necessary if we are to persuade industrialists and others to convert to coal in the future.

Mrs. Kellett-Bowman: Will my right hon. Friend acknowledge the excellent work that the chairman of the NCB has put into securing export orders upon which a long-term future for the coal industry can be founded?

Mr. Walker: The marketing of coal is immensely important both at home and abroad and is something to which I hope the board will give ever-increasing attention.

Mr. Benn: Is not the truth that during the dispute the Secretary of State allowed pledges to be given on almost any terms to NACODS to get the dispute ended? Now that the current dispute is more than three months old, NACODS feels entirely betrayed by the chairman of the board and by the Government. The result of victimisation of miners and some of the savage sentences is that more and more people think that the NUM was correct in the defence that it mounted last year.

Mr. Walker: No, Sir. The opposite is the truth. The reality is that the agreement on modified procedures was virtually reached before the NACODS overtime ban took place and was entirely in accordance with procedures. It is also true that I met the NACODS leaders for two hours, when they asked for two matters to be fulfilled, both of which have been fulfilled.

Mr. Nellist: What sort of vindictiveness is it that causes the Secretary of State to refuse to allow the 700 sacked miners—11 of them in the area of Warwickshire which I represent—to return to their jobs? Is it not a fact——

Mr. Speaker: Order. There is a related question on this issue.

Mr. Nellist: Let me finish my supplementary question, Mr. Speaker.

Mr. Speaker: The hon. Gentleman must read the questions that appear on the Order Paper. Question No. 9 is about membership of the National Coal Board.

Mr. Nellist: Is it not a fact that the sackings——

Mr. Speaker: Order. That is just the point. If the hon. Gentleman will read the question and relate it to the board, he will be all right. I shall give the hon. Gentlman one more chance.

Mr. Nellist: Is it not a fact that the board's membership means that the sackings were targeted at union organisers and that many of those who were sacked have been found not guilty in courts of law? Does that mean that the present membership of the board and the Secretary of State are setting themselves up as judge, jury and executioner?

Mr. Walker: There is a right of appeal in all cases. It would be pleasing if occasionally the hon. Gentleman showed some concern about the vindictiveness of some of those who have been sacked.

Mr. Orme: Does the Secretary of State agree that the NCB is responsible for the present NACODS' dispute? The board has violated the agreement and is demanning pits, such as Horden in the north-east and St. John's in south Wales. It is therefore getting round the agreement and allowing pits to be run down so that they can be closed. Is that not another example of the board's dubiety?

Mr. Walker: I wish that the right hon. Gentleman, with his keen enthusiasm for the future of the industry,

would recognise that when a pit has been virtually destroyed, because of the coal strike, and the majority of the men at the pit want to be transferred or to take voluntary retirement, it would be right for him to criticise the board if it ignored the views of the majority at that pit.

Coal Industry

10. **Mr. Nicholls** asked the Secretary of State for Energy how many miners have taken voluntary redundancy since 1 March.

Mr. Peter Walker: I am encouraged by the levels of production attained since the end of the strike, although damage to coal faces has had a lasting effect. Between the beginning of March and 4 May over 2,000 miners took voluntary redundancy, reducing the number of men on colliery books to approximately 169,000.

Mr. Nicholls: May I take that answer as meaning that working miners are now satisfied that their applications for voluntary redundancy or transfer are being processed speedily? Does my right hon. Friend agree that if earlier reports that miners were not satisfied that such applications were being processed speedily were justified, that would have reflected a substantial betrayal of a brave body of men?

Mr. Walker: It is up to the management to take decisions on the applications of individual miners. All the individual cases forwarded to me have been taken up by the board and have been dealt with satisfactorily by the management.

Mr. Ray Powell: Is the Minister aware that at the St. John's colliery 350 miners have volunteered for redundancy payments as a result of two years of threatening closure by the National Coal Board and the Minister? The Minister, in response to an Adjournment debtate that I initiated, said that investigations would take place. Is he aware that the chairman of the board condones actions by the board and by its officers to put pressure on miners to volunteer to become redundant?

Mr. Walker: I do not agree. Any closure will be dealt with under the proper, agreed procedure.

Mr. Peter Bruinvels: Does my right hon. Friend agree that, as about 14,000 miners have now accepted voluntary retirement, there was no need for the dispute in the first place, Arthur Scargill was completely wrong, and the Government were right in supporting the National Coal Board in getting good value for money and ensuring that the miners did a decent day's work. Does he further agree that the industry is in a better position now than it was 12 months ago?

Mr. Walker: It is not true that the industry is in a better position. Considerable damage was done by the dispute to markets, coal faces, mining machinery and by delaying substantial investment programme. It is certainly true that a good investment programme, much higher than that of the rest of Europe together, is the best way to guarantee a good future for the industry.

Mr. Eadie: Why does the Secretary of State allow the chairman of the NCB to walk all over him? Regarding redundancy payments, is it not a fact that the NCB is instituting by stealth the closure of collieries without negotiation, and that miners are losing their jobs as a consequence? is the Secretary of State aware that the NACODS' dispute is costing the nation about £24 million a week? He should be worried about that, instead of answering, as he has been doing today, by saying that everything in the garden is lovely. We know that the garden is not lovely.

Mr. Walker: The main cost of the present dispute is the potential loss of markets for the industry to which the hon. Gentleman has devoted his life. The loss of coal production has been minute, as the hon. Gentleman knows, and there have been only small delays in starting production. The damage to the reputation of the industry has been considerable. With the guarantees given by the NCB, there is no need for the overtime ban to continue.

Nuclear Power Establishments

11. **Mr. Adley** asked the Secretary of State for Energy if he will list the nuclear power establishments which Ministers in his Department have visited in the last three years.

Mr. Goodlad: During the past three years departmental ministers have on various occasions visited all the principal Atomic Energy Authority and British Nuclear Fuels sites and a number of nuclear power stations. I shall give details in the *Official Report*.

Mr. Adley: I thank my hon. Friend for that answer. During the visits, has he been made aware of a concerted campaign which is being waged and seeks to imply that the presence of these establisments in a locality is itself a primary cause of cancer for those who live nearby? Is there any medical evidence to support that? If not, will my hon. Friend please take this opportunity to destroy those scaremongering techniques, which are causing a great deal of unnecessary anxiety to many people?

Mr. Goodlad: As my hon. Friend knows, this is primarily a matter for my right hon. and learned Friend the Minister for Health. However, the radioactive discharges from Winfrith, about which my hon. Friend and others have written to me, are strictly controlled by the Department of the Environment and the Ministry of Agriculture, Fisheries and Food. Monitoring carried out by both MAFF and the operators confirms that the radiological impact of discharges is well within internationality recommended limits and is insignificant in relation to naturally occurring radioactivity. It is most unlikely that Winfrith discharges could have given rise to increased levels of leukaemia. Variations in the local incidence of leukaemia are found throughout the country. Studies are being carried out by the local health authorities to identify the incidence of leukaemia throughout east Dorset, and are still at a preliminary stage. There is certainly no evidence that connects any increase in leukaemia with Winfrith.

Mr. Donald Stewart: Is the Minister aware that the announcement in a written answer on a Friday of the new nuclear development at Dounreay is regarded as an affront to Scottish opinion? Since, in the words of Sir Christopher Hinton, the chairman of the Atomic Energy Authority at the time, that installation went there originally because there was an element of danger, is the Minister aware that the new development is regarded in the same light in Scotland?

Mr. Goodlad: My understanding is that the announcement has been widely welcomed in Scotland.

Mr. Teddy Taylor: Is there not a need for the Government to mount a major campaign to put across to the largely uninformed public the basic point that that nuclear power is by far the safest form of energy conversion? Will he at least get across the simple point that one gets more radiation from having a colour television set in one's house than from living beside a nuclear power station?

Mr. Goodlad: I agree with my hon. Friend that reiteration of the facts can do a great deal to dispel misconceptions.

Mr. Wallace: If, in the near future, a Minister visits Dounreay, will he also take the opportunity to take the short trip across the water to my constituency in Orkney, where many people are worried that the new reprocessing plant may well cause difficulties and dangers to farming and marine interests? Will he reassure the House and my constituents that there will be a public inquiry so that these genuine anxieties can be fully expressed?

Mr. Goodlad: I understand that my right hon. Friend the Secretary of State for Scotland has today announced his intention of calling in the planning application for his own decision and that a public inquiry will be held. As the hon. Gentleman will know, no one in the House is more alive to the interests of his constituents than I am.

Mr. Rowlands: Is the Minister aware that there is genuine concern about aspects of nuclear discharges? For example, in Winfrith there is genuine local concern about unusually high levels of leukaemia, which are as yet unexplained? In order to allay these fears and worries, will he pull some of the information together and produce a comprehensive statement about the issues and problems arising from Winfrith so that those concerns and worries can be met?

Mr. Goodlad: When the result of the investigations to which I referred is available, I shall make sure that it is properly disseminated.

The following are the details.

Nuclear power establishments visited by Department of Energy Ministers during the past three years are:

United Kingdom Atomic Energy Authority
Harwell Atomic Energy Research Establishment
Dounreay Nuclear Power Development Establishment
Risley Nuclear Power Development Establishment
Springfields Nuclear Power Development Laboratories
Winfrith Atomic Energy Establishment
Culham Laboratory

British Nuclear Fuels plc
Sellafield Plant
Capenhurst Plant
Springfields Plant
Headquarters, Risley

Central Electricity Generating Board
Berkley Nuclear Laboratories
Heysham I and II Power Stations
Hinkley B Power Station

National Nuclear Corporation
Headquarters, Knutsford

Electricity Prices

12. **Mr.Greenway** asked the Secretary of State for Energy if he will make a statement on the report on two-tier pricing of electricity.

Mr. Goodlad: The Central Electricity Generating Board and the National Coal Board have put to my Department ideas for reducing further the price of electricity to the largest users. These ideas will be discussed with the industries.

Mr. Greenway: Does my hon. Friend agree that it is quite wrong for landlords to be able to surcharge tenants for electricity above the rate that they would pay themselves? Will he bring that practice to an end?

Mr. Goodland: I know that my hon. Friend has taken a great interest in this matter, which has been the subject of a number of inquiries by my right hon. Friend the Secretay of State for Trade and Industry. The Department of Trade and Industry is currently studying a report produced some months ago by the Office of Fair Trading, and I understand that no decisions have yet been taken. I shall ask my right hon. Friend to write to my hon. Friend in due course.

Coal Industry

13. **Mr. Teddy Taylor** asked the Secretary of State for Energy if he is satisfied with the steps taken by the National Coal Board to protect miners who worked during the recent dispute from intimidation and harassment.

Mr. Peter Walker: I am confident that the National Coal Board has made strenuous efforts to deal with the problem of intimidation in the coal industry. Firm action, including dismissal, has been, and will continue to be, taken against those indentified as offenders.

Mr. Taylor: In view of the complaints from the NUM about the need to avoid victimisation, may I ask whether my right hon. Friend has had any indication of support and co-operation from the NUM in order to avoid the intimidation and harassment that have been applied to a number of working miners?

Mr. Walker: Not exactly, but in the great majority of pits working conditions have very quickly returned to normal and no intimidation is taking place. However, instances have taken place in a minority of pits, and they have been dealt with firmly by the management.

Mr. Eastham: If there is a genuine desire to protect the rights of miners, may I also remind the right hon. Gentleman that many miners have been dismissed even though they have been tried in courts or have appeared before industrial tribunals which have found in their favour? Is it not about time that the Secretary of State made representations to Mr. MaGregor to reduce the number of such cases?

Mr. Walker: A considerable review has taken place and management decisions were taken. There are procedures to be followed if anyone considers that such decisions were incorrect. Those procedures are taking place.

Sir Peter Emery: Will my right hon. Friend have words with the chairman of the NCB to ensure that, in the context of continuing and increasing NCB productivity,

those who worked throughout the whole of the strike are given absolute preference to allow them to play a major role in the future success of the coal industry?

Mr. Walker: They did play, and are playing, a very major role. I am sure my hon. Friend will also agree that a large number of miners were kept out of work by various methods although they have the same desire for their industry to succeed. We need to support them as well.

Mr. Skinner: Is the Secretary of State aware that those who suffered the greatest intimidation and harassment are the 720 miners who did not get their jobs back after the strike ended? Is it not strange that in some NCB areas intimidation and harassment are occurring involving those who have not got their jobs back, whereas in other areas, where seemingly the strike was almost solid, almost every sacked miner has been given back his job? Perhaps someone at NCB level is involved in serious intimidation and harassment on an area basis. Why does not the right hon. Gentleman put that right?

Mr. Walker: I believe that that is inaccurate.

Mr. Orme: Does the Secretary of State agree that industrial relations are at an extremely low level following the dispute, and that the NCB has deliberately stirred this matter up and done nothing to ensure that normal relations are resumed? What is the Secretary of State doing about that?

Mr. Walker: The facts are that at the majority of pits normal relations have been resumed and production is at a high level, as are deliveries of coal. I am sorry that the right hon. Gentleman is not being more positive in encouraging all working to return to normal.

Energy Audits

14. **Mr. Hannam** asked the Secretary of State for Energy what steps he is taking to introduce a system of energy audits.

Mr. David Hunt: My Department's energy efficiency office continues to make grants of up to 50 per cent. towards the cost of energy surveys of non-domestic premises under the energy efficiency survey scheme. The energy efficiency office has supported the development of home energy audits, some of which are currently available to the public.

Mr. Hannam: I congratulate my hon. Friend on his successes in the industrial and commercial sector. Will he accept that we need a similar system to that operated in the United States, whereby anybody in the domestic sector can get a home energy audit done for only $15 through local electricity and gas companies? Would it not be desirable to introduce this system here? Pending the time when it is introduced, will my hon. Friend look at the position of local authorities and exert maximum pressure on them to ensure that their stock of housing is brought up to a reasonable standard?

Mr. Hunt: My hon. Friend is right to stress the need to learn lessons from others, and I have been able so see at first hand in Sweden and Denmark the progress made there in energy efficiency in the domestic sector. A number of lessons still need to be learnt, and my hon. Friend is right to stress the importance of encouraging home energy efficiency labelling and to show our acceptance of the fact that it is in the local authorities that considerable savings can be made.

HOUSE OF COMMONS

River Traffic (Noise)

20. **Mr. Greenway** asked the Lord Privy Seal if he will make representations to the Port of London Authority about the level of noise from vessels passing close to the Palace of Westminster; and if he will make a statement.

The Lord Privy Seal and Leader of the House of Commons (Mr. John Biffen): The authorities of the House keep in touch with the directorate of marine services of the Port of London Authority with regard to river traffic. If my hon. Friend has any particular point in mind, perhaps he would let me know.

Mr. Greenway: Is it not unnecessary for certain pleasure steamers to come so close to the Terrace, with the result that noisy bands and sometimes raucous singing drown the proceedings of Committees, sometimes for minutes on end? Cannot something be done about this?

Mr. Biffen: I must confess that this has been going on for some years and a bit of good-natured commentary from the river does not necessarily do any harm. However, I shall look into the point that my hon. Friend raises.

Mr. Skinner: Has the Port of London Authority sent the right hon. Gentleman any complaints based on the noise emanating from this place and disturbing the people travelling up the river?

Mr. Biffen: Again, in terms of entertainment, it is a good two-way traffic.

Mr. Dickens: Does my right hon. Friend agree that if the Palace of Westminster were built in Trafalgar square or Hyde Park corner we might have something to worry about? However, as it is situated alongside Old Father Thames, with just a few vessels, tugs and motor boats going by, which is rather lovely, I agree for the first time with the hon. Member for Bolsover (Mr. Skinner) that there is much more noise from this Chamber than from the River Thames.

Mr. Biffen: Whatever supernatural force has joined those two together, let me put not asunder.

Parliamentary Procedure

21. **Mr. Nicholas Baker** asked the Lord Privy Seal if he has received any representations about improvements in parliamentary procedures.

Mr. Biffen: Yes, Sir. The latest report of the Procedure Committee — the Second Report from the Select Committee on Procedure, Session 1984-85 — includes major recommendations for changes in the Standing Committee procedures of the House.

Mr. Baker: My right hon. Friend will be aware that the private Member's motion to be moved on Friday to ensure the debate of a Bill that has the support of the House is within the rules of order, and it is proper that it should be debated. However, does he agree that there is a procedural loophole here, at which both he and the Select Committee on Procedure should look, to see whether action can be taken to stop it? [HON. MEMBERS: "Why?"]

Mr. Biffen: My hon. Friend identifies that the procedures that are for debate in Friday are both in order and of general interest. I shall not now anticipate the remarks that I intend to make then.

Mr. Pavitt: Does the Leader of the House recall that, on a number of occasions, on a Friday, objections have been made and there have been requests from hon. Members on both sides of the House that the hon. Members concerned should be identified in *Hansard* and not remain anonymous? Has he looked at that, and will he try, with the Procedure Committee, to right that patent wrong?

Mr. Biffen: The Procedure Committee has reported on public Bills. But the hon. Gentleman is right to say that there are aspects of private Members' legislation which have given rise to anxiety in the past. I have no doubt that the hon. Gentleman's point will have been heard by the Chairman of the Procedure Committee.

Mr. Maxwell-Hyslop: Would it not be for the convenience of the House if my right hon. Friend made available in the Vote Office the report of the Procedure Committee which led to both the starting and the terminal hours on Fridays being brought forward one and a half hours, which was not done with the object of undoing it by sitting later?

Mr. Biffen: I shall look into that.

Mr. Peter Shore: In respect of this Friday's innovation, to put at its lowest, and major misuse of parliamentary procedure, to put it another way — *[Interruption]*—does the right hon. Gentleman not think that it would be wrong to allow this proposal to go ahead without first referring it to the Select Committee on Procedure, so that we might have a proper report on what would be a most dangerous precedent?

Mr. Biffen: The very remarks of the right hon. Gentleman and the way that they have been received in the House today suggests that it is a topic far better dealt with within the parameters of the debate rather than at Question Time.

Sir Peter Emery: I refer to my right hon. Friend's original answer about the last report of the Procedure Committee. As it has considerable importance for the House, may we have his assurance that we shall debate it before the House rises for the summer recess?

Mr. Biffen: I have said already that the Committee's proposals will be debated. I do not want to be specific about the precise time. But since I am always under pressure for the House to rise before getting too far into August, my hon. Friend will understand that any debates which might occur with advantage in the autumn are considered prime candidates for that treatment.

Members' Secretarial Allowance

22. **Mr. Dubs** asked the Lord Privy Seal what recent representations he has received advocating an increase in the Members' secretarial allowance.

Mr. Biffen: The Members' secretarial allowance has been the subject of parliamentary questions and, more recently, of an early-day motion.

Mr. Dubs: Is the Leader of the House aware that nearly 200 hon. Members of all parties have signed that early-day motion? Is that not a remarkable sign of the strength of feeling in the House, given that the signals from the Government are that they are not sympathetic to the idea? I appeal to the right hon. Gentleman, whose job it is to protect the interest of ordinary hon. Members and not those of the Cabinet, to show sympathy to a reasonable request to enable us to do a better job for our constituents.

Mr. Biffen: The hon. Gentleman will know that the Government are committed to periodic reviews of these allowances. That remains the position. If we are to play the numbers game, I remind the hon. Gentleman that he could get only a little more than a score of his supporters to vote when he tried to persuade the House to move to a secretarial allowance of £17,000.

Sir John Biggs-Davison: If more hon. Members made good use of the superb facilities of the House of Commons Library, would there not be less need for research assistants and the money to pay them?

Mr. Biffen: My hon. Friend makes a fair point. I am anxious not to be drawn into the controversy about the adequacy of the secretarial allowance, other than to say that it is only 12 months since the figure was voted by the House of Commons and that the Government made it clear that it was subject to periodic review. I do not think that it would be wise to depart from the present arrangements so shortly after they have been concluded.

Mr. Beith: When considering this matter, was the Leader of the House influenced by the Prime Minister's remarks just before the recess, which implied that there had been a disproportionate increase in the costs of the House of Commons? If so, or if he believes what the Prime Minister said, does he believe that he has in some way neglected his duties to contain that expenditure or that he has properly stood up for the needs of the House to challenge the Government and what they are doing?

Mr. Biffen: Before getting into that type of debating exchange, the hon. Gentleman should remember that a great deal of the House's expenditures are not cash limited and that there have been substantial increases in the costs of running the House, which might well be merited but which still have to be justified.

Research Assistants

23. **Mr. Peter Bruinvels** asked the Lord Privy Seal how many research assistants were employed by hon. Members as at 1 May; and how this compares with those employed on the same date in each of the past 10 years.

Mr. Biffen: The number of Palace of Westminster photo-identity passes on issue to Members' research assistants on 1 May 1985 was 469. This figure compares with a total of 452 on 1 May 1984. I regret that the records which are held by the athorities of the House do not enable me to give comparative figures for the other years requested.

Mr. Bruinvels: Does my right hon. Friend agree that it is ridiculous to have so many research assistants working in the House? Is he aware that 102 hon. Members have two or more research assistants, one hon. Member has eight research assistants, two have nine, nine have four, three have five and four have six? Should we not try to tie the number down so that hon. Members have no more than one research assistant and that research assistants on the books are paid?

Mr. Skinner: The hon. Gentleman was a half of one himself.

Mr. Biffen: In that case my hon. Friend speaks from experience. My hon. Friend makes an interesting point, but perhaps it would be better elaborated in the debate that has been promised on the second report of the Services Committee, dealing with research assistants.

CIVIL SERVICE

Unions (Meeting)

24. **Mr. Teddy Taylor** asked the Minister for the Civil Service on how many occasions he has met representatives of the Civil Service unions over the past 12 months.

25. **Mr. Winnick** asked the Minister for the Civil Service what recent meetings he has had with trade unions representing Civil Service staff.

The Minister of State, Treasury (Mr. Barney Hayhoe): Other than informally, I have met the unions on six occasions in the last 12 months. The last occasion was at a meeting on 30 April held by my right hon. Friend the Secretary of State for Employment to discuss the question of arbitration with the general secretaries of four Civil Service unions in relation to their 1985 pay claims.

My right hon. and noble Friend the Chancellor of the Duchy of Lancaster most recently met representatives of the Institution of Professional Civil Servants on 2 April to hear their views in favour of extending unified grading in the Civil Service.

Mr. Taylor: Does my hon. Friend agree that the pressure of work in some local Departments, especially the Department of Health and Social Security and Customs and Excise, is probably greater now than ever before? In view of the rather low morale of the Civil Service, will my hon. Friend make it abundantly clear at his next meeting that the Government fully appreciate that Britain has an extremely loyal and efficient Civil Service, which is one of the best in the world, and the least corrupt?

Mr. Hayhoe: I willingly and wholeheartedly endorse my hon. Friends comments .

Mr. Winnick: Is it really intended that disciplinary action be taken against those at GCHQ who refuse to give up their union membership? Is the Minister aware that the Opposition would deplore any such action?

Mr. Hayhoe: I note what the hon. Gentleman says. He will know that questions on this matter should be directed in the first instance to my right hon. and learned Friend the Foreign Secretary.

Mr. Dickens: A civil servant wrote to me this morning stating that, during the past 60 years, access to arbitration had been turned down by the Government 10 times, three times by the present Government. Civil servants feel very sore about the Government's denial of arbitration, but I do not know whether my information is right. Can my hon. Friend say whether it is?

Mr. Hayhoe: Post-war Governments of all persuasions have maintained that access to arbitration can be refused by the Government on grounds of national policy. I can confirm that the Government have refused access to arbitration.

Mr. Wrigglesworth: As it is the Government's view, as stated by the Chancellor of the Exchequer and his predecessor, that pay awards in the Civil Service should not fall consistently below awards in the private sector, what steps does the Minister propose to take in the forthcoming year to rectify what has happened in this year's pay award and other recent ones in which civil servants have fallen a long way behind the private sector?

Mr. Hayhoe: I confirm that both the present Chancellor of the Exchequer and his predecessor made such clear statements to representatives of the Civil Service unions. The hon. Gentleman will know that in the context of this year's pay negotiations the Government have made it clear once again that they are very anxious and willing to proceed to negotiations, with the aim of establishing an agreed pay system which will have long-term implications for the determination of future pay settlements.

Mr. Ashby: Does my hon. Friend not think that many of the Civil Service problems over pay and conditions would be resolved if the Ombudsman dealt with these matters?

Mr. Hayhoe: That is highly unlikely, but I am prepared to consider my hon. Friend's novel suggestion.

Mr. Janner: Has the Minister considered the answers given by each Department of State to my question about the ethnic origin and sex of its equal opportunities officer? In each case the reply was that the equal opportunities officer is white and male, except for the Secretary of State for Transport, who replied that his equal opportunities officer is a British citizen and that he does not understand the relevance of sex.

Mr. Hayhoe: The hon. and learned Gentleman's question goes very wide indeed of the question on the Order Paper. However, if he cares to pursue it with me in other ways I shall try to give him a definitive answer.

Dr. McDonald: Does the Minister think that the letter from the chairman of the Inland Revenue to his staff, threatening that those who engaged in industrial action were likely to have their career prospects blighted, is a sensible way to conduct industrial relations within the Civil Service?

Mr. Hayhoe: As ever—no, not as ever, but as so frequently happens—the hon. Lady has got it wrong. I have here the text of the letter that was sent by the head of the Inland Revenue to his staff. It begins:

"The first point I must make is that there is not, nor has there been, a ban on the promotion of those who have taken industrial action."

He then went on to make the points that I covered in the House when I answered questions on 18 February. I refer the hon. Lady to the answer that I gave then.

ENERGY

Coal Industry

15. **Mr. Willie W. Hamilton** asked the Secretary of State for Energy if he will make a statement on the financial resources available for use in the Scottish coalfield in the light of pit closures and the consequent employment problems.

Mr. David Hunt: NCB (Enterprise) Ltd., the National Coal Board's job creation subsidiary, is active throughout

the British coalfields. The funds available to the company are not allocated between areas but may be used in support of schemes wherever there is the opportunity to create real jobs. The House has been informed that the funding of the company will be kept under close review as operations progress.

Mr. Hamilton: Is the Minister aware that there is acute and growing concern in Scotland about the future of the coal mining industry? Is he further aware that in the area of the Seafield colliery in Fife male unemployment already stands at over 30 per cent. and that unemployment there would be considerably worsened if Seafield colliery were to close? Why does the Minister not do the same trick as was done by the Secretary of State for Scotland when he obtained £150 million from somewhere to get himself out of a hole over rates? If he can do it, why cannot the Secretary of State for Energy do it to create new jobs for miners who are to be thrown out of work because of pit closures?

Mr. Hunt: As I have already pointed out to the House, the funding of NCB (Enterprise) Ltd. will be kept under review. However, the hon. Gentleman must realise, referring in particular to Seafield, that in Scotland we are seeing the result of damage caused by an unnecessary and tragic strike. Scotland suffered great damage during that dispute and, as a result, lost 11 coal-producing faces.

Mr. Wilson: Does the Minister not understand, first, that many people in Scotland believe that damage was caused by the manager of the National Coal Board in Scotland and, secondly, that if the Government, instead of creating NCB (Enterprise) Ltd., had, together with the NCB, put additional investment into new coal faces in Scotland, the unemployment problem would have been taken care of? What proposals does he have to authorise investment in the Musselburgh extension?

Mr. Hunt: First, may I put the record straight. There is no question but that Polkemmet was flooded as a direct consequence of the NUM strike, and I much regret the disgraceful suggestion made by the hon. Gentleman. As to investment, four major projects in Scotland are under way with an estimated capital cost of £91·8 million. In real terms, investment in the Scottish coalfield is 43 per cent. higher under the Conservative Government than it was under the Labour Government.

Coal Industry

16. **Mr. Eadie** asked the Secretary of State for Energy, following representations to him for reinstatement of sacked miners arising from the miners' strike, how many have been reinstated as a consequence of inquiries to the National Coal Board.

Mr. David Hunt: I understand from the National Coal Board that of the 1,013 employees dismissed for offences related to the dispute, 373 have subsequently been re-employed.

Mr. Eadie: Will the Minister tell us about the cases that have been referred to him? He made great promises to the House that he would take up the cases of victimised miners. How many cases did he take up, and in how many cases was there reinstatement? In Scotland he has failed abysmally, because no miner has been reinstated following a request by the Minister.

Mr. Hunt: I have taken up every case that has been referred to me. I should tell the hon. Gentleman that all of us have been impressed by the responsibility of the vast majority of miners, who are now working together to repair the damage caused by the strike.

European Cup Final (Brussels)

3.30 pm

The Prime Minister (Mrs. Margaret Thatcher): With Permission, Mr. Speaker, I shall make a statement about the events at the European Cup Final in Brussels last week and the measures which have been put in hand in this country to deal with football violence.

Last Wednesday, television viewers throughout Britain and the world witnessed the appalling scenes of violence at the European Cup Final in Brussels, which resulted in 38 deaths and a much larger number of injuries; 27 people are still in hospital. I know that the whole House will share the nation's profound sympathy for the bereaved and injured, and the sense of outrage and shame at the behaviour of some of our citizens which led to the tragedy. The House will also wish to associate itself with the message of sorrow and condolence sent by Her Majesty the Queen to President Pertini of Italy and King Baudouin of Belgium. I have sent similar messages on behalf of the Government to Signor Craxi, Mr. Martens and President Mitterrand. The immediate contribution that we have announced of £250,000 for the families of the victims is an expression of our deep sympathy and support for those involved.

The Belgian authorities and UEFA are conducting formal inquiries into the arrangements for the match and into the disaster. They will no doubt report on the extent to which the internationally agreed guidelines and precautions for spectator safety were followed. We cannot prejudge the outcome of those inquiries, but we must recognise that there has been a terrible record of violence at European football matches in which, I regret to say, English supporters have played a large part over many years.

In those circumstances, the Government welcomed the initial decision of the Football Association to withdraw English clubs from participation in European competitions next season, and we fully understand the subsequent decision of UEFA to ban English clubs from European competition for an indefinite period, and we believe it to be right. This withdrawal gives English football authorities the opportunity to introduce effective measures to combat violence and to convince other countries that they have done so.

Last week, I was able to have discussions with several people, including the chairman and secretary of the Football Association, who returned immediately from Mexico after receiving news of the tragedy, the chairman of Liverpool football club, my hon. Friend the Parliamentary Under-Secretary of State for Employment, who happened to be present at the match and was an eye-witness to the events, and a number of football correspondents, who were also present at this and similar occasions in the past.

The following measures will be taken, or are already in hand, to put our own house in order.

First, we shall introduce as soon as possible legislation similar to that contained in the Criminal Justice (Scotland) Act 1980. That Act makes it an offence to be drunk or to possess alcohol on football coaches, on entry to grounds and in most areas of grounds. It also makes it an offence to be in possession of containers that could be used as missiles. Subject to discussions through the usual channels, it is our intention to have this legislation on the statute book by the summer recess, in time for the coming football season.

Second, we shall proceed next Session with the legislation envisaged in the Government's White Paper on the review of public order. The proposals on assemblies in the open air will considerably strengthen the powers available to the police to guard against the risk of disorder. Wherever they have reason to expect disorder at a football match, the police will, in effect, be able to limit the gate and impose other conditions. Under this provision, the police should be able to stipulate whatever steps they judge necessary to minimise the risk of disorder.

Third, Mr. Justice Popplewell will continue with his inquiry into the events at Bradford City and Birmingham football grounds on 11 May. His terms of reference are already wide enough to allow any lessons learnt from Brussels to be taken into account. I understand that Mr. Justice Poppelwell hopes to submit an interim report before the beginning of next season.

Fourth, my right hon. and learned Friend the Home Secretary has set in hand the procedure for designating under the Safety of Sports Grounds Act 1975 all clubs in the third and fourth divisions. We have, in addition, agreed with the football authorities on a number of measures, including acceleration of the introduction of closed-circuit television, with the help of the Football Trust. I have been informed today that the trust is proposing to allocate £500,000 for this purpose as a first step. That would give cover in more than 30 grounds, in addition to the 11 at which experiments are already taking place.

Events at Brussels last week have, however, made it clear that more is now needed. I shall be discussing urgently with the football authorities proposals for the introduction of a practical scheme of membership schemes, either on a club or national basis, proposals for far more all-ticket matches and stricter controls or, in some cases, a ban on visiting spectators.

I recognise that such measures would mean a radical change in the way in which football is conducted in this country, but radical change is needed if football is to survive as a spectator sport and if English clubs are once more to be acceptable abroad.

Fifth, in parallel with our own action, we shall continue to co-operate in developing international measures to deal with hooliganism. Next week, my hon. Friend the Minister with responsibility for sport will be attending a meeting of European Ministers for that purpose.

In the meantime, we are anxious to give the Brussels authorities every possible assistance in bringing to justice and dealing appropriately with people from this country who have committed offences in connection with last Wednesday's match. My right hon. and learned Friend the Home Secretary has sent a message to the Belgian Minister of the Interior offering the assistance and co-operation of British police forces. The Merseyside police and the Metropolitan police are examining television film closely to see whether they can identify those responsible for last Wednesday's violence.

We also want to do everything within our power to remove any possible difficulty in the way of any charges that the Belgian authorities may decide to bring. Arrangements already exist between the United Kingdom and Belgium for the extradition of those accused of serious offences of violence such as murder, manslaughter,

[The Prime Minister]

wounding or serious assault. If the Belgian authorities were to seek the extradition of someone accused of such an offence, we should naturally give them every assistance to meet our requirements on evidence.

One disincentive for the Belgian authorities may be that it is less trouble simply to expel Britons who may have committed offences rather than to prosecute and sentence them appropriately. We intend to offer the Belgians the opportunity, in accordance with the Repatriation of Prisoners Act, of removal to prison in this country of anyone who may be given a prison sentence in Belgium.

I hope that last Wednesday's sickening events will unite all decent people in helping to eradicate hooliganism. To curb violence requires effort and commitment from us all. If English clubs are to play football in Europe again, they can do so only when their good name, and that of their followers and supporters, has been restored.

Mr. Neil Kinnock (Islwyn): First, I should like to repeat my complete condemnation of the violence that led to the deaths and injuries at Heysel stadium last Wednesday. Naturally, we in the official Opposition join all others in offering our deepest condolences to the relatives of all those who died and of those who were injured. As I have already said, we agree with the Government's decision to give £250,000 to the relief fund set up by the Italian Government. I welcome the assistance being given, and announced in the Prime Minister's statement, in bringing to justice the criminals of any nationality and of any affiliation who were responsible for the tragedy in Brussels.

As to today's statement by the Prime Minister, I should like to tell the right hon. Lady that the Opposition support the Government's decision to bring in legislation similar to the Criminal Justice (Scotland) Act 1980. However, we are frankly surprised at the rather restricted action proposed by the Government, and disappointed at the decision to extend Mr. Justice Popplewell's inquiry beyond its already stretched limits. Does the Prime Minister really consider that the learned judge, with all his vigour and undoubted thoroughness, has the resources and facilities necessary for yet another major area of inquiry? Surely it is not enough to hope, as the right hon. Lady said in her statement, that Mr. Justice Popplewell will produce an interim report in time for proposals to be implemented before the beginning of the next football season. We need a firm assurance now that the report will come in time for proposals to be implemented before the season begins, and that any necessary resources will be available for practical implementation.

I refer to the problems of football and football hooliganism. May I specifically ask the right hon. Lady whether she will bring forward proposals to ensure that some of the revenue taken out of the game is returned in the form of improved safety and security at football grounds? That is clearly necessary to assist with the cost of better accommodation and effective policing. Frankly, the proposals that we have heard so far do not begin to match the scale of the crisis in British football, both in and near to British football grounds. When we consider that it is now 12 weeks since the awful scenes at the Luton ground in the Cup match against Millwall, and that it is exactly the same period—12 weeks—until 24 August, the beginning of the new football season, that shows how much speed and effectiveness is necessary to tackle the problem directly before we are afflicted again next season by the scenes that we have witnessed in this and previous seasons.

In the official Opposition and, I think, in the House generally, we are and must be intent on securing arrangements by both the Government and other relevant authorities, which will help football clubs and genuine football supporters, who are in the vast majority, and the police, to defeat the criminals who are destroying the game, terrorising spectators and inflicting misery on people who live near football grounds or who travel when football games are taking place. In the Opposition, as a basic principle, we seek properly to maintain the civil liberties of the decent and innocent majority to go to games in safety, and to live in peace. To that end, I say to the Prime Minister that our responses to this matter cannot relate simply or solely to punishment or to policing; neither can they relate only to a period of probation for English football.

On 14 March, I asked:

"Will the right hon. Lady agree that we need action to identify and deal with the causes of these afflictions and the breakdown of behaviour in society?"—[*Official Report*, 14 March 1985; Vol. 75, c. 431.]

We want the thugs caught and punished, but does the Prime Minister agree that in addition it is essential to discover not only those who commit the crimes but why they commit such crimes? Therefore, can we look forward to a quick and thorough investigation with that in view, which would involve the police, youth and social workers and others with direct practical experience from week to week of dealing with the issues posed by the spread of thuggery? *[Interruption.]* If it is the case, as Mr. John Smith and hon. Members have suggested and as others have noted in years gone by, that any of this thuggery is related in any way to political organisation by racists, Fascists or anyone else, that must be among the areas to be inquired into so that the menace to democracy is taken out.

We have witnessed a terrible tragedy in Brussels, and we now know UEFA's response. The thuggish minority, who are a stain on British football and British society, are the cause of both. It must be our determined purpose now to ensure that they have had their day once and for all. On football grounds and anywhere else in society we shall never permit them to show their ugly and thuggish face again.

The Prime Minister: If I may reply to some of the right hon. Gentleman's points. I am grateful to him for saying that the Opposition will support legislation similar to the Scottish legislation. As I said, we shall be in touch through the usual channels on this matter.

I did not say that Mr. Justice Popplewell will inquire into the matters at Brussels. I said, and drafted this point very carefully:

"His terms of reference are already wide enough to allow any lessons learnt from Brussels to be taken into account."

I cannot speed up the rate at which Mr. Justice Popplewell will report. I understand that he intends to make an interim report before the beginning of next season. In the meantime, the Football Association and the Football Trust are active. Each of the football clubs is responsible for the safety of people on its ground. Fire officers are now looking at the stands. The Football Ground Improvement Trust and some surveyors are

looking at the stands to ascertain the changes that can be made. Those changes cannot all be made in time for next season. But the numbers of people that the clubs allow into the grounds must take into account the condition of the stands already on the grounds because the clubs are responsible for safety.

On finance, there is already a working party under the chairmanship of my hon. Friend the Member for Sutton and Cheam (Mr. Macfarlane), consisting of the Football Association, the Football League, the Football Trust, the Football Grounds Improvement Trust, the Pools Promoters Association and the Sports Council to make an assessment of the moneys that are needed to make the grounds safe. This assessment will be made in view of the numbers of spectators many of those grounds now have, and not in relation to the stands that they had for higher numbers of spectators in the past. Of the money that is available at the moment, £7 million a year goes from the football promoters to the Football Trust and £3·3 million was distributed retrospectively in 1984 from the Football Ground Improvement Trust—not for new applications for safety provision but because there were no applications for safety provision. The £3·3 million was distributed retrospectively for work that had already been done. A further £5 million a year is received direct from pools promoters as payment for the copyright on the fixtures list, without which the pools could not operate and £3·5 million a year is received from television. That is apart from the proceeds from the gate. Considerable sums are already going into football. We are prepared to allocate more, should the committee's findings show that that is necessary.

The right hon. Gentleman suggested that there should be an inquiry into crime and hooliganism. That could go on for years and find as many answers as there are people on such an inquiry. There is violence in human nature. There are only three ways of trying to deal with it—persuasion, prevention or punishment. We shall try to operate all three.

Mr. Eric S. Heffer (Liverpool, Walton): Is the right hon. Lady aware that the two grounds of Liverpool and Everton are in my constituency? Over the weekend I went round my constituency and spoke to people who were on the Z,Y and X terraces at Brussels? Is the right hon. Lady aware that there is a deep feeling of grief among the people of Liverpool? They are crying for the dead and for their families; they are crying for the city, because they never expected, with their record, that such an event could occur; they are crying for football both in Britain and internationally; they are crying because the truth has been a casualty; and they are crying because they believe that the time has come to face up to the political elements that were involved in that and other matches—incidentally, from both ends. Mr. Brian Moore, the ITN correspondent, was the only person who clearly explained that the forces involved were trying desperately to create trouble and cause problems for our people.

I have today told the Italian ambassador, on this Italian day, that my people in Liverpool have as much grief in their hearts as the people of Milan, Turin or elsewhere in Italy.

I ask the right hon. Lady not to become involved in a cover-up of the terrible events. Other questions must be asked. What about the fact that many people have run away from their responsibilities? What about the position of the Belgian authorities, the fact that the ground was unsuitable and that police action was insufficient to deal with the outbreak of violence? What about the fact that UEFA has been quick to introduce action but has not dealt with the situation?

I say to the right hon. Lady that whatever is being suggested must not be used as a further attempt to undermine our civil liberties. We must deal with the individuals and groups concerned; we must root out and isolate them. We have to say who they were and explain why they did it. We must find the reason—that is the important factor. I hope that the right hon. Lady will not be misled in other directions.

The Prime Minister: I think that the whole nation shares the grief expressed by the hon. Member for Liverpool, Walton (Mr. Heffer). Indeed, we are united in sharing and expressing that grief.

We cannot prejudge the results of the inquiry in Belgium. Some of the matters to which the hon. Gentleman referred would not be necessary unless there were soccer hooliganism. It is appalling that supporters of one club cannot stand alongside supporters of another club without the fear of violence. That used not to be so in football, or in any sport in this country. It is that that we must try to eradicate. In the meantime, we must tackle the situation by a mixture of prevention, above all, and of punishment when these events occur.

Mr. David Ashby (Leicestershire, North-West): As someone with the closest possible connection with the town of Turin, may I speak of my great shame at the events of last Wednesday? There should be no cover-up and no excuses for the disgrace of those events.

We talk about giving help to the police in Belgium, but why on Thursday morning were there not hundreds of police officers at all points of entry into this country finding out the names and addresses of those returning from Belgium and what they had been doing, so that we could discover exactly who was responsible for that outrage?

Does my right hon. Friend agree that the responsibility should be placed firmly on the football associations and on the clubs themselves, and that clubs and stadiums should be licensed in the same way as public houses, so that, if clubs failed to meet the requirements of good order, they could be closed until they could met them? Then we would not export our violence to the continent of Europe.

The Prime Minister: With regard to police help, the police are giving all the assistance that they possibly can. In addition to looking at videos, they have been active at some of the ports of entry of football supporters on their return, as my hon. Friend would expect.

The question of drink at football clubs will be dealt with under the legislation that will shortly be brought before the House. There are one or two ways in which English clubs differ from Scottish clubs, and my right hon. Friend the Home Secretary is in consultation with the police about any differences in legislation that may be advisable.

Several Hon. Members *rose*——

Mr. Speaker: Order. I understand that the House feels very deeply about this matter, but I must have regard to the subsequent business. Therefore, I ask for brief questions, and I shall allow them to run until 4.15 pm.

Mr. David Alton (Liverpool, Mossley Hill): I associate myself and my hon. Friends with the expressions of sympathy and with the condolences which have been offered to the bereaved and to those who were injured in the terrible events of last Wednesday.

May I also tell the Prime Minister and the House that the people of Liverpool feel not only acute grief but a profound sense of shame at the mindless acts of a minority who dragged the name of a great football club and city into the dust by their actions? Those actions cannot be forgiven by people trying to sweep aside the blame and pass it on either to the Belgian authorities or to UEFA.

Will the Prime Minister consider extending the ban on alcohol to areas around football grounds? When matches are played away from home, alcohol should be banned not only on the coaches taking people to matches but on the duty-free ferries.

I ask the Prime Minister to urge those who witnessed the scenes in which there was a breakdown of personal responsibility last Wednesday, and those who have some say in running the affairs of the city of Liverpool at this critical time, not to break the law or to elevate mob rule to some sort of cult, but to endeavour to achieve the highest levels of personal responsibility which are necessary if we are never again to witness the kind of scenes that we saw last Wednesday.

The Prime Minister: I am grateful for what the hon. Member said. There are, I believe, no excuses for what happened, and we must not try to find any.

With regard to the hon. Member's comments about alcohol being available in areas around football grounds, the police can already apply to the magistrates, so that public houses and places where alcohol is sold can be closed on a particular day for a particular time. Use can be made of that power.

I echo the hon. Member's suggestion that we should all attempt to ensure that there are the highest levels of effort and commitment to stamping out violence, because we all have some part in setting the standards by which our society lives.

Mr. John Carlisle (Luton, North): I have been particularly interested in the subject since the Luton and Millwall game. Does my right hon. Friend accept that there will be some disappointment at her statement?

The remedies that she has put forward in regard to legilsation concerning alcohol, club membership tickets and all-ticket games will not necessarily eradicate the problem. I listened in vain for some hint of the severe penalties that might be imposed upon hooligans. Nowhere in my right hon. Friend's statement was there any suggestion about penalties that would impose on hooligans the sort of physical pain that they so readily impose on other people.

In addition to the legislation that my right hon. Friend intends to bring before the House, which will receive all-party support, could not some amendment be made to the Criminal Justice Act 1982 to enable hooligans to be punished so severely that they will not commit such crimes again?

The Prime Minister: The penalties available for these serious crimes are already severe. The penalties meted out at Cambridge about a fortnight ago were of the order of five years' imprisonment, and we all thought that they were appropriate sentences. There could, indeed, be even more severe sentences. The Court of Appeal has already said that severe crimes of that nature should in general meet with a prison sentence. Recent events will probably mean that heavier sentences are meted out, and I think that that would be right.

Mr. Merlyn Rees (Morley and Leeds, South): Is the Prime Minister aware that, of course, it is right to act against violence? Does she recall that it was Frank McElhone, a junior Minister at the Scottish Office, who did the research upon which the Scottish legislation was based? I speak as someone who lives alongside Elland road football ground. We know that violence occurs outside the ground—in city centres and on the trains—and that people are afraid. Violence does not just occur in the grounds. Has the Prime Minister considered—it is what I asked myself when I was Home Secretary—what has gone wrong? On 3 September, 40 years ago, the Welsh Guards went into Brussels as its liberating force and anyone with a daffodil in his hat was well received. Then we saw what happened last week. Something has gone wrong in this country and the right hon. Lady as Prime Minister must give some thought as to what it is.

The Prime Minister: The right hon. Gentleman is aware that there has been what one of the newspapers called at the weekend

"a chronicle of violence in soccer"

for over 15 years. There has been violence elsewhere also. Violence is frequently caused by people who have quite a bit of money. Violence is caused partly because there is now more money and far more mobility than there was in the past, and that enables people to move from one soccer club to another much more quickly. In the meantime, we must act on prevention and punishment. Punishment is part of prevention. I do not believe that it would help to have an extended, indefinite inquiry into the causes of crime which has been with us as long as man has existed.

Mr. Eldon Griffiths (Bury St. Edmunds): Is my right hon. Friend aware that amid all the shame and humiliation to which our country has been subjected abroad, the only reaction so far that has cut any ice overseas is her clear condemnation of the atrocity, her outright apology and the announcement that she has made today that we intend to put our own house in order? Will she nevertheless accept that no words and no legislation will be effective unless the police can enforce that legislation? The police are fed up with being used as the "poor bloody infantry" in such disputes. They are fed up with asking for powers and being denied them. In particular, they need to be able to search for weapons, liquor or drugs under the clothing of those who enter football grounds. That power was denied them in the Police and Criminal Evidence Act 1984. They need the power to ban a football match if those going to it pose a clear threat to public order.

The Prime Minister: I have made it clear many times that there are no excuses for what occurred. There is only shame that it should have occurred. With regard to legislation, under the proposed public order legislation, we shall try to see that the police have increased powers to decide what goes on in football grounds if they apprehend that there might be public disorder. I have said that that legislation will come forward during the next Session. I understand that the Police and Criminal Evidence Act 1984 does not prevent the police from searching for weapons in any case where that is considered necessary.

I hope that my hon. Friend will take the view that we are increasing the available powers. In the proposed legislation we shall be implementing measures similar to those contained in the Scottish legislation and we shall be prohibiting the supply of alcohol on trains.

Mr. Jack Ashley (Stoke-on-Trent, South): Is the Prime Minister aware that the despair and disaffection of so many young people in Great Britain today is the breeding ground for the mindless and appalling aggression that we saw in Brussels last week? However, that is no excuse for it. I agree with her that we must not try to find excuses.

However, she must face the fact that aggressive economic and social policies exacerbate the problem and that, unless those policies are softened or modified, what happened in Brussels last week may well be a tragic and chilling prelude to what may happen in Britain in the future.

The Prime Minister: I accept a good deal of what the right hon. Gentleman says. I think that this nation has done something creditable, which shows its underlying and overwhelming sense of decency, by accepting that there are no excuses and by feeling a national shame. That shows that civilisation and civilised values in this country still run strong. I believe that we have the overwhelming majority of people behind us when we take rather sterner action than we might have previously thought necessary. I believe that people expect that action to be taken now.

Mr. Stefan Terlezki (Cardiff, West): People in Wales are shocked and horrified by what happened in Brussels. Wales has only four professional clubs. We understand the horror of what occurred in Brussels, and we hope that such a thing will not happen in Wales or the rest of the United Kingdom.

I agree with the proposals that my right hon. Friend has announced this afternoon, but I was somewhat perturbed when she mentioned membership cards. I should like to see a membership card with a photograph issued to young supporters aged between 12 and 20. I am convinced that that would go a long way to help. When I was associated with Cardiff City football club, such passes were issued to young supporters. I remember one evening when Cardiff City played Hereford United. There were 35,000 people watching, but there was not one arrest or prosecution. I should like to see such passes introduced by every football club before the kick-off in the autumn.

The Prime Minister: A number of views are held about membership cards. Unfortunately, they are different. Some believe as fiercely as my hon. Friend that there must be club membership cards containing a photograph. Others say that there should be national membership cards. I am assured that with modern technology either is technically feasible. I shall be discussing that point again with the Football Association which, before the events in Brussels, was resistant to the idea of membership cards. I shall be doing my utmost to persuade it that club membership cards are necessary to achieve the requisite control.

Mr. John Maxton (Glasgow, Cathcart): As the Member representing Hampden park who has seen the Scottish experiment in operation, may I ask the Prime Minister to consider the closure of all licensed premises within a radius around a football ground as well as banning the taking of alcohol into football grounds in the legislation that she intends to introduce? Secondly, and more positively, may I suggest that when she studies the Scottish experiment she reads the report produced by the late Frank McElhone and considers the positive ideas that he proposed—in particular, all-seat stadiums and that there should be more community facilities within them to make football grounds part of the community, not just part of the football scene?

The Prime Minister: With regard to the hon. Gentleman's first point, it is already possible for the police to apply to the magistrates for the closure of licensed premises near to grounds. I agree with the hon. Gentleman that that is necessary. We have already discussed with the Football Association seating in stadiums, the provision of family enclosures, to which the Football Trust frequently makes special subsidies to the various clubs, and more all-ticket matches. All these things are under discussion already with the Football Association. I take note of what the hon. Gentleman has said.

Mr. Barry Porter (Wirral, South): Does my right hon. Friend accept that the majority of people on Merseyside do not and will not attempt to justify or excuse the actions of the drunken and homicidal hooligans in Brussels the other night? Does she accept also that Merseysiders, who were so disgraced in Brussels, will support whatever measures are necessary — the measures which are announced or measures which are suggested in future— to ensure that what took place in Brussels never happens again?

The Prime Minister: I am grateful to my hon. Friend. I believe that there is a national sense of shame and that the people of Liverpool feel especially deeply about what took place in Brussels. We shall be introducing appropriate legislation to deal with the drink problem. However, I think that it would be a mistake to believe that that will solve all the problems. The term "mindless violence" is used frequently, but my worry is that it is often calculated and mindful violence, which is an important factor. We must try to apprehend and punish severely those who commit acts of violence wherever violence occurs.

Mr. Eddie Loyden (Liverpool, Garston): The Prime Minister will be aware that there has been universal condemnation in Liverpool of the actions of those who were responsible for the violence last Wednesday. Liverpool does not abrogate responsibility for the part played by so-called Liverpool supporters. I hope that the right hon. Lady will make every effort to ensure that we seek out those who were responsible and that our actions do not amount to a universal condemnation of the city. As I have said, Liverpool has profound sympathy with the families which have been bereaved. Indeed, that sympathy was reflected in a service that took place in Liverpool on Saturday.

Will the Prime Minister recognise that the violence which we saw on Wednesday has been developing over the past decade and is not an overnight phenomenon? That is my view as a Liverpool supporter of many years' standing who has stood on the terraces. Little attention has been give to those who now occupy the terraces, which used to be occupied by those who wanted to watch a sporting game. The present occupants are those who go to matches for purposes that are limited to violence, thuggery and

[Mr. Eddie Loyden]

hooliganism. Will the right hon. Lady ensure that proper access is given to all those who witnessed certain events at the Brussels match so that the fullest and most comprehensive inquiry can take place? Only that approach will lead to the elimination of violence at football grounds.

The Prime Minister: I agree very much with the hon. Gentleman's contribution. Given the scenes that we saw on television and the terrible consequences, it is something of a disappointment that so few have so far been apprehended or arrested. The anonymity of the crowd is one of the deeply disturbing factors in such crimes, and that is why we are trying to do so much with closed circuit television. We are going through the photographs to ascertain whether we can identify those who were responsible for what took place. That is why we are so anxious to see the introduction of identity cards and other means by which we can readily identify those who attend football matches. Everything possible will be done to apprehend those who were responsible and to bring them to justice. That would be the best thing possible, and for that we need the co-operation of those who were present who know those who were responsible.

Mr. Kenneth Warren (Hastings and Rye): I accept that there is no excuse for the violence that took place in Brussels. Will my right hon. Friend give an assurance that every co-operation will be given by her Ministers and by our police to the Belgian police, especially in the light of evidence that has come before me today and which I intend to place before Ministers? The evidence suggests that there was inadequate policing at the stadium before and after the match and that Belgian police officers were seen selling tickets at random outside the stadium before the match.

The Prime Minister: I think that these matters will emerge as the inquiry into the events which took place in the stadium, which the Belgian authorities are conducting, continues. My hon. Friend is aware that the inquiry is taking place. We must have the right arrangements to prevent these violent events from taking place and these must include seating and limitations of crowds and of who shall be present. The matters to which my hon. Friend has referred would not have been harmful if there had not been a tremendous streak of hooliganism within the stadium.

Mr. John Cartwright (Woolwich): Does the Prime Minister accept that the anti-hooligan measures that she proposes make sense but involve major financial problems for the less wealthy football clubs in the lower divisions? Does she accept that pool betting duty is now raising £220 million a year for the Government and that a 2·5 per cent. reduction of the duty would generate £15 million? If that sum were distributed throughout the Football Trust there would be enough money to bring all league clubs up to acceptable safety standards and to pay for the anti-hooligan measures in the lower divisions which she proposes. Will she consider that as an urgent measure?

The Prime Minister: The football pool betting levy is a tax on gambling, not on football. The Government must have income to carry out the many social and other services for which they are responsible. We are prepared to find more money if the committee which is now sitting says that that is necessary. As I have said, £7 million goes to the Football Trust each year and £5·5 million goes to football league clubs for the copyright of the matches which are played. Television rights amount to £3·5 million. Last year, in the absence of further applications for improvements to grounds, the Football Ground Improvement Trust disbursed £3·3 million in support of improvements which had already taken place. We must direct ourselves to the money which is available and is being used for safety purposes and to the new rules which the Football Association, after discussion, may think fit to introduce. There is no point in re-doing up old stands which are far too large for the numbers of spectators who now attend matches.

Mr. Jim Lester (Broxstowe): I am sure that we all accept that football should not be a vehicle for violence, that there are no excuses for violence and that violence has become a disgrace for teams, towns and the country. Will my right hon. Friend accept that there are millions of football supporters who watch matches every week and that many of them organise supporters' clubs? Is she aware that the supporters' clubs have a great deal to offer in terms of prevention and identifying the hooligans? Will she ensure that the supporters' clubs have a full part in all the discussions that take place?

The Prime Minister: I take note of my hon. Friend's remarks. I am sure that we shall have the overwhelming support of all members of supporters' clubs who love football and who wish to see an end to hooliganism and violence. I am sure that these supporters want once more to be able to take their families to football matches to see the game played as it used to be played.

Mr. Kinnock: The Opposition want to co-operate as much as possible with the improvement of legislation and with other measures which are intendedd to combat hooliganism at football grounds and elsewhere. However, I listened intently to the right hon. Lady and I heard no effective proposals for co-ordination between the various interested bodies. She has given no undertakings of adequate finance being made available, despite the fortunes that are made out of football. She has given no undertaking to investigate the causes of violent criminality. Instead, we have heard the Prime Minister confine herself almost entirely to addressing the symptoms of the sickness, and only as they relate to football, which is only a part of the problem afflicting our society.

I ask the Prime Minister further to reflect on these matters and to reconsider her attitude so that we can get directly to the sources of the savagery and by that means find real answers. I plead with the right hon. Lady to do that before she commits herself irrevocably only to dealing with a small part, albeit a horrific one, of the problem.

The Prime Minister: I said in reply to the right hon. Gentleman's earlier contribution that there is already a co-ordinating committee on finance under the chairmanship of the Minister with responsibility for sport, my hon. Friend the Member for Sutton and Cheam (Mr. Macfarlane). On his working party there are representatives of the Football Association, the Football League, the Football Trust, the Football Grounds Improvement Trust, the Pools Promoters Association and the Sports Council. The committee is considering the very finance to which the right hon. Gentleman refers.

Regarding the right hon. Gentleman's desire for a general inquiry into the causes of violence, there are books

and books, papers and papers, and courses and courses upon it. They have not found the answer and they never will. I do not intend to ask for yet another inquiry.

Social Security Review

4.20 pm

The Secretary of State for Social Services (Mr. Norman Fowler: I will with permission, Mr. Speaker, make a statement on the review of social security.

During the last 18 months the Government have been examining the major areas of social security provision. In that time more than 40,000 consultation documents were issued, 4,500 pieces of evidence were received, and 62 organisations and individuals gave oral evidence at public sessions. The Government are today publishing a Green Paper which sets out their proposals. We will now be seeking comments on the proposals from interested organisations and will be providing an opportunity for the House to debate them.

The social security system in the United Kingdom owes a great deal to the report of Sir William Beveridge in 1942. Although much of what he proposed was changed when it came to implementation, and more has been changed since, many of the principles on which his proposals were founded remain sound. The Government remain committed to the concept of a national insurance system, under which entitlement to the major benefits is earned by the payment of contributions during a working life. The Government also believe that our tradition of state support for those in need is one which should be maintained and developed. However, social security is not a function of the state alone. It should be a partnership between the individual and the state—a system built on twin pillars.

Any review of social security must recognise its considerable achievements, but the review has shown that there are several major causes for concern. By common consent the social security system is too complex. That is to the disadvantage of both the public and the staff. In particular, the research evidence shows that substantial numbers of supplementary benefit claimants do not understand how their entitlement is worked out, in spite of the fact that 38,000 staff are now working exclusively on supplementary benefit. With the pressures now being faced there is a danger that some parts of the system will break down. It is, therefore, a matter of urgency that we devise a simpler and more coherent system.

The social security system also needs to be modernised. It is not properly co-ordinated with the tax system and operates with outdated equipment. We now need a major computerisation strategy for social security, which can link effectively with other Government systems, including that of the Inland Revenue.

In terms of spending, the cost of the social security system has increased fivefold in real terms since the war and now totals some £40 billion a year. That is over 30 per cent. of all public spending and represents over 11 per cent. of gross domestic product compared with only 4·7 per cent. after the war. Nor has the pressure for growth in spending ended. In the first part of the next century we need to provide for an extra 4 million pensioners. That, taken together with the state earnings-related pension scheme, means that spending on pensions will at least treble. We must ensure now that we have a soundly based social security system which the country can afford.

Above all, perhaps, the social security system does not always help those most in need. More than half of those living on the lowest incomes are in families with children. This affects not only the unemployed, but families where

[Mr. Norman Fowler]

the head is working. Yet, under the present system, low income working families can face both the difficulty of escaping the poverty trap, where they may get no increase in total income when their earnings rise, and the unacceptable position that they can be better off out of work. That position must be changed.

To make better provision to meet the needs of poor working families with children has been a major priority of the review. We therefore propose to introduce a new benefit, to be called family credit, to provide better help for such families. Family income supplement will be abolished. Family credit will have three main features. First, it will be paid on the same basis as help to unemployed families, in that help will be related to the age of children. That means that families with children cannot generally be better off out of work than in work.

Secondly, family credit will be related to take-home pay, not to gross earnings, as is family income supplement. The worst effects of the poverty trap will be eliminated by making it impossible for people to face a marginal tax rate of more than 100 per cent. Thirdly, it will be paid by employers through the pay packet. Families will see their benefit as part of their income from work, whether as an offset to tax and national insurance, or, in the case of the lowest paid, as an addition to gross pay.

Family credit will be paid in addition to child benefit. The Government believe that the extra responsibilities carried by all those bringing up children should be recognised. Child benefit will, therefore, continue to be paid for all children, irrespective of the means of the family.

Family credit will be part of a coherent system of income-related benefits. That system, covering basic income support, assistance with housing costs and help for low income families, will be based on a common income test and a common structure. It will be simpler, fairer and easier to administer, and it will provide the same level of help at the same level of income for those in and out of work.

We propose to replace supplementary benefit with a new income support system. The central concept of the income support scheme is that the regular extra payments, now made on the basis of detailed individual assessment, should be absorbed into the main rates of benefit. Those rates will provide a special higher level of benefit for pensioners, the long-term sick and disabled and lone parents. Families with children will not only receive assistance for each child, but a premium to reflect the extra pressures that they must cope with. At the same time, the capital rule will be eased by introducing a taper between £3,000 and £6,000, instead of the present inflexible £3,000 cut-off. We shall also ease the earnings rule for the long-term unemployed and the disabled.

The income support scheme should provide for the needs of almost all claimants, but we recognise that the system must be ready to cope flexibly and quickly with particular problems. Instead of the present single payments system, we propose to set up a social fund which will be operated on a discretionary basis by specially trained staff at Department of Health and Social Security local offices. It will provide emergency help where needed, and help those who face particular difficulties. We also expect that the social fund will, in time, provide a better basis for contributing cash help to enable people to be cared for in the community rather than in institutions.

Today I am also publishing the report of the housing benefit review team, and have accepted most of its recommendations. The review team found that housing benefit was excessively complicated, involving six different tapers applied to different groups at different income levels. It is also expensive and poorly targeted, with more than one third of all households, some with incomes up to average earnings, receiving benefit.

We intend to move to a simpler and clearer system. It will be based on the same net income assessment basis as the income support and family credit systems. It will also provide help on the basis of rent and rates together rather than separately, as at present.

For the poorest families, housing benefit will meet 100 per cent. of rent. At present 100 per cent. help goes only to those on supplementary benefit. In future, it will apply equally to those in and out of work.

We believe, however, that the basis on which help is provided with rates needs to be changed. At present some 7 million householders receive help with some or all of their rate bills and over 3 million householders pay no rates. As a result, a large proportion of people live in households in which no rates are paid. This means that there is no effective link between payment for and use of local services. The whole structure of rates is currently under review, but the Government believe that, so long as domestic rates remain, all householders should be directly responsible for making some payment towards them. The Government have in mind a figure of the order of 20 per cent.

The review also examined the contributory national insurance benefits for unemployment, maternity and widowhood. As I have already made clear, the Government remain committed to the principle of basic provision for these contingencies organised by the state through the national insurance system. We propose no change in unemployment benefit, which will continue to be paid for 12 months.

For widows under 60, we propose to replace the widow's allowance currently payable for the first six months after bereavement by a single lump sum payment of £1,000 to give them more help when it is most needed. In addition, widowed mother's allowance will now be paid from the time of bereavement rather than after six months as at present. Widow's pension will also be paid from the time of bereavement, but the rules of eligibility will be modified to concentrate help more on older widows who are least likely to be able to resume work. The changes will not affect the benefit paid to any existing widows.

In maternity, we propose to adjust the rules governing materinity allowance so that the mother can have greater freedom in choosing when, around the time of her confinement, she wishes to be paid the allowance. We also intend to change the qualification period so that the benefit is more likely to be paid to women who have had to give up work in order to have their babies.

The maternity grant and the death grant have been left at their present level—£25 and £30 respectively—for many years and are now quite inadequate for their purpose. The average cost of a funeral is now over 10 times as much as the death grant, and it costs £20 in administration to pay out each £30 grant. We propose instead a new maternity grant of £75—three times the level of the present grant

—available to all low income families. Help with the full cost of funerals will also be made available more widely than at present to anybody who has responsibility for a funeral and lacks the resources to pay for it. Help will be provided through the social fund to ensure that it can be given quickly and flexibly and with the minimum of detailed inquiry. These changes will concentrate help where and when it is most needed instead of providing a token contribution to everybody when it may be of little practical use.

The largest single area of social security spending is on pensions. The basis pension alone accounts for over £15 billion a year and is paid to 9 million people. That pension accounts, on average, for half the income of pensioners and has been a major factor in raising pensioners' living standards since the war. It is, and must remain, the basis on which individuals can build additional pension provision. The question is how that extra provision should be made.

At present only about half the working population belong to occupational pension schemes. The development of occupational pension schemes has been an important factor in improving living standards since the war, but the coverage of schemes has not increased since the mid-1960s. The development which it was hoped would follow the Social Security Pensions Act 1975 has not taken place. Nor has the forecast of cost on which the 1975 scheme was based proved sound. The analysis undertaken during the review has shown that the number of pensioners for whom we will eventually need to provide is 3 million greater than was recognised in 1974 and 4 million higher than it is today. It is clear, therefore, that the long-term costs of state pensions are set to rise steeply in the first 30 years of the next century. If the basic pension was uprated in line with prices, its cost would increase in real terms by half to £22 billion. If it kept pace with earnings, the cost would treble to nearly £45 billion. On top of that, the cost of the state earnings-related scheme will add another £23 billion. Thus, the total pensions bill will at least treble and could increase by over four times. At the same time the ratio of contributors to pensioners will worsen, and it is estimated that there will be only 1·6 contributors for each pensioner compared with 2·3 now.

As a country we cannot ignore these emerging costs. If the best estimates available to us lead us to question whether we will be able to afford the promises we are making, we have a duty to re-examine the position. It would be an abdication of responsibility to hand down obligations to our children which we believe they cannot fulfil.

The real question is not whether action should be taken on the state earnings-related scheme, but what action. There are those who argue that we should restrict the emerging cost of the state scheme by changing its provisions. The difficulty of that course is that contributions would remain the same while benefits would be reduced. There is no reason to believe that there would be any increase in occupational pensions to fill that gap. The Government have concluded that it would be better to adopt a different approach. This would be based on the aim of ensuring that in addition to the basic pension everyone has his own pension with his job—whether it be an occupational pension, membership of an industry-wide scheme or a personal pension. In all cases every employee would have the right to a contribution from his employer.

We recognise, however, that relatively older workers would have difficulty in building up adequate occupational pension cover. We have decided, therefore, not to make any changes for those within 15 years of retirement. For men aged 50 or over and women aged 45 and over at the time of implementation, the existing state earnings-related arrangements will continue. This means that no one retiring during the rest of this century will be affected by the change and nor will any existing pensioner.

All rights built up in the state scheme at the time of the change will be honoured. In addition, we also intend to give a special enhancement of rights for men aged between 40 and 49 and women aged 35 to 44. They will be given a bonus of added years of entitlement, which will give them higher pensions when they eventually retire.

For those to be covered by the new arrangements the Government will lay down a minimum contribution level of 4 per cent. of earnings, at least half of which must be provided by the employer. The new arrangements will be phased in over three years. These changes will mean that in due course all employees will be contributing to their own additional pension through their jobs. This will represent the biggest ever extension of occupational pension coverage in this country and will add to the reforms of occupational pensions, involving improved rights for early leavers and transfer of pensions, currently in legislation before Parliament.

The Government must also ensure that the social security system is managed as effectively as possible to provide the best possible service to the public. The Government's benefit proposals will in themselves make the system simpler, but we are now to embark on the largest programme of computerisation ever undertaken in this country to modernise and improve its operation.

The benefit changes and the computerisation both of my Department and the Inland Revenue will provide opportunities to achieve better co-operation and closer working between the tax and benefit systems. The Government intend to take advantage of those opportunities and will be considering this further in the context of the Green Paper on personal taxation.

Meanwhile, we have decided to take a major step towards better harmonisation by aligning the tax and benefit years. Instead of benefits being uprated in November each year, the uprating date will be moved to April. This means that all tax and benefit changes will be implemented at the same time. It will also be of considerable assistance to local authorities which at present have to reassess housing benefit cases twice a year.

The change in the benefit year will be brought in at the time of implementation of the major structural reforms. We expect this to be in April 1987. After the uprating of benefits due at the end of November 1985, there will, therefore, be a 16-month period before the change in April 1987. It would clearly be wrong to allow such a gap between upratings, but it would not be practicable to have upratings both in November 1986 and April 1987. Accordingly, the Government have decided that, following the November 1985 uprating, there will be two upratings at eight-month intervals, the first in July 1986 and the second in April 1987.

The programme of reform that I have announced will provide a system which is easier to understand and simpler to administer. It will mean the most substantial changes in income-related support for 50 years, and for the first time give equal support for those in and out of work. It will

[Mr. Norman Fowler]

provide more help for low income families with children. It will establish a better partnership between state and individual provision, especially in pensions, giving everyone the right to his own pension with his job. Above all, the reforms will provide a modern social security system to take us into the next century.

Mr. Michael Meacher (Oldham, West): Is the Secretary of State aware that, behind all the rhetoric about restructuring, this statement represents the erosion of the fundamental principle of a welfare state for all citizens? *[Interruption.]*

Mr. Speaker: Order. The Secretary of State was given a fair hearing.

Mr. Meacher: Is the Secretary of State further aware that the statement represents the reintroduction, for the first time this century, of Victorian values in an invidious distinction between deserving and undeserving poor? Is he also aware that this package as a whole will bring about a net loss in the next few years to pensioners and the unemployed of at least £1,000 million a year even before the huge losses from the abolition of SERPS begin, and that the main beneficiaries, whom he did not mention, will be the rich, who will receive even bigger tax handouts in future Tory Budgets?

We welcome the Government's limited reprieve on SERPS, in response to our demand. *[Interruption.]*

Mr. Speaker: Order. We have a full day ahead of us.

Mr. Meacher: It is patently clear that the Government lost their nerve after their original intention had been made clear in repeated leaks. Is the Secretary of State aware that the Government's longer-term abolition of SERPS, which is the central arch of the welfare state, is still a betrayal of an unequivocal pledge by the Prime Minister three weeks before the last general election, when she said:

"nor are there any plans to change the earnings-related component of the State pension."

Is the Secretary of State aware that if SERPS were to continue it would roughly double the pension in the next 13 years, and that if it is abolished millions who would have enjoyed dignity and security without a means test in retirement will be forced into poverty? How does the Secretary of State justify the fact that women, low-paid workers, and the longer-term sick and disabled and the millions of carers who look after them will be shifted compulsorily into private schemes to which they will be forced to make higher contributions for less benefit?

Is the Secretary of State aware that there can be no justification for claiming that SERPS cannot be afforded in the next century, when the Government's own Social Security Advisory Committee said explicitly less than two years ago:

"At this distance of time we do not think there can be solid grounds for altering the scheme now for fear of all the worst outcomes occurring steadily for 40 years."

Is the Secretary of State aware that any allegations that SERPS cannot be afforded reflect not adverse demographic trends but an admission that the Government's policies will lead to longer-term economic stagnation?

Secondly, is the Secretary of State aware that the huge cuts in the housing benefit package will bring a loss to tenants of about £750 million a year, forcing up rents for tens of thousands by £7 to £12 a week? Is he aware that the poverty trap will be enormously intensified by his decision to increase the loss of housing benefit as wages rise from 38p in the pound to 70p in the pound? Is it not harshly unjust that the 7 million people receiving housing benefit, of whom 4 million are pensioners, will for the first time have to pay 20 per cent. of their rates and all of their water rates? Is he aware that nearly 2 million households now receiving housing benefit, of which the great majority are owner-occupier pensioners, especially widows with small occupational pensions, will lose it altogether?

Thirdly, this statement virtually makes the unemployed into the outcasts of society—the new undeserving poor in the Prime Minister's vision of this new Victorian poor law. Not content with clawing back £650 million a year from the unemployed by taxing unemployment benefit for the first time over the past three years, and not content with ending, three years ago, the earnings-related supplement to unemployment benefit, worth £16 a week to an average paid worker, the Government are now proposing to force the unemployed on to the lowest rate of the new income support scheme. Is the Secretary of State aware that that will take about £5 a week from those who are 25 or younger, will deprive them of all help with heating bills and of single payments for clothing and furniture, will force them, for the first time, to pay 20 per cent. of their rates and all of their water rates, and will replace the present basic benefit safety net by a discretionary and recoverable loan? The Government have trebled unemployment. With these cuts, they are now gratuitously twisting the knife in their victims.

Fourthly, families across the nation will be hit. Will the Secretary of State confirm that child benefit will be frozen or uprated by less than inflation, so that the benefit for 7 million mothers and 12 million children will begin to decline in real value? Will he confirm, too, that the new, vaunted family credit will begin to be phased out when earnings exceed £40 a week, which is lower than for the family income supplement, and that the rate of withdrawal will be 60p in the pound, which is higher than the 50p in the pound under FIS, so that the poverty trap will be worsened? Will he also confirm that benefit will be transferred from the woman to the man, which is not publicly supported, and that entitlement to free school meals and school milk will be ended? The Prime Minister has not only become the pensions snatcher — she remains the milk snatcher that she always was. Changes such as this will not strengthen family life, but will undermine it.

Fifthly, will the Secretary of State confirm that the death grant will be abolished and that the discretionary help will be available to the deceased's relatives only on the basis of a means test? Is he aware that this means bringing back for hundreds of thousands of our poor elderly the shame and indignity of a pauper's funeral, which no civilised society should inflict on its citizens?

This is a black day for the people of Britain — a monument to six harsh years of Thatcherite rule. The themes of this statement are more means testing, bigger cuts, penalising pensioners, the unemployed and low-paid in order to enrich still further the already rich, and the privatisation of the welfare state on the American model, which the people of this country want no more than they want the Prime Minister's fancy for the Americanising of our hospital management. There is no shred of political mandate for the proposals, since they derive from partisan

committees hand-picked by a partisan Government for predetermined ends. Today's statement opens up the central issue which will dominate the next general election and, because the Government have profoundly misunderstood the commitment of the British people to the welfare state, it will pave the way for the election of the next Labour Government.

Mr. Fowler: Not on anything that we have heard from the hon. Gentleman today will it pave the way for the election of any Labour Government. We have had from the hon. Gentleman a typically hysterical response. He cannot even get his shadow Cabinet to back his own proposals, and it was clear from the response of his Back Benchers that he could get very few of them to back what he was saying.

However, I am grateful for what I took to be the endorsement of my proposals on the state earnings-related pension scheme for the rest of this century. I am grateful to the hon. Gentleman for the generous way in which he endorsed them.

The hon. Gentleman asked about the overall cost of pensions. The 1975 Act was based on the assumptions, which the then Labour Government were making, of 3 per cent. growth and 2·5 per cent. unemployment and, above all, that there would not be an appreciable increase in the number of pensioners. It is now clear that between 2010 and 2035 we shall see an increase of about 3 million in the number of pensioners, and that over the period to 2035 there will be an increase of about 4 million pensioners. In 1975 the Labour Government did not have that information, or, if they had it, they ignored it. The question before the House is whether to ignore the best advice and the best estimates that can be made today of the emerging costs of pensions.

As for the case for change, it is clear that the cost of the state earnings-related pension will increase very substantially.

In terms of income support, the new system gives a guaranteed weekly income, with higher rates for disabled people, pensioners and children. The hon. Gentleman is wrong about families, because, in addition, there will be a family premium, which families with children do not get at the moment.

At present, one in three households receives housing benefit—7·5 million households altogether. Costs have risen from £1·2 billion in 1979 to £4·2 billion today. I have made it clear, and I do so again, that we shall be looking to housing benefits to make significant reductions in the social security budget.

The hon. Gentleman asked about the social fund. I am sure that in his calmer moments he will agree that the present system of supplementary benefit is not serving well those who need special help and special care. One of the ways in which I hope that the social fund will be able to develop is to give special grants to people coming from institutions into the community, but also to pay to keep people at home and to support them, rather than their going into institutions.

The hon. Gentleman's comments on the death grant were a total travesty of our proposals. The death grant was last increased in 1967. It has remained at £30 since then. Surely no one will claim that that is adequate. The choice that has to be made is whether the country is prepared to go on with a token gesture of that kind or whether it makes more sense to give help directly to those who need it—to give full help and better help. That is what the Government want to do.

Mrs. Jill Knight (Birmingham, Edgbaston): Bearing in mind that this is the most far-reaching and fundamental statement on social security benefits for many years and that its soundness and sense will be apparent to everyone once it is properly explained, will my right hon. Friend assure the House that he will make a similar statement to every sector of the media which makes itself available and even consider the production of leaflets for the separate groups of people involved? Will my right hon. Friend also shoot down the myth put forward once again by the hon. and boringly predictable Member for Oldham, West (Mr. Meacher) that means tests should not be employed, because unless we employ means tests we cannot be sure that the maximum benefit will go to where the maximum need exists?

Mr. Fowler: We are not means testing, but seeking to test incomes. In addition, we are making help available to people on the basis of their income, and not according to whether they are in or out of work. That is a very significant change in approach. It means that the 100 per cent. marginal tax rates, which at the moment are a scandal, can come to an end. That is one of the most significant changes in the review.

Mr. Michael Foot (Blaenau Gwent)): In view of the far-reaching nature of the proposals, and in view also of the cuts and additional means tests which they impose on some of our poorest people, will the right hon. Gentleman say, first, when the proposals were forecast and explained by the Prime Minister at the time of the last general election, and, secondly, exactly what is the saving on the social security budget which he aims to secure by these measures?

Mr. Fowler: When the inquiry into social security was set up we made it absolutely clear that the Government intended to have a fundamental review of the social security system. That has been the position throughout.

The right hon. Gentleman asks about the savings. The emphasis in the Green Paper is on the new structure. Until that is settled it is impossible to provide a detailed analysis, because clearly it depends on the benefit rates set in April 1987. However, the main direction of savings is clear. The major savings will be the long-term savings in the next century resulting from the phasing out of the state earnings-related pension scheme.

Changes in supplementary benefit structure are not intended to reduce the overall help provided. As a result of the structural changes in supplementary benefit, we shall ensure that as far as possible there are no cash losers. Support for low-income families will be increased by family credit. The Green Paper makes it clear that we expect spending on housing benefit to be reduced considerably. This will not be at once. We expect spending to be reduced eventually by about £500 million.

Several Hon. Members *rose*——

Mr. Speaker: Order. I know that this is a statement of great interest to the House, but I have to bear in mind that there is another statement to follow it and that we are to have further debates in what will be a long day. The Secretary of State said that there would be a debate on this matter later. I shall allow questions to go on until 25

[Mr. Speaker]

minutes past five before we move to the next statement. If those who are called put short questions to the Secretary of State, I hope that I shall be able to include most hon. Members who are seeking to catch my eye.

Mr. David Howell (Guildford): Does my right hon. Friend agree that his proposals are skilfully targeted at the changing and future shape of society and that he should ignore the ridiculous cries from the past from the Opposition? Does he further agree that, whether we like it or not, there is an increasing trend towards part-time work, which inevitably means part-time incomes, and that his proposals, by concentrating on improved social provision as part of income for the low-paid, is in line with that trend and reinforces those who are most dispossessed by the trend towards part-time work? Does he agree that the change will make a major contribution to the expansion of occupation and employment?

Mr. Fowler: I am most grateful to my right hon. Friend. He is right. Family credit will bring direct help to low-paid families with children. It will prove a substantial base on which to build even further.

Mr. Archy Kirkwood (Roxburgh and Berwickshire): Does the Secretary of State agree that it is difficult to form a detailed judgment without the figures? My colleagues and I cannot support his proposals on pensions, because they do not tackle the present problems. The pension is too low, and we would not countenance any change unless there was some recognition of that. As for supplementary benefit, we are worried that we are drifting away from the Beveridge system, which applies to all, to a service exclusively for the poor. That would be wholly wrong. We are worried that if the Green Paper is fully implemented it will fracture the all-party consensus. We must consider the detail before making final decisions.

Mr. Fowler: I accept that my documents are long and detailed, and also what the hon. Gentleman says about his party's view. Lord Banks, the Liberal spokesman on social security in the other place, has said that the Liberal party consistently opposed the introduction of an earnings-related state pension scheme. It is not clear from what the hon. Gentleman said whether that remains Liberal policy.

Sir David Price (Eastleigh): In view of my right hon. Friend's declared intention to modernise our social security system and to make it more responsive to changing social needs, will he introduce flexibility of retirement age and equality between men and women in eligibility? He will recall that that was proposed by the Select Committee and by me in a private Member's Bill in the previous Session of Parliament.

Mr. Fowler: My hon. Friend will find that in the Green Paper we deal with flexibility in retirement. I do not pretend that there are easy answers to that matter, but, like him, I should like there to be more flexibility. We invite comments on what we have set out in the Green Paper as a decade of retirement.

Mr. Frank Field (Birkenhead): As the Secretary of State has boasted that the four reviews will result in nothing less than a new Beveridge, will he give two pieces of information so that we can see to what extent the reviews live up to that self-imposed objective? If the Government enact all of these proposals, how many people will cease to be poor? Secondly, as the hon. Gentleman acted as co-ordinator for all four reviews, can he say how many people will gain and how many people will lose? Will he give a commitment that those who bear unemployment will not have their benefits cut further?

Mr. Fowler: For various reasons, I cannot give the figures for which the hon. Gentleman asks. As I explained to the right hon. Member for Blaenau Gwent (Mr. Foot), no detailed analysis of cost can be made until benefit rates have been set in April 1987. [HON. MEMBERS: "How much will it cost?"] My answer is entirely frank and reasonable.

As for help to the poor, family credit and other proposals in the review will reduce poverty. The social security system must be capable of coping with changes in the pattern of poverty. We have proposed family credit because we have considered the pattern of poverty in detail and it is clear that, in the past 15 years, families with children have been most in need.

Mr. Robert McCrindle (Brentwood and Ongar): Will my right hon. Friend accept from one who has expressed reservations that there is a great deal to commend in these proposals and much that is long overdue? Will he confirm that those who are most likely to be affected by changes in housing benefit include widows and occupational pensioners? Is my right hon. Friend open to some suggestions on that matter, because the changes in housing benefit seem to lie strangely with his commendation of occupational pension schemes? My right hon. Friend said that on the phasing out of the state earnings-related pension people would have a right to opt for a private pension scheme. What happens if people choose not to exercise that right and reach retirement age with nothing but the basic pension?

Mr. Fowler: I am grateful for my hon. Friend's comments about the review. I hope that the Green Paper will go some way to meet the issues that he has in mind. Housing benefit goes further up the income scale than any other benefit. On that basis, it is more reasonable to look for economies there, bearing in mind the scale of the increase in expenditure on housing benefit in the past six years. There will be minimum requirements for individual pensions. Employees and employers will be required to make provision. There is no question of people in work reaching pension age without having an additional occupational, personal or industry-wide pension.

Mr. Jack Ashley (Stoke-on-Trent, South): Is the right hon. Gentleman aware that the Government are making social security a scapegoat for the failure of their economic policies and that, instead of caring more for the growing number of casualties of their incompetence, they are planning to care less? That means that the Government are incompetent and insensitive to the poverty, degradation and suffering caused by the unemployment that they have created.

Mr. Fowler: I do not accept that for one moment. We all respect the right hon. Gentleman's knowledge and experience in these matters, and I hope to dissuade him from that view. Few people in the country or the House believe that the present social security system is capable of continuing without major change. This is the first Government to tackle that problem for 40 years. The Government and the country have a responsibility to

change the social security system to provide a modern system which can be sustained by present contributors and our children.

Mr. Andrew Bowden (Brighton, Kemptown): I am delighted to support much in my right hon. Friend's statement, but will he confirm that the Green Paper is not a White Paper in disguise and that no decisions have been made? How will the income support system affect pensioners who do not claim a supplementary pension? As to housing benefit, may I stress the grave anxiety for pensioners, the value of whose savings has been destroyed and whose financial circumstances have been undermined by their not having inflation-proof pensions? They must not be worse off as a result of these proposals.

Mr. Fowler: This is a Green Paper. The purpose of the review has been to consult the public. We shall continue to consult the public and to listen to issues that are raised with us. The simplicity of the income support scheme will bring immeasurable benefit to all. I remind my hon. Friend of what we are doing to preserve the interests of people approaching pension age. Nobody who retires this century will be affected by the changes in the state earnings-related scheme. It goes without saying that rights which have accrued and which are in payment will be honoured fully. That includes inflation-proofing.

Mr. Gordon Brown (Dunfermline, East): Will the Secretary of State confirm that today he has praised the Beveridge report only to bury it, and that he is ratting on promises made not only about the state earnings-related pension scheme but about child benefit and help for the unemployed? Will he confirm that under these new poor laws 7 million people will receive less in housing benefit, and that 1·8 million people — 3,000 in every constituency—will lose help with rent and rates? Will the Secretary of State tell us by how much the basic pension and the supplementary pension will have to rise to compensate for the loss of heating, dietary and clothing additions and the death grant, and for his demand that the poor should pay 20 per cent. of the rates? Why is it that the poorest, the weakest and the most frail in our community have to pay the price for his Government's economic failure?

Mr. Fowler: That is not the case, and the hon. Gentleman is too intelligent to believe that it is. I have made it clear that there will be reductions in housing benefit, but I have to point out to the hon. Gentleman a fact which he probably knows well enough in any event —that housing benefit expenditure has increased from £1·2 billion in 1979 to £4·2 billion in 1985-86.

The hon. Gentleman also knows that housing benefit expenditure goes further up the income scale than any other benefit. We are spending £40 billion a year on social security. Furthermore, spending on social security by this Government has increased by about 30 per cent. The majority of that increase is spent not on unemployment benefit but on making improvements in real benefits. It helps absolutely nobody to believe that expenditure of this kind can continue in a totally uncontrolled manner. I believe that our proposals are fair to the public and will help to bring about the recovery of the economy that we all want.

Mr. Roy Galley (Halifax): My right hon. Friend will be aware of the wide welcome that there will be for the better targeting of benefits, for the concentration of help on families in need and for basing benefit on take-home pay and reducing the poverty and unemployment traps. Does my right hon. Friend agree that one aspect of the poverty trap has been the way in which supplementary benefit has been the gateway to a plethora of other benefits? Will he elaborate upon how far these various additions will be consolidated into the income support system and upon how free school meals will be related to the family credit system?

Mr. Fowler: As a general aim, the Government are trying to make benefits available equally on the basis of income. In other words, rather than having the distinctions that exist now between those on supplementary benefit and those in work—as my hon. Friend points out, having passports which take one to particular benefits — we shall make the same benefits available on the basis of equality of income, whether people are in work or out of work. I should make it clear that we intend to include some of the extra benefits in family credits and to pay those benefits in cash rather than in kind.

Mr. Donald Stewart (Western Isles): Is the Secretary of State aware that the United Kingdom is lagging behind a number of other European countries in providing this type of benefit and that these proposals will push us further down the league? Is he also aware that some of the poorest people in our society will experience the rigours of the Victorian workhouse? As maternity and death grants will be means tested and paid for out of a so-called discretionary fund, does the Secretary of State not realise that people will be means tested literally from the cradle to the grave?

Mr. Fowler: There is a profound misunderstanding of the Government's proposals. They are based upon a test of net income. If one believes in trying to target help on those who need it most, it is impossible to devise any other way to bring that about. Therefore, I ask the right hon. Gentleman to study with greater care the proposals in the Green Paper. As for the social fund, I do not think that anybody would defend the present position under which additional payments are made. It does not work. It has not worked for some time. The social fund will enable us to provide a more sensitive and better targeted way of providing help for those in need.

Dr. Brian Mawhinney (Peterborough): Does my right hon. Friend accept that his concentration of help on families with children and the testing of incomes is very welcome and will be widely supported in the country? Can he confirm that the contributions to SERPS of those who will not be retiring this century will, nevertheless, be inflation-proofed against price rises, to cover the time when they will receive the benefit of the contributions that they have made?

Mr. Fowler: The position of any man over the age of 50 and of any woman over the age of 45 is preserved. The accrued rights of people generally are also preserved in the same way.

Mr. Derek Foster (Bishop Auckland): Is it not outrageous that the Secretary of State should come to the House this afternoon and claim to be proposing a new Beveridge and yet be quite unable or unwilling to tell us how many will gain and how many will lose under these proposals? Out of the many thousands of poor people who

[Mr. Derek Foster]

will lose under these proposals, will the right hon. Gentleman tell us how many pensioners with small occupational pensions will have their heating and dietary additions removed?

Mr. Fowler: I dealt with that question in some detail when I answered the right hon. Member for Blaenau Gwent (Mr. Foot). The purpose of the social security review is to put forward a new structure and to seek the views of the House and the public on that structure. It is impossible to provide a detailed analysis of the cost until the benefit rates have been set. I have been entirely frank in saying that we expect there to be significant savings in housing benefit. I gave that figure to the right hon. Gentleman.

Mrs. Edwina Currie (Derbyshire, South): Given the huge size of the social security budget—£40 billion a year—and given also the growth of that budget, its complexity and the muddle and confusion which appear to be rife within it, does my right hon. Friend agree that it would be a thoroughly irresponsible Government who did not undertake these long overdue reforms? Does he accept that we shall all benefit—taxpayers, recipients and particularly the less well-off—and that the people of this country will have cause to give thanks to my right hon. Friend, particularly after several upratings in 1987?

Mr. Fowler: There is no question but that a re-examination of the social security system was long overdue. There is also no question but that the majority of the public share that view. I believe that many Opposition Members secretly share that view, too. This Government have had the courage to undertake that review. The hon. Member for Derby, South (Mrs. Beckett) laughs, but the only thing that the last Labour Government did was to ask a team of officials to look at the supplementary benefit scheme. That is not the way to reform social security, and that is not the way in which this Government propose to reform it.

Mr. D. N. Campbell-Savours (Workington): Is it not clear that the Secretary of State is refusing to give these figures for singularly party political advantage? Has he forgotten what was contained in the Conservative party's manifesto at the last general election? The Conservative party gave a solemn undertaking to the British people that it would protect pensions and other linked long-term benefits against rising prices. Has not that solemn undertaking been broken today? Is it not clear that the Government do not have a mandate for pursuing this policy? Their only reason for pursuing it is that they cannot make their economic strategy work. They cannot make the nation pay the bill. They have failed.

Mr. Fowler: The hon. Gentleman has not understood a single word of what has been said today. We stand entirely by the words to which he referred. We have kept pensions up with prices, and we have also tackled inflation. Under the Labour Government inflation increased by 110 per cent., which was a cruel blow to pensioners.

Sir Brandon Rhys Williams (Kensington): Will my right hon. Friend accept my warmest congratulations on his decision that occupational pensions should be based on real funding, and on his courage in slaying the Hydra of the state earnings-related scheme, which is not even an honest system of repartition? With regard to benefits that will still be based on a redistribution of the national income, would it not have been more logical and practical to integrate the income tax wholly with the contributory system, so that the residual welfare state, which is still concealed inside the income tax system, could be integrated into a logical new system of benefits?

Mr. Fowler: I have much sympathy with what my hon. Friend says, but we are still some distance from that position. First, we must computerise the DHSS system. We are taking several steps in a direction which my hon. Friend would support. The alignment of the tax and benefit years is a major improvement. Family credit will prove a natural system for bringing together social security and tax affairs, and computerisation will undoubtedly help. Some of the further points put forward by my hon. Friend can be examined in the Green Paper which my right hon. Friend the Chancellor of the Exchequer will introduce later this year.

Mr. Robert N. Wareing (Liverpool, West Derby): Is the Secretary of State aware that his statement is a kick in the teeth for all disabled people, especially for the non-industrial disabled, who do not receive disablement benefit? They depend for 20 per cent. of their incomes on the additional allowances, such as the heating allowance, which, at a stroke, he is abolishing. Have the Government considered compulsory euthanasia as a way of solving their monetary problems? It seems to me and to millions of disabled people that they are being sacrificed on the altar of Conservative monetarism.

Mr. Fowler: That is a very silly intervention. The hon. Gentleman must understand—if he does not, he had better read the document—that the income support scheme will include a special premium for the disabled. I advise the hon. Gentleman to look at that.

Dr. John G. Blackburn (Dudley, West): As someone who represents 70,000 pensioners, may I ask my right hon. Friend to accept that they will welcome his proposal for a review of the housing benefit scheme, which will be to their advantage? Does he further accept that the widow's grant of £1,000 will be widely welcomed? Will he, as he said earlier, accept further representations?

Mr. Fowler: Yes, indeed. On any of the proposals made in the Green Paper, the Government will wish to hear representations from interested organisations outside the House and from hon. Members. The widows' arrangements are more flexible and better targeted than the present ones, but I am open to suggestions on how to improve them.

Mr. Hugh Brown (Glasgow, Provan): Does the right hon. Gentleman accept that almost everyone in the House accepts the need for some reform—*[Interruption.]* I shall put my question in my own way. From so many proposals, there must be one or two that can be accepted by us all. Is not the real indictment that the Government seem to be incapable of creating a society without 4 million unemployed? In those circumstances, there is no possibility of obtaining a consensus on the broad approach to social reform. Will the right hon. Gentleman confirm that the poorest section of the community—those in

receipt of supplementary benefit — will not be cash losers? He used the phrase. Can he explain what he means by it?

Mr. Fowler: Exactly what I said. We shall ensure that the structural changes will not result in cash losses by those who are now in receipt of supplementary benefit. I accept the hon. Gentleman's more general point. The aim is not to increase and improve social security benefits. The aim is to reach a position whereby we can reduce unemployment and dependence on those benefits.

Mr. Roger Freeman (Kettering): Is my right hon. Friend aware that his proposals on SERPS will be widely welcomed because they are founded on common sense? Will he confirm that the required mandatory contribution for additional pension provisions, which is set at 4 per cent.—half of which will be paid by the employer—is only one third of the contribution rate normally applicable in occupational pension schemes and, therefore, should be financially acceptable and is basically sensible?

Mr. Fowler: Yes, I can confirm that. I can also confirm—I know that my hon. Friend has expressed anxiety about this — that the contribution will be available for personal pensions as well as for occupational pensions or for membership of industry-wide schemes.

Several Hon. Members *rose*——

Mr. Speaker: Order. I shall take two more questions from each side, and in the debate that is to follow I shall give preference to those hon. Members who have not been called today.

Mr. Charles Kennedy (Ross, Cromarty and Skye): On the question of alleviating family poverty, will the Secretary of State explain why, under the proposed family credit plan, payments will go direct to the pay packet? Given that that represents a major redistribution of wealth in the family away from mothers, would it not be better to adapt that proposal before the White Paper is published so that mothers can claim it if they wish? As to the income support scheme, is not the most glaring omission the fact that the right hon. Gentleman has firmly set his face against an extension of the rate to the long-term unemployed, who are the new poor under the Government's policies?

Mr. Fowler: The hon. Gentleman must remember that we are adding a family premium to the income support scheme. The family premium and children's rates will be added to the standard rate, which will provide help where it is needed—among low-income families with children. As to the argument about the purse to the wallet, it is more sensible to make family credit part of the total income from work. That will improve the present poor take-up of family income supplement, which has caused us anxiety for a long time. Although initially it will be assessed by the DHSS, there is no reason why it should not go into the pay-as-you-earn system, which is something that the hon. Gentleman might welcome.

Mrs. Elaine Kellett-Bowman (Lancaster): I warmly welcome my right hon. Friend's efforts to rebuild personal incentive, and especially his help to families with children, who are by far and away the largest proportion of people with below accepted nutritional standards. The new family credit scheme will help to equate those who work with those who do not, and the £1,000 grant to widows at a difficult time in their lives will be welcomed. May I also congratulate him on his efforts to co-ordinate the tax and benefits systems, which was recommended to the Chancellor of the Exchequer by the Select Committee on tax credits 13 years ago?

Mr. Fowler: I am grateful for my hon. Friend's generous welcome for the proposals. One area that caused those who conducted the review most anxiety was that of low-income families with children. That is what the proposals try to tackle, and I believe that family credit will make a great contribution.

Mr. Andrew Faulds (Warley, East): Should not this supposed Green Paper be simply titled "Dismantling the Welfare State"? As the right hon. Gentleman claims that he cannot give figures — that has been a persistent theme of his responses today — will he publish an assessment, based on demographic developments and Treasury forecasts, of a range of likely benefit payments in the April 1987 Budget, so that the people of this country can judge for themselves the damaging implications of this developement before the next general election?

Mr. Fowler: There will be no difficulty in finding out the implications of the proposals before the next general election. In the Green Paper we have tried to set out the structural reforms and changes that we are making. That is an entirely proper and right course to take in a Green Paper. A White Paper and a Bill will follow and go into even more detail.

Mr. J. F. Pawsey (Rugby and Kenilworth): As my right hon. Friend's Department is responsible for 43 per cent. of all Government spending, will he confirm that help will continue to be concentrated on those who are most in need and that his proposals will result in a more efficient service, which, in turn, will mean that resources are used more adequately and efficiently?

Mr. Fowler: I very much hope that we shall be able to achieve the last part of what my hon. Friend has set out. There is no doubt that we need a modern system of social security which provides a better service. The present system does not achieve that, and I believe that it is common ground on both sides of the House that we should move towards that goal.

Mr. Meacher: Is the Secretary of State aware that he was wrong when he said that the majority of increased spending on social security since 1979 has been devoted to improve benefits?

Will the right hon. Gentleman give the House an assurance that, given the magnitude of this exercise, we will have not merely a one-day debate, but a two-day debate, so that we may explore fully the implications of his statement?

On the funding of SERPS, does the Secretary of State recall that in 1954 the Phillips committee said that the pension could not be afforded over the next 30 years? If we had listened to that committee, the pension would be about £15 a week today and retirement ages would be 63 and 68. Does that not show the folly of making drastic decisions now about unknowable circumstances 50 years on?

Are we seriously expected to believe that the Government are launching this massive exercise without being able to estimate any costs until the benefit rates are

[Mr. Meacher]

fixed in 1987? Is that not utterly irresponsible, or is it that this Treasury-dominated cuts exercise still has a long way to run and that, given pressure from the Treasury, the overall cuts may turn out to be £2 billion or more?

Mr. Fowler: The hon. Gentleman is getting carried away again. I have already given the figure and, like everyone else, the hon. Gentleman listened to it. Since 1979 the majority of increased spending has gone on extra benefits and beneficiaries.

Mr. Meacher: Ah!

Mr. Fowler: I should point out to the hon. Gentleman — just in case he should have other ideas — that additional beneficiaries have to be paid for.

I cannot commit my right hon. Friend the Leader of the House to a two-day debate. Certainly, we are committed to a debate. The hon. Gentleman made the classic dud point about the Phillips committee. I ask him to go back to the committee. The one figure that it was able to predict with almost total accuracy was the future number of pensioners. That is the great difference between the situation in 1975 and the situation now. On the best predictions that can be made, we shall need policies for dealing with between 3 million and 4 million more pensioners in the first half of the next century. That is the best estimate, and I advise the hon. Gentleman to accept it.

Sri Lankan Tamils

5.34 pm

The Secretary of State for the Home Department (Mr. Leon Brittan): With permission, Mr. Speaker, I wish to make a statement.

On 20 May, in reply to a question from my hon. Friend the Member for Lewisham, West (Mr. Maples), I announced my future policy towards Sri Lankan Tamils who expressed a fear of return to Sri Lanka. In the week following that statement, more than 500 Tamils arrived here seeking asylum. I decided that further measures were necessary to reduce the influx and, after consultation with my right hon. and learned Friend the Secretary of State for Foreign and Commonwealth Affairs, I announced on 29 May the imposition of a visa requirement for Sri Lankan citizens, to come into effect the following day. The need for such a measure was demonstrated by the fact that 244 Tamils arrived on 29 May. A further 76 Tamils arrived shortly after the visas requirement came into effect, but there have been no further arrivals over the weekend or so far today.

The imposition of a visa requirement will not prevent the entry of those Sri Lankan citizens who qualify for admission in the normal way—for example, as visitors or students — although they will, of course, have to obtain visas before travelling. It will save the cost and disappointment of wasted journeys for those who would not be allowed to enter because they do not qualify under the immigration rules. If a Tamil not qualifying under the rules and seeking in present circumstances to leave Sri Lanka wishes to come to this country, he will be able to apply for a visa. Such applications will, however, be granted only if the individual can show that he is suffering severe hardship and the circumstances — including, for example, family links with this country — warrant the exercise of discretion in his favour outside the normal immigration rules.

The position of all the Tamils who have recently arrived will continue to be considered individually on the basis set out on 20 May. Where an application for asylum is refused, there will be an opportunity for the United Kingdom Immigrants Advisory Service of the United Nations High Commissioner for Refugees to consider the case and representations from Members of Parliament will continue to be considered.

It was only with great reluctance that I decided that it was necessary to impose a visa requirement on a fellow Commonwealth country. The need for it will be kept under review and I hope that it can be lifted in due course.

Mr. Alfred Dubs (Battersea): Is the Home Secretary aware that his statement represents a major departure from two important traditions? For the first time, Commonwealth citizens — albeit from only one Commonwealth country at the moment—will require a visa to enter this country. Secondly, the British tradition of offering haven and hospitality to those seeking asylum has been breached.

Does the Home Secretary agree that some Tamils who came here were very much in fear for their safety in Sri Lanka and that that was the motive which prompted them to seek asylum in this country, as it prompted many of their fellow countrymen to seek asylum in Germany and other countries in Europe? Is the Home Secretary aware

that we are asking that the tradition of granting temporary admission for those in fear for their safety which has operated for many years should be continued?

How long will those applying for a visa in Sri Lanka have to wait before it is granted? Have those who are fearful for their safety any chance of being granted a visa to come to this country and seek temporary admission while their claims for asylum are being considered? How many Tamils arrived in this country seeking asylum in May?

My final point was not mentioned by the Home Secretary: What is the reason for the diminution of the rights of hon. Members to make representations on behalf of our constituents or relatives of our constituents? Why has the tradition of making such representations been whittled away to a 24-hour period? Will the Home Secretary explain the reasons for that and tell us how the system is to work? In fact, will he drop that provision?

Mr. Brittan: With regard to the alleged major departures, the hon. Gentleman is right to say that up to now visas have not been required for Commonwealth citizens coming to this country. I regret the fact that it should be necessary to impose such a requirement for the first time. However, other Commonwealth countries, such as Australia, Bangladesh, Nigeria and India, require British citizens to have visas. It is also the case that most Western European countries require persons from Sri Lanka to have visas.

With regard to a breach of our tradition of haven and hospitality, I cannot accept that the position is for a moment as the hon. Gentleman said. It seems to me to be far more sensible that the question whether someone is likely to suffer severe hardship should be considered in Sri Lanka itself by appropriate representatives of the British Government than that people should simply come to this country, having nowhere to go to, and have to be dealt with at Heathrow or Gatwick. There is nothing in the slightest bit more humane than a policy that allows people to come in, provided that there is machinery for considering whether they would suffer severe hardship and whether this country is the appropriate place for them to go. Let us not forget that large numbers have gone to India and not been refused admission.

With regard to coming here to seek temporary admission, that is inconsistent with the changes that I announced on 20 and 29 May. For the reasons that I gave just now, it is preferable for the question whether someone is suffering the sort of severe hardship that would lead to them being admitted to the United Kingdom to be considered in Sri Lanka itself. The number of officials dealing with the matter is being strengthened—two have gone out, two more are being transferred by the Foreign Office and another two are going there on 1 July. I cannot say how long it will take to consider applications.

I can give the numbers coming to Britain during the month of May. From 1 May to 15 May, approximately 240 arrived. From 16 May up to and including 20 May, when I made the previous statement, 218 came. But between 21 May and 27 May, a total of 532 came; 26 came on Tuesday 28 May; and on the day that I made the announcement about visa requirements, 244 came. Therefore, the number was accelerating. Of that there is no question.

Referring to the rights of Members of Parliament, the hon. Gentleman has, I am sure unwittingly, misrepresented the situation. There was never any question of these cases being considered within 24 hours. I made that clear in my statement. I said that in the process of proper consideration, which of course will be given to people whether they are here or applying for a visa in Sri Lanka, it was reasonable, in the case of those who are here, to ask Members of Parliament to make their representations, which are only a part of the process, within 24 hours if at all possible.

A delegation of hon. Members came to see me about that matter, and I made it clear to them that if, in a particular case, there were special difficulties that made it impossible for them to make their representations as quickly as that, they should inform the Home Office and we would consider a short extension of the time during which the representations could be made. However, I believe that it is reasonable, in the interests of the Tamils as much as anything else, that the representations should be made quickly, and that it should not simply be possible for Members of Parliament to take an indefinite period of time to make representations, particularly when, as I have made clear, the machinery for considering all the points in an individual case, whether put forward by the individual, UKIAS or the United Nations High Commissioner for Refugees, was fully in place.

Mr. Roger Sims (Chislehurst): Is my right hon. and learned Friend aware that, when I had the opportunity of visiting Sri Lanka earlier this year, I formed the view that the Tamils in the north of the country lived in fear of their lives because of the possible over-reaction by the army to Tamil terrorist incidents, such as the recent one at Anuradhapura, where a number of Sinhalese were not only in fear of their lives but were killed? Elsewhere in Sri Lanka, where the Tamils are in a minority, they are nevertheless active and involved members of the community, but some of them naturally fear the possibilities of a backlash against them, with rioting and bloodshed such as has occurred in the past.

However, does my right hon. and learned Friend also accept that we are talking of a population of about 3 million people, and it is unrealistic to expect this country to open its doors to a number of people approaching that figure who believe that they are in fear of their lives? This is a serious and worrying internal problem. It may well be one that other people will have to help the Sri Lankan authorities to solve. It will not be solved by us opening our doors to anything up to 3 million Tamils.

Mr. Brittan: I am grateful to my hon. Friend for his analysis of the situation. I had the benefit of talking to him about it shortly after he returned from Sri Lanka. He is right; I do not in any way underestimate the gravity of the problem. It is complex and must have a political solution. I welcome the fact that there have been recent discussions, as the House will be aware, between President Jayawardene and Mr. Rajiv Gandhi. I hope that such contacts can lead to a solution of the problem.

There has been disorder in Sri Lanka. As my hon. Friend said, the position will vary from one part of the country to another. But it is not the case that we have a situation that is in any way analogous to that of Amin's Uganda, for example, where the Government were seeking to persecute a particular minority, because, as the House will be aware, prominent members of the Tamil community hold extremely prominent positions in Sri Lanka. It is worth mentioning that the Minister of Home

[Mr. Brittan]

Affairs, the Minister of Rural Industrial Development, the Chief Justice and the governor of the Central Bank are all Tamils. Such a situation would have been inconceivable for Ugandan Asians during Amin's regime.

Mr. Michael Meadowcroft (Leeds, West): Is the Home Secretary aware that, whatever the cause of the internal problems in Sri Lanka, his view of the reality in that country is greatly different from that of the Tamils, who are outnumbered by about four to one by the Sinhalese, and who clearly need some help and sympathetic refuge? Why was there no mention in the right hon. and learned Gentleman's statement of talks with the Commonwealth? Is it not important for the Commonwealth to be involved corporately with this urgent problem, which involves two of its members? Will the right hon. and learned Gentleman support the moves for an early debate on the Floor of the House on the Liberal prayer against the changes in the immigration rules?

Mr. Brittan: I hardly think that the hon. Gentleman seriously expects me to give an answer to his final point. My right hon. Friend the Leader of the House will consider it. Of course, it is a general problem of an international nature. The most able and best placed countries to deal with it are, of course, Sri Lanka and India. However, if my right hon. and learned Friend the Foreign Secretary can assist in any way, of course he is ready to do so.

Mr. Terry Dicks (Hayes and Harlington): Does my right hon. and learned Friend accept that many of my constituents are concerned that any Tamils have been allowed into the country at all? Many people in my constituency and, I am sure, up and down the land feel that this country has done enough. Enough is enough. We have our own problems across the board, from unemployment to social services. When will the first Tamils be sent back, because the Government of Sri Lanka have clearly said that there is no threat to their existence in that country?

Mr. Brittan: Ten Tamils were returned not to Sri Lanka but to European countries and, I believe, in one case, to India, over the weekend. With regard to the others, the process outlined in my statement of 20 May and today's statement will be followed. Careful consideration will be given. However, my hon. Friend is right to draw attention to the fact that on 31 May President Jayawardene gave our high commissioner a formal personal assurance that no Tamils returned to Sri Lanka would be harassed or persecuted in any way. That is something that we shall certainly seek to build and rely on as the situation develops.

Mr. Dave Nellist (Coventry, South-East): Will not this disgraceful change in the appeals procedures and visa requirements result in many Tamil refugees in Britain being sent back to arbitrary arrest or even death? The Home Office says that only 1 per cent. of Tamil refugees in Britain are genuine refugees. Is the Home Secretary aware that Germany has accepted 95 per cent. of its 10,000 Tamil refugees as genuine? Does the right hon. and learned Gentleman realise that his remarks give credence to the crude racism coming from some of the gutter newspapers and Tory Back Benchers who talk of stemming a flood when 1,300 refugees spread equally across the country would mean that a city the size of Coventry could absorb eight more people out of a third of a million? Where is the flood there?

Are not the arrangements which have been announced today — which were made during a recess so that Parliament could not question them and which were announced in a written answer of 20 May — just the kick-back from this Government to repay the discussions that the Prime Minister had in April with President Jayawardene and in exchange for a new naval base for America and Britain in Sri Lanka and for influence in the Indian ocean?

Mr. Brittan: The hon. Gentleman's observations are extravagant and inaccurate. There has been no change whatsoever in the appeals procedures. The hon. Gentleman's reference to the statement that 1 per cent. of Tamil refugees are genuine shows that he has not distinguished between refugees under the convention and persons who might be subject to severe hardship and who would be considered outside the rules. There is a complete difference between the two. The German rules and appeal procedure are quite different. There is a clear distinction between the very small number of people who are counted as refugees and those who might qualify under the policy which I announced on 20 May and reaffirmed today.

Mr. Jeremy Hanley (Richmond and Barnes): The United Kingdom has an honourable record in giving refuge over the years to hundreds of thousands of people who have suffered from persecution in their own countries. Does my right hon. and learned Friend agree that we must continue to give that refuge and that it is vital for care to be taken in assessing those who are genuine refugees so as not to dilute the status of refugees, past, present and future? Will he assure the House that once a person has proved his status as a refugee, fleeing from a totalitarian regime, we shall still treat him with humanity and not as part of immigration control?

Mr. Brittan: I agree with everything that my hon. Friend has said. There is no question but that we will honour to the full in spirit and in letter our obligations under the convention relating to refugees. My hon. Friend is absolutely right in saying that no useful purpose is served by seeking to muddy the waters, as the hon. Member for Coventry, South-East (Mr. Nellist) does, and to confuse the position of genuine refugees and others for whom one may have a considerable degree of sympathy, but who are not necessarily refugees.

Mr. Max Madden (Bradford, West): Is it not shameful that a Home Secretary whose family sought refuge in this country has slammed the door in the face of those coming from a Commonwealth country who believed that their lives were in jeopardy? Will the right hon. and learned Gentleman give a clear assurance that no Tamils who have sought entry to Britain will be returned directly to Sri Lanka? Does not the right hon. and learned Gentleman understand that Tamils awaiting entry clearance in Colombo — for a month or even longer — face harassment, injury and possible death? Will he give a clear assurance that no Tamils will be returned until there has been a proper opportunity for full inquiries to be made? Does not the right hon. and learned Gentleman recognise that it is an insult to hon. Members and to parliamentary democracy for these shameful decisions to have been taken when the House was in recess?

Mr. Brittan: The hon. Gentleman's personal references are wholly inaccurate, but I do not think that he greatly worries about that. The initial statement of policy was made on 20 May in a written answer to the House. It was capable of being challenged in the normal way. The subsequent change was necessitated by escalating numbers of people who were arriving on our doorstep. I do not believe that there would be anything in the least humane in allowing that process to continue unimpeded. Today's statement was made at the earliest possible opportunity after the recess.

Sir John Page (Harrow, West): The calm and moderate Tamil community here realise that this country is in a difficult position over the possibility of a mass immigration of Tamils. They will understand that it was necessary for my right hon. and learned Friend to take some steps. Will regular visitors to this country — business men, politicians and others—who are Tamils, coming from countries other than Ceylon, have the opportunity to obtain a visa in a much shorter time than two months? I shall write to my right hon. and learned Friend about a particular case.

Mr. Brittan: I appreciate my hon. Friend's statement. I should like to take this opportunity to pay my tribute to the Tamil community in this country who, faced with a tremendously difficult situation, have been able in a very short period to look after a large number of people. It is not our intention to prevent people who would be eligible in the normal way from coming to this country. Obviously, within the context of the visa regime, we shall want to do everything that we can to ensure that that happens as quickly as possible.

Several Hon. Members *rose*——

Mr. Speaker: Order. An application under Standing Order No. 10 will be made immediately after this statement and, in fairness to Scottish Members who are concerned with the following business, I shall take two further questions from each side.

Mr. Jeremy Corbyn (Islington, North): Does the Home Secretary accept that his performance since 20 May on this issue has been one of disgraceful subterfuge of the House and Members of Parliament? Why, when a delegation of three hon. Members—my hon. Friends the Members for Newham, North-West (Mr. Banks) and for Coventry, South-East (Mr. Nellist) and myself — met him on 29 May, did he not tell us that he was planning to announce visa restrictions the following day? Will the right hon. and learned Gentleman confirm that last week the United Nations High Commissioner for Refugees, Mr. Hartling, had an extended meeting with representatives of most European countries and many others and discussed this and many other matters? The statements of that meeting which came from Mr. Hartling's office suggested that he was highly critical of the attitude taken by the British and Dutch Governments.

Should not the right hon. and learned Gentleman look once again at the reports that he received from Sri Lanka which suggested that improvements were taking place? There is no evidence whatever to support that idea. Indeed, all the evidence points to a deterioration and danger to the Tamil people because of the position in Sri Lanka. Is it not incompatible for the right hon. and learned Gentleman to make statements such as the one he made this afternoon while the British Government continue to supply arms and to train army officers in Sri Lanka, showing exactly on which side of the communal divide in Sri Lanka they have placed themselves?

Mr. Brittan: Neither the hon. Member for Islington, North (Mr. Corbyn) nor anyone else has said anything to suggest that there has been a subterfuge. The policy was announced first in a statement on 20 May, then in an announcement on 29 May, and today a statement has been made in the House. At least the hon. Member for Islington, North was good enough to state that the strictures of the United Nations High Commissioner for Refugees covered the Dutch Government as well. The fact is that virtually all the countries of western Europe have found it necessary to operate a visa regime. I therefore feel no need to apologise for taking action which was necessitated by circumstances that were not the making of Her Majesty's Government.

Mr. Bowen Wells (Hertford and Stortford): I congratulate my right hon. and learned Friend on his action to protect Britain from this type of immigration through the excuse that some Tamils are——

Mr. Nellist: Excuse!

Mr. Wells: It has been used as an excuse on a type of immigration which should not take place and which protects them through the visa requirements. I congratulate my right hon. and learned Friend also on jealously guarding our proud reputation of providing a political refuge for those who are genuinely in danger in their own country. Will he ensure that his requirements apply equally to Tamils and Sinhalese who apply to this country for entry? The Sinhalese are also under attack from the Tamil guerrillas in many parts of southern Sri Lanka and their lives are in danger. Has my right hon. and learned Friend made strong representations to the Indian Government to prevent further Tamil aggression and the supply of Tamil guerrillas from India? If preventive measures were implemented, they would put an end to this immigration and the need for Tamils to try to enter this country.

Mr. Brittan: I am grateful to my hon. Friend for what he said at the beginning of his remarks. I shall draw his latter remarks to the attention of my right hon. and learned Friend the Foreign Secretary.

As far as I am aware, there have not been any applications from Sinhalese, as opposed to Tamils, seeking refuge or asylum. If there are, I shall keep in mind my hon. Friend's points.

Mr. Sydney Bidwell (Ealing, Southall): Will the Home Secretary be more trenchant in rejecting the attitude expressed by the hon. Member for Hayes and Harlington (Mr. Dicks), who believes that this country can be insulated against its responsibilities for refugees out of line with other European countries that subscribe to refugee responsibilities?

Should we not be ultra careful in handling these matters on an individual basis? I have experience in these matters, and I ask the right hon. and learned Gentleman to consider one particular aspect. It appears to be mostly single young men, rather than families, who are seeking refugee status. They have many anxious relatives both in this country and in northern Sri Lanka, who are scared that they may become involved in terrorist activities in southern India or

[Mr. Sydney Bidwell]

elsewhere. They have combined their efforts to ensure that these young men came to Europe to escape that. Will the right hon. and learned Gentleman keep that in mind when deciding on individual cases? The majority of such young men are asking for refuge for only a limited period, not for all time.

Mr. Brittan: I recognise what the hon. Gentleman says and respect his great experience in these matters. However, I do not really think that someone subject to pressure to become involved in Tamil terrorism could regard that as a reason to come to Britain. It is possible to avoid being involved in Tamil terrorism, as evidenced by the many millions of Tamils wo have succeeded in doing just that and have not had to resort to coming to Britain.

Mr. John Stokes (Halesowen and Stourbridge): Is my right hon. and learned Friend aware that there has been a massive misrepresentation of his actions, especially in the press and on television? It has been suggested that many Members of Parliament have asked him to allow more Tamils into Britain. The truth is that the majority of hon. Members are against that, as are the large majority of people in the country. My right hon. and learned Friend has acted moderately and responsibly. Britain is no longer a colonial power, and the main responsibility lies with India. He should stick to his guns.

Mr. Brittan: I am most grateful for my hon. Friend's support.

Later——

Mr. Harry Greenway (Ealing, North): On a point of order, Mr. Speaker. I seek your guidance in relation to the very important statement on the Tamils. There are about 2,000 Tamils living in Ealing, which has within it the excellent weekend Tamils' school. Therefore, I represent a considerable number of them. It would be helpful, in advance of statements such as this, if hon. Members with particular concerns could notify you, Mr. Speaker, of their interest so that you would know of their anxiety to catch your eye.

Mr. Speaker: That was a good try by the hon. Gentleman. My feeling is that he does fairly well. It would be ideal if I could call every hon. Member who rose. I allow as good an opportunity as possible for hon. Members to put questions on statements. However, with the best will in the world, and in fairness to other hon. Members, it is not possible for me to call everyone who wishes to question a Minister.

Immigration (European Court Judgment)

6·4 pm

Mr. Gerald Kaufman (Manchester, Gorton): I beg to ask leave to move the Adjournment of the House, under Standing Order No. 10, for the purpose of discussing a specific and important matter that should have urgent consideration, namely,

"the urgent need to re-examine the cases of those husbands and male fiancés whose refusal of admission to Britain is placed in question by the decision of the European court."

The matter is specific because it relates to a judgment delivered in the European Court of Human Rights six days ago, during the recess. It is extraordinary that the Home Secretary has not come forward with a statement today, and that makes this application all the more necessary.

The matter is important because the European court has on two counts found that the British Government are in violation of the European Convention on Human Rights, and accordingly have been acting unlawfully for almost six years. First, the Government have been acting unlawfully because the applicants to the court have been victims of discrimination on the ground of sex, in violation of article 14 taken together with article 8. Secondly, there has been a violation of article 13 of the convention, which provides that everyone whose rights and freedoms as set forth in the convention are violated should have an effective remedy before the national authority, notwithstanding that the violation has been committed by persons acting in an official capacity.

The matter should have urgent consideration for two reasons. First, the law as embodied in the 1983 immigration rules — which continues and, indeed, exacerbates the sexual discrimination of which this Government have been found guilty—clearly must be changed speedily. It is essential that this House should be able to express a view on how that law should be changed before the Government reach an irrevocable conclusion. It is essential that the Government accept the spirit of the European court's judgment, rather than seek to avoid their responsibilities arising out of the judgment by changing for the worse the immigration status of wives and female fiancees. It is essential that the Government give an unambiguous commitment to abolish the sexually discriminatory primary purpose rule.

Secondly, the House must debate the matter urgently to safeguard the 3,350 husbands and male fiancés whose applications have been refused since November 1979, and who share with the menfolk of the successful applicants at Strasbourg the injustice that the Government have committed. In all justice, those men must have their rejected applications urgently considered afresh in the light of their legal rights as established by the Strasbourg judgment. After some of them have had their rights withheld for nearly six years, and thousands for a substantial, if lesser, period, it would be wrong if they and their female partners, who are suffering injustice with them, should have to apply afresh and wait a further long period for interviews and decisions.

It would be wholly unacceptable if those unjustly treated men were made to wait in suspense until the Government changed the rules — and did so in a restrictive manner which would extinguish the legal rights established by the European court's judgment.

Major principles of justice are involved. Within those principles, the individual rights of thousands of men, women and families are at stake. It is the right and the duty of this House of Commons to debate and consider how best properly to safeguard those rights before the Government act in the way that the Secretary of State acted, precipitately and without notice last week, and without the House being given an opportunity to debate the issue.

In the light of those considerations, Mr. Speaker, I request that you grant my application.

Mr. Speaker: The right hon. Member for Manchester, Gorton (Mr. Kaufman) asks leave to move the Adjournment of the House for the purpose of discussing a specific and important matter that he thinks should have urgent consideration, namely,

"the urgent need to re-examine the cases of those husbands and male fiancés whose refusal of admission to Britain since 1980 is placed in question by a decision of the European court."

The right hon. Gentleman and the House know that the decision that I have to take is whether to give this matter precedence over the business set down for today or tomorrow. I listened carefully to what the right hon. Gentleman said, but I regret that I do not consider the matter that he raised appropriate for discussion under Standing Order No. 10 and, therefore, I cannot submit his application to the House.

Mr. Kaufman: On a point of order, Mr. Speaker.

Mr. Speaker: Order. No point of order can arise on that matter.

Mr. Kaufman: It is a new point of order, Mr. Speaker. I am in no way seeking to challenge your decision, but wish to put a point to you. Prior to my application there was a statement by the Home Secretary on his decision relating to Tamils, which was not a voluntary statement, but arose from your decision to allow a private notice question, as advertised to the House on the Annunciators earlier today. Therefore, no confidences are involved. The Home Secretary never intended to make a statement. He did so only because you, in your wisdom and discretion, allowed a private notice question. Because of your decision, the House was able to question the Home Secretary.

The right hon. and learned Gentleman has not volunteered a statement on the matter that I raised in my application under Standing Order No. 10. There are thousands of people whose personal situations are at stake and who have no idea of where they stand. Can you advise the House on how we are to obtain some explanation from the Government on how they intend to proceed as a result of the Strasbourg judgment?

Mr. Speaker: Order. What the right hon. Gentleman said may or may not be true, but I do not control statements that are made by the Government. That is entirely a matter for them. I am sure that the Home Secretary listened to what the right hon. Member said. With regard to opportunities for discussing this important matter, it is not for me to advise the right hon. Gentleman on tactics, but I suggest that it would perhaps be a good topic for an Opposition day.

Orders of the Day

Rating (Revaluation Rebates) (Scotland) Bill

Order for Second Reading read.

Mr. Speaker: As the debate is starting fairly late, I appeal to hon. Members for brief contributions.

6.11 pm

The Secretary of State for Scotland (Mr. George Younger): I beg to move, That the Bill be now read a Second time.

Before detailing the provisions of the Bill, it is important to set out something of the background. Events in this field have moved very quickly indeed in the past few months, and the Government have responded quickly and flexibly to meet exceptional circumstances by exceptional measures.

There are two main questions which have been asked over the past few weeks. First, why did we have to have a revaluation? In Scotland, the law clearly lays down that there should be regular revaluations every five years to ensure that properties continue to bear appropriate shares of the overall rating burden. No one has argued against that in principle. While we have a rating system, it is only just that the relative values on which the tax is levied should be kept in line with reality and reasonably up to date.

In August 1983 the Government confirmed in the White Paper on rating reform in Scotland, Cmnd. 9018, that there would be a full Scottish revaluation to take effect from April 1985. Again, that was approved by all parties and by the Convention of Scottish Local Authorities. Indeed, it would be fairly difficult for anyone to argue in favour of perpetuating indefinitely a set of old and increasingly out of date relative values. There was no further justification for postponement, and the time when the 1985 revaluation could have been postponed in an orderly manner came and went.

The second question with which I must deal is: why could special help not be given earlier and in one tranche instead of several?

Mr. Robert Hughes (Aberdeen, North): There is a third question to which I hope that the Secretary of State will give an answer. Why was there a change in relationships between industrial ratepayers, commercial ratepayers and domestic ratepayers?

Mr. Younger: I shall come to that point. The hon. Gentleman is very perspicacious in these matters.

It was in the autumn of last year that the results of the assessors' work over the preceding months first began to become available. By the time of the rate support grant announcement on 7 December I had been made aware of the very substantial shift of rateable value away from manufacturing industry and towards domestic property. This was not, as some have suggested, an arbitrary or a political judgment of the assessors. It reflects the fact that over a period of seven years, in which there has been substantial economic change, the heritable assets of Scottish industry have not risen in value in the same proportion as the homes of the Scottish people. It was not

[Mr. Younger]

surprising, and the Government's reaction to it was to use both the instruments available to me to moderate the general effects of the shift.

In December, therefore, taking account of the benefits that revaluation would bring to this sector, I made an order adjusting the level of industrial derating down from 50 to 40 per cent., and at the same time announced that the level of domestic rate relief would be increased from the equivalent of a penny in the pound to 5p in the pound. Those decisions were taken on the basis of indications from the assessors of what the average effect of revaluation on the different sectors would be: that domestic subjects would lose, commerce would neither gain nor lose, and industry would by and large gain.

In mid-February the assessors were required by law to deliver the new valuation rolls to the local authorities for publication, and swiftly thereafter it became clear to us that there would be some very large increases involved for domestic ratepayers once the local authorities set their rate poundages. In the few weeks between the publication of the rolls and the last date for setting of rate poundages, we decided exceptionally to increase the domestic rate relief yet further, from 5p to 8p in the pound, at an extra cost of £38·5 million. This was announced early in March.

Up to this point, we had been concentrating on the effects of broad movements of rateable value in terms of the averages for the different sectors. It seemed that, with the action already taken, domestic, commercial and industrial ratepayers could now be expected to live with the results of the revaluation as we saw them in terms of those average sectoral figures. We must bear in mind that it is the precise purpose of having a revaluation to reflect changes in values both upwards and downwards. It never was the purpose to ensure that nobody had an increase and nobody had a reduction. That would merely perpetuate the unfairness which revaluation is designed to reduce.

However, by the time everyone had received his valuation notice and then his rate demand, it became very clear that, whatever the average might be, there were still very many ratepayers whose valuation increases were so steep as to lead to unacceptably large increases in their rate bills. Many of these were in the commercial sector where, as I have said, we were aware that the overall effect of the revaluation was neutral. It is, however, of little help to know that the average effect of something is neutral if its effect on one's own business is fatal.

During March and April the evidence built up that the sudden effect of the more extreme valuation changes that 1985 had brought would be damaging and unacceptable. The Government decided that a limit should be set. With the average revaluation multiplier for all property being 2·33 times, the limit was fixed at three times. We are in no doubt that there are many in Scotland who, even after the new rebates, will continue to face hefty rate increases this year, especially in areas where the local authorities have been less than responsible in their budgeting. The measure before the House today is not able to, nor is it intended to, bring down all high rate bills. It is, I repeat, an exceptional measure intended to tackle selectively the exceptional hardship which would be suffered by those individuals and businesses facing extrememly high increases in the rates that they would have to pay.

I now deal with the Bill itself and what is in it. It is deliberately short. It creates two new statutory duties. First, there is a duty on rating authorities to give rebates to those whose valuations have increased more than three times between the most up-to-date version of the "old" roll, which was valid on 31 March this year, and the new roll which came into force a day later. The essence of the Bill is that it applies to properties for which this comparison can be made. If the comparison is not possible, the property cannot benefit.

The exclusions—listed in clause 1(2)—are: properties which are already valued by a statutory formula approved by Parliament, properties which benefit from their valuations being already reduced by statutory derating, and local authorities' own properties.

Properties occupied by the Crown — hospitals, Government offices and the like — are technically not liable for local authority rates as such, and the Bill does not therefore need to exclude them. The usual procedure whereby the Treasury valuer arranges for payments in lieu of rates will operate, unaffected by the Bill.

The second new duty created by the Bill is laid upon me, to reimburse the rating authorities the amount of all the rebates that they pay. The amounts of such rebates granted to ratepayers, and liable for reimbursement by the Scottish Office, will not be relevant expenditure by the local authorities and will not count against their guidelines.

The Bill is an enabling measure. I intend immediately after its enactment to bring to this House an order which will contain all further necessary provisions for operating the scheme, including the ceiling of £10,000 on the rebate on any one property. This order is being discussed with COSLA, whose representatives have already made several useful contributions. In particular, they have argued that it would be preferable for the rating authorities in the first instance to calculate and grant rebates rather than for ratepayers to send in individual claims. Only if someone feels that he has been missed out will there be a claim procedure to fall back upon. I agree with COSLA that this would seem desirable. As well as making for more economical administration, it will be less trouble for qualifying ratepayers.

I might add that it would be helpful if ratepayers did not write to their assessor or rating authority about this scheme at present. The assessors have plenty to do, with the many appeals against valuations now being lodged, and the Scottish Office intends to make sure by giving suitable publicity to the fact that those who may qualify for the new rebate will not lose out through inadvertence. Meanwhile, if a ratepayer judges that, because he may qualify for rebate when the Bill is enacted, he will be better off not paying his 1985-86 rates by instalments, he may of course opt for that, but he then becomes liable to make a lump sum payment at the end of September of the whole of his year's rates, less any rebate which his authority should have calculated by then.

The Bill does not limit the laying of such an order to this year alone.

Mr. Barry Henderson (Fife, North-East): I have one slight anxiety about the possible use of clause 1 in future years. My right hon. Friend may not wish to deal with the matter now and it could perhaps be dealt with in the reply to the debate. It is a technical point. The clause obliges rating authorities to grant rebate. I am not clear whether that provision could be used by a Secretary of State in

future to be selective about which rating authorities would be obliged to do so, or whether the provision would always apply to all rating authorities.

Mr. Younger: I take my hon. Friend's point. The important thing is that the Bill makes it possible in future years to lay an order which is similar, or slightly different if such should be deemed necessary. I am not sure—I shall make inquiries—whether, if the Bill were passed by the House, it would be in order for a future order to be selective in its application. I should have thought not, but I shall check and write to my hon. Friend, or my hon. Friend the Under-Secretary the Member for Edinburgh, South (Mr. Ancram) might be able to deal with it in replying to the debate.

Mr. James Wallace (Orkney and Shetland): The Secretary of State referred to the number of appeals received by the assessors. Will he say something about the psychological effect that the Bill might have? People might not now be disposed to appeal, and that could have long-term consequences. It could mean that money was being paid out under an order which would be unnecessary if an appeal were allowed.

Mr. Younger: The hon. Gentleman's main point is right. The point of appealing is not, principally, to alter the amount that a ratepayer pays this year. The object of appealing is to ensure that the basic valuation upon which the rate is based is correct and just. If ratepayers feel that their basic revaluations are too high or in some other ways defective, they should still appeal, irrespective of the aid to be provided this year under an order which I hope the House will approve later.

Mr. Robert Hughes: To follow up the point made by the hon. Member for Fife, North-East (Mr. Henderson) about whether an order might discriminate between one authority and another, the Secretary of State must surely intend that all rating authorities as specified in the Bill — "Regional and Islands Councils" — will be treated equally. I hope that he will therefore make it clear that, however the wording of the Bill might be construed, he intends to treat all rating authorities equally with regard to rebate.

Mr. Younger: I appreciate the hon. Gentleman's point. I shall check to ensure that this is correct, but the Bill discriminates between classes of ratepayer, not between authorities. I believe that that is the answer, but I shall ensure that it is correct. I hope that my hon. Friend the Under-Secretary will be able to let the House know about that.

Finally, I come to the figures in the explanatory and financial memorandum. There has been a good deal of public interest in the likely cost of the revaluation rebate scheme and I should therefore like to say a word or two about that. At the time, a few weeks ago, when evidence was coming in about the effects of certain steep valuation increases, and the Government were deciding that these were not acceptable, we did not have direct and confidential access to the data banks or the data handling facilities of the Scottish assessors, and had perforce to make estimates of the prevalence and the nature of such extreme valuations on the basis of quite a small sample. Nevertheless, once I had announced the threshold multiplier of three, the rating authorities were enabled to use their computers to begin calculations of rather more accurate figures by matching up the entries on the old and new roles. We have consulted the convention, and the figures that it has given us are not yet complete.

While it looks as if the total cost should indeed be contained within the £50 million figure attached to the Bill, and may be a bit less, it is not possible yet to be sure what it will amount to, and not at all certain that the lower estimate of £30 million which has been mentioned in the press would be enough to cover all the rebates.

Whatever the outturn figure, the Government take the view that it is surely right in principle that ratepayers in Scotland should not suffer through sudden and unexpected changes in the tax base raising their valuations to levels greater than three times last year's. That is, and always was, the purpose of the scheme that we are debating today.

While there will be a number of details in the Bill which hon. Members will wish to question and scrutinise today, I am grateful to the Opposition for their undertaking to facilitate the passage of the Bill through the House.

Mr. Bruce Millan (Glasgow, Govan): As we are rushing this measure through, why does the Bill provide that it only comes into effect two months after the Royal Assent?

Mr. Younger: That seems to be the normal procedure. As the right hon. Gentleman knows, there are procedures to be followed between Royal Assent and the coming into effect of the Act. I do not believe that that will cause any great difficulty, but if the right hon. Gentleman feels that it will I should be glad to hear any points that he would like to make. He may have a sensible point to make.

As I said, I am grateful to the Opposition——

Mr. Millan: In other words, the Secretary of State does not know the answer to my question. Could he perhaps answer another question? When will we have the statutory instrument?

Mr. Younger: The right hon. Gentleman will be aware from having read the Bill that various things have to be done between those two points. For instance, there has to be an Order in Council. That is bound to take some time. If the right hon. Gentleman had been listening, he would have heard me say that I would bring in the order as soon as I could after the Bill had been passed by the House. I hope that he will feel that that is satisfactory.

Mr. Robert Hughes: Is the Secretary of State aware that if the Bill comes into effect two months after the Royal Assent, and the order cannot be laid until the Bill comes into effect, that will take us into the middle of the summer recess? Surely he will not introduce such an order during the summer recess. As I understand it, the Bill requires an affirmative order, and that could not possibly come in until about October or November.

Mr. Younger *rose*——

Mr. Millan: The Secretary of State mentioned an Order in Council. Where is there a provision in the Bill for an Order in Council?

Mr. Younger: It is a statutory instrument that must be produced. I am sorry if I misled the right hon. Gentleman.

As there is plainly some anxiety about this matter, I shall lay out a clear schedule of the likely timing. I understand that this measure is generally supported, and I hope that with the agreement of the House we can get the legislation through reasonably quickly. There will then be

[Mr. Younger]

no delay in putting forward the necessary further procedures so that local authorities, assessors, and ratepayers can be in no doubt of their position. I hope that that is helpful.

It will be welcome to ratepayers in Scotland to see that their real concerns are being acted upon generously and decisively by the Government, and that Parliament can act quickly and with general agreement when there is a clear need to do so.

6.30 pm

Mr. Donald Dewar (Glasgow, Garscadden): Monday is not the best of days for the Second Reading of a Scottish Bill but I do not think that there will be too many complaints from Conservative Members. One feature of Scottish politics is that the Conservative party, which used to campaign with some elan and enthusiasm on rating, now finds the issue a deeply embarrassing one. It was clear that the Secretary of State did not have his heart in the job this afternoon. His arguments were cursory and simplistic.

The Bill provides a measure of relief for the hard-pressed Scottish ratepayer and that is why we are allowing it to go through on an expedited timetable. I was surprised when the right hon. Gentleman explained to my right hon. Friend the Member for Glasgow, Govan (Mr. Millan) that a delay of two months is normal. We are using abnormal procedures to expedite the Bill's passage and to help the Government and for the right hon. Gentleman to plead that it is normal to have delay against that background is remarkably irrelevant.

If the Bill is to give anything to the ratepayer in Scotland, we shall give it a helping hand. However, the measure has been born out of a great deal of indecision and confusion. It is the product of a good deal of disordered panic in the Scottish Office, which over the past few months has become the mark of this Administration.

The Secretary of State took us through the history of the Bill. He seemed to suggest that there was almost a master plan. He implied that the necessity for the Bill had been seen months ago. It is usually the hon. Member for Edinburgh, South (Mr. Ancram), the Under-Secretary of State for Scotland, who comes up with that sort of earnest alibi, which he utters implausibly. The Secretary of State has rather disappeared from the Scottish political scene of late. However, both the right hon. Gentleman and the hon. Gentleman agree that the provisions in the Bill were all foreseen. That alibi is implausible. First, the domestic element was set at 5p. The Government admittedly produced £19 million and £31 million had to be produced by local authorities. The £31 million was clawed from the already reduced services provided by the authorities. The Government's attitude at that time was "Not a penny more".

The heat came on and suddenly and mysteriously £38·5 million was added to the domestic element. That sum was ripped out of the Scottish Office budget. Again the Government said, "Not a penny more". However, another £50 million has been found to save the Secretary of State from the wrath of his own supporters. The week at Perth must have been one of the most expensive weeks for the country and the Treasury for a long time. However, the result appeared to offer some help and much needed relief for the Scottish ratepayer. I suppose that we were all supposed to go home happy at the end of that little performance.

We have seen Ministers being driven from pillar to post. They thought at each step that they would get away with it but at each step the public's wrath mounted and each time Ministers had to produce something else because they had it lamentably and politically wrong. Once a Government lose control—there is a lack of confidence and grip in the Scottish Office—it is extremely difficult to re-establish any form of authority.

Mr. Younger: Who wrote that?

Mr. Dewar: I did and I am proud of it. I think that it has the ring of truth for most people in Scotland, who are not impressed by what has been happening in the Scottish Office. For a long time the press machine of the Scottish Office was telling us that the Secretary of State had earned a glittering prize and that he had done so well that he should be promoted. However, his friends, with endless ingenuity, are now saying that the right hon. Gentleman must be moved because he is a liability. At least that has a kernel of hope for most of us.

As I have said, any help for the Scottish ratepayer is welcome but the help which the Government are providing is on the margin. There is no doubt that the scheme that the Secretary of State has introduced will result in many inequalities. There will be rough justice and much discontent when it is seen in operation.

I accept that the scheme is based upon rateable values and is designed to take the peaks out of the effect of revaluation, but the public think very much of what they have to pay at the end of the day. It is no doubt well known to the Secretary of State that some domestic properties which had a rateable value of £300 have had that valuation increased to £900. The threshold in Glasgow will be 39 per cent. and in Aberdeen it will be 19 per cent. A similar picture emerges for commercial property. An increase of 53 per cent. in Glasgow will not qualify for relief but in Aberdeen relief will be triggered by an increase of 37 per cent. I recognise that there may be a logic in the Government's argument but it turns on rateable value and has nothing to do with what people pay at the end of the day. It is the effect of the Bill that the public will judge. The examples that I have given can be extended to other areas, including Tweeddale. There will be problems and the right hon. Gentleman should address himself to them.

The Secretary of State has a better case on the commercial side than on the domestic. I reckon—I have been helped by COSLA—that the concessions in the Bill will amount to about 4 per cent. of the total bill for the commercial sector. There will not be a great deal of gratitude from anyone for that because many people will still face substantial increases. However, I accept that there is something of consequence in the Bill.

I understand that slightly more than 50,000 commercial properties will benefit following the Bill's enactment. That sounds pretty impressive but it must be put into perspective. I have no doubt that the Minister has been giving some thought to what has been happening. In Tayside, for example, about 12,700 commercial properties will benefit from this form of rate relief. That is the good news. The not so good news is that 8,000 of those properties are lock-up garages. Does that suggest to the right hon. Gentleman as it does to me that the scheme

has produced an unintended consequence, or is it a piece of careful Conservative planning? If that example is projected throughout Scotland—I do not suppose that there is anything particularly unusual about Tayside—a picture emerges that is different from the one that might be expected.

The concession for the domestic ratepayer is extremely thin. There will be marginal assistance for a few but there will be nowt for the vast majority. There is an air of unreality about many of the arguments that have been advanced. For example, there was a pompous announcement by the Scotish Office in the text of a reply to my hon. Friend the Member for Glasgow, Maryhill (Mr. Craigen). The impression was given that the Government were introducing an important concession by means of the £10,000 cut-off on individual properties in the domestic sector. Is there a property in Scotland that will benefit from that cut-off? If there is—perhaps the right hon. Gentleman is more expert than I am on stately homes—I have no doubt that we shall be told when the Under-Secretary of State replies. Perhaps there is a marquis or duke somewhere who will benefit from the concession. Who knows, there may be a more humble chatelaine who is saying his prayers and counting his blessings.

Mr. Younger: Surely the fault lay in the form of the question, or is the hon. Gentleman suggesting that the question should not have been answered?

Mr. Dewar: We have said consistently to the right hon. Gentleman that he might want to consider a cut-off, but we did not consider a cut-off of £10,000. Surely that concession has the air of a make-believe figure. There is little in the Government's concession for the owner-occupier at the bottom end of the market. I suspect that there is even less for the council house tenant.

There are houses in the Garscadden constituency that will benefit from the Government's scheme. There are some that will enjoy an advantage but not very many. I have taken some examples of houses in Knightswood. I do not claim that it is an enormously rich and sensitive sample but it is one that produces some interesting facts. It is a scatter of individual examples of rateable values that have increased by a factor of more than three. The greatest saving will be 6·6 per cent. on the new rates bill. The smallest saving in my constituency is 0·5 per cent. in the sample that I have considered. The greatest cash reduction will be £31·71 on a bill of £591. However, I have considered only a handful of properties and the majority of my constituents will get not a penny piece. The bleak reality is that many will face increases in their rate bills of 30 per cent. or 40 per cent. and will receive no help from the changes that are being introduced.

Mr. Younger: I am sorry to keep interrupting. The hon. Gentleman is an advocate of revaluation and, indeed, supported and pressed for it. What does he suggest should happen? He says that the Government are giving help to people with exceptionally high increases, and he supports revaluation, so what does he want?

Mr. Dewar: I shall come to that, and the right hon. Gentleman will no doubt await my reply with interest.

I am establishing the simple point that large numbers of people who rightly feel hard pressed by the increases in their rates bills will not be assisted. We shall wish to ask many questions in Committee on Wednesday. I was delighted to notice in the *Daily Express* of 30 May, for example, a direct quote from the Secretary of State, which stated

> "Mr. Younger admitted that the figures for the original calculations were hurriedly produced.
>
> 'They were necessarily speculative,' he said. 'But the whole matter will be thrashed out in Parliament next week.'"

I look forward to the exciting Wednesday that we shall have. Today, I shall give the right hon. Gentleman a taste of some of the points that we shall raise on Wednesday, and which will be the subject of specific amendments.

The first relates to the take-up. I recognise that there is an element of error and that there may be some minor changes. I have examined the figures from COSLA, which were produced by running the new and old rules through all the major rating areas to extract the properties that are eligible for benefit. COSLA is confident that the pay-out will be, not £50 million, but £29·5 million or near to it. It will not do for the Secretary of State to say in a lordly way that the figure may be less than £50 million. Any reasonable calculation shows that it will be a hell of a lot less.

It is remarkable that COSLA was consulted about this rickety scheme for the first time only last week. A shortfall of £20 million is unacceptable. The Secretary of State is trying to buy peace, and if he does that he must pay the price for it. If £50 million is to be shaken from the piggy bank of the Chancellor of the Exchequer, it should be spent as was advertised at Perth. We shall want assurances that that money will be devoted to relieving the pressure on Scottish ratepayers.

I accept that there may be difficulties in simplistically dropping the multiplier, because if we reduce it by even a small amount we include an enormous slice of the total properties in any one sector. However, we shall certainly table an amendment to give the power to include other classes of ratepayer, and to vary the present rules. If that is impracticable, the right hon. Gentleman may consider whether he should put a further 1½p on the domestic element, which would benefit every domestic ratepayer, and which would be covered by a figure short of £20 million, which it appears will become available.

Mr. Norman Hogg (Cumbernauld and Kilsyth): Has my hon. Friend seen the Glasgow *Evening Times* of 29 May, which states that the hon. Member for Strathkelvin and Bearsden (Mr. Hirst) threw his weight behind the campaign to ensure that the full £50 million is taken up? Is he encouraged by that?

Mr. Dewar: I do not know how much weight there is there. The hon. Member for Strathkelvin and Bearsden (Mr. Hirst) has always struck me as being a slight figure in every sense of the word. I certainly welcome his help, for what it is worth. To be fair to the hon. Gentleman, he is right to say that it would be unacceptable to hon. Members if £20 million were returned to the Treasury as some sort of baksheesh for the mandarins there. It should be used for Scottish ratepayers, and on Wednesday we shall want the Secretary of State to deal with that issue.

Secondly, there is the question of the future of the assistance during the latter part of the quinquennium. Obviously, this is a rescue package designed for 1985-86, but what will happen in the second, third, fourth and fifth years when the revaluation is in operation? The right hon. Gentleman is a reluctant Samaritan in the first year, and there will be a great deal of disappointment and anger if

[Mr. Dewar]

he allows the victim to be sandbagged in the second year and leaves everyone to meet the full impact of revaluation. It is important that we move away from the present provisions which permit the continuation of the system in the latter part of the quinquennium, and that we receive guarantees from the Secretary of State.

I do not like raising unpleasant subjects, but recently there was an unpleasant incident in Scotland when the Chancellor of the Exchequer visited Perth. The *Glasgow Herald* of 11 May quoted the Chancellor as saying that

"he . . . had bailed out Mr. George Younger . . . in his crisis with . . . 'exceptional extra funds'."

The Guardian of 11 May stated that the Chancellor said:

"'No more money is likely for Scotland next year. I don't think he (Mr. Younger) will find me in the same compassionate, open-handed and generous mood next time'."

From that, it appears that we must help the Secretary of State in his fight against the Chancellor over what will happen in future years. I hope that Conservative Back Bench Members will support us in that fight. I cannot think of anything that would put their marginal seats in more jeopardy than, having mounted the rescue bid for the coming financial year, abandoning it in future. They should join us in tabling amendments, which will buttress the Secretary of State's efforts by placing on him a statutory duty to continue this system at some level during the remaining years. That would help the right hon. Gentleman greatly in his fight against the Chancellor. I genuinely hope that there will be all-party support for the amendments, and that Conservative Members will join us in the Lobby on Wednesday.

The third question relates to administrative expenses. The financial memorandum suggests that they will amount to £1 million. I do not know whether that is accurate, but the figure will be substantial. It will be necessary to identify the people who will be entitled to some form of rebate. In many cases it will be necessary to call in and adjust or issue new payment books for those who pay on a 10-instalment basis. Despite the strictures of the Secretary of State, there will be a great volume of work dealing with inquiries from disappointed and enraged people, who find that they are entitled to nothing. As the Secretary of State said, at least by implication, there will inevitably be a considerable delay in collecting rating revenue compared with a normal year, and, as a result, interest charges for local authorities will rise.

By operating the formula we have the power to reimburse the money given to the ratepayers. Perhaps the Secretary of State will tell us when that reimbursement will take place. It will not be satisfactory if local authorities must wait until the start of the next financial year. I hammer the point that there is power to reimburse, but no power to reimburse the expenses which, according to the explanatory memorandum, will fall entirely on local authorities. I am grateful to the Secretary of State for what I believe to be an assurance—I shall read what he said—that we shall not be in the black farce in which that will be counted against guidelines, and prayed in aid in evidence of excessive and unreasonable expenditure. We want a guarantee. It would be perfectly fair for administrative expenses to be refunded to local authorities. They should not be asked to foot the bill for the Secretary of State's incompetence.

We would normally discuss at length an enormous number of further points. I am glad that the Secretary of State has shifted his ground regarding whether there should be individual applications or whether the onus should be on local authorities. In his statement of 14 May he made it clear that he was thinking in terms of individual applications. I welcome the fact that he has written to COSLA on that point.

At present there is no appeal mechanism in the Bill, and presumably anyone with a grievance will have to go to judicial review, which means to the Court of Session. I suspect that effectively there can be no appeal. The right hon. Gentleman should also consider that point.

The whole thing is shot through with anomalies which will cause difficulties. The amount of money, while not very large, will cause irritation. For example, it will be somewhat anomalous if someone buys a house half way through the year without paying the rateable value in the previous year. In a row of houses under completion, there could well be cases—I can think of some in Glasgow—where one of them will have been occupied in time to get on to last year's roll and will qualify for assistance, while others with identical rateable values on the new roll will not qualify. That is bound to cause problems.

Difficulties could also arise over disabled persons' rating relief. If there is a variation in the discount on the rates payable during the previous year, it could well be that the payment has gone up by more than a factor of three whereas the rateable value has not. In such circumstances, will a person qualify for this relief? An enormous number of detailed points such as those can arise, and I have no doubt that the Parliamentary Under-Secretary will do his best to deal with them.

The Parliamentary Under-Secretary of State for Scotland (Mr. Michael Ancram): Is the hon. Gentleman saying that he envisages a situation in which the revaluation goes up by less than three times while the rate of payment increases by more than three times?

Mr. Dewar: Yes, because of a change in the special discount allowed to disabled persons. I have quoted cases where that could happen. I concede that it is a marginal problem, but it could arise. I instance that as an example of the rough justice that could result from the Bill.

Many of my hon. Friends will want to take up general points during the debate, but I am sure that I speak for all of them when I say that we take very little satisfaction from what, on the whole, has been a sad and sorry tale. The whole thing began with the revaluation saga, and the Secretary of State is never blate in suggesting that I pressed for the revaluation to go ahead. Initially, revaluation was on; then it was partially on; then it was off. Ultimately, it proceeded with the maximum of confusion.

I certainly agree that there must be revaluation in a rating system, otherwise anomalies will grow. But we cannot have a rating system or revaluation when that is combined with ruthless and relentless cumulative cuts in the rate of central Government support—where there is a determined effort, as there has been over recent years, to shift the burden from the Treasury to the individual ratepayer.

The figure that we have used again and again is central to the argument. COSLA has calculated that had the percentage of rate support grant been held at its 1980-81 level in the intervening years since then, local authorities would have had another £1,000 million of central Government support. Revaluation has been the final

insult. It has certainly been a tremendous blow to individual householders. But the real problem and complaint is that the amount of money to be paid has been rising, directly reflecting the policy of the Secretary of State. In that sense, he has been his own executioner.

Ministers have been ambushed, and realise that they are in mortal danger. That is why we have had a rout and scramble for safety over the last few months. Indeed, the difference a few weeks makes is extraordinary. On 5 March, in an article in *The Scotsman*, the Parliamentary Under-Secretary, the hon. Member for Edinburgh, South, said:

"we had to accept that the routes"—

to rating reform—

"which had been examined were unacceptable and that for the time being we would have to continue with the rating system".

He was asked specifically if he favoured changes in the rating system and whether he ruled them out. He replied:

"I do not think you can rule out anything for ever".

Three weeks later his political master was sounding a retreat, and the hon. Gentleman was duly spinning on his heels and heading in exactly the opposite direction.

It is worth remembering the reason why that was done. Indeed, the right hon. Gentleman was engagingly frank about the matter. He said:

"We have had one go at trying to reform rates and everyone was against the alternatives. This time we have to deliver. Not acting at all means there will be severe political consequences".

That was the great pilot's statement of principle. The Minister knew that the political ground under his feet was shifting and that he had to scramble to save not only his seat but those of his hon. Friends. We are now committed to we know not what. All we know is that a manifesto pledge will not be enough. We know from the right hon. Gentleman's speech at the Tory party conference that there will be a scheme by the end of this year, but I suspect that when that pledge was given Conservative Members, including the Secretary of State, did not have a clue about what they would do or how they would do it.

Mr. Ancram: Perhaps the hon. Gentleman will use this opportunity to answer a question that I put to him previously. Does he and his party favour finding an alternative to the rating system, and, if so, will he clearly say so?

Mr. Dewar: I am happy to state our position. We will look very hard at the alternatives — *[Interruption.]* Conservative Members laugh at responsibility. I suppose that they must, because they are strangers to it. I believe that there is a very strong case for local income tax because it meshes with our plans for a Scottish Assembly and the financing of it. We shall look carefully at that. However, we shall not go in for some hastily cobbled together solution based on expediency and political opportunism and, I suspect, a strong dash of fear, and which will not provide any real basis on which local democracy can flourish.

Mr. Albert McQuarrie (Banff and Buchan) *rose*——

Mr. Dewar: No, I shall not give way.

We want to see a sensible reform of the system, but we shall not adopt the silly course of promising something without knowing exactly what it should be. That has been a mark of recent months. We at least shall try to keep in touch with reality, responsiblity and our duty to local democracy and the system in Scotland.

The responsibility for the present problems lies squarely with the Secretary of State. The disarray and distress behind him is a mark of that. A few moments ago the hon. Member for Renfrew, West and Inverclyde (Mrs. McCurley) said that as a result of present incompetence in the Scottish Office she predicted that only four Scottish Conservative Members of Parliament would be left after the next election. The hurried and ill-prepared scheme which is now being talked about will reflect that calculation rather than any real basis of principle. This is all too obviously a deathbed repentance on the part of the Secretary of Sate, and deathbed repentances are seldom convincing. He and his hapless friends will not be saved, because he has not brought forward the kind of relief for the hard pressed ratepayers of Scotland that the crisis demands.

6.58 pm

Lord James Douglas-Hamilton (Edinburgh, West): I am glad that the hon. Member for Glasgow, Garscadden (Mr. Dewar) said that he welcomed the Bill. He said that any help is welcome, and this measure will be very welcome to the large number of my constituents who are affected. The hon. Gentleman also referred to years two, three and four. The reform of the rating system may have gone through well within that time scale, and I for one very much hope that it has.

I welcome the Bill and regard it very much as a stage in the continuing process. After all, the Secretary of State increased to £88 million the domestic element of the rate support grant. That means relief of £40 on a value of £500, and more on higher values. I take as just one example shopkeepers in my own constituency. One lady selling clothes found that the rateable value of her shop went up from £650 to £2,800. A great many like her will benefit from the Bill. It is encouraging that relief will be at least 100 per cent. in respect of that part of the rates bill relating to total valuation that is more than three times the revaluation for this year.

The upper limit on total relief will relate to the property concerned to allow maximum help both for successful small businesses and for businesses in general throughout Scotland. That will be important to many people. I hope that my hon. Friend the Under-Secretary of State will do everything within his power to identify those concerned as soon as possible so as to make it certain that those who are entitled to claim are aware of their rights.

This morning I received a letter from the National Federation of the Self-Employed and Small Businesses, which raises a question about appeals that has already been touched on by the hon. Member for Garscadden. It says:

"We also urge you to ensure that this relief will not act as a disincentive to the ratepayer exercising his right to appeal".

I ask my hon. Friend to look at this matter bearing in mind expenses. For most appeals, costs are probably minimal. They start off with a letter, which the assessor may accept. In one case in my constituency, where a railway stop has just been established, the assessor has automatically accepted the appeal at no more expense to the appellant than a postage stamp. However, if appeals mean substantial expenses and having to go through a long detailed court case, it might become counter-productive for the person to go ahead with the appeal. I hope that, before the Bill is finally passed, some guidance will be given.

[Lord James Douglas-Hamilton]

The federation has said that in one case an assessor increased the rate from £1,100 to £13,000. This means that rate relief can be claimed on £9,700 and as local rate poundage is 70p, relief will be £6,790. On the federation's advice, the person concerned was appealing, but in that case the assessor had already offered to reduce the valuation from £13,000 to £5,000.

The assessor may act reasonably in most cases, but I can give an example of him acting unreasonably. When Edinburgh airport established a new runway, the assessor refused to accept that there should be any difference in rateable value, although the new runway was pointing straight at the citizens concerned. They had to go through an expensive case, at the end of which the rateable value on their properties was reduced.

Mr. McQuarrie: My hon. Friend has quoted an example of an assessor in Edinburgh reducing an assessment from £13,000 to £5,000—a cut of £8,000. Does my hon. Friend accept that this answers the case that we have been endeavouring to put forward, that assessors have merely been taking figures out of their heads and applying them to anybody's household, to such an extent that the increases are unacceptable to most people?

Lord James Douglas-Hamilton: I cannot tell my hon. Friend about the exact circumstances as the case was put to me by the National Federation of the Self-Employed and Small Businesses. However, I think that in most cases the assessors tried to act professionally, although in some cases they were way out. I invite my hon. Friend the Under-Secretary of State to give some guidance about appeals if there is any danger that substantial expenses may be involved.

When the statement about this Bill was originally made, I flew straight up to attend a large meeting of ratepayers at which one of the assessors was speaking. He said that what we would be doing today represented a distortion of the system, and in a sense it is. However, that serves only to underline the need to reform the rating system generally. I was glad to see that, as part of the transitional arrangements, clause 1(6) makes it clear that the Secretary of State will be enabled to continue these arrangements next year, should the necessity arise. By then we shall know a great deal more about how successful in giving assistance this has been. We may need to modify the scheme depending on the representations that we have received from interested parties.

Recently, I tried to discover the difference in rateable value between properties north and south of the border. A few days ago, I received an interesting reply from my right hon. Friend the Prime Minister. She said:

"It is in the nature of a system based on evidence of local rental values that the valuation of similar buildings will vary both within a locality and from one area of the country to another. The detailed legal basis for the valuation differs in Scotland and more importantly Scottish figures are now shown at the levels of 1985-86 revaluation while those for England and Wales are set in relation to the 1973-74 revaluation."

The significant part of the letter says:

"On the domestic side, it may be reasonable to look at the average rate bill for a domestic property. The Scottish figure including the domestic water rate is £397 in the current year as against around £430 in England when water charges are included. Even with these figures there is the difficulty that the mix of properties may not be comparable as between houses and flats, urban and rural property, owner-occupied and local authority owned housing."

As there are far more local authority houses in Scotland, it is difficult to get a comparison, but I can say with certainty that in Edinburgh the rateable values for commercial, industrial and domestic properties have increased far more than in East Lothian, Midlothian and West Lothian.

Mr. Robert Hughes: What about Aberdeen?

Lord James Douglas-Hamilton: I shall look up the facts and try to answer the hon. Gentleman's question. The same may apply in the countryside outside Aberdeen.

John Lewis, the large department store in Edinburgh, has compared the rates that it has to pay with the rates that John Lewis in Oxford street, London has to pay. It says that the rates paid per square foot in Edinburgh are 20 per cent. higher than those in Oxford street. The store fears that it may soon have to pay twice as much in Edinburgh as it does in Oxford street. In a letter to me, the managing director says:

"I need scarcely point out that Oxford Street is perhaps the finest trading pitch in the world and that our branch there enjoys an island site with extensive frontages at shopping level, whereas in Edinburgh we are in an essentially secondary location with no exposure to the principal shopping thoroughfare."

My hon. Friend the Under-Secretary is bound to take into account the overspending of Edinburgh district council, which is 48·3 per cent. above the guidelines, which would increase the district rate by 79 per cent. I made inquiries as to what it had been spending on. More than £100,000 worth had been spent on propaganda.

Mr. Donald Stewart (Western Isles): Might not the trouble be with the original assessor? The hon. Gentleman will no doubt have received, as most of us have, a letter from the Football Association in Scotland, with a copy of an article by the chairman of the Celtic football club. In it, he claims that his club paid more in rates in one year than a leading English club paid in 25 years. Are not the assessors to blame for the enormous discrepancies rather than local councils?

Lord James Douglas-Hamilton: That may be so in certain cases and I am making inquiries into that case. However, in the case of John Lewis in Edinburgh, the rise in rates has had much to do with the expenditure by the council.

I can give examples of the £100,000 that has been spent on propaganda. More than £10,000 was spent on a full page advertisement in the Edinburgh *Evening News*. Some £3,900 was spent on hand-painted banners and some £1,300 on the erection of the banners. One poster says, "Support Democracy". We all support democracy, but it is not necessary for us to spend more than £1,000 in doing so. Producing art work for posters cost £3,873, 48 sheet posters cost £4,810 and so on.

When the interests of those involved in the local economy are at stake I hope that my hon. Friend the Under-Secretary will take such expenditure into account because selective action may become a necessity if the local economy is to survive. The director-general of the Retail Consortium spoke about the Bill in a letter that arrived today.

Mr. Norman Buchan (Paisley, South): What percentage of loss to the local economy will be caused by hand-painted banners, and what percentage will be caused by the proposals made by the Secretary of State for Social Services? Are not other, related matters involved?

Lord James Douglas-Hamilton: I do not think that there is any connection between the two. If there is overspending of £100,000 on propaganda, that is not what the ratepayers want. There has also been £150,000 spent on a new women's committee. If one scrutinises the accounts carefully, which I have no doubt we shall do in a future debate, the position will become clearer, but I think that it is a pity that we should have to go over the same course as that followed by Lothian regional council a few years ago.

Mr. Henderson: If the Labour party wants to indulge in propaganda, that is entirely legitimate in a democracy provided that it pays for it itself and does not expect the ratepayers to pay for it. For example, if Fife regional council wants to support striking miners, which bring disaster to the Fife economy, Labour party members should use their own money and not expect ratepayers to foot the bill.

Lord James Douglas-Hamilton: I agree with my hon. Friend. The significance of this is felt by many shopkeepers, who will not benefit from this measure. For those who are affected by overspending of the sort that we have seen in Edinburgh, it must be taken into account.

However, a much more fundamental issue is the reform of the rating system, and I am glad that a review has been set up to find a fairer scheme than the existing rating system and a fairer and clearer way of distributing rate support grant. At the Perth conference, the Prime Minister said:

"We have reached the stage where no amount of patching up the existing system can overcome its inherent unfairness."

There is a vital need to reform the system. In fact the director-general of the Retail Consortium said that there requires to be "a change of attitude by local and national governments, away from rates being regarded as a tax on the occupation of property to that of a reasonable payment for the value of services actually received and equitably allocated." I hope that the reform of the system will take place within the lifetime of this Parliament, finally and irrevocably in the interests of fairness and justice.

7.12 pm

Mr. Gregor MacKenzie (Glasgow, Rutherglen): Like my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar), I give a cautious welcome to the Bill. I put it no higher than saying that I am not opposed to it. It is born of the statement by the Secretary of State at his own party conference in Perth, although later he made a statement about it here as well. It reminded me of a Budget statement. I have listened to a great many Budget statements. They always seem good when they are first heard. But, after two or three weeks' reflection, doubts begin to emerge. That is my view of the Bill and of the statement by the Secretary of State at his party conference.

At first glance, it seemed that a great many people would be assisted and that all would be helpful. But now we begin to wonder about the extent to which the average commercial and domestic ratepayer will be assisted and, more to the point, which of our domestic and commercial ratepayers it will help. That does not come through clearly to me either in the Bill or in the speech of the Secretary of State today.

My third worry arises very much from what the Secretary of State said in his 16-minute speech because, only a few weeks ago, I was chided by the Parliamentary Under-Secretary of State for saying that I thought that the Government's proposal had been hastily conceived. I was extremely worried when the Secretary of State said that even now he did not have all the information from the various assessors, computers and all the paraphernalia available to him. That proved what many of us had been thinking—that the Secretary of State only a few days before his party conference plucked a figure and a formula out of the air. It was all far too hastily conceived, and that does not make for very good government.

Like my hon. Friend the Member for Garscadden and the hon. Member for Strathkelvin and Bearsden (Mr. Hirst), I hope that this £50 million will be spent fairly and squarely on domestic and commercial ratepayers. However, what is sometimes fogotten by many right hon. and hon. Members is that the £50 million will come not out of some fairy grotto beneath New St. Andrew's house, but out of taxpayers' pockets, and the taxpayers are entitled to a better report from the Secretary of State than they had in his 16-minute speech about how the Government's proposal will be administered. Certainly before I give the Bill unqualified approval, I want to hear a great deal more about how the money will be spent, because taxpayers are entitled to more information about it.

My main concern is with the domestic ratepayer. I have spoken to dozens of my constituents and, as yet, I have not found one who will benefit from this proposal. Not one will meet the requirement specifying a threefold increase in the valuation of his property. Most of them come very near three times—2·7, 2·8, 2·9—but not three times. That means that they will not benefit in the way that many of them had hoped. I must stress that these are not crummy houses. They are houses in the Burnside or Kirkhill areas of my constituency which the hon. Member for Moray (Mr. Pollock) knows well. They will not benefit, so I wonder who will benefit.

The people who give me great cause for concern are the young people who have been encouraged by this Government and others to buy their homes. They have bought three-roomed and four-roomed houses taking on huge mortgages, and they are now working on very tight budgets. Their valuations have been increased, but nothing like three times. They will still be asked to pay a great deal more in rates, and that will be very difficult for many of these young people. They are the people who concern me most of all because they will not get one penny piece.

Many of us want to hear from the Parliamentary Under-Secretary of State who among the domestic ratepayers will benefit in any way. Apparently only those with large and comfortable houses will benefit. We did not hear a great deal from the Secretary of State about that. However, we are sure that the people who will be paying the extra money in the form of tax to raise this additional £50 million are those young people who are buying their homes on huge mortgages. It is they who will be asked to pay extra tax to help those who are a great deal better off than they are. That does not seem to be right. These young people are being asked to subsidise those who are better off than they are.

I shall not say much about the commercial sector, but I hope that in the weeks ahead the position will be made much clearer. From the correspondence that hon. Members have received from the National Federation of the Self-Employed and Small Businesses and the Retail Consortium it is clear that commercial ratepayers

[Mr. Gregor MacKenzie]

themselves are not sure how their problems will be sorted out. The Secretary of State was kind enough to concede some months ago that the problem was being dealt with in a piecemeal fashion, which cannot be good for the rating system in Scotland. It appears to many people that the rating system is turning into a shambles.

We do not know what will happen in the years ahead. Even the Secretary of State does not know. It appears that the only person who knows is the Chancellor of the Exchequer, judging by his comments at the Perth conference. However, most of us want to take a fundamental look at the rating system. Legislation such as this will not help Scottish ratepayers for ever more. We must examine the system fundamentally. I hope that the Government will iron out the anomalies in the systems in England and Scotland as Scottish people feel that they are being penalised. I should like there to be just one system for the whole of the United Kingdom. The Secretary of State has time to work something out with his Cabinet colleagues. I hope that they will come up with something better than this piecemeal approach.

We were told recently at Question Time that the Government are considering how to raise local government money, whether by income tax or some form of poll tax, which would be reprehensible. I hope that the matter will be given much more thought than has been put into the Bill. I do not favour change for the sake of change. There are deficiencies in the present system, but it is better than some of the hare-brained notions that have been put about recently. I am merely asking the Secretary of State to give the matter a good deal of thought and to devise a sensible system which applies to the whole of the United Kingdom and is fair to the ratepayers of Scotland.

7.21 pm

Mr. Michael Hirst (Strathkelvin and Bearsden): I am grateful to you, Mr. Deputy Speaker, for calling me sufficiently early to enable me to host a dinner downstairs on behalf of a colleague who is not here today. I therefore apologise to the Front Benches and to the House if I am absent during the winding-up speeches.

We were led to believe that the Opposition would give this welcome measure constructive support. The support given by the hon. Member for Glasgow, Garscadden (Mr. Dewar) was somewhat half-hearted. The Opposition's new found enthusiasm for the cause of ratepayers seems a little synthetic when we consider what the hon. Gentleman's comrades are doing in Edinburgh and Stirling. Unlike him, I have no hesitation in welcoming this measure to help those who are worst affected by revaluation.

I congratulate my right hon. Friend on his success in getting money from the Treasury to provide relief. That success should be contrasted with his reception when he announced additional rate relief. The Opposition could only crib that it was a reallocation of the Scottish Office budget.

I am pleased that it has been possible to assist commercial and domestic ratepayers who were hardest hit by revaluation. It is preferable that domestic ratepayers be helped selectively as indiscriminate rate relief would not target relief on those whose rates bills are highest. I hope that my right hon. Friend will continue to take a firm line on local government spending. I have heard some councillors, who are not of my persuasion, suggesting that this is a safety net under ratepayers with the highest valuations and that they can continue to spend without conscience.

I spoke to the finance director of Strathclyde regional council last week to discover how many of my constituents will benefit as a result of the Bill. I am grateful to Mr. Paterson and his staff for digging out the information for me. In Bearsden, 421 commercial ratepayers, or nearly 30 per cent., will benefit. In Strathkelvin, 658 commercial ratepayers, or 27 per cent., will benefit. Those are the highest percentages in Strathclyde region, and they confirm that rateable values in my constituency are excessively high. I hope that ratepayers will avail themselves of their right of appeal to get justice.

The story is rather different for domestic ratepayers, 243—1·71 per cent.—of whom in Bearsden will benefit and 979—3·3 per cent.—of whom in Strathkelvin will benefit. I see that 36,000, or 12 per cent., of ratepayers in Glasgow will benefit. It is not fair for the right hon. Member for Glasgow, Rutherglen (Mr. MacKenzie) to tell the House that he knows nobody who will benefit. I cannot believe that some of those 36,000 people do not live in his constituency. I am sure that 12 per cent. of my constituents will be pleased to qualify.

Strathclyde regional council has advised me that £14·6 million will be available. I appreciate that my right hon. Friend is unable to announce the bill for Scotland, and I understand his difficulty in putting the scheme forward on the basis of insubstantial information. I am nevertheless glad that he was prepared to push for the scheme. However, it seems that there will be a shortfall which may be significant. I appreciate that eligibility should be set down in the Bill, but is the revaluation of three immutable? Could some other figure, which used up the money, be applied?

Mr. John Maxton (Glasgow, Cathcart): That is not what the hon. Gentleman said last week.

Mr. Hirst: I stand by what I said to the *Evening Times* last week when I was asked for an instant reaction to the news. I have no fear about saying one thing in Scotland and quite another here. I congratulate my right hon. Friend on persuading the Treasury to come up with an extra £50 million.

Mr. Norman Hogg: The hon. Gentleman said that at the beginning.

Mr. Hirst: It is worth repeating. I hope that it will be possible to ensure that the majority of the money is spent.

I am glad that the Bill provides for the scheme to be continued. Although it is unrealistic to expect my right hon. Friend to give commitments about spending in the future, he will have the undivided support of this side of the House if he can continue this form of relief until a replacement for rates is found. I am sure that my right hon. Friends on the Front Bench know that the burden that this year seems to be so intolerable to those who will qualify under the scheme will not be lightened next year.

There is one point upon which I should be grateful for clarification. I recognise the benefits of a simple Bill. I recognise also that certain categories will be exempted. However, I should be grateful if my hon. Friend the Under-Secretary of State for Scotland could deal with the position of the quarrying industry. I understand that quarrying is treated like any other normal industry.

However, certain quarries have experienced an enormous increase in their valuations. I understand that quarries qualify for industrial derating, but, in view of the references which have been made to legislation, I should be grateful if my hon. Friend could let me know whether the quarrying industry will qualify for relief.

Mr. Norman Hogg: I strongly support the request of the hon. Member for Strathkelvin and Bearsden (Mr. Hirst). In my constituency, the rateable value of a quarry will rise 2·9 times—2·9 being a very significant figure — from £27,000 to £77,400. I hope that the Under-Secretary of State for Scotland will answer the point made by his hon. Friend.

Mr. Hirst: One of the interesting aspects when legislation comes before the House is that letters are sent to Members of Parliament. I expect that all Members have been bombarded with letters about the Bill from the Retail Consortium and the National Federation of the Self-Employed and Small Businesses, which, incidentally, were asking for a much smaller sum than is now on offer. One of the benefits of such letters is the constant reference by the retail sector to the damage that high rates do to businesses.

During the past week I have spoken to a number of small business men, one of whom recently opened a second shop which is facing a rates increase of 96 per cent. That man will benefit from the legislation, and he is very pleased about that, but he will still be faced with a significant increase in his overheads. His comment to me was, "Well, Michael, we hoped to take on a school leaver this year, train her in the business and provide a job for another person. Unfortunately, because of the rates increase, that will probably not be possible." I took the opportunity to remind him that the lion's share of the rates increase will go to Strathclyde regional council, which is still spending £43 million in excess of Government guidelines.

Bearing in mind that comment, the Opposition seem to be showing synthetic concern for commercial ratepayers. Only a few months ago they wrote in their campaign briefing:

> "There isn't a single shred of evidence to show that rates force firms to lay off workers or deter new businesses from starting up."

I welcome the conversion of the Opposition, whether on the deathbed or not. I hope that when they return to Scotland and redraft their campaign briefing, they will be prepared to acknowledge that high rates harm the commercial and industrial health of this country.

Perhaps I ought to refer to the warped priorities of the Liberal spokesman. I am not surprised that the Scottish spokesman for the Liberal party has not had the guts to turn up today, nor that today its strength is only one eighth. Having accused the Secretary of State of adopting warped priorities in providing aid amounting to £40 million to commercial ratepayers, I am not surprised that he has stayed in his fastness of Gordon, albeit temporarily.

Even with this scheme, many of my constituents will still be paying the highest rates in the country. I echo their demand for reform. Although this measure is welcome, it represents a further tinkering with the system and is no substitute for the radical reform which all of us want. Scottish ratepayers should take note of what is said in the debate. They will clearly see that it is the Conservative party which shows real concern for ratepayers and, moreover, that the Conservative party is the only party with the political will to grasp the nettle and to introduce rating reform.

7.34 pm

Mr. Donald Stewart (Western Isles): I have only a few points to make, simply because the Secretary of State appears in the Bill to be forking out instead of clawing back. Therefore, it would be wise to take the money and run. Prior to the announcement of the rates relief which we are discussing today, the Scottish Nationalist party stressed that any relief given must be new money from the Treasury. We are glad to note that this will happen, but we are concerned that the full £50 million allocation may not be used. It would be scandalous if it were not used. Even the £50 million of relief represents only about one and a half days of Scottish oil revenues. Compared with the money pouring into the Treasury from Scotland, and compared with the amounts being spent on fortress Falklands and Trident, £50 million is small beer. It is essential that that sum of money should not be reduced.

What will happen in subsequent years? We may assume that two or three years will elapse before a major reform is seriously discussed in Parliament. At the beginning of his speech the Secretary of State omitted to deal with a point which I subsequently put, while the right hon. Gentleman was absent, to his hon. Friend the Member for Edinburgh, West (Lord James Douglas-Hamilton), namely, the enormous discrepancies between the assessments in Scotland and England. I do not agree with the right hon. Member for Glasgow, Rutherglen (Mr. MacKenzie) that there should be uniform rating throughout the United Kingdom. The situation in the two countries is different. However, the case that I mentioned earlier showed that there was a difference of 25 times between the rating of the Celtic football ground and the football ground of a team in England. Therefore, the Secretary of State ought to take into account such enormous anomalies.

As the Government have promised that the rating system will be reformed, what plans have they made to take care of the position in Scotland during 1986-87? To help to spread the benefit that may be obtained through the rebates, the qualifying level should be set at a lower figure for the increase in the rateable value instead of the three times increase which is proposed in the Bill.

I suggest that a limit of £10,000 should be placed upon rebates. This would ensure that as many businesses as possible, in particular small businesses, would benefit from the rebate. I hope that those with large revaluations will appeal before applying for a rebate. If their appeal is successful, the rebate may not be needed. More money will then be left in the kitty for those who are faced with greatly increased rates bills.

The Bill will be enacted. Nobody shoots a one-legged Santa Claus. Today, however, the Secretary of State for Social Services said that the poorest people would be obliged to pay 20 per cent. towards their rates bills. This burden will have to be borne by those who are currently in receipt of rates relief. It shows the brazen effrontery of this Government. On the day that the Secretary of State for Scotland is giving away money with the one hand, his right hon. Friend the Secretary of State for Social Services is taking it back with the other. When looked at in these terms, one sees that Santa Claus does not have a leg to stand on.

7.38 pm

Mr. Nicholas Fairbairn (Perth and Kinross): First, I congratulate my right hon. Friend the Secretary of State on having obtained a huge sum which will benefit the ratepayers of Scotland, both commercial and domestic. It is not good for the right hon. Member for Western Isles (Mr. Stewart) to pooh-pooh such a sum of money as small, when comparatively huge sums of money are spent on transport for his constituents. Indeed, at least a quarter of that sum is spent on transport in his constituency, so a little modesty might suit him better.

Mr. Donald Stewart: The highest subsidies for transport in the United Kingdom are in London, where an enormous mass of rolling stock is needed to take in commuters in the morning and take them out again at night. Expenditure on transport in the Western Isles is peanuts compared with that.

Mr. Fairbairn: I am not an expert on transport in London, but I am informed about the right hon. Gentleman's constituency. I assure him that the sums which it enjoys from other people's pockets are disproportionate to those enjoyed in any other part of Scotland.

Mr. McQuarrie: The right hon. Member for Western Isles (Mr. Stewart) should have no cause for complaint. He should remember the integrated development programme, which is expressly suited to his constituency, and which injects massive sums into the Western Isles. It would be much better to spend that money in the Grampian region, and especially in my constituency of Banff and Buchan.

Mr. Fairbairn: Yes, and if there is any left over, perhaps it could go towards transport in London.

We have seen some remarkable schizophrenia in the debate. As ever, the hon. Member for Glasgow, Garscadden (Mr. Dewar) made a fluent and cogent speech, but Socialists and Socialist authorities have always believed that the people who should be milked are those who own houses and shops and run businesses——

Mr. David Lambie (Cunninghame, South): And castles.

Mr. Fairbairn: Yes, indeed, and I think I am right in saying that it was a Socialist Government who said that ancient monuments such as myself and the house in which I live should be derated to some extent. I am grateful for that. It is strange for the Opposition suddenly to be on the side of those whom they have always regarded as the milch cows for their extravagance. Fortunately, I represent a constituency that is not of Edinburgh airport, and since Edinburgh airport is not of the capital city I have few reasons to go there, but I am horrified by the extent to which it is being defiled to advertise the extravagance in which the gauleiters of the Supreme Soviet of Edinburgh indulge.

The system of rating taxation has never been fair, and it has always amazed me that the Conservative party should have tolerated it. It is a tax on everything which we believe the humblest, the poorest, the youngest and the oldest should be able to achieve and enjoy. The buying of a house probably represents the largest expenditure that most people will ever undertake.

Mr. Robert Hughes: I am following the hon. and learned Gentleman's speech with great care. He seems to be suggesting that only property owners pay rates, but that is untrue. Those who rent properties, whether from the private sector or from local authorities, also pay rates. That must be said repeatedly, because they get no credit for their contributions.

Mr. Fairbairn: That is slightly inaccurate, because I understand that only 26 per cent. of those who pay rates do not receive some form of rate rebate.

Rates are a tax on the home, which is the centre of family life. As it is normal for an ordinary family or an ordinary human being to wish to associate themselves with the home, unless they must move home for employment reasons, or unless they become more prosperous, they will not normally wish to change their homes. Although their children may marry and move away, the family home is still fundamentally important. Therefore, rates are a tax on the most important heritable object with which we are associated. I should tell the hon. Member for Aberdeen, North (Mr. Hughes) that the more homes are merely hired from some wretched local authority, the less significant they are to the family. The greater the influence of the home and the family, the greater will be social cohesion and decency.

The tax does not take into account the ability of the occupant to pay. It is rendered on a property regardless of whether its inhabitants have a huge income or a petty one. That is unfair. It is especially offensive because domestic rating is a complete disincentive to improving one's property because one is punished for doing so. When one considers the GEAR scheme and the magnificent reconstruction of the tenements in Edinburgh and Glasgow, such as Georgie Dalry, Maryhill and Trongate, one sees that the improvement of property is a great social benefit. Therefore, it is extremely unfortunate to have a tax which is a disincentive to improvement.

My right hon. Friend the Secretay of State has frequently said that the revaluation is all the assessors' doing. I agree, but the bases upon which the assessors do it are extremely unfair, arbitrary and inequitable in practice. The assessors must try to be like Pontius Pilate —absolutely fair between Barabbas and Christ—but it does not alter the fact that, in practice, the assessors and their staffs do not visit similar houses. They do not know what the differences are. They cannot make an intelligent comparison between a newsagent in Auchterarder and a newsagent in Aberdeen or in Ayrshire. Therefore, all that has happened is that a system based on appalling inequities and contrary to all the principles of Scottish law has been demonstrated to be even more unfair by revaluation.

The myth about revaluation is that it is meant to make everything fair again. It is like saying that, in five years' time, the man who has made a million, the man who has made nothing and the man who has squandered a million will be equal.

Mr. Robert Hughes: Will the hon. and learned Gentleman give way?

Mr. Fairbairn: I have already given way to the hon. Gentleman.

Mr. Hughes: The hon. and learned Gentleman shows such appalling ignorance of the rating system that he should give way.

Mr. Fairbairn: I am sure that I cannot beat the hon. Gentleman for that.

Mr. Hughes: The hon. and learned Gentleman should know that one guideline for revaluation which the assessors are supposed to follow is generally to ensure that the revaluations do not greatly change values in one part of Scotland as against another, except in exceptional circumstances——

Mr. McQuarrie: That is not true.

Mr. Hughes: It is true. The general understanding is that the assessors should ensure that valuations increase in broadly similar bands throughout the country, except where exceptional circumstances make it impossible.

Mr. Fairbairn: I understand guidelines, and I have always been against them. I do not like the word "guidelines" and I shall give the hon. Member for Aberdeen, North an example of the effect of guidelines.

The Socialist council in Glasgow has closed down almost every business in Jamaica street. If the assessor goes there, he will say, "This looks like Bhopal after the explosion. We had better decrease the rating valuation." However, if he comes to Perth high street, or Auchterarder high street, or Blairgowrie high street, and sees that the businesses that have been driven out of Glasgow have opened up in those streets, he will say, "These look like prosperous places." When one council has been extravagant, the guidelines will penalise places where the councils have not been extravagant.

That is what happens because of the actions of the unneutral political masters of neutral assessors. Socialist councils take a sadistic view of properties and those who operate them and regard businessses as places to be looted.

Mr. Dewar: May I divert the hon. and learned Gentleman — helpfully, I hope — from his somewhat ruminative look at the rating system?

It has become clear, and will become clearer, that there will be a considerable shortfall on the payout under the Bill. It may not be £20 million, as I have suggested, but it will be substantial. What is the hon. and learned Gentleman's attitude to that? Will he be happy if £20 million of the £50 million is merely handed back to the Treasury?

Mr. Fairbairn: I have always admired the hon. Gentleman's prescience, and he has made a point which I was about to develop. My regard for his intelligence has had corroboration from his intervention.

Not only is the rating system unfair, but the Secretary of State's gallant attempts to make fair the unfairness of the revaluation will be even more unfair. Let us examine the microcosm of Braco, where the domestic rate increases throughout the village range between 25 and 40 per cent. in real terms. Not a single house will benefit under the Bill.

It is all very well to say that inflation is 5 or 6 per cent., but people facing large increases in their biggest annual bill cannot budget for or afford such extra sums. It is not the fault of the Secretary of State, but it is an unfairness which we must correct, because the people involved have bought their own homes and are doing the best for their families, but they are being punished.

Tourism is particularly important in Perthshire. Hotels and bed-and-breakfast establishments have to set their terms a year ahead. They cannot be altered because of a rating revaluation. A hotel in Comrie faces a rate increase from £7,900 to £10,000 a year—an extra £40 a week.

For those who are thirsty, let me give the example of a small company in my constituency that owns nine pubs. Prices in those pubs cannot be increased, because the Chancellor has already imposed increases of 2p a tot. To pay for those rate increases, the pubs will have to sell an extra 325,000 pints of beer, or 355,000 more whiskies. Even for the thirstiest—even for the right hon. Member for the Western Isles—that would be an awful lot of drinking. It is not a realistic burden to impose on people who are involved in tourism, which is one of our major industries.

No one is a prouder Scotsman or less a nationalist than I, but I have to say that another major unfairness is the difference between Scotland and England. For example, a six-bedroomed hotel in St. Andrews will pay £32,000 in rates, but a similar hotel in St. Albans will pay only £5,000. Those hotels are supposed to be competing for the same tourists.

The small businesses that have not quite qualified under the three factor will be hit hardest. If people's domestic rates go up, they can reduce the amount that they spend at the hairdressers or with the picture framer. The small businesses, which have already been hard hit, will be hit even harder because their customers will face bigger domestic rate bills. My picture framer has taken on a young man from the YOP scheme who is fully trained and an excellent employee. The increase in the picture framer's rates bill is exactly the same as the salary of that young man, whom he wishes to keep on. What does he have to do?

The admirable efforts of my right hon. Friend the Secretary of State will demonstrate, by the chaotic and unfair comparisons that will reflect like magnifying mirrors the idiocies of the system, a great unfairness. I urge my right hon. Friend to think carefully about whether, if there is a shortfall, the money could be used to help those who are having to pay an extra 25 to 40 per cent. on their principal annual bill. People who budget carefully cannot afford such increases and, of course, there is next year and the year after to come. I do not know whether there will be appeals under the new system, but I know that the cost of appealing to the revaluation appeal court is considerable.

Every time a defence has been made of this wretched revaluation, people have said, "The law of Scotland is different and we are proud to have a different law. It has compelled us to have a revaluation." I have an answer for the Secretary of State. Let us change the law on our own; let us not wait for objections from the Home Office, the Department of the Environment and the rest who are screaming for different systems because their empires are affected. Let us just have a new system in Scotland. Let us show them. After all, we have shown them how to deal with football hooliganism and a whole lot of other things recently.

Let us have a new rating system set out in the Queen's Speech for Scotland only, and if England thinks that it is a rotten system it need not follow us. Let us do what suits Scotland, because the penalty for the system that we have, the revaluation that we have done and the extravagance of the councils is that many businesses will go to the wall and many families will not be able to pay their principal bill. So let us tackle the problem ourselves. I congratulate the Secretary of State, but let him go further and do for Scotland what ought to be done for Scotland. Let England do what it wants in its own time.

Mr. Deputy Speaker (Sir Paul Dean): Mr. James Wallace.

8.1 pm

Mr. James Wallace (Orkney and Shetland): I shared some of the conclusions——

Mr. Robert Hughes: On a point of order, Mr. Deputy Speaker. At the risk of incurring your displeasure, I should like to say that, while members of minority parties have rights, so have majority parties. So far only one Back Bencher from the majority party in opposition, the Labour party, has been called.

Mr. Deputy Speaker: I hope that the hon. Gentleman is not criticising the difficult job that the Chair has in calling hon. Members to speak. Mr. Wallace.

Mr. Wallace: While I agree with some of the conclusions reached by the hon. and learned Member for Perth and Kinross (Mr. Fairbairn), I do not agree with some of his reasoning. However, the time is ripe for the rating reform that he called for. I agree that there is no reason why Scotland should have to wait for England to catch up.

I welcome the legislation, although it does not contain everything that one would wish to see. None the less, it is generally to be welcomed. As might have been expected, there has been some self-congratulation on the Government Benches. It would be churlish not to acknowledge the success of the Scottish Office in prising a significant sum out of a Chancellor of the Exchequer who is not renowned for his open-handed generosity. Indeed, it is reassuring to know that if an argument is good enough, and if the Secretary of State fights his corner, new money can be found. I am sure that that message and particularly the fact that the Secretary of State fought his corner will have been noted by the teaching profession in Scotland.

Equally, if self-congratulation is fair on Conservative Benches, Opposition parties, too, can take some of the credit for keeping up pressure on the Government to make some of the changes. It is only fair to say that my hon. Friend the Member for Roxburgh and Berwickshire (Mr. Kirkwood) and other of my right hon. and hon. Friends, even before the full effect of revaluation on the commercial sector dawned upon the Government, were making representations. Those have been continued both in correspondence and on the Floor of the House.

I wish the Bill a fair wind and confirm that we shall co-operate in getting it on to the statute book. It is not the Opposition's role to be blindly uncritical of what the Government are doing. My first point of criticism is that to date we have not had a reassurance that the additional money will be forthcoming next year or in subsequent years of the present quinquennium. The rates that will be levied in forthcoming years will be based on the same rateable values that are causing concern and anxiety this year. The only idea as to future plans that we have had was given by the Chancellor of the Exchequer at the Scottish Conservative conference, in the passages that the hon. Member for Glasgow, Garscadden (Mr. Dewar) quoted. He hinted that he would be reverting to his more typical tight-fistedness. Without the reassurance that that sum will be repeated in future years, what is being offered to the ratepayers, particularly to the commercial ratepayers, is not so much a lifeline as a short stay of execution.

When I met several retailers in my constituency last month, what caused them considerable anxiety was not simply the size of the rate increases that they faced—some were about 600 or 700 per cent. — but the uncertainty about whether the Government would provide relief for them. They had business decisions to make. They had to decide whether to cut staff and what overheads could be cut or dispensed with. Some of them even had to consider whether they could continue trading at all. At that time such decisions could be made only tentatively. It might be fair to excuse the Government this year for some delay as they assess the situation, but if we are to treat our small business sector with proper respect we cannot impose the same uncertainty on it next year. The hon. and learned Member for Perth and Kinross made that point graphically in the examples that he gave.

Many small business men are operating on narrow margins. Their rates bill, particularly after revaluation, forms a large part of their annual expenditure. If small businesses are to exercise financial responsibility in budgeting and planning ahead, and if they are to show the enterprise that many of us would like to see, it is only fair that they should know at a relatively early stage where they stand vis-à-vis next year's rates bill. We should like reassurances from the Minister during the passage of the Bill. If that is not possible, I think that it would not be unfair to seek an announcement — a favourable announcement—before the summer recess, or, at least, early in the autumn.

My second point is about qualification for payment. There is no doubt that the across-the-board approach that has been adopted has administrative simplicity. No doubt some of the larger chain stores are adversely affected and feel the pinch of rate increases, but they are not affected in the same way or threatened as much as several of the smaller businesses. Larger chain stores with branches in many towns throughout Scotland could reap the benefit many times over, whereas small businesses that fail to qualify under the multiple of three would not receive any assistance.

Mr. Fairbairn: While I agree that chain stores will have more resources, stores that have moved into country towns, which will be operating on much smaller margins, and which have had huge increases, must ask themselves whether they will stay there. Again, that has a big impact on local employment.

Mr. Wallace: I take the hon. and learned Gentleman's point that in many smaller towns the introduction of those stores has been worthwhile, and their head office will have to consider the matter. However, many of the larger stores could qualify for assistance, and the viability of many such stores is not threatened, so there appears to be some rough justice. One might have to consider the cut-off point and whether it should be linked to the number of premises, and what the total amount should be that any firm throughout the length and breadth of Scotland could claim back as a rebate.

In introducing the Bill, the Secretary of State admitted that there would still be higher rate bills for several domestic and commercial ratepayers throughout Scotland. He said that the Bill would not necessarily help them. High rate bills will be faced by many who qualify for assistance, and particularly by those who just fail to qualify. I have a list of the revaluation and rate payment increases of many of the retail outlets in the Shetland part of my constituency. There are rateable value percentage increases of 300 per

cent., 500 per cent., and 600 per cent. Many, indeed all of those outlets will qualify for assistance under the Bill, and I am sure that they will be grateful for it. Nevertheless they will still be paying a substantially higher amount in rates this year than last year. The same applies to the Orkney part of my constituency, where people face rate bills that are 30 per cent., 40 per cent., and 50 per cent. higher, which is many times the average rate of inflation.

The Secretary of State and other Conservative Members have tended to put the blame for increased rate bills, as opposed to what may be attributed to revaluation, on high-spending authorities. However, it is not many months since the Secretary of State, from the Dispatch Box, praised Orkney Islands council for having kept within guidelines. Yet commercial and domestic ratepayers in Orkney are also having to pay considerably higher rates this year. That cannot be attributed to a high-spending authority. It can be attributed in part to the reduction in central Government assistance and, in some cases in my constituency, to derating of external plant and equipment. This has resulted in a multi-million pound handback of money which would otherwise have been paid by the oil companies. The oil companies will not feel the pinch if they do not have that amount of money. I am sure that many ratepayers in my constituency would have benefited far more if that derating measure had never been taken, for the spurious reason that it would bring Scottish law into line with English law. It did not do that. Indeed, should one attempt to bring Scottish law into line with English law? The measure has had a serious impact on rating levels in Orkney and Shetland. Oil companies have benefited at the expense of smaller businesses and domestic ratepayers.

What happens if the Government do not use the £50 million that has been set aside for this purpose? I join with those who say that the balance should be applied to give relief to ratepayers and should not be handed back to the Treasury. Perhaps a sliding scale should be introduced for those who pay the highest increases. Perhaps there should be a sliding scale for those whose rate increases are between 2·5 and 3 times the previous level so that that important sector of the small business community is given some relief.

The exemptions in clause 1 mean that the whisky industry will not receive any advantage in the Bill. Conventional wisdom has it that the industrial sector has benefited from revaluation. Indeed, the cut in derating occurred in the light of that. Nevertheless, the whisky industry seems to be an exception to the rule. Revaluation generally has increased the amount of cash that is paid. The Scottish Whisky Association claims:

"Revaluation has increased the amount of cash paid in respect of rates on distilleries and warehouses by an average of 36 per cent."

In my constituency, there has been one cash increase of 100 per cent. and an average increase of 82 per cent. The average increase in the Lowlands is 75 per cent. and on Speyside it is 41 per cent. These high additional sums must be found in an industry that cannot be said to be prospering.

The Chancellor made a specific point in his Budget statement of helping the industry by pegging the duty on whisky to the inflation rate. He recognised the industry's plight. Although that measure was welcome, it was not enough, especially after the abolition last year of stock relief. The increased rates are a further substantial blow. I have written to the Secretary of State about it. I know that the Under-Secretary of State will look into the matter. Has the hon. Gentleman been able to make any progress in providing assistance to this important industry which makes a valuable contribution to the Scottish economy?

The Bill underlines the extent to which radical reform of our rating system is needed. I welcome the fact that the Government have again put reform of the rating system on the agenda. It is no secret that my right hon. and hon. Friends favour a system of local income tax, especially one that is made more administratively easy with computerisation. In the past, we have heard pledges to reform the rating system. Today we have heard a more specific statement, that a proposal will be brought forward by the end of this year. I recall reading about Ministers making the same statement at the Dispatch Box about the road equivalent tariff. We were told that it was a complex matter involving many problems but that the Government would come forward with a solution at the end of the year. That statement was made in 1981 and 1982 and, eventually, in 1984 the Government told us that they had examined the problem and had decided to do nothing. Many of us fear that we are slipping into a similar pattern with rates. My right hon. and hon. Friends will continue to press the Government to ensure that, this time, they meet their commitment to undertake the much-needed and long overdue reform of the rating system.

8.14 pm

Mrs. Anna McCurley (Renfrew, West and Inverclyde): I am happy to congratulate my right hon. Friend the Secretary of State for Scotland on the speed of his response to the most pressing problem for Scottish householders and small business men. The amount that my right hon. Friend has given during the past few months is no small beer. He began his measures when it was obvious that revaluation would affect ratepayers. He increased by £19 million the domestic element of rate support grant provision, increasing domestic rate relief from 1p to 5p in the pound in post-revaluation terms. Subsequently, an additional £38·5 million was granted. We now have a total rebate of £50 million. I hope that the Government guarantee that amount.

The actions of the Secretary of State have finally convinced the Government that rating reform is necessary. I refute the challenge of the hon. Member for Glasgow, Garscadden (Mr. Dewar) that this is just a matter of expediency. It is a matter not of expediency but of commitment. The Government have always been committed to rating reform and assisting the ratepayer. If anyone should be thoroughly ashamed of expediency it is the Opposition, who talked earlier about devolution and the establishment of a Scottish assembly. They know that, during the 1970s, that was their expedient response to what was happening in the Scottish national camp at that time.

I hope that the firm stand taken by my right hon. Friend the Secretary of State means that many of the small businesses in my constituency will remain viable. Many shop doors have already closed. I hope that some, which were about to take that step, will remain open. It cannot be assumed, however, that this relief which is offered in part to commercial enterprises will serve to assist all these people. That worries me greatly because, although the proposals will have great merit, we must take account of the fact that those to whom the multiple factor of three does not apply will still pay much more than last year. There are some small businesses in villages in my

[Mrs. Anna McCurley]

constituency that cannot tolerate the excessive increases of the past year. It is less noticeable in the cities when premises change hands or shut down, but when shop premises in villages and small towns lie empty or are neglected because rates are too high there are deleterious effects on the spirit and fabric of life in those areas.

I am pleased that additional finances will be given to help householders. Although there was exhilaration at the press conferences because of the announcement of help to our commercial firms, some individuals were still reticent about the measures. Domestic ratepayers are still paying a great deal more than previously. The real problem occurs when rates are of more worry than markets. Even the choice of moving down market is closed to many because of the sheer costs of moving.

Another problem which I have encountered goes slightly beyond the terms of the Bill. I have discovered on travelling round my constituency that the arbitrariness of these increases in rateable values has been remarkable.

I want to explain how the assessor was completely out of touch with the accurate position for one of my constituents who had established a small market garden business. It will take two or three years to get the business going fully, and during that time he will receive subsidies. Surely that should explain to any assessor that agricultural premises are involved. But no, the assessor demanded that my constituent pay rates on his property being classed as a luxury bungalow. I do not know how many hon. Members know my constituency, but it includes a few areas with so-called luxury bungalows. The bungalow in question is in a conservation area, and meets the minimum standards required. It has three rooms—two bedrooms—and houses two adults and a child. That hardly constitutes a luxury bungalow. When my constituent challenged the valuation and told the assessor that a much larger house up the road had been given a lower valuation, the assessor uprated the valuation of the other house. That caused fearsome strife in the village.

Assessors do not appear to know the difference between a garage and a store. My constituent was angered when, having demonstrated that the shed next to his house was not a garage, he was told, "That is only because you do not choose to use it as a garage." That is ridiculous, because the shed is used to store his business equipment.

Mr. Michael Forsyth (Stirling): I am intrigued by the use of the term "luxury bungalow." I have experience of assessors talking about good and bad areas. Does my hon. Friend share my concern that there is a little too much subjectivity creeping into assessments because there is no rental evidence? I wonder what rental evidence there is for the sort of place that she has described.

Mrs. McCurley: I could not agree more with my hon. Friend that an element of subjectivity looms large in assessments. I hope that my right hon. Friend the Secretary of State will take that point on board.

I am disappointed that my right hon. Friend the Chancellor of the Exchequer is not here this evening. When he was at Perth, he took credit for the new money that had been made available. It would have been nice had we had the opportunity to thank him — and also to remind him that until there is a new rating system he must honour in full the commitment to the ratepayers embodied in this Bill.

Under the Bill, the Secretary of State can continue the scheme, and will no doubt wish to do so during the next few years of the quinquennium. I wish him all the best in determining the allocation of resources. I hope that the Treasury appreciates the seriousness of the position for ratepayers in Scotland. No doubt the dexterity demonstrated by my right hon. Friend will hold him in good stead. However, I admit to having the same concern as that expressed earlier by my hon. Friends about whether the full £50 million allocation will be used. I am not as scrupulous as my hon. Friend the Member for Strathkelvin and Bearsden (Mr. Hirst). I would use any surpluses for additional relief for commercial ratepayers.

I am worried that we are asking Scottish authorities to administer the cost of the rebate, which will amount to about £1 million. It is not a great deal of money, but a principle is involved. Perhaps the bulk of that financial burden will be placed on the more prudent authorities, some of which are Conservative controlled. I am aware of the deep division between local government and central Government about continuing financial restraints. However, I remind the House that only one third of the increase in rates concerns revaluation, while two thirds arises because of excess spending by local government. I want the rift to be healed so that we can obtain co-operation from local government in being accountable for its spending, and not simply using the prevailing conflict to be bloody-minded at the expense of the ratepayers.

I have more respect for local authorities than simply to regard them as purveyors of bins, bogs and burials—indeed, I have served on a local authority—but I wish that they would confine their activities to those for which they were established. I have a dossier of what I would term political abuses by local authorities amounting to many thousands of pounds. It upset me when the Opposition quibbled with my hon. Friend the Member for Edinburgh, West (Lord James Douglas-Hamilton) when he mentioned that. Since May 1984 the city of Edinburgh district council has made political use of council funds amounting to more than £70,000. That includes donating money for public meetings on behalf of the Chile Democratico. That may be legal, but there is something very wrong when most of the councillors were elected not to act as the next Secretary of State for Defence, but to ensure that bins were emptied and roads were repaired. It appears that the Labour candidates' selection process now throws up the type of councillor who believes that his mandate makes him responsible for national defence, foreign affairs, civil liberties, national if not global ecology and anything else one can name.

If we are to believe the constant call of the Left—that housing is in an awful state, that education is being decimated and that cuts in finance are causing hardship — it is reasonable to inquire how Labour councillors find the time to take on national tasks. It is difficult to explain to an electorate how they can attend the second international nuclear-free zone conference in Cordoba in Spain but not find the time to attend a tenants' association meeting. That is particularly hard as the Cordoba conference lasted only three days, but many of the Scottish Labour councillors stayed there for a week—no doubt at the ratepayers' expense.

Mr. Robert Hughes: I accept that there are differences of opinion about what should and should not be done by councillors, but if the hon. Lady is suggesting that certain

councillors received expenses for staying in Spain longer than was necessary, I hope that she will name them and take to task the financial officers of the local authorities that sanctioned such expenditure.

Mrs. McCurley: I shall happily take on that task.

The new breed of Labour councillor — [HON. MEMBERS: "Name them."] As I said, I shall be happy to take on that task. I shall be in correspondence about that matter.

Mr. Robert Hughes: That is not good enough. The hon. Lady should be prepared to substantiate her charge with names, dates and local authorities, either in or outside the House. She should not make a general smear on councillors which goes far beyond the reasonable partisan politics of this House.

Mr. Bill Walker (Tayside, North): My hon. Friend will be aware that I have in the past done exactly what the hon. Member for Aberdeen, North (Mr. Hughes) has been asking for. I have reported to the local authority auditor the city of Dundee and its councillors. Had they not stopped doing what they were doing, they would have been prosecuted. They had been printing a news sheet and did not even—*[Interruption.]* The principle is the same, and the hon. Member for Falkirk, East (Mr. Ewing) knows it. He has friends serving on councils who do not always obey the law.

Mrs. McCurley: I should like now to continue with my own contribution.

The new breed of Labour councillor is quite prepared to spend ratepayers' money to further his own causes. That is sad, because many decent people in the old Labour party are now prepared to support some of the nonsense on which Labour councils are spending our money. It is obvious that local authorities are finding legal ways to fund organisations which support their own political viewpoint. In that way, those councillors enjoy benefits which are not available to their political opponents. That gives them a clear advantage in financial terms and also in regard to the scale and effort of any campaign. If little or no time is required to organise funds for a campaign, more time and effort can be devoted to the campaign proper. It seems to be only the Left that is abusing the system at present. However, if no action is taken, it is likely that before too long every party may start to make use of this new system of finance. That is why it is extremely important to alter the rating system to exclude those abuses.

It is to be hoped that the findings of the Widdicombe committee will strengthen the demand to ensure a fairer and more democratic system, and one which reflects the proper functions of local authorities. If local authorities behave themselves, we might just be able to manage with the system that we have; but as they have abused the system, changes are now urgent. Any money that we expend at the moment to help our hard-pressed ratepayers will be reimbursed suitably in the future when those changes are introduced and implemented.

8.34 pm

Mr. Robert Hughes (Aberdeen, North): I very much regret the fact that the hon. Member for Renfrew, West and Inverclyde (Mrs. McCurley) made such disgraceful allegations of illegality without one shred of evidence to back them up. It is no use the hon. Lady waving a news sheet which she has received from the Conservative Central Office.

Mrs. McCurley: It is not a news sheet.

Mr. Hughes: If the hon. Lady has names of councillors who she believes have broken the law with regard to expenses, she has a duty to name them, either in this House or outside it, otherwise she is an accessory after the fact in breaching the law.

Mr. Fairbairn: Will the hon. Gentleman give way?

Mr. Hughes: No.

Whenever Conservative Members have an inadequate case, they use the grossest smears to cloud the issue. I thought much more highly of the hon. Member for Renfrew, West and Inverclyde before she made her speech. I hope that she will do me the courtesy of naming names, or withdrawing her general allegation.

Mr. Fairbairn: The hon. Member makes a strange case. Socialist councillors went to Cordoba for a fatuous conference which had nothing whatever to do with local government. If a councillor can get to a place such as Cordoba at the expense of the ratepayers, it is not very expensive for him to have a holiday while he is there.

Mr. Hughes: With respect, that is not what the hon. Lady said. Her allegation goes much wider and much deeper than that.

Mr. Henderson: Will the hon. Gentleman give way?

Mr. Hughes: No. Several of my hon. Friends want to take part in the debate, so I must get on with my speech.

There has been a general welcome for the Bill, in so far as it helps commercial and domestic ratepayers, and I share that general welcome to some extent, especially as it is now clear from clause 1 that it is at least possible for the rebates to continue for more than one year if the Secretary of State thinks fit. The Secretary of State was pressed on that issue, very largely by the Opposition, and eventually the provision appeared in the Bill. Whether he will allow the rebates to continue after next year is another matter. I suppose that, even if it is for only one year, we should be grateful for small mercies, but there is one vital question that must be answered by the Secretary of State.

As the £50 million—whether it is used this year or not is not the point at this stage—is available as new money this year, is it committed for as long as the transitional system lasts, until we have a new rating system, or are we to revert next year to £20 million, £30 million or £40 million being removed from the health budget, the education budget, or some other budget to meet the demands of the rebate system? The Secretary of State must give a clear answer to that question. Unless we have a clear answer, he will be guilty of deception. He has our consent for the Bill to go through without challenge, on the basis that it is to last for a considerable time. I hope that he will put our minds at rest on that.

Mr. Michael Forsyth: Will the hon. Gentleman give way?

Mr. Hughes: No, I must continue with my speech.

I am sorry that the hon. and learned Member for Perth and Kinross (Mr. Fairbairn) is not here. He pontificated about the rating system and seemed to labour under the illusion that only house owners pay rates. When I

[Mr. Hughes]

challenged him on the point and told him that all householders were eligible to pay rates and were eligible for assessment, his reply was that most of them live in local authority houses and do not pay rates because they get a rebate. That showed that the hon. and learned Gentleman knows little or nothing about the system. All householders are eligible to pay rates. The fact that some of them do not pay full rates and that some of them pay no rates is a reflection of their circumstances.

It is interesting that in the statement by the Secretary of State for Social Services today he pointed out that 7 million householders receive some help with rate bills and that 3 million householders pay no rates. That simply reflects the poverty of people. The Secretary of State is to compound that poverty by saying that everyone now has to pay a minimum of 20 per cent. of his rates. Where is the compassion and the care that we hear so much about from the Government? They are making the poorest of all people—those who under their system cannot afford to pay any rates whatever—contribute at least 20 per cent. The contempt of Conservatives for local authority tenants is revealed by the way in which they speak about ratepayers as though ratepayers were only those who own their own property, and deny any rights whatever to those who are in rented property.

Before coming to the generalities of the Bill I have one or two technical points to make. I understood the Secretary of State to say that automatically local authorities will examine all ratepayers in their area and decide whether they are to get a rebate under the Bill, and that ratepayers will not have to make application for it. I wonder how that is to be done. It will be a major administrative task. I do not see how it can be done within the cost of £1 million that is mentioned in the Bill. It is grossly unfair that local authorities should be expected to meet the administrative cost.

The difficulty arises very largely because the balance as between one class of ratepayer and another has been disturbed. The Secretary of State comes to the Dispatch Box and blithely tells us that there has been a change in the relative gross annual values. The reason why the industrial ratepayers' gross annual value has gone down is that business is in such a parlous state. That is the state to which the Government have reduced industry in Scotland, and it is not able to pay the share of the rates that it used to pay.

The Secretary of State should re-examine the timing of the Bill. It does not come into effect until two months after it has been enacted. He cannot produce a statutory instrument until the Act has been brought into force. That means that we shall not see an order—an affirmative order according to the Bill—until the middle of the summer recess. The House has never been known to sit beyond that glorious day, 12 August, and therefore it will be September or October before we return to this matter. We shall be at the end of the financial year before the right hon. Gentleman tells the local authorities what the rebates will be and before they are paid. That is nonsense.

I reiterate what my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar) said. The Bill is supposed to deal with an abnormal situation and is to be passed at great speed. I therefore do not see why the Secretary of State should not bring the Bill into force at great speed.

If all the values had remained relative one to another, and if the proportion paid by industrial, commercial and domestic ratepayers had remained broadly in balance—I do not know how three different things can be balanced, but never mind—the rates paid by the different classes of ratepayer would have been much the same but for rate increases. I accept that.

The problem is that we have all been aware for a long time that the rating system provides rough justice. It is not fair. The system has been generally palatable because it has meant that rates have not been increasing enormously. The problems of the rating system have been accentuated by two factors. The first is the greater demand on and greater responsibilities of local government. I reject the idea that local government has somehow decided to spend as much money as it can just because it wants to spend more money. That is not true. Local authorities spend more money because they have greater responsibilities to meet.

The second reason why the problems have been compounded is the inexorable reduction of the central Government share of financial support.

I hope that we shall have a general debate about the future of the rating system, long before the Government are ready to produce a Green Paper. Whatever the faults of the rating system—I accept that it has many, and I could speak for an hour on its different faults—the one advantage it has is that local authorities are reasonably certain about their income. With local income tax, sales tax or some other such system, a local authority will not know what its income will be. It needs some certainty, and a least the present rating system provides that.

The certainty of income is diminished by the way in which the Secretary of State constantly revises his provision downwards. I saw the Secretary of State for Scotland on "Weekend World" a few weeks ago. It is not often that I pay compliments, but I am bound to say that he dealt with the difficult situation extremely well. He defended his case well. One of the most significant concessions that he made on that programme was that he accepted that there had to be an element of central Government support to provide for local authority services. At the heart of the argument about the rating system—the provision for people and the amount of rates to be paid—is the size of that element. So long as central Government reduce their element of the provision, the more rates paid locally will have to increase. That is an obvious truism. That is the main reason why we have problems.

There must be a great deal more planning and thought than has gone into the Bill. Local government is there to provide a service. I do not defend abuses in local government or those who spend money illegally. I do not concede the case made by the hon. Member for Renfrew, West and Inverclyde and all the other hon. Members who go on about "political purposes". The actions are legal, but even if I were to concede that they may be inadvisable, which I do not, the amount of money involved is a small proportion of the gross amount of money paid by local authorities. That is not the problem.

The problem is that neither the Secretary of State nor any of his hon. Friends has ever said a decent word about local councils and the needs that they have to face. Instead of being constantly at loggerheads with local government, the Secretary of State should be in constant dialogue with it about providing for people's needs. The Government are

not interested in ratepayers. They are interested only in one class of ratepayer. They are not interested in the services that ratepayers expect to receive — decent housing, education and other local services. All that the Government wish to do is to whine about the rates, but the objective of local government is to provide the best services available for those in need. I commend local government for that.

I wish that the Government would pay tribute to the many local councillors who give hours and hours of their unpaid time and in many cases sacrifice their careers merely to receive brickbats, and not commendations, from Conservative Members, who should be ashamed of their narrow-minded and bigoted attitude towards local government.

8.46 pm

Mr. Michael Forsyth (Stirling): May I say to my right hon. Friend on behalf of 3,100 domestic ratepayers and 700 non-domestic ratepayers in my constituency who will benefit from the Bill, for this relief much thanks. Businesses in Callendar blazed the trail for an event which turned out to be happening in other parts of Scotland such as St. Andrews and elsewhere.

We must be clear tonight about what the Bill is about and what it is trying to achieve. It is not about reducing the excessive rate burden that ratepayers have to face. It is about protecting those people who have found themselves with a completely unexpected and sudden increase in their rates bill which they cannot meet. There is a clear distinction there. There are many people with large and intolerable rates bills whose rateable values will not have increased more than threefold.

Opposition Members have ritualistically asked about what will happen next year and whether my right hon. Friend the Chancellor of the Exchequer will be the bogy-man or whether my right hon. Friend the Secretary of State will be St. George, or perhaps St. Andrew, on his charger and win the extra £50 million. There is no reason why the scheme could not be continued next year and be funded from the overall rate support. I commend that to my right hon. Friend as a possible way of dealing with the problem.

May I also thank my right hon. Friend for having acted against Stirling district council? He has required it to rebate 3p to the ratepayers in my constituency because of its outrageous proposal to keep council house rents well below the Scottish average and to ask ratepayers to foot the bill. It is a matter of deep regret to me that members of the Labour party—I assume that the people who run Stirling district council and Opposition Members who seem to have found sympathy for the ratepayer are in the same party—propose, if I am to believe what I read in the *Stirling Observer*, to obtain counsel's opinion and go to the courts, no doubt at vast expense to the ratepayers, to try to stop that 3p rate being returned to the people in whom Opposition Members have shown such great interest.

The other argument we have heard has been about the rate support grant and the fact that reductions in rate support grant are to blame for the problem. I hope that I shall be forgiven for being parochial and talking about my constituency, but the cuts in rate support grant in Stirling have occurred because of the financial irresponsibility of the district and regional councils. They have decided to spend vast sums. We have heard about trips to Spain but my lot seems to go on trips to eastern Europe. The Central region has spent £10,000 on a brochure to tell everyone what a marvellous job it has been doing over the past 10 years. Stirling district council is spending £100,000 a year on a scheme which is called "Stirling Future World". It is a world that is very much in the future and far removed from the real world. The authority has given more than £250,000 to miners in the region and more than £150,000 to those in the district.

Mr. Henderson: Fife has given £2 million.

Mr. Forsyth: My hon. Friend the Member for Fife, North-East (Mr. Henderson) reminds me in an aside that Fife has given £2 million to the miners. The authorities have made these donations despite the fact that they are overspent on their budgets and incurring penalties and loss of grant that amount to 85 per cent. for Stirling district council and 75 per cent. for the regional council.

There are those who argue that my right hon. Friend the Secretary of State for Scotland has been ungenerous. I remind them that he could have taken much more back in reduced rate support grant. He gave every local authority the opportunity to reduce its spending and thereby to get its full rate support grant entitlement. To be fair to the Central region, from being £3 million in excess of its budget it has managed to reduce that sum to about £900,000. Last year Stirling district council started off with £600,000 in the bank and at the end of the year was £600,000 in debt. Its rent subsidies and spending beyond its budget have led the council to seek a rate of 23p whereas it should be only 18½p, as Conservative Members have said. That rate could be set without cutting £10,000 a year on the women's committee and all the other items that are the symbols of the Left. The loss of rate support grant in my patch is due entirely to local government extravagance.

The hon. Member for Glasgow, Garscadden (Mr. Dewar) tried to explain that he was against the consequences of revaluation. He told us that he considered revaluation a good idea at the time but added that there has been too much chopping and changing and that he now wants to be certain of the current position. I am sorry that the hon. Member for Dundee, East (Mr. Wilson) is not in his place. I enjoyed reading the report of his recent speech, in the course of which he argued that Scotland would be disadvantaged if revaluation did not take place. He cited England as an example, and said that Scotland prides itself on quinquennial revaluations.

It is rather disingenuous always to seek to place on the front pages of newspapers examples of Scotland at a disadvantage when set against other parts of the United Kingdom and to fail to draw attention to examples of differences in Scottish law that do not suit popular opinion.

I hope that my right hon. Friend will recognise the injustice of the position that we now face. In the past only a tiny minority have been able successfully to appeal against the rateable value of their property. Thousands appeal and only hundreds are successful. The successful appellants tend to be those who employ expensive professionals, who know all the tricks. If an ordinary man cannot pay his rates bill, he has only the prospect of embarking on a long and arduous appeals procedure and the incurring of professional fees without any guarantee of success at the end of the day. As my hon. Friend the Member for Renfrew, West and Inverclyde (Mrs. McCurley) said, he will have the prospect of never having

[Mr. Forsyth]

his neighbours speak to him again if his appeal is successful because the consequence of that will be an increase in their rates. The appeal process is a daunting task and is one upon which the majority are unwilling to embark, for understandable reasons.

Assessors are answerable to no one and those of us who have been involved in correspondence with them recently have had that fact underlined effectively. The rental evidence on which they supposedly make their judgments is non-existent, thanks to the Rent Acts, which we hope the Government will find time to deal with during the next Session. It is too often said, for example, that Falkirk is a bad area and Killearn is a good one and consequently rateable values in Killearn were increased accordingly. Why is it that council houses in my constituency have incurred an average increase of 2·57 times whereas the average increase in the private sector is 2·75? I hope that the assessor is not using the rental evidence that is produced by the fact that council house rents are depressed as a result of subsidies that are paid, in effect, by ratepayers in the private sector because their properties' rateable values have been increased.

How do we explain the extraordinary differences in rateable values throughout Scotland? A massive number of businesses and domestic ratepayers are benefiting in the Borders, for example, but other areas have benefited to a lesser extent. Are we to conclude that the assessor for the Borders made a terrible mistake last year or that the Borders region is booming and that there has been a sudden hike in rents? There is no evidence to support the second theory. Either the assessor got it very wrong this time or he got it very wrong last time. None of us can say what has happened because none of us can obtain the criteria on which the assessor acted in the first place.

Injustice is done to those in my constituency who have seen the rateable value of their property increase by more than 2·4 times. I was canvassing in Stirling on Saturday and in doing so I was knocking on doors of newish houses. Many of these houses were about 10 years old. I found that they had rate bills of £800, £900 or £1,000. When I told colleagues who represent constituencies south of the border about this, they were stunned. They thought that I was quoting exceptional examples. Such rate bills are intolerable and we must not fool ourselves into thinking that because we are dealing with the problem facing those who have been exceptionally hard hit we are dealing with the basic problem.

There are a number of specific issues within the compass of the Bill which worry me. These include the anomalies to which the hon. Member for Garscadden rightly drew our attention. I understand, for example, that if I erect a new sun lounge, conservatory or extension, it will be rated in the following financial year. If there are two houses that are identical in every respect, one of which has had its rateable value increased by three times and the other by three and a half times because of the sun lounge that was built in the previous year, the owner of the house with the sun lounge will qualify under the scheme and enjoy a 100 per cent. rebate whereas the owner of the other property will not. Such a result would be intolerable. I hope that provision will be made in the statutory instrument for real changes arising out of revaluation and that the measure will not restrict itself to additional building works, for example.

What is the position when there is a change of use, from industrial to commercial, for example, that involves the 40 per cent. derating? If a factory becomes a warehouse and the owner loses the benefit of 40 per cent. derating, will that be regarded as a rating increase of more than three times? Surely that would be wrong. Worse still, what about the new housing estate with identical houses, some of which have been occupied prior to 1 April, and where rateable values have increased following that occupation by more than a factor of three? People who buy the identical house after 1 April will not get the rebate received by the neighbour who moved in prior to the new rule coming into effect. What is worse, assuming the scheme continues, when the person who benefits sells the house, the house will continue to be eligible for subsidy. Therefore, two people in identical houses will pay different rates because of the scheme. I hope that provision will be made to deal with that anomaly.

I am not a great champion of hunting, shooting and fishing, but I have those interests in my constituency. I understand that the present practice is for beats on rivers and shooting interests to be lumped in aggregate and rated as a whole. Can people who have found that the aggregate has increased by 2·9 times on six or seven stretches of a river say that on one stretch it increased five times and on another two times? What is the position of the assessor? Can those people ask for information on each individual beat, and would they qualify?

It is unusual for me to speak in defence of local government, but if we have this scheme, is it fair to ask local government to bear the administration and manpower costs? We cannot continue to tell local government to cut its cloth yet give it extra duties without making resources available. It is also unfair to the ratepayers who will not qualify for support because at the end of the day they will have to meet the bill for paying the extra allowance to more lucky neighbours and fellow citizens.

I ask the next question in the expectation of receiving an answer to it on Wednesday. Will my hon. Friend tell me what the effect has been of the Valuation (Deductions from the Gross Annual Value) (Scotland) Order 1984? I understand from the regional assessor that it has altered the tables so that the difference between the gross annual value and the net value has been reduced because the allowance for maintenance on higher rated property was reduced and the allowance for maintenance on lower rated properties increased. I am told that the net effect—I would be grateful for my hon. Friend's guidance on this—is that in villages in my constituency, such as Killearn, the effective amount knocked off the rates, in crude terms the rateable value, was reduced, which adds about £75 a year to their rates bill. Could we re-examine those tables, and offer some help?

My final point relates to the scheme. It is complicated, although I accept that it is as simple as is possible. It is vital that it is well publicised and that people understand what their rights are and what the effects of revaluation have been. My hon. Friend should counter some of the propaganda that has been funded at ratepayers' expense —the misleading attempt to blame overexpenditure and extravagance on revaluation — by setting the facts straight and explaining how the scheme will help ordinary domestic ratepayers. Far be it from me to incite my hon. Friend to indulge in political propaganda at taxpayers' expense. The Civil Service, unlike local government, has such high standards of professionalism that it would not

allow him to get away with it, if he were so inclined, which I am sure he is not. Has my hon. Friend thought of delivering through every letterbox a leaflet explaining the scheme and its background? That would help those of us who seek to do that through correspondence.

The rating system has always been unjust, and the burden has now become intolerable. I have people who are now putting their houses on the market because they cannot pay their rates bill. We must regard the Bill as a palliative, and proceed urgently to get rid of the domestic rating system altogether and to tackle the problems facing commercial ratepayers. If we do that, we shall receive the widespread support of Scottish people, whether their local authority bills are higher or lower than at present. There is widespread recognition that the present system is unjust. In bringing the scheme into being, I hope that my hon. Friend will try to minimise the injustices and anomalies that we face.

9.4 pm

Mr. David Lambie (Cunninghame, South): Unlike the hon. Member for Stirling (Mr. Forsyth), I am here to speak not on behalf of my constituents who this year are facing massive rates increases and who will not benefit one iota from the Bill, but on behalf of the small number of my constituents who will benefit, and for them I am grateful to the Government.

This is the Government's second attempt this year to deal with the effects of revaluation. Had they taken my advice at the end of last year and halted the 1985 revaluation before it was announced, we would not be wasting the time of the House dealing with the £38·5 million given to domestic ratepayers or the £50 million that will be given through the Rating (Revaluation Rebates) (Scotland) Bill.

It was all very well for the Secretary of State for Scotland to ask the Labour Front Bench their opinion on revaluation. He should be fair and recognise that over a period of years voices have been raised in all parts of the House against this revaluation and the one in 1978. Those voices said that Scottish revaluation must be stopped so long as similar revaluations did not take place in England and Wales. The right hon. Gentleman has never listened to those voices. He has always gone ahead on advice from his civil servants — the same civil servants who gave similar advice to the previous Labour Administration and Labour Secretary of State for Scotland.

Given the uproar in Scotland over the effects of the 1985 revaluation, I hope that the political parties in Scotland will look realistically at the whole rating system and try to introduce a system that is fairer to everyone, be they domestic, commercial or industrial ratepayers.

The Bill will give £50 million—although earlier we were told it might be £30 million—to certain categories of domestic and commercial ratepayer. In areas such as mine large industrial complexes will experience great difficulty because of the increases they face in their rates bills, yet they will get no help from the Bill. We should not fall over backwards to congratulate the Government on the small amount of help that they have been forced to give because of opposition from Members of Parliament representing all areas of Scotland. The Government have been forced to do so because they were stupid in continuing with the 1985 revaluation.

One may sometimes think that one is a voice in the wilderness, and if one continues to shout about something like this, people often say, "He is speaking on his own behalf. He does not have the support of his party. He is a wee bit eccentric. If the Labour party says something, he might well say the opposite." However, the political eccentrics are sometimes correct. Tonight the Government have been forced to act because of pressure over the last five and a half years from people such as myself.

Mr. McQuarrie: The hon. Gentleman had made great play about the Government's decision on this revaluation. However, he must accept that during a previous debate on rating and valuation in Scotland the hon. Member for Glasgow, Garscadden (Mr. Dewar) said:

> "To push the revaluation back by two years will considerably disadvantage the ordinary ratepayer."

He went on to say:

> "I hope that the Minister will tell us what will happen in 1985-86. Will he guarantee a full revaluation then?" — [*Official Report*, 28 July 1982; Vol. 28, c. 1194-95.]

Therefore, the Labour party wanted to ensure that there was a full revaluation in 1985-86. If the hon. Gentleman feels that it was only on the Conservative Benches that there was a desire for revaluation, he should remember the facts stated by the hon. Member for Garscadden.

Mr. Lambie: The hon. Gentleman cannot have been listening to what I said, because I made that point. The hon. Gentleman has been trying to make that intervention since half past five, but no other hon. Member would let him in. I have given him the chance because, like me, he is an eccentric and he does not bow down whenever the whip is cracked.

The right hon. Member for Western Isles (Mr. Stewart), who unfortunately is not present, spoke about an article in a recent edition of the Glasgow *Evening Times* by Desmond White, the chairman of the Celtic football club. He outlined the serious problems facing the ratepayers of Scotland. He drew attention to the anomaly in the rating of football grounds in England and Scotland. The present rateable value of Ibrox park, the home of Glasgow Rangers, is £176,250, and Celtic park has a valuation of £120,750. However, the Manchester United ground, which includes a substantial restaurant, has a rateable value of only £37,000, and Arsenal has one of £30,500. I might be accused of distorting the picture by quoting only valuations, and it could be said that I should be quoting the amount of money that the clubs actually pay, but Mr. Desmond White points out that the Glasgow club paid almost £50,000 more in rates in 1984-85 than Manchester United, a club with approximately two and a half times Celtic's income.

Mr. Dewar: My hon. Friend will remember that when we debated the Rating and Valuation (Amendment) (Scotland) Act, we received an assurance from the Minister that, by virtually abolishing the contractor's principle and allowing comparability with England when there was not sufficient local comparable property, the problem could be cured. Unless the Minister fails to live up to his advertisement, there is now no differential between English and Scottish grounds under the new valuation law.

Mr. Lambie: I am glad that my hon. Friend has made that point.

Desmond White wrote a similar article in a Scottish newspaper at about the time we debated the Rating and Valuation (Amendment) (Scotland) Act. He again wrote

[Mr. Lambie]

to Scottish Members of Parliament on this subject. I replied that I thought that he and all the other football clubs in Scotland were being conned into accepting the assurance given by the Secretary of State for Scotland that the Act would deal with these anomalies. That Act has not dealt with the anomalies, and from the figures that I am quoting it is clear that the anomalies are greater than they have ever been because of the effects of the 1985 revaluation.

Mr. Ancram: I am sure that the hon. Gentleman wants to be accurate in what he says. He will be aware that, as a result of revaluation, a number of Scottish football grounds, including Parkhead and Hampden, will pay less in rates this year than they did in 1984-85. As for comparability, he will also be aware that the legislation provided that it could be done during the course of an appeal.

Mr. Lambie: We are discussing the anomalies in valuations which have always existed between properties in Scotland and similar properties in England and Wales. We are not discussing whether they paid more last year or are paying more this year. Glasgow Celtic is paying £50,000 more this year than Manchester United is paying for much better facilities and on the basis of a greater income.

Desmond White makes the valid point that he is concerned not just about the anomalies between similar places in Scotland and in England; he is also dealing with what he considers to be the special case of Scotland. He says:

"If the Government wished an immediate partial solution it could very well drop the requirement that the Scottish local authorities require to pay 44 per cent. of their total expenditure to a figure of 40 per cent. This would have the immediate effect of reducing the rate burden of everyone north of the border by approximately 10 per cent."

If the Government had tabled an order to increase the rate support grant in Scotland by 4 per cent., every ratepayer—not only those whom the hon. Member for Stirling was discussing earlier but thousands of my constituents who are ratepayers—would benefit to the tune of 10 per cent. I put it to the Government and their supporters that the problem has been accentuated by the 1985 revaluation. The real problem is the continuing reduction in the rate support grant to Scottish local authorities.

Between 1977 and 1981 — the period of the last Labour Government running into the first two years of the present Conservative Administration — the amount of local government expenditure paid by the Government was 68·5 per cent. In the orders that we have debated—and, unfortunately, passed by a majority — this year the amount paid by the Government to Scottish local authorities has been reduced to 56·6 per cent. of relevant expenditure. That is where the real problem arises. Unless the Government increase the rate support grant to local authorities, we shall never deal fairly with Scotland's ratepayers.

I am disturbed that we are spending the time of the House, as we have on similar orders in the past, discussing this problem when the people whom I represent were telling me last weekend that we should be discussing unemployment in Scotland. The latest unemployment figures were published at the end of last week. In my constituency, every third man is now unemployed, and, of those who are unemployed, every second one has now been unemployed for more than a year and in many cases for more than two years. That is the problem that the House should be discussing, and it is the problem that my constituents would like the House, Scottish Members especially, to discuss instead of wasting our time tinkering with the effects of a system which should have been altered years ago.

All those hon. Members who have spoken so far have concluded their comments by saying what they thought was the real solution to the reform of the rating system. The only way in which to solve the problem of the rating system in Scotland quickly and fairly is to introduce a 100 per cent. Government grant. The days of the traditional idea of local democracy have gone. Local people can no longer pursue policies opposed to those of the Government. That is true to some extent even of Labour Governments. We cannot go back to the good old days before local government reorganisation. If we were to introduce a 100 per cent. Government grant for relevant local authority expenditure, we should have no more debates on the rating system in Scotland. Moreover, the people of Scotland would not have to face rates increases and we would be able to deal with the immediate problem of mass unemployment.

9.20 pm

Mr. Barry Henderson (Fife, North-East): We all know that the hon. Member for Cunninghame, South (Mr. Lambie) has consistently opposed anything to do with the rating system. He is one of the few hon. Members—perhaps the only one—who did not think that we should go through with the 1985 revaluation. These matters are of considerable importance to unemployment. High rates hurt unemployment. That fact should never be lost sight of, and I hope that the hon. Gentleman will encourage his friends in local government to keep it in mind.

I welcome the Bill because it gives direct help to ratepayers who are most severely affected by the revaluation. It gives a full rebate to those whose valuation has been increased three times. That, combined with previous measures to give an eightfold increase in domestic rate relief, has gone a long way to reduce the effects of revaluation on ratepayers. The problem is that there are wide variations, even within districts, and to talk about averages is dangerous. However, as revaluation would affect domestic ratepayers more severely this year, the increase in relief has been of great help.

I am glad that my right hon. Friend has introduced a Bill to deal with wildly increased valuations, but many ratepayers — possibly most — will face substantially increased rates bills. The best thing about the Bill is that it highlights the fact that it is not revaluation but the spending policies of local authorities that determines the size of most ratepayers' bills. Rate increases in my constituency could have been within the rate of inflation if it had not been for the spending policies of local authorities, especially Fife regional council. The product of 10 years of Labour effort in Fife regional council is that the area has gone from being one of the lowest rated in Scotland to one of the highest.

What have the Liberals done to help to produce that result? They have not even voted for the last four budgets of Fife regional council. They were content literally to sit on their hands when these crucial votes were taken. The

Liberals were prepared to allow a 20 per cent. rates increase to be imposed on Fife ratepayers, when on average the increase could have been only 2 per cent. if they had voted at the right time. The cost of spending beyond guidelines by Fife regional council is hitting our ratepayers to the tune of 8p in the pound—interestingly enough, exactly the same amount in the pound that was provided by my right hon. Friend to help domestic ratepayers who were affected by the results of revaluation.

Although the Liberals are far from perfect, I must congratulate north-east Fife district council, under its Liberal administration, on keeping its expenditure within guidelines. However, if one removes the effect of the rate support grant distribution formula, about which I should have had a few things to say to my hon. Friend the Under-Secretary of State for Scotland if I had had more time, one sees that in one year the Liberal council in north-east Fife has increased the rates by twice as much as the Conservative council increased them in the previous four years. It does not, therefore, have a perfect record, either.

The Labour party has tried to suggest that it is the Government's policies which have caused the substantial rates increases. Local authority expenditure is still higher than it was in 1978-79. The measures taken by my right hon. Friend represent a tiny reduction in rate support grant distribution, but a substantial increase in the direct help that is given to ratepayers. This means that total central taxpayer support for local government is no less than it was last year. Most of it has gone towards providing direct help for hard-pressed ratepayers. Therefore, I warmly welcome the Bill. I very much look forward to the proposals for fundamental reform which we are told can be expected at the end of the year.

9.27 pm

Mr. Jim Craigen (Glasgow, Maryhill): I have no doubt that the speech of the hon. Member for Fife, North-East (Mr. Henderson) will go down well in the *East Fife Mail*. However, the Bill has to be viewed in the context of the announcement by the Secretary of State for Social Services this afternoon: that many more Scottish people will have to pay rates because of the changes that are to be made in the housing benefits system.

When he introduced the Bill, the Secretary of State for Scotland outlined some of the problems which followed the 1985 revaluation because of the shifting of the rates burden among the various sectors. My hon. Friend the Member for Cunninghame, South (Mr. Lambie) is not so eccentric as he makes out. It was the first time that I have heard him admit that he might be eccentric. I knew that to be the case with the hon. Member for Banff and Buchan (Mr. McQuarrie), but my hon. Friend the Member for Cunninghame, South has his head screwed on the right way. He knows that because the Secretary of State for Scotland cut back on rate support grant during the last five or six years, many revaluation difficulties have been created with which the right hon. Gentleman is now faced. The right hon. Gentleman went too far over the last cut-back in rate support grant. That is why the revaluation exercise upon which he embarked has come back to him with a vengeance.

My hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar) said that about £1 billion had been taken by central Government during the last five years from local authority services. There was a clear problem of hardship for many small businesses. We should remember the different categories in the commercial sector. We heard earlier about the tourist industry and the importance of hotels, and we have discussed the problems of shops, although less reference was made to offices. Many small businesses face real hardship as a result of the sudden upsurge in their fixed costs arising from the revaluation exercise, compounded by the reduction in rate support grant. Those problems were especially acute in the Borders and in Dumfries and Galloway, and many problems emerged in Central region, Strathclyde and Lothian.

Last month, I wrote to the Secretary of State asking for clarification about the amount of take-up under the scheme, because the evidence suggested that it would be nothing like the £50 million that has been allocated. The National Federation of the Self-Employed and Small Businesses, after conducting a survey of its members, reckoned that, of the £40 million for the commercial sector, the take-up might be about £22 million.

The self-employed, who represent about one tenth of the work force, have become a significant sector of the economy. The Secretary of State was right to recognise the special hardships that would be caused to many of the self-employed. It was in the context of those figures that my hon. Friend the Member for Garscadden assured the Under-Secretary of State for Scotland last month that there was no statutory machinery whereby the Government could assist people in this predicament. My hon. Friend had every right to expect that the Scottish Office would do its homework and get the figures right. I wonder whether the Secretary of State would have got such ecstatic applause at the Tory party conference in Perth——

Mr. Dewar: He did not. It was loyal applause.

Mr. Craigen: My hon. Friend points out that it was loyal applause. Indeed, my hon. Friend got the ecstatic applause on at least two occasions, when the Secretary of State said that the Opposition would help the Government with the passage of the legislation. I was about to suggest that the Secretary of State would have got a slow handclap if the delegates at Perth had known what we now know about the way in which it appears the scheme will operate.

Scotland has been allocated £50 million, and we wish to ensure that we get that £50 million for the benefit of Scottish ratepayers. I know that in Committee we shall have the support of the hon. Members for Banff and Buchan and for Strathkelvin and Bearsden (Mr. Hirst) and the hon. and learned Member for Perth and Kinross (Mr. Fairbairn) in making a useful amendment by varying the threshold so that the whole £50 million is taken up.

Preliminary work in Dumfries and Galloway suggests that a change in material circumstances could be a factor in some properties going over the 300 per cent. threshold. This is where the appeals machinery comes in. Will there be a shortfall as a result of successful appeals? We shall have two problems of take-up. One will be caused by the 300 per cent. threshold and the other will be caused by the unquantifiable number of appeals.

The hon. Member for Stirling (Mr. Forsyth) must have held a constituency surgery on Friday, because he spelt out a number of anomalies in the new scheme. I can imagine a Maryhill ratepayer asking me, " How is it that the man next door will get relief because his valuation has gone up 320 per cent. and he had central heating put in last year,

[Mr. Craigen]

but my valuation has gone up 299 per cent. and I am getting nothing?" My answer will be, "Speak to the Secretary of State for Scotland."

The Secretary of State mentioned the cash flows of local authorities. I met representatives of COSLA recently and they were apprehensive about the delays that may result from people holding back until they see how the scheme works. Cash flow problems will inevitably lead to higher interest charges for local authorities. I am glad that the Secretary of State seems to be coming round to the idea that it would be administratively more convenient if, instead of shoals of letters being sent to rating authorities, those authorities identified the people who should qualify under the scheme. The Secretary of State expressed caution about a letter-writing campaign, but can he tell us how soon people will know when the scheme will come into operation? The scheme will depend on the statutory instrument that is to follow the primary legislation. Therefore, there will be a period of considerable uncertainty while people are expecting a benefit.

New St. Andrew's house will be relieved of the responsibility, but I suspect that the computers of quite a few rating authorities will get overheated while trying to identify who will benefit from the new system. I suspect that many people will be disappointed when they find out how much they are to get from the new system. We are talking only about the margin over 300 per cent., and some figures that I have seen suggest that there may be some relatively small rebates, particularly for domestic ratepayers.

I have a continuing curiosity as to which chairman of a Conservative party constituency organisation will benefit most from the scheme. After all, it is open-ended. We know that it is not Fordell castle. However, it will be interesting to see who benefits most from the scheme, on the domestic side.

I should like the Minister to clarify a point that the Secretary of State made about the guidelines. Am I right in thinking that the administrative costs of the scheme, as presently intended, will not affect local authority guidelines? It would be ironic if the Scottish Office, which has so bungled this £50 million relief scheme, yet is in charge of a £3·4 billion local authority budget in Scotland as a whole and exercises rate-capping powers over the 65 local authorities, created a situation which meant that some of them got into trouble in the operation of the small scheme and the administrative charges that are to be imposed on the local authorities.

The Opposition hope that the Government will come round to the idea of accepting the administrative costs for the scheme — in other words, reimbursing the rating authorities for the costs and the payments that will be made under the scheme. Moreover, I wonder whether we shall get a value-for-money scheme. It will be quite a costly exercise. Clearly, the less that is spent on its administration, the more that will be available to benefit ratepayers.

I notice from recent parliamentary answers that the Minister has given to me that the cost of rates collection in Scotland as a whole is only 1 per cent. of the total amount collected, which next year is estimated to be £1·6 billion. I wonder whether this scheme will cost just 1 per cent. of the £50 million. I suspect that it will be fairly costly. When does the Minister expect the regulations to be introduced under the scheme? Although we shall touch on these matters on Report on Wednesday, it is essential that we get some idea of when the regulations will come into force.

The Opposition wish to give the Bill a proper launch. We were a bit apprehensive over the past few weeks at some of the uncertain noises emerging from the Scottish Office about whether the scheme would capsize before it was properly afloat. On Wednesday, our aim will be to make it an improved measure. As my hon. Friend the Member for Garscadden has said, it is a rough justice scheme. It will generate a postbag full of anomalies and complaints. I hope that they will find their way to the Secretary of State.

I cannot but conclude that more Scottish ratepayers will be disappointed by the scheme and at their exclusion from it than will benefit from its introduction. The Secretary of State probably knows this, but he may expect little thanks from those who will be assisted, because the relief that they obtain under the scheme will probably be less then they bargained for much less than they were led to expect.

I hope that the Under-Secretary of State will spend a little time explaining the intricacies of the scheme in relation to commercial ratepayers. They rightly feel considerable consternation about how the scheme will operate. They would like to know why the threshold cannot be brought down below the 300 per cent. mark.

9.45 pm

The Parliamentary Under-Secretary of State for Scotland (Mr. Michael Ancram): On 17 April this year during Question Time the hon. Member for Glasgow, Garscadden (Mr. Dewar) said:

"In respect of the commercial ratepayer, the Minister"—

I believe that he was referring to me—

"has managed to give the impression that the only factor stopping help for at least those hardest hit is the lack of any statutory machinery for doing so."—[*Official Report*, 17 April 1985; Vol. 77, c. 255.]

I assure the hon. Gentleman that if he wishes to create that statutory machinery the Government will give that measure every facility and speed it through the House. The Bill provides that machinery and fulfils the commitment made by my right hon. Friend the Secretary of State to provide a mechanism to bring exceptional relief to commercial and domestic ratepayers, who, as my hon. Friend the Member for Fife, North-East (Mr. Henderson) rightly said, have been hardest hit by the effect of revaluation. The hon. Member for Glasgow, Maryhill (Mr. Craigen) says that those who have not been helped by it will be disappointed. I am sure that when the hon. Member for Garscadden was offering help to the hardest hit he appreciated that those people would be at the top of the scale.

My right hon. Friend the Secretary of State has outlined how the scheme will work. In a sense, the Bill gives us the power to grant relief to domestic and commercial ratepayers in the circumstances outlined. It defines the class of ratepayer who will be eligible for such relief and the trigger of that eligibility. To that extent it fulfils the wish of the hon. Member for Garscadden, and I look forward to his co-operation during the remaining stages of the legislation. The speeches of the hon. Members for Garscadden and Maryhill tended to give a slightly new meaning to the word "co-operation".

Mr. Dewar: The hon. Gentleman is being a little less than gracious. If he wished a withdrawal of co-operation, we could happily have promised him several months of consideration in Committee. We have not done that.

Mr. Ancram: I think that the hon. Gentleman is aware of what I mean. In terms of welcoming this machinery, some of the points that he raised were not as gracious as he might have liked them to be.

During the past few weeks the Opposition parties have been delighted to take advantage of what they have seen as a politically disruptive situation in Scotland. In political terms, I find it hard to criticise them for that. It is interesting to look at their record. I was interested to see tonight that the Liberals had decided to send forward not the hon. Member for Gordon (Mr. Bruce), who believes that any help to ratepayers is a warped priority, but an hon. Member who believes that helping ratepayers is a priority — the hon. Member for Orkney and Shetland (Mr. Wallace). It never ceases to amaze me how the Liberal party, with its small numbers, always seems to have a man for all seasons.

I believe that we were all delighted to hear the right hon. Member for Western Isles (Mr. Stewart) tell us that, as a Scottish nationalist, he wished the position in England to be identical to that in Scotland. We welcome his conversion to unionism, which we have long been pressing on him.

Mr. Donald Stewart: I merely expressed the view that I did not want to see that. I spoke about the appalling anomalies between the assessments in the two areas.

Mr. Ancram: If the right hon. Gentleman reads the *Official Report* tomorrow, he will find that he called on the Government to ensure that the positions were similar. He neatly avoided the fact that, on 28 July 1982, the hon. Member for Dundee, East (Mr. Wilson) pronounced these exciting words:

"There is nothing wrong with revaluation. In fact, there is much to be gained from it."

I have listened with interest to some of the criticisms that his party has made since then about revaluation. — *[Interruption.]* The hon. Member for Glasgow, Cathcart (Mr. Maxton) points out that the SDP is not represented tonight. I did not mention that because it happens with such regularity that it is not worth commenting upon.

I listened carefully to what the hon. Member for Garscadden said. He rightly pointed out that during the debate on 28 July 1982 he called for a full revaluation this year. He said:

"The Minister should make it clear now that there will be no more flirting with this halfway house"—

that is, partial revaluation—

"and parboiled non-solution. He should tell us that there will be a proper revaluation in 1985-86."—[*Official Report*, 28 July 1982; Vol. 28, c. 1195-97.]

The hon. Gentleman placed no qualification on that. He did not say that we had to provide mechanisms to bring relief to those who might be hardest hit by revaluation.

The hon. Gentleman may say that he did not expect the sort of multipliers that have occurred during revaluation. If that was the reason why he was so keen to have a full revaluation without any qualifications, I must tell him that that does not hold water. When his party was in government, it experienced revaluation in 1978-79. He may remember the multipliers on that occasion — the domestic multiplier was 2·8, the industrial multiplier was 4·2, the commercial multiplier 4·1, and the category described as others 4·9. Therefore, the overall revaluation average multiplier was 3·6.

What happened under the Labour Government to relieve the ratepayers' suffering because of the multipliers? Precisely nothing, other than that the domestic relief element of the rate support grant was reduced by 75 per cent. It is interesting to note the Labour party's new-found support for the ratepayers whom it was not prepared to help when it was in charge of revaluation in 1978.

The hon. Member for Garscadden will never concede that any of the rating effects this year have been due to overspending by councils. I wish to put a serious question to him. He spoke earlier about the effects of RSG reductions. He knows that both I and my right hon. Friend have spoken about the effect on rates of overspending throughout Scotland. There is one example that he cannot ignore, and that is the one mentioned by my hon. Friend the Member for Edinburgh, West (Lord James Douglas-Hamilton) about Edinburgh district council, which, by its own hand and by its spending decisions, has increased its rate poundage by almost 80 per cent. He knows full well the direct effect that that will have on ratepayers in Edinburgh, both domestic and commercial.

I hope that the hon. Gentleman will take this opportunity to tell the House whether he supports that council's spending decision, and whether the report in today's *Glasgow Herald* that the executive council of the Scottish Labour party has sent messages of support to the council is correct.

Mr. Fairbairn: I can give my hon. Friend one good example of Edinburgh's rating policy. Jenners has a turnover which is 500 times less than that of Harrods, but has to pay to Edinburgh district council twice the rates.

Mr. Ancram: I am grateful to my hon. and learned Friend. I am disappointed that, once again, the hon. Member for Garscadden has failed to answer my question about rating reform.

A number of specific questions were asked by hon. Members, and I shall do my best to answer them.

My hon. Friend the Member for Fife, North-East, in an intervention during my right hon. Friend's speech, asked whether clause 2(2) could be used selectively in terms of the authorities to whom the rebate is paid on a future occasion. My answer is no. The subsection is drafted so that that cannot happen.

The hon. Member for Garscadden asked whether we would consider paying the rating authorities some of their reimbursement "up front", as I think he put it. The Bill provides for flexibility in our repayment, and I should like to consider what evidence would be acceptable for making some early payment to the rating authorities before an audited certified claim can be prepared.

The hon. Member asked about disabled persons' relief, and I think he appreciated that I was not altogether clear about it. I am still puzzled as to how it can arise. If the hon. Gentleman will write to me about it, I shall look into the matter.

My hon. Friend the Member for Strathkelvin and Bearsden (Mr. Hirst) asked about mines and quarries. *[Interruption.]* I shall deal later with what hon. Members call shortfall. Quarries are formula-valued and will not qualify for relief under the measure.

[Mr. Ancram]

The hon. Member for Orkney and Shetland asked about the whisky industry. As he knows, whisky distilling is manufacturing and benefits from industrial derating. Thus again, under the Bill as drafted, the industry will not qualify for relief.

My hon. and learned Friend the Member for Perth and Kinross (Mr. Fairbairn), together with my hon. Friends the Members for Renfrew, West and Inverclyde (Mrs. McCurley) and Stirling (Mr. Forsyth), rightly pointed out that the lesson of the revaluation has been in underlining the anomalies and iniquities in the present system. Those have been highlighted by the revaluation, and that is precisely why the Government have been looking, for some years now, for a better way of financing local government.

I must say to the right hon. Member for Glasgow, Rutherglen (Mr. MacKenzie) that the suggestion that we are being panicked into a solution or are rushing to find one has to be judged against the vast amount of work that has been done in this regard in the last Parliament and since November last year. It remains our intention to produce in the near future proposals which we believe will be acceptable as a better and fairer system of financing local government.

My hon. Friend the Member for Renfrew, West and Inverclyde asked about the problems of market gardening. Market gardens other than the house are generally treated as agricultural subjects and therefore do not appear in the valuation roll. Obviously I cannot comment on a particular case, but if there is any doubt obviously the occupant should appeal in circumstances such as those mentioned.

The hon. Member for Aberdeen, North (Mr. Hughes) asked why there was to be a delay of two months before the measure was brought into force. The answer is that it is not needed before that. The order can be laid and debated immediately. If Royal Assent is given in June, we would have that order by the summer recess. That would be in plenty of time for the authorities to make payments of the rebate before the due time when the rate bills have to be paid.

My hon. Friend the Member for Stirling asked several questions, and I may have to write to him on some of them. With regard to fishing, if there is a separate entry in the new roll for a fishing beat which can be matched against a similar entry in the old roll, the property can possibly qualify, but if the beats have been amalgamated or divided between the two rolls there can be no comparison and thus no rebate.

With regard to change of use from industrial to commercial purposes, there has to be a comparison between lands and heritage before and after revaluation. If there is a difference of a kind to which my hon. Friend points, there will not be matching entries in the old and new rolls, and therefore there will be no rebate.

Several hon. Members asked about the amounts of money involved. The scheme was devised by looking for a multiplier which we believed would deal with the harshest cases arising from revaluation and the effects on rate bills. The figure that we chose, which is very much in line with the figures for domestic relief which I quoted for 1978-79, was a multiplier of three. It is not easy to calculate how much that will cost, as hon. Members have realised. I believe that we shall not know the full answer to that question until all those who are eligible have been paid.

The Bill fulfils the commitment that my right hon. Friend made to the House in his recent statement. It is good for Scottish ratepayers, and I call on the House to support it.

Question put and agreed to.

Bill accordingly read a Second time.

Bill committed to a Committee of the whole House. *—[Mr. Peter Lloyd.]*

Committee tomorrow.

BUSINESS OF THE HOUSE

Ordered,

That, at this day's sitting, the Family Law (Scotland) Bill *[Lords]* may be proceeded with, though opposed, until any hour. *—[Mr. Peter Lloyd.]*

RATING (REVALUATION REBATES) (SCOTLAND) BILL [MONEY]

Queen's Recommendation having been signified—

Resolved,

That, for the purposes of any Act resulting from the Rating (Revaluation Rebates) (Scotland) Bill, it is expedient to authorise the payment out of money provided by Parliament of the expenses of the Secretary of State in paying rating authorities amounts equal to the total amounts of rebates granted by them under the Act.—*[Mr. Peter Lloyd.]*

Family Law (Scotland) Bill [*Lords*]

As amended *(in the Standing Committee)*, considered.

Clause 8

ORDERS FOR FINANCIAL PROVISION

10.1 pm

Mr. Donald Dewar (Glasgow, Garscadden): I beg to move amendment No. 1, in page 6, line 20, at end insert—

'(2A) An order under subsection (1)*(a)* for the transfer of heritable property from one spouse to the other which is made by the court shall have no effect in relation to third parties transacting with the spouse against whom the order has been made unless it is registered in the Register of Inhibitions and Adjudications within fourteen days from the date on which it is made.'.

Mr. Speaker: With this it will be convenient to take amendment No. 6, in clause 14, page 12, line 41, at end insert—

'(4A) An order under subsection (2)*(d)* which is made by the court shall not affect dealings relating to the former matrimonial home by the non-applicant spouse with third parties acting in good faith unless such order is registered in the Register of Inhibitions and Adjudications within fourteen days from the date on which it is made.'.

Mr. Dewar: We come to what is on the face of it a fairly dry piece of law reform. I am not sure that I shall do anything to dispel that impression in the next 10 minutes or so. I am equally confident that the Solicitor-General will rise to a similar high standard when it is his turn to speak. This is a matter of some importance. I approach it with a good deal of caution because, although I am occasionally given to flamboyant claims of my expertise and virtue, I have never prided myself upon my knowledge of conveyancing law. A few obscure fragments are lodged in my memory. They have something to do with a mysterious Act which reached the statute book in——

Mr. Nicholas Fairbairn (Perth and Kinross): 1924.

Mr. Dewar: Yes. The sight of the hon. and learned Member for Perth and Kinross (Mr. Fairbairn) and I discussing conveyancing must be quaint and strange.

These two amendments to comparatively simple matters in terms of principle, although the complexities would puzzle someone with a great deal more expertise than myself. We are considering clause 8. Most hon. Members will be aware that clause 8(1)*(a)* deals with the transfer of property between spouses. That is when, in an action for divorce, there is an application to the court for an order to transfer property.

Clause 8(1)*(c)* relates to an incidental order. It is defined, as hon. Members will be aware, in clause 14. Clause 14(2)*(d)* and *(e)* refer to incidental orders which, among other things, may regulate occupancy rights or outgoings of the former matrimonial home. This is an unashamedly difficult subject for me and somewhat confused.

The first problem is that there has been some sort of clash or competition between an incidental order under clause 14 and occupancy rights which are awarded under section 3 of the Matrimonial Homes (Family Protection) (Scotland) Act 1981. That will to some extent be clarified by Government amendment No. 5. I had tabled amendments to the same end, but I shall give way to the Government's formulation. I am grateful to the Solicitor-General for having listened to the arguments that came largely from the Law Society of Scotland and the professions and which were reflected by my hon. Friend the Member for Falkirk, East (Mr. Ewing), who raised the matter in Committee.

I understand that once the Government amendment has been incorporated there will be a fairly neat demarcation, and occupancy rights under the 1981 Act will run to the point of divorce and will then, to use the fashionable term, fly off. If there is any need for the enforcement of occupancy rights thereafter, it will have to be pursued through an incidental order under clause 14. That will arise only at or after the point of divorce. I hope that that is clear to those who are following the debate.

Mr. George Foulkes (Carrick, Cumnock and Doon Valley): No.

Mr. Dewar: I know that my hon. Friend is an honest trier and is not usually terribly discouraged by failing to understand what is happening. I look forward to one or more of his rumbustious speeches during the course of our exchanges.

I turn now to the real issue behind the amendment, which is directed to how the new provisions will work. I am not clear about the way in which they will operate and their operation has not been explained to me by any of those learned in the law whom I have consulted. It is as plain as the nose on my face—it could not be much plainer than that—that the courts can make an order enforcing a transfer between the spouses. The timing is referred to in clause 12. The court can order that the transfer takes place on the granting of a decree of divorce or

"within such period as the court on granting decree of divorce may specify."

Even taking into account the provisions in clause 12, I presume that there will have to be a disposition. I presume that a formal document will be signed by the spouses transferring the property, which ultimately will give a good title that will be recorded in the register of sasines. I do not know how long it takes these days successfully to record a deed in the register, but I am told that it takes many months. I have been told that there can be a time lag of as long as nine months. I was rather surprised when I was told—this shows how much I am out of touch—that the delay when land registration is involved can be as long as 18 months. That period can elapse before the new title is properly registered and, therefore, available for public inspection, or at least to the eye of a searcher who may be carrying out an examination on behalf of a prospective purchaser.

If there is such a substantial gap between application and registration it has been suggested to me that a dishonest spouse may try to defeat the transfer by selling to a third party. How can the third party be expected to be aware of the fact that there is an order under clause 8(1)*(a)* in existence, which will presumably prevent the third party from getting a good title?

The amendment suggests that when an order is made by the court under clause 8(1)*(a)* there should be a duty upon the parties—presumably upon the grantee, the person who will receive the property—within 14 days to register the order in the register of inhibitions and adjudications. If the grantee fails to do so, the theory is—I hope that it holds good in practice—that the third party sale would go ahead and would not be affected adversely by the existence of a section 8(1)*(a)* order.

[Mr. Dewar]

I hope that this issue has been explained reasonably clearly. I an sure that the Solicitor-General for Scotland follows it. Indeed, there has been some correspondence between us on these issues prior to the debate.

Obviously, the Bill complicates conveyancing, but complication will undoubtedly abound in this matter. That is the fault of the House. For sufficiently good reasons we try to get more sensible property laws on the break-up of a marriage, and in so doing we complicate the life of a conveyancer in Scottish legal practice. If, for example, a wife were to get the transfer of the house, her legal adviser failed to register the order in the register of inhibitions and adjudications, alienation took place and a third party bought in good faith because there had been no registration in the register of inhibitions and adjudications, the third party sale could not be overturned, and presumably there would be a nice action for professional negligence against the solicitor. Perhaps I should not be laying up such a store of trouble for my colleagues, and who knows what the future holds for me?

There is common sense in the proposal, and great danger in leaving the position in the somewhat unsatisfactory state in which a clause 8(1)*(a)* order may be made, the complicated and laborious conveyancing process may be in hand, and there is an apparent transaction with a third party, such as I have described. That is the simple part of the story.

Amendment No. 6 deals with the same sort of point in connection with incidental orders, to which I referred earlier. They are the orders made under clause 8(1)*(c)* and further defined in clause 14. Clause 15(3) states:

"Neither an incidental order, nor any rights conferred by such an order, shall prejudice any rights of any third party insofar as those rights existed immediately before the making of the order."

That seems to be conclusive, but I am not entirely sure that it is. I hope that the Minister can help me on that.

If an incidental order confers on one spouse occupancy rights and the entitled spouse sells the property to a bona fide third party and, therefore, there is competition about which occupancy rights take precedence and are preferred, what is the position?

Some time ago the Minister wrote me a complicated letter—I do not complain about that—which to some extent deals with the problem. It would be convenient if he would summarise the letter and incorporate it in his speech. He stated:

"The bill as introduced sought to protect the right to occupy a matrimonial home under a court order by providing that provisions of sections 6, 7 and 8 of the 1981 Act should apply. That would have meant that the right to occupy would automatically prevail over the rights of third parties who acquired right to the property."

That was the position in the Bill as originally drafted. Sections 6, 7 and 8 of the 1981 legislation were imported into the Bill. That made it clear that in those circumstances an incidental order would prevail over a sale to a third party.

Mr. Barry Henderson (Fife, North-East): Did I understand the hon. Gentleman to say that he expects the answer of the Solicitor-General for Scotland to be even more complicated than the hon. Gentleman's question to him?

Mr. Dewar: I fear that that may be so, but we must wait with bated breath. I am glad that the hon. Gentleman has followed the question with his usual——

Mr. John Home Robertson (East Lothian): Perspicacity.

Mr. Dewar: I thank my hon. Friend the Member for East Lothian (Mr. Home Robertson). The point, before I lose my thread, is that the position as outlined was perfectly clear as the Bill was originally drafted.

10.15 pm

However, the Minister goes on, fairly, to point out that sections 6, 7 and 8 are no longer imported into the Bill because there were amendments. Therefore, the clear position that there will be an automatic preference over the rights of third parties is presumably undermined. The Minister makes that point, but goes on to say:

"This does not of course mean that the person who is given the right to occupy is left without protection. The court in a divorce action could be asked in advance by the spouse to protect her right to occupy against adverse dealings in addition to its common law powers and the specific power to interdict avoidance transactions under clause 18 the court has a very wide power under clause 14(2)*(k)* to make any ancillary order which is expedient to give effect to its orders. Thus the court could, having regard to these various powers, interdict the former husband from disposing of, or otherwise dealing with, the house while the right to occupy lasts."

As I understand what the Minister is saying—I hope that we have this clear in our minds—it means that as the Bill was originally drafted, it was quite clear that an incidental order regulating occupancy rights took precedence over any sale of a property to a bona fide third party. The situation has now been thrown into the melting pot, but that preference for the occupancy rights could still be re-established if an application were made to the courts to use their powers to interdict the husband from disposing or otherwise dealing in the property, thus settling the matter by that specific court order and provision.

That may be satisfactory enough, but there may be many occasions when the court is not invited—perhaps through inadvertence or because it was not thought necessary—to use those additional powers to make that specific order. The question still arises about what would happen in that situation, where the powers under clause 14(2)*(k)* have not been called into play. It seems to me that we are left with a somewhat doubtful query, where the clear superiority of the incidental order no longer automatically prevails and where that position has not been put right by some specific and special order of the court.

In that situation, amendment No. 6 comes into play and commends itself, at least to me, as a perfectly sensible idea. The House will remember that amendment No. 6 states that unless there is a registration of the incidental order

"in the Register of Inhibitions and Adjudications within fourteen days",

the preference in any competition of occupancy rights will go to the third party who has purported to buy in good faith. That is sensible and clarifies the situation. Although the Minister has rejected the argument in his letter, I hope that he will be prepared to look at the matter again.

One of our difficulties—I say this with regret, but there is nothing we can do about it—is that the Bill began its journey in another place. Therefore, it is now at the end of its parliamentary passage. So often in this House we are able to say, "Ah, but the Government can take this away, think about it and put it right later." On this occasion we must put it right tonight. There is no doubt that there is great anxiety, particularly among the legal profession. That was eloquently expressed by Mr.

Graham, president of the Law Society of Scotland, who corresponded with the Secretary of State about the Bill. He said in a letter dated 16 May:

"The Council is convinced that unless the Bill is radically amended in relation to certain of its provisions, it is likely to have the effect of bringing the conveyancing process in relation to domestic property to a virtual standstill."

In fairness, I ought to say that part of the Law Society's anxiety has been met by the neat demarcation which will be put into the Bill via Government amendment No. 5. Therefore, I do not suggest that the amendments I am proposing are essentially what is referred to in Mr. Graham's serious suggestion. I know from my personal contact with the Law Society that it feels strongly that my amendments will sensibly clarify the position. I hope that, even at this late stage, the Minister will be prepared to turn his mind seriously to them rather than accepting the fait accompli and saying that there is no room for further movement.

I recognise that I have spoken at some length on this matter and that I may have confused myself and the House. However, I have tried to make a serious point and to put across a genuine difficulty, as it is seen by many people who have to deal on a daily basis with our conveyancing system. I hope that the Minister will be prepared to look at what has been said, and the arguments that have been advanced.

Mr. Gordon Wilson (Dundee, East): I do not intend to follow the hon. Member for Glasgow, Garscadden (Mr. Dewar) through the maze in which he took us, although we were all impressed by his ability to steer us into it. Whether he got us out of it is another matter. I do not intend to show my ignorance of these matters. It is many years since I did conveyancing and I shall not pretend that my knowledge is sufficient to allow me to speak with expertise.

As the hon. Member for Garscadden elaborated his case, certain memories of what happened during the formulation of the Matrimonial Homes (Family Protection) (Scotland) Act 1981 came back. The notice of warning to conveyancers and their clients first emerged then. Court orders that might have an effect on the heritable property were granted. However, nothing was available to warn everybody of what might be happening. I take it that this is what the hon. Member for Garscadden has been developing in the debate on this Bill.

During the proceedings on the 1981 legislation, the Government had the opportunity to consider amendments that sought to make greater use of the register of inhibitions and adjudications, but turned down that solution on cost grounds. My readings of outpourings thereafter in various legal journals showed me that the profession was concerned that the Government, by bypassing the register, had made life more complicated. The great advantage of the register is that it gives an immediate warning of what might be happening. It is not subject to the delays that can be encountered in the register of sasines.

I was struck by what the hon. Member for Garscadden said about delays. He spoke about nine months for a return of deeds duly recorded, and suggested that that might become worse under the new land registration procedures. In the days when I practised, six months was considered to be excessive, but it takes that length of time before any property can show up on the searches. During that period, many difficulties in the transfer of the property can occur.

In view of the complexity about which we have been talking, the fact that a greater number of people own their houses than did so a few years ago and the existence of the register of inhibitions and adjudications, why have the Government not thought of making better use of that register? It could be used to give fairly speedy notice to third parties and others that a problem might emerge. The register can give a reply quickly and it does not involve the technicality of registering deeds in the register of sasines. It always seemed strange that the Government should introduce new matrimonial provisions concerning the disposal of property in the most complicated way.

If there is a simple way, we should try to follow it. Regardless of the argument powerfully deplored by the hon. Member for Garscadden—who knows his stuff, because none of us could follow it—would it not be desirable to try to make life as simple as possible? If these registers exist, they should be utilised. I do not believe that the cost would be all that great. In view of this amendment and thinking back to the 1981 Act, I recommend to the Minister that greater use should be made of those registers.

The Solicitor-General for Scotland (Mr. Peter Fraser): Although both amendments cover much the same ground, the hon. Member for Glasgow, Garscadden (Mr. Dewar) will appreciate that in one sense they cover rather different areas although the remedies proposed by them are similar.

The Government have sympathy with the objective of securing sufficient protection in the Bill against the disposal by the defender of property which is the subject of an order for transfer under clause 8. In the light of the representations received from the Law Society, we have considered carefully how far such additional protection is necessary or readily practicable.

It is necessary to be clear about the nature of an order for the transfer of property. As the Bill stands, this is simply a personal order against one party requiring him or her to convey that property to another party. In itself, such an order cannot affect the rights of third parties. It is only after the property has been conveyed that the transferee acquires a real right to it. Therefore, there is no need for a specific provision that the order shall not affect the rights of third parties.

The real question is whether there is sufficient provision to protect the interests of the person to whom it is proposed the property should be transferred against dealings with a third party before it is conveyed. It is my view that the existing powers available to the court under the Bill and at common law should be adequate and that it would not be justifiable to provide in addition a specific statutory requirement for the registration of orders for the transfer of property.

Given the careful way in which the hon. Member for Garscadden advanced his argument, it might be helpful if I explained these powers.

A defender who disposed of property in defiance of a court order for transfer could be punished for contempt of court. Under clause 14(2)(*k*), or clause 18, he could also be expressly interdicted from disposing of the property and punished for his breach of interdict. Most importantly, the transferor could be inhibited from disposing of the property. Clause 19 would enable a person applying for a transfer order, whether pursuer or defender in the divorce action, to obtain "on cause shown" warrant for inhibition on the dependence of the action, and such inhibition would

[The Solicitor-General for Scotland]

remain in force until the order for transfer was implemented. If a party had not obtained inhibition on the dependence of the action, he could still obtain warrant for inhibition at common law once the order for transfer of property had been made. Thus, by using the normal machinery of inhibition, the transferee could obtain the effects sought by the amendment, namely, publication to third parties and the setting aside of adverse dealings with such parties.

Given this array of powers available to the court, both at common law and under the Bill, I am not persuaded that there is a clear need for additional protection against avoidance transactions in the form of a statutory scheme of registration. There is also the consideration that a statutory registration requirement would impose considerable additional costs upon the Department of the Registers and would also increase the cost of searches in the register of inhibitions and adjudications and hence increase the cost of conveyancing generally. The delay in Scotland is no small consideration. To require additional work when there is sufficient remedy is undesirable. The Government's view is that it would not be justifiable to provide for the registration of orders for the transfer of property. On that basis, I ask the House to reject the amendment.

10.30 pm

Amendment No. 6 deals with circumstances in which there is what I might, in shorthand, call an occupancy order. It is important that a person who is given the right to occupy the former matrimonial home should be able to protect that right against dealings with third parties. It is also important that third parties who acquire the right to property should not have their rights prejudiced by finding that the property is subject to a right to occupy under a court order of which they have had no opportunity to learn.

The Bill tried originally to protect the right to occupy a matrimonial home under a court order by providing that sections 6, 7 and 8 of the Matrimonial Homes (Family Protection) (Scotland) Act 1981 should apply. That would have ensured that the right to occupy would automatically prevail over the rights of third parties who acquired the right to property. The Law Society and the Department of the Registers have represented that that would impose an extremely heavy burden on conveyancers and the keepers of registers. In every transaction concerning residential property they would have to investigate whether a right to occupy under a court order existed. We have concluded that that would be difficult to justify, as there are only a limited number of cases, and other reasonable safeguards are available. On that basis, in Committee we deleted provision for including sections 6, 7 and 8 of the 1981 Act.

The result of that deletion is that court orders regulating the right to occupy the matrimonial home will have effect between the parties to the marriage, but there is no question of their having effect against third parties who acquire right to property in the absence of specific provision to that effect. Thus, third parties will acquire their right to the property free of the right to occupy. They will accordingly need no notice of the protection against that right.

The question is whether the person who is given the right to occupy has the necessary protection. The hon. Member for Garscadden answered the question to some extent. The court in a divorce action could be asked in advance by a spouse to protect his or her right to occupy against adverse dealings. In addition to its common law powers and a specific power to interdict avoidance transactions under clause 18, a court has wide power under clause 14(2)*(k)* to make any ancillary order which is expedient to give effect to its orders.

The court could, having regard to those powers, interdict a husband from disposing of, or otherwise dealing with, the house while the right to occupy lasts. The ex-spouse would be liable to punishment for contempt of court if he or she breached such an interdict. The court could, in appropriate cases, circumvent this problem by ordering the property to be transferred into the joint names of both spouses or into the names of trustees. I refer the hon. Member for Garscadden to the power given in clause 14(2)*(g)*. The Scottish Law Commission mentioned that possibility in its report. I am satisfied that the court has adequate powers to protect the interests of the person who is given the right to occupy.

In Committee I also stated that we would consider strengthening these powers by giving the court power to grant a warrant for inhibition in respect of property which is subject to a court order granting the right to occupy. We have given this matter serious consideration, but have come to the conclusion that it is not desirable to amend the Bill in this respect. Inhibition is a remedy normally available against a creditor in an obligation to pay money or to transfer property against the debtor in that obligation. In this type of case there is no creditor, no debtor and no such obligation. We would thus for the first time be seeking to apply inhibition in a situation where it has not been applied before. It is uncertain how it would apply in these circumstances, and to provide adequately for its application could be extremely complicated.

Another important consideration for those hon. Members who have been so concerned about this long-awaited report on diligence is that we hope it will be soon available. In these circumstances, it would be premature to extend inhibition to an entirely new area in advance of consideration of that report. The hon. Members for Dundee, East (Mr. Wilson) and for Garscadden referred somewhat tentatively to their experience of this law. I am sure that they recollect all too vividly their university lectures on the problems of future debts in such an area. It is important that on this point we should await the deliberations of the Scottish Law Commission.

Mr. James Wallace (Orkney and Shetland): My recollection of warrants for inhibition on the dependence in a consistorial action is that one had to have allegations of the dependence being either vergens ad inopiam or in meditatione fugae. Clause 19 says:

"the court shall have power, on cause shown, to grant warrant for inhibition . . . on the dependence."

Is the Solicitor-General satisfied that the words "on cause shown" extend to causes which might be used to justify such a warrant for inhibition on the dependence beyond the narrow grounds upon which it is currently allowed by the courts?

The Solicitor-General for Scotland: I compliment the hon. Member for Orkney and Shetland (Mr. Wallace) on his recollection of the Latin tags that have been put on these matters and, indeed, on the warrant which he doubtless put on many summonses during his practice in the courts. I concede that the phrase "on cause shown" is

potentially wider than either the prospect of vergens ad inopiam or in meditatione fugae. Nevertheless, on his more fundamental point, the application of inhibition to future debts is a matter which would be such an innovation in the law of Scotland that at this time its introduction would be undesirable.

The amendment provides that an order giving the right to occupy may be registered in the register of inhibitions and adjudications and that unless it is so registered within 14 days the order shall not affect dealings with third parties. The amendment is not necessary or appropriate, since, as I have sought to explain, under the Bill as drafted the right to occupy would not affect the dealings with third parties. There is therefore no need for a system of publication to give notice of such a right to third parties.

I should add that we have examined in considerable detail whether a system of registration of such orders is desirable. We have come to the conclusion that it is not. To provide adequately for such a system would require quite complex and detailed provision, quite out of proportion to any advantage arising from it. Such a system might also prove too rigid. It would prevent any dealings with the property, although in some cases the court might consider that dealings such as the grant of a security or the sale of surplus ground attaching to the property were reasonable. The arguments against allowing inhibition that I have mentioned would apply also to such a system if its effect were to place inhibition upon the dealings with the property.

For those reasons, which I accept are somewhat complicated and specialised in the law of Scotland, I ask the House to reject this amendment as well as the first amendment.

Mr. Dewar: I do not know whether my colleagues will be satisfied with that reply. Perhaps I watch "Weekend World" too much, but I have got into the habit of recapitulating an argument to make sure that I understand it. I am tempted to do so now, but I am sure that it would show my inadequacies and I shy away from the prospect. Besides, it might try the patience of my hon. Friends.

I understand the Solicitor-General's point about the distinction between the two areas with which the amendments deal. The first is the section 8 order for the transfer of the property between spouses. If there is such an order and the spouse who is transferring decides to sell in defience of the order—one would hope that happens only rarely—he can be punished if there is an inhibition or an interdict to stop that. But assuming that there is not, and an order has been made simpliciter, if he then goes to a third party and says, "If you want a nice house, I will let you have it cheap," and the third party goes to his solicitor who proceeds to buy it in good faith, I wish to be clear about what will happen. Presumably, the sale is invalid because there is a court order. I did not understand the answer to that simple question. Perhaps the Minister will explain it.

The Solicitor-General for Scotland: The example that the hon. Gentleman gave shows his difficulty. If he has in mind, to adopt the bankruptcy law provisions, a confident and conjunct person, clause 18 deals with orders relating to avoidance transactions, and, in general, the position that he postulates would be covered by the clause.

However, if the court has ordered that the house should be transferred from the husband to the wife, one assumes that, in the ordinary course of events, it will be advertised and there will be an opportunity for potential purchasers to inspect the property. I was trying to explain to the hon. Gentleman that, before the order was granted, the request for inhibition would have been within the action itself. Alternatively, if, subsequent to the decree of divorce, it comes to the attention of the spouse in favour of whom the order has been made that that is what is intended, under common law he or she would have the right to request inhibition from the court. In those circumstances, the hon. Gentleman's anxiety is misplaced, because the opportunity, which exists now, of using the common law powers of inhibition, would be available.

Mr. Dewar: I am grateful to the Minister. It may be that I am making a mountain out of a molehill. I was thinking of the unlikely circumstances in which an order is made under which the husband is bound to transfer the property to the wife, who intends to live in the ex-matrimonial home and bring up the family there. The husband, perhaps cheesed off with the hardness of his fate, may decide to live on the Costa del Sol. He may therefore say to a third party, "I am going to Spain and I want to get rid of the house in a hurry. I will sell it to you." The purchaser then goes to his solicitor and says, "I have arranged to buy the house." Binding arrangements are then entered into, and the transaction goes ahead. However, unbeknown to the purchaser, there is a court order which says that the house must be transferred to the wife.

Of course, if the wife was lucky enough, she could get her hands on the proceeds of the sale, if they were not already in Spain. However, she may not want the money; she may want to live in the house. I am simply asking the Minister what would happen then. Does the third party have a good title, or is the uncompleted order enough to defeat him in his attempts to buy?

The Solicitor-General for Scotland: It is always difficult to deal with incomplete examples, but it seems that the more that the hon. Member for Glasgow, Garscadden (Mr. Dewar) elaborates, the closer he gets to a situation in which the provisions of clause 18 would apply.

If it is anticipated on behalf of the pursuer spouse that the correct way to dispose of the property on divorce is a transfer of property order, it will be appropriate to seek for inhibition then. If that were not done at that stage, it would be appropriate, subsequent to the decree of divorce, to use the approach that is available under common law to seek for letters of inhibition.

10.45 pm

Mr. Dewar: I shall retreat. We shall have an opportunity to read what the Solicitor-General has said, and no doubt those with a particular interest in these matters will do so. I do not know whether they will be consoled.

I do not wish to trespass on the time of the House by dwelling on the second amendment. It is clear that, with the Bill in its present form, the incidental order would not prevail and the third party's rights would be paramount. The question would be: what redress is open to the dispossessed spouse? I am not sure whether such situations will arise. Perhaps the best course is to hope that they will not.

The Solicitor-General for Scotland has looked at the issues closely and I know that he has been pressed hard on

[Mr. Dewar]

them behind the scenes. If he is sure that registration and a register of inhibitions and adjudications would be unnecessary, I must let the matter rest there. I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 14

Incidental orders

The Solicitor-General for Scotland: I beg to move amendment No. 2, in page 11, line 24, leave out 'An' and insert 'Subject to subsection (2A) below, an'.

Mr. Deputy Speaker (Mr Harold Walker): With this, we may take the following: Amendment No. 3, in page 11, line 37 at end insert

'made after the granting of decree of divorce.'

No. 4, in page 11, line 40 at end insert

'made after the granting of decree of divorce'.

Government amendment No. 5.

The Solicitor-General for Scotland: The amendments are intended to ensure that incidental orders regulating the occupation of the matrimonial home, the use of furniture in it and so on, or regulating liability for outgoings in respect of a matrimonial home may be made only at the date of divorce or thereafter.

The amendments were tabled in response to views first expressed by the Law Society, which suggested that it would be inappropriate for the power to make incidental orders under clause 14(2) *(d)* or *(e)* to be available to the courts while the parties are still married, as disputes about occupancy and furniture arising prior to divorce should be dealt with under the powers conferred by the Matrimonial Homes (Family Protection) (Scotland) Act 1981. The hon. Member for Falkirk, East (Mr. Ewing) raised the matter in Committee and the views expressed by him and, in supplement, by the Law Society, seem to be correct.

The Scottish Law Commission said in its report that some of the incidental orders under clause 14 (2) might not be appropriate before divorce and, accordingly, clause 14 (6) would allow the Court of Session to make rules restricting the types of order that may be made before the granting of a divorce. I think that in such cases it would be desirable to have express provision in the statute rather than leave the matter to rules of court.

Opposition amendments Nos. 3 and 4 are designed to achieve the same effect as the Government amendments, but I believe that it is preferable to make separate provision, on the lines of our amendments, than to write the limitations into paragraphs *(d)* and *(e)* of clause 14 (2). The paragraphs relate to the types of orders rather than the times at which they may be made. However, there is only a difference of drafting between us.

Amendment agreed to.

Amendment made: No. 5, in page 12, line 10, at end insert—

'(2A) An incidental order referred to in subsection (2)*(d)* or *(e)* above may be made only on or after the granting of decree of divorce.'.—*[The Solicitor-General for Scotland.]*

Clause 16

AGREEMENTS ON FINANCIAL PROVISION

The Solicitor-General for Scotland: I beg to move amendment No. 7, in page 13, line 32 at end insert—

'(2A) Without prejudice to subsections (1) and (2) above, where the parties to a marriage have entered into an agreement as to financial provision to be made on divorce and—

(a) the estate of the party by whom any periodical allowance is payable under the agreement has, since the date when the agreement was entered into, been sequestrated, the award of sequestration has not been recalled and the party has not been discharged;

(b) an analogous remedy within the meaning of section 10(5) of the Bankruptcy (Scotland) Act 1985 has, since that date, come into force and remains in force in respect of that party's estate; or

(c) That party's estate is being administered by a trustee acting under a voluntary trust deed granted since that date by the party for the benefit of his creditors generally or is subject to an analogous arrangement.

the court may, on or at any time after granting decree of divorce, making an order setting aside or varying any term of the agreement relating to the periodical allowance.'.

Mr. Deputy Speaker: With this it will be convenient to take Government amendment No. 8.

The Solicitor-General for Scotland: These amendments are intended to ensure that where a periodical allowance on divorce is payable under a voluntary agreement, it will always be possible for a payer who is bankrupt to apply to the court to vary or set aside the provision for the periodical allowance as may be appropriate in the circumstances. Where a person becomes bankrupt, the trustee in bankruptcy will take possession of almost all his assets and probably a fair proportion of his income. In these new circumstances, the amount of periodical allowance payable by the bankrupt person to his divorced spouse may be quite unrealistic. Where the periodical allowance is payable under a court order, the bankrupt person could apply for the order to be varied or set aside as appropriate under clause 13(4). Where it is payable under agreement, and the agreement provides for variation, he could apply for periodical allowance to be varied or set aside as appropriate under clause 16(1).

It is only in those cases—probably very few—where the agreement does not provide for variation that difficulty could arise. The bankrupt person could find himself liable to an obligation which is already unrealistic in the circumstances, which he has no means of paying and which the other spouse cannot in practice enforce. That is not satisfactory for anyone. It is to allow variation in those few cases that the amendment is proposed.

The additional power to vary would last only—I emphasise this—while the bankruptcy itself lasted. I stress that the amendment merely gives the court a discretion to vary or set aside a periodical allowance. It would not be obliged to do so.

Amendment No. 8 would have the effect of extending clause 16(3) to the new subsection (2A) so that any term of an agreement that purported to exclude the right to apply to the court in circumstances set out in subsection (2A) would be void.

As I have explained, the amendments deal with a problem that should seldom arise, but could cause considerable difficulties if it did. I therefore ask the House to accept them.

Amendment agreed to.

Amendment made: No. 8, in page 13, line 34, after '(1)(*b*)' insert 'or (2A)'. — *[The Solicitor-General for Scotland.]*

10.52 pm

The Solicitor-General for Scotland: I beg to move, That the Bill be now read the Third time.

The main provisions of the Bill achieve a comprehensive reform of the law of aliment, the introduction of statutory principles to be followed by the courts in making orders for financial provisions on divorce, and the clarification of the law relating to property rights and legal capacity of married persons. They are based, as Scottish Members will certainly appreciate, on the recommendations of the Scottish Law Commission, the proposals of which were widely supported,. That was reflected in the general welcome accorded to the Bill by hon. Members.

I am grateful to Opposition Members for the constructive contributions that have been made, which have resulted, I hope, in an improvement of the Bill in certain important respects, for example, to the incidental orders that we have just been discussing on Report. I commend the Bill to the House.

10.53 pm

Mr. Dewar: On the whole, the Bill is a useful addition to the law of Scotland. The Opposition took something of a battering from the Government for their lack of co-operation. We had examples earlier this evening. I am grateful that it was not the Under-Secretary, the hon. Member for Edinburgh, South (Mr. Ancram), but the Solicitor-General, who was in charge on this occasion.

Question put and agreed to.

Bill read the Third time and passed, with amendments.

STATUTORY INSTRUMENTS, &c.

Motion made, and Question put forthwith pursuant to Standing Order No. 79(5) (Standing Committees on Statutory Instruments, &c.)

HOUSING (SCOTLAND)

That the draft Scottish Special Housing Association (Limit of Advances) Order 1985, which was laid before this House on 23rd April, be approved.—*[Mr. Neubert.]*

Question agreed to.

Newham (Young Persons)

Motion made and Question proposed, That this House do now adjourn.—*[Mr. Neubert.]*

10.54 pm

Mr. Tony Banks (Newham, North-West): I have sought this short debate on the problems of youth in Newham because I have become disturbed by the amount of evidence that has been presented to me by various agencies and youth workers operating in the borough of Newham and the evidence before my own eyes daily as I live in my constituency. What is emerging is making me angry and considerably alarmed for the future.

On many occasions, I and my hon. Friend the Member for Newham, South (Mr. Spearing), who has joined me here, have pointed out that the people of our borough face social, economic and environmental problems that are greater than almost anywhere else. The Under-Secretary of State for the Environment—the hon Member for Ealing, Acton (Sir G. Young)—knows that from his own experiences, because all three of the Members who represent Newham have been with him on a tour of the borough. By his Department's assessment, Newham is second only to our neighbouring borough of Hackney as the most deprived local authority area in England. Whereas Hackney has partnership status, Newham is still denied it. I hope that the Under-Secretary of State will give us the good news which I and my hon. Friend the Member for Newham, South have been waiting so long to hear. What more evidence does the Under-Secretary of State and his colleagues require to convince them of the justice of our case?

In Newham, 11,000 households are without their own bath or inside toilet, 6,318 households are overcrowded; there is the highest percentage in the whole of London of children living in poor housing; 58 per cent. of children live in overcrowded accommodation; and 15 per cent. of children live in households containing at least one unemployed adult. For the first time, 30,000 people in Newham are on supplementary benefit. Sixty five per cent of the council's tenants receive housing benefit. With 17,000 people out of work, the unemployment rate approaches 20 per cent. The Under-Secretary of State knows these statistics, yet we still seem unable to convince him and his colleagues that we need that extra assistance that only his Government can give.

Youth unemployment is considerably higher than 20 per cent. A review citing the percentages of young people who were eligible to leave school at the end of the 1984 academic year shows that their destinations were as follows: 30 per cent. stayed on at school, 8 per cent. attended college, and 62 per cent. left full-time education. At the earliest opportunity, 62 per cent. left school. Of that percentage, 20 per cent. are known to be in permanent employment, 11 per cent. are known to be on the youth training scheme, 25 per cent. are registered for work at the careers office and the destination of 44 per cent. is unknown. Of the 62 per cent. of those who left school at the end of that academic year, 69 per cent. are either registered for work or seem to have dropped out of the system — 42 per cent. of the entire output of that academic year. That is a tragic comment on the state of the job market and the prospects facing youth in Newham.

High unemployment, a poor environment, housing stress, low educational achievement and a general lack of social amenities combine to brutalise people, especially the young. What sort of background is that for the youth of Newham to grow up in? Would the Under-Secretary of State want his children to face those miserable prospects? A whole generation is becoming increasingly dispossessed of those rights and opportunities that were established, improved or maintained during the past 30 years.

Youth as a group in our society is damaged far more by unemployment than others. The Government's blind and tragic refusal to assist any growth in the economy, together with the imposition of cuts in public expenditure and the insidious rolling back of the welfare state, hit the young disproportionately in Newham and elsewhere.

It is all very well to talk about voluntary redundancies, early retirements and natural wastage. They sound painless —perhaps for some of the workers involved they are— but for the young, these devices merely mean more jobs lost and further restrictions placed on their all-too-limited job propects.

In Newham, as elsewhere, the young are being continually bombarded, on television, in newspapers and in shops, with all the tempting luxuries that money can buy —if that money were available. In our acquisitive and materialistic society, the expectations and the needs of the young are being continually excited—but for so many of them the means to meet those expectations are being cruelly denied.

The Prime Minister is fond of talking about moral values, but, frankly, she gives no moral lead to the young in Newham or in the country as a whole. After all, her economic policies are deliberately geared to promoting self-interest, greed, selfishness and soulless materialism. If we add to that a concoction of mindless populism and a willingness to employ crude force rather then arguments, we have the creation of a social time bomb that could yet destroy what civilised norms are left in this country. The recent upsurge in violent behaviour among football crowds can and is being seen by some as a harbinger of future developments in the wider society that we all ignore at our peril.

At a recent meeting that I attended in Newham of young people in receipt of DHSS board and lodging payments —soon to be hounded out of the borough and moved around the country because of the Government's changes in regulations—one youngster said that he would be better off in jail. What an indictment of our times for a young person to say that in a meeting and get agreement from so many other young people. Yet this Government are busily creating among the young an ever-increasing number who adopt just that attitude. Those young people cannot see what stake they have in our society. Indeed, they have no stake. For them there are no social norms, about which the Prime Minister keeps talking. They feel that they have nothing to lose by turning to violence, drugs and crime.

It is a matter of some regret that Newham has a high crime rate. Tragically, it is growing fastest among the young. But in a society that rewards the strong and denigrates the weak, is it any wonder that so many of our young are being corrupted and led astray? Professional youth workers in Newham have told me of 18 and 19-year olds who are already long-term unemployed, gradually losing all self-respect and respect for others. Young people in my borough spend large amounts of time begging—

this is 1985 — and it is tragic that that is becoming socially acceptable among the young. There is also increasing evidence that teenage prostitution is on the increase, and many young women in Newham are deliberately entering into disastrously early relationships and pregnancies as a way of trying to achieve some form of adult status and their own accommodation. They regularly come to my advice surgery. The borough already has more than 5,000 single-parent households.

Against that frightening social background, Newham council and the voluntary organisations working with young people are subject to increasing attacks upon their resources. Youth services have been forced to cut back on their provision and curtail badly needed building programmes while the Government deliberately redistribute support to the shire counties and pump money into face-saving and cosmetic training schemes — neglecting those experienced agencies that have traditionally supported the young people who have difficulty coming to terms with the adult world.

Many of the professional youth workers in Newham feel that we are approaching a situation where the majority of young people will be unable to take the normal steps to adulthood. It has been suggested—and I tend to agree from my experience — that inner-city areas such as Newham will eventually be reduced to battlefields of warring gangs of youth. Already the police in the borough are overwhelmed by the sheer level of street crime, racist attacks and burglaries. Householders in Newham, as in other parts of London, are being encouraged to employ private security firms to patrol the streets and protect their properties.

Inexorably we are moving towards no-go areas, where policing will either be absent or very limited—and that, of course, will be complemented by middle class enclaves where police effort will be concentrated. Those are existing or possible images of life in Newham in the 1980s and the 1990s, as ordinary, decent people in my community are gradually overwhelmed by the sheer scale of the problems confronting them. Those images are not the product of my over-stretched imagination but are based on statments made to me by responsible individuals who are growing both frightened and alarmed by what they see and hear around them in the borough of Newham.

Much as I have time for the Minister—although he has taxed me in terms of my patience and my sympathy on many occasions—I expect little, if anything from him or his Government, because it is his Government who are responsible for the the rapid pace of social breakdown in Newham. The youth of my borough, not surprisingly, want real jobs and decent pay. They want homes. They want social and recreational facilities into which they can channel their energy and exuberance.

Mr. Nigel Spearing (Newham, South): Is my hon. Friend aware that in the south of the borough, in the royal Victoria dock, the borough council has a lease with the London Docklands Development Corporation for recreation on that mile-long stretch of water? But it is a lease for only five years with an unelected body. Does not that emphasise one of our problems — the existence of an unelected body which governs a very large area of the south of the borough?

Mr. Banks: I could not agree more. The Minister and his colleagues are continually pointing out to us the success, as they see it, of the London Docklands Development Corporation, but the LDDC has been given resources and powers that the borough councils in the docklands area and the GLC can only have dreamt of in past years. The difficulty is that so many of the activities of the LDDC take place behind closed doors. I have to keep asking the Minister questions to find out what is going on in docklands.

The one thing we know is that after the next Labour Government are elected in a couple of years' time, the LDDC will be abolished, and the resources that it is currently squandering will be given to the docklands boroughs to deal with the problems of the people of Newham in the way that they would want them dealt with.

We want action from the Government. We do not want lectures from the Prime Minister, coming from her wealthy and privileged background, about the responsibilities of youth. There is no way that Newham borough council can provide out of our own resources the sorts of things that we want. We desperately need a Government who will recognise the social time bomb that is even now being primed in Newham and other inner city areas. We want such a Government to act with speed and determination to eliminate the economic and social deprivation which is the root cause of the problems that I have been trying to discuss.

I do not expect to see this Government being sympathetic or taking any action. I know that that can come only with the speedy election of a Labour Government. I hope that that Labour Government will appoint a Minister with special responsibilities for the young, since the young represent society's investment for the future. It is an investment that is being cruelly squandered in Britain at the moment. The signs of social collapse starting with the young are there in Newham and elsewhere in London for all who wish to see, but tragically that does not appear to include the Prime Minister and her Government.

11.9 pm

The Parliamentary Under-Secretary of State for the Environment (Sir George Young): During the course of his remarks, the hon. Member for Newham, North-West (Mr. Banks) accused me of taxing him and taxing his patience. For the past 12 months I have been answering the parliamentary questions churned out by his research assistant. I think that my patience has been taxed just as much as the hon. Gentleman's. On the LDDC alone, I have answered 102 parliamentary questions in the past 12 months. I think that the hon. Gentleman is running out of steam, because his four recent questions were identical to one that he asked me only a fortnight ago.

The hon. Gentleman has tabled some interesting questions about the number of paper clips purchased by my Department. Information that has been released to us from the GLC indicates that it is part of his campaign to try to destroy the stamina and the enthusiasm of my officials. I have to tell him that his campaign will not work. The hon. Gentleman is riding his hobbyhorse again. The reality is that the LDDC has produced action. Towards the end of his remarks he asked for action. There was little action before the LDDC. There was a great deal of talk. The GLC had access to all the resources that it needed, if it had wanted to make substantial progress in docklands, but it did not make use of them. There was a rather unconstructive dialogue between the GLC and the

[Sir George Young]

boroughs. Now there is action. If one goes around the docklands area one can see work being created and homes being built.

Although the hon. Gentleman wants the LDDC to be wound up, in other parts of the country where we have LDDC-type operations in the form of the new towns, each time that the Government want to wind one of them up we receive representations from his colleagues asking us to keep for another year or so that quango, appointed by Ministers, which is unelected and not accountable to local people.

I come now to the theme of the hon. Gentleman's speech. I welcomed the time that he and the hon. Members for Newham, South (Mr. Spearing) and for Newham, North-East (Mr. Leighton) took when they escorted me around the borough for a day last year. It made a great impression on me. I enjoyed meeting the people in the borough. I hope that some, if not all, of the decisions that my Department has taken subsequently have been of some help.

I want to assure the hon. Gentleman that the plight of young unemployed people is a matter of deep anxiety to me and to the Government. We are, of course, aware of the problems facing young people, about which the hon. Gentleman spoke so eloquently, many of them from disadvantaged groups and ethnic minorities who are living in inner city areas such as Newham.

In many ways, it is those young people who have been hardest hit by the recession. It is in recognition of that that the Government are pursuing some specific initiatives aimed at improving employment prospects and providing social and community support for young people. Young people in Newham want hope, self-respect and a job. In that they are the same as young people in Acton or anywhere else in London.

Our first priority must be to reduce the level of youth unemployment. I accept that the rate in Newham is among the highest in London. Some measure of the importance that we place on that is the £2·25 billion that the Government spent in 1984-85 on employment and training schemes, many of them aimed at young people.

The main initiative directed at improving the skills and training of school leavers is, of course, the YTS. In view of the figures that the hon. Gentleman deployed, that is of special relevance to Newham. However, it is important that young people take up that opportunity. I hope that the hon. Gentleman and those in the voluntary organisations with whom he is in contact will encourage young people to take up the places.

I was dismayed to find that only 82 per cent. of the YTS places in Newham were filled last year, despite the fact that nearly 80 per cent. of those who completed the training subsequently found jobs.

In 1985-86, 750 places have been approved at a total cost of £1·5 million. That budget is bigger than that for Hackney, Haringey or Southwark. It shows the priority that we place on tackling the problems in Newham.

I was encouraged to hear that Newham is sponsoring three schemes with over 90 places—a social services training workshop, a clerical and a building scheme! I was pleased to learn that there is a high ethnic minority participation in those schemes.

Apart from the council, Newham does not have many large employers to run schemes. I was interested to see that a successful project has been achieved by the Docklands and East London Training Agency, which is acting as a managing agent for a scheme sponsored by Grand Metropolitan Community Services. DELTA has links with 170 potential providers of training—mainly small firms covering a wide range of trades—and, when necessary, it can cater for trainees' individual preferences. Those have included locksmiths, glass blowers and Afro-Caribbean hairdressers. I believe that that shows a potential for providing training linked to local firms and the needs of young trainees.

In addition, as from April 1986, YTS will be extended to provide two years' training for 16-year-old school leavers and one year for 17-year-old leavers, thus ensuring that anyone under 18 who is not still at school and has no job has the opportunity to receive good quality training.

In addition to YTS, there are a number of MSC employment initiatives available to young people in Newham, of which the major one is the community programme. Under this, long-term unemployed over the age of 18 are provided with temporary employment on projects of benefit to the community. At the end of April this year there were in Newham a total of 249 community programme places, and I am glad to say the take-up here was 90 per cent. As with the YTS, young people must be encouraged to take advantage of the employment opportunities offered by the community programme, which is being expanded nationally from 100,000 filled places to 230,000 by the end of May 1986. Agreement has now been reached for an initial increase of 50,000 by December of this year, of which 13,500 will be in London. Additional places in Newham and other London boroughs are currently being considered.

The hon. Gentleman spoke about the resources available to the local authority and complained about cuts in services. Between 1981-82 and 1984-85 the London borough of Newham's current expenditure increased by 30·8 per cent., ranking second to the London boroughs. The average increase was 17·6 per cent. The borough's 1985-86 target of £124·154 million is a 3·76 per cent. increase on the 1984-85 budget. The grant related expenditure of £544 per head ranks highest of the London boroughs and is to be compared with an average of £384. Some of the problems that the hon. Gentleman mentioned of deprivation and some of the client groups in the borough are recognised in some of the figures which I have quoted.

Mr. Banks: Can the Minister tell us whether Newham will be rate capped in the next year?

Sir George Young: No, I cannot. That is because the Government have not yet addressed themselves to the important problem of rate capping next year. I think that the hon. Gentleman knows that a number of councils are still grappling with their consciences over decisions for this year. I think that he knows also what the timetable is for rate capping next year.

The hon. Gentleman mentioned, as I thought he might, the designation of the London borough of Newham under the urban programme. We provide extensive support for projects in Newham that are aimed at both improving the skills of young people and providing social and community support. The hon. Gentleman and his hon. Friend the Member for Newham, South have been consistent in their campaign for more Government resources to be directed towards Newham, particularly in

their support of the borough's case for promotion to partnership status. The argument in favour of partnership or programme authority status for Newham under the urban programme has been forcefully stated again tonight. The council narrowly missed such status when the lists were last reviewed in 1983. It had not at that time submitted the powerful submission which I discussed with hon. Members from the borough and representatives of the council, the voluntary sector and the chamber of commerce last December. However, I recognised at that meeting that when the list is next reviewed Newham will be knocking very strongly at the door. The hon. Gentleman asked whether we needed any more evidence. I can tell him that I think we have all the evidence that we need. I accept that the case has been presented forcefully. For the time being, the best course for the borough must be to maximise its benefits from the sources of funding that are available, and these are not insubstantial.

I am delighted to see that Newham is making a more concerted attempt to benefit from urban development grant. The approval of the £500,000 UDG in March for the redevelopment of a former power station site by Gunson Sortex in the Marshgate industrial improvement area is an indication of the potential of UDG. It will directly lever £2·8 million of private investment and provide 82,000 sq ft of industrial and office space—a significant source of jobs in a depressed area.

The programme of reclamation, job creation and housing provision by the LDDC is also a continuing positive force in the southern part of the borough. This year alone about £4·8 million has been allocated for environmental works, reclamation and utilities in the Newham area of docklands in addition to £250,000 of support for voluntary projects. In future, the development of the STOLport should attract more employment to the royal docks area. My right hon. Friend the Secretary of State acknowledged that in his recent decision to approve outline planning permission for the airport. Clearly these initiatives do not solve all the borough's problems, but they are not irrelevant to the issue of unemployment.

I turn to the current position of other urban programmes support. Newham current receives funding for industrial and commercial projects as an other designated district — or ODD as it is generally called — and for social projects under the traditional urban programme. As an ODD, Newham receives grant towards a range of projects aimed at economic regeneration, in particular to help small businesses get established. In 1984-85 such support amounted to £475,000, and for 1985-86 nearly £250,000 has already been approved. A particularly good example of the cost-effectiveness of the support is the Stratford workshops project. We have recently approved a £35,000 grant for improvements and six new workshops, additional to the 89 small starter units already available and in action. They provide cheap and accessible accommodation for new firms and, in addition, grant can be made available to help new firms start up. That could provide the opportunity for new young businesses to build on some of the skills obtained from the training initiatives in the borough. Occupancy of the units is consistently high, and once established many of the firms move to larger premises.

I have been impressed by the way in which Newham has managed its use of ODD funds and industrial development generally. It is good at giving advice and help to firms, and it receives active co-operation from the private sector in the area, which proved willing to assist in making business expertise available to counsel and advise new businesses. As a result, the borough gives grants only when they are strictly necessary and will be effective.

Mr. Banks: Is the Minister aware that the Greater London Enterprise Board gives considerable assistance in Newham? However, the Minister for Local Government is putting restrictions on the GLEB, which could jeopardise jobs in Newham and elsewhere. What has the Minister to say about that?

Sir George Young: I think that I have seen the letter to my right hon. Friend the Minister for Local Government from the GLEB which asked for a meeting to discuss these issues. I hope that a meeting will take place shortly, when they can be discussed in sightly more detail.

When I met the delegation from Newham in November 1984, it was clear that there were still opportunities for even wider use of urban programme resources to include broader-based training projects, particularly aimed at the young unemployed. I encourage projects of this type. No such schemes have yet been put to me, but my Department would be glad to discuss any proposals with the borough and we would be sympathetic to funding worthwhile projects.

Regarding the traditional urban programme, we have always recognised Newham's high level of deprivation. For 1985-86 the borough has received the highest level of new approvals, not only in London but in the whole country. Six new projects, costing £400,000, were approved. That represents an increase of 50 per cent. over the level of new projects approved last year. I hope that the hon. Gentleman will accept that that is a clear reflection of our policy of concentrating traditional urban programme funds in the most extensively deprived areas. I hope that it reminds him that nationally, because of the continuing high level of support for existing schemes, resources for new projects have inevitably fallen again by about half. Newham receives considerable support for continuing projects, which amounts to £765,000 for 1985-86.

The hon. Gentleman touched on the board and lodging regulations, which were debated extensively on 2 April. My only point this evening is that the DHSS is carefully monitoring the effects of the new regulations, and my Department will liaise with it closely. In the light of how the system operates, Ministers will consider whether any changes are necessary.

The hon. Gentleman mentioned many issues about dealing with juvenile crime in the borough and relationships with the police. I was interested to hear of the way in which the police are working with youngsters in Newham, especially ethnic minority groups. No fewer than 13 initiatives have been brought to my attention, which aim to improve links between the police and young people, increase the understanding of police work, and provide social support for young offenders.

I am aware that I have not done full justice to the wide range of issues raised by the hon. Gentleman. I shall write to him to deal with the more significant omissions, and perhaps he will table yet another question to me to elicit responses. I assure him that the Government are aware of the problems faced by young people in Newham and that

[Sir George Young]

we are trying to help them. I have outlined some of the schemes introduced by the Government to tackle those problems.

Question put and agreed to.

Adjourned accordingly at twenty-three minutes past Eleven o'clock.

House of Commons

Tuesday 4 June 1985

The House met at half-past Two o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

PRIVATE BUSINESS

ROYAL BANK OF SCOTLAND BILL

Order read for consideration of Lords amendments.
To be considered tomorrow.

BATH CITY COUNCIL BILL *[Lords]*

GREATER MANCHESTER BILL *[Lords]*

LUTON BOROUGH COUNCIL BILL *[Lords]*

Orders read for Third reading.
To be read the Third time tomorrow.

Oral Answers to Questions

DEFENCE

Departmental Cars

1. **Mr. Roger King** asked the Secretary of State for Defence how many cars his Department has purchased over the last two years; and whether they were produced in the United Kingdom.

The Parliamentary Under-Secretary of State for Defence Procurement (Mr. John Lee): I apologise for the absence of my right hon. Friend the Secretary of State for Defence, who is on an official visit to Denmark. Over the past two financial years—April 1983 to March 1985—we purchased 4,411 cars and car-type utility vehicles, and 96 per cent. of this total, or 4,244 vehicles, were produced in the United Kingdom.

Mr. King: Does my hon. Friend agree that there is a distinction between what is produced in the United Kingdom and what is manufactured in the United Kingdom? Does he agree that priority must be given in future purchasing to the United Kingdom content of vehicles?

Mr. Lee: Yes. We buy British vehicles whenever that is sensible, economic and consistent with our international obligations. We have a first-class record of support for the United Kingdom motor industry. I note my hon. Friend's comment about content. There is a problem and we are paying increasing attention to it.

Mr. MacKenzie: What on earth is the Ministry of Defence doing with more than 4,000 cars?

Mr. Lee: It is a substantial Ministry.

Mr. Peter Bruinvels: May I congratulate my hon. Friend on the superior and good example set by his Ministry in purchasing so many British cars? I wish that other Departments would follow that example. May I reinforce the view expressed by my hon. Friend the Member for Birmingham, Northfield, (Mr. King) in saying that it is important to buy British cars with United Kingdom content?

Mr. Lee: Increasingly we are taking into account United Kingdom content in our purchasing.

Mr. Denzil Davies: The Minister's answer was carefully drafted, and I have no doubt that he is pleased with its reception, but why is it necessary for Ministers, the top brass and top civil servants, to drive around in Ford Granadas, which are mainly, if not completely, made in West Germany? Do not officials in the Foreign Office and in almost every other Government Department ride in British-made cars?

Mr. Lee: When the Ford Granadas were chosen, they were considered to be the best value for money. When there is a model change in two years' time, we shall evaluate other contenders.

Arms Control Unit

2. **Mr. D. E. Thomas** asked the Secretary of State for Defence if he will make a statement on the work of the arms control unit in his Department.

The Minister of State for the Armed Forces (Mr. John Stanley): The defence arms control unit was formed on 2 January. It has combined and strengthened existing civilian and military expertise within the Ministry of Defence in this area. It provides the focus within the Ministry for advice to my right hon. Friend the Secretary of State on how best to support the Government's policy of balanced and verifiable arms control, on which the lead responsibility continues to be with the Foreign and Commonwealth Office.

Mr. Thomas: How can we place any confidence in the work of the unit or in statements made in the last year by the Secretary of State and other Defence Ministers when clearly they have misled the House and the country about the deployment by NATO of battlefield nuclear weapons?

Mr. Stanley: I cannot accept that. The position is clearly reflected in the communiqué that was issued after the latest meeting of the nuclear planning group. I think the hon. Gentleman will find that perfectly consistent with the answers that my right hon. Friend the Secretary of State and my colleagues on the Front Bench have given.

Sir Antony Buck: Does my right hon. Friend agree that it is most important to maintain the closest co-ordination with the Foreign Office on this matter? Would he like to say something about the co-ordination that there is between the unit and similar units working within the ambit of the Foreign Secretary?

Mr. Stanley: I entirely agree with my hon. and learned Friend. There is a need for close co-ordination, and I can assure him that it takes place extremely closely at both ministerial and official level.

Mr. Denzil Davies: Is it not a fact that this so-called arms control unit is a cosmetic exercise? What arms are being controlled? In fact, the Government are engaged on a massive escalation of nuclear power in purchasing Trident. They have accepted cruise missiles at Greenham

Common and probably at Molesworth. They are embarking on the modernisation of British battlefield nuclear weapons. What on earth are we talking about in terms of arms control?

Mr. Stanley: The right hon. Gentleman is entirely wrong when he refers to a cosmetic arrangement. I thought that the Opposition Front Bench and other Opposition Members would welcome the constructive contribution that is being made for the first time by the Ministry of Defence in arms control, under this Government.

Dr. Hampson: Does my right hon. Friend agree that the previous Labour Government could have taken such an initiative, but made no such attempt to have an equivalent unit in the Ministry of Defence, which the public expect? Is the unit in touch with Washington? It is vital that we tell the American Government that they must hold to SALT 2 although it is unratified.

Mr. Stanley: I can assure my hon. Friend that the defence arms control unit keeps in close contact with opposite numbers in Washington as well as in the Foreign Office.

British Citizens (Employment)

4. **Mr. Yeo** asked the Secretary of State for Defence how many British citizens are employed in the armed forces or otherwise by his Department.

Mr. Lee: That information is not held centrally and could be provided only at disproportionate time and effort. Each candidate for Her Majesty's armed forces, and for the Civil Service, must meet certain nationality and residence rules in order to be eligible for consideration for a post and each case is individually examined at the time of application.

Mr. Yeo: I understand that the Ministry of Defence has more than half a million United Kingdom-based staff apart from its overseas staff. We should be able to ascertain how many British and foreign citizens are employed, directly or indirectly, by the Ministry of Defence. Will my hon. Friend assure me that every effort will be made to ensure that British citizens are given every consideration when they apply for posts that are held by foreign citizens, so that the maximum number of British staff are employed by the Ministry?

Mr. Lee: My hon. Friend's figure is not right. We are talking about 500,000 employees overall—service men and those on the civilian side, both here and abroad. There is no management or other requirement to provide a global nationality breakdown of service personnel and civil servants. However, I shall take into account my hon. Friend's point about United Kingdom citizens. Let me take West Germany as an example. We employ about 25,000 locally there, and probably the vast majority are German.

Mr. George: How many British citizens or other citizens are likely to be deployed on the new aircraft carrier, or through deck cruiser, the Ark Royal? Will the Minister confirm, or deny, that, after tens of millions of pounds have been spent on that aircraft carrier, no troops, sailors or aircraft will be specifically designated for it?

Mr. Lee: In terms of our planning and the size of the fleet, we believe that there is a sensible equation between the numbers that we shall employ in our Navy and the numbers that we shall require.

Falkland Islands

5. **Mr. Andrew F. Bennett** asked the Secretary of State for Defence if he will estimate the cost per Falkland Islander of defence expenditure in connection with the Falkland Islands for each of the next five years.

Mr. Stanley: The provision for Falklands costs included in the defence budget is equivalent to £288,000 per Falkland Islander in 1985-86, £234,000 in 1986-87 and £156,000 in 1987-88. Funding thereafter will be determined in future public expenditure surveys.

Mr. Bennett: Would not the Minister have thought that many of the Falkland Islanders would prefer a smaller sum than that to move elsewhere? Why is it so important to give such a sum of money to people in the Falkland Islands to maintain their traditional role in that area rather than to try to maintain the tradition in this country of full employment? If similar sums of money were spent in some of the areas of extremely high unemployment, would that not be far better and would we not protect the traditions of this country rather than waste the money in the Falklands?

Mr. Stanley: Those hon. Members on both sides of the House who visited the Falkland Islands have been struck by the determination of those who live there to continue living under the British way of life. I do not regard this in any way as a possible waste or misuse of money. More than 250 British people lost their lives in the recovery of those islands, and I am certain that it would be quite unacceptable to the great majority of British people not to take steps to defend them thereafter.

Mr. Cyril D. Townsend: Does my right hon. Friend agree that all Conservative Members feel that the Secretary of State was absolutely right to mention the other day in the Falkland Islands that it was to the benefit of NATO that one member of NATO had shown the ability to back diplomacy with skilled and courageous use of force? At the same time, we should make it absolutely clear to the Argentines that the Falkland Islands are not a NATO base and that at present there is no intention of their being one.

Mr. Stanley: It was a good indicator from this country as a NATO member that it made its own determination to protect the interests of British people wherever they might be and to ensure that British territory was not subject to invasion in any part of the world.

Mr. Robert C. Brown: Is the Minister not aware that many thousands of people in the north of England will be absolutely outraged at the answer that he has just given? It costs about £200,000 per head to keep Falklanders in the Falkland Islands, yet young people in places such as the northern region have been forced to move to the south-east or the west midlands to try to find work. They could be maintained in their own areas in full-time employment —instead of suffering from 20 per cent. unemployment —for much less than we are frittering away on the Falkland Islands.

Mr. Stanley: I am quite certain that many people in the north-east of England will clearly remember what it cost,

both in human and financial terms, to repair the ravages in this country when peace broke down between 1939 and 1945.

Falklands Airfield

6. **Sir William van Straubenzee** asked the Secretary of State for Defence when he expects civilian aircraft to be able to use the military airfield in the Falkland Islands.

Mr. Stanley: To enable the remaining construction work to be completed as rapidly and as economically as possible between now and early 1986 when the airport becomes fully operational, the use of Mount Pleasant airport currently has to be limited to the following aircraft: wide-bodied aircraft owned by or chartered by the Ministry of Defence carrying service personnel; civilian passengers and priority freight; locally based light aircraft; and possibly the occasional civil charter flight. Once the airport becomes fully operational early next year, there will normally be no need to limit the frequency of either military or civil flights.

Sir William van Straubenzee: I thank my right hon. Friend for that reply, and appreciate that in the early support facilities such as buildings are necessarily extremely limited. Does his answer confirm—I hope that it does—that, in view of the massive and proper investment in this remarkable airfield, there will be no avoidable delay in making it available for civilian purposes when that is possible?

Mr. Stanley: I can give my hon. Friend that assurance. As I have explained, we are trying to ensure that the airfield is fully completed at the fastest possible rate. After that takes place early next year there will be no impediment, apart from overriding military requirements, to the civil use of the airfield.

Mr. Campbell-Savours: Has not this military airfield been an extravagant abuse and use of public resources? Is it not true that had the Government offered each Falkland Islander £150,000 or £200,000—only one fifth of the amount of money which has been spent on the Falklanders in the last four years—they would all have sought to leave the Falkland Islands and the British Government would not be faced with the prospect of defending an island that is quite indefensible? Why do the Government not review their position and face up to common sense?

Mr. Stanley: As I said previously, there is no basis for saying that the Falkland Islanders would want to leave the way of life that they have chosen.

Mr. Campbell-Savours: Just make them an offer.

Mr. Speaker: Order.

Mr. Stanley: Regarding the costs of the airport, it has the benefit of ensuring savings from the present cost of the air bridge, and also of giving us much greater flexibility on force levels as a result of the greater rapidity of reinforcement that we can achieve through the construction of the airfield.

Mr. Latham: Is my right hon. Friend aware that Conservative Members regard honouring our commitments to the Falkland islanders as a matter of honour?

Mr. Stanley: I am grateful to my hon. Friend, and I am certain that that is the view, not only of Conservative Members, but of the overwhelming majority of British people.

Accidental Nuclear War (Prevention)

7. **Mr. Simon Hughes** asked the Secretary of State for Defence whether he will make a statement on measures taken by his Department to prevent accidental nuclear war.

17. **Mr. McTaggart** asked the Secretary of State for Defence if he will make a statement on the measures taken by his Department to prevent accidental nuclear war.

Mr. Stanley: The United Kingdom, the United States and France all have agreements with the Soviet Union to prevent accidental nuclear war. The relevant agreements for the United Kingdom are the British-Soviet Agreement on the Establishment of a Direct Communications Line —the British-Soviet hot line agreement of 1967—and the 1977 Agreement on the Prevention of Accidental Nuclear War, Cmnd. 7072.

Mr. Hughes: Does the Minister recall the words of the Secretary of State for Defence to the Defence Select Committee on 8 May, when he said that there was no precedent for the reduction of nuclear arms anywhere? Given that we are now in an age where the nuclear hair trigger is at its most dangerous, must we wait for a precedent before stepping back from that brink? Are we not, with increased research, moving nearer to it, which is in the opposite direction to the wishes of our country and to the other countries that he mentioned?

Mr. Stanley: I would have thought that the hon. Gentleman would welcome the fact that under the Government there has been a substantial reduction in NATO battlefield nuclear weapons, which is greater than that achieved by the Lib-Lab Government who preceded us.

Mr. Nicholls: Does my right hon. Friend agree that the greatest risk of accidental nuclear war would come about if government were entrusted to a party which had no discernible defence policy? Does he agree also that it would be a great tragedy if there were alliance Government, bearing in mind that their two wings have at least four discernible, different and wholly conflicting policies between them?

Mr. Stanley: I entirely agree with my hon. Friend that one of the essential safeguards of the continuation of peace is the certainty of deterrence, which is ensured by the continuation of the present Government.

Mr. Home Robertson: Is the Minister aware of the old maxim that what can happen, will happen? In view of that, why on earth are the Government increasing the risk of accidental nuclear war by deploying new nuclear weapons systems in the United Kingdom?

Mr. Stanley: The facts are clear. What the hon. Gentleman fears will happen has certainly not happened during the past 40 years.

Mr. Denzil Davies: In a previous answer the Minister mentioned battlefield nuclear weapons. Will he try to clear up the considerable confusion between statements made to the United States Congress by Dr. Wagner about the decision to modernise British battlefield nuclear weapons,

and the Government's statements in the House? Is it intended to replace the existing 155 mm atomic shell with a new atomic shell, which can be used and will be produced by the Americans, and which can also be adapted into a type of neutron bomb? What is the Government's position? Have they told the Americans one thing and the House another?

Mr. Stanley: That is certainly not the case. As the right hon. Gentleman knows, we are not answerable for the statements made by Dr. Wagner or any other American official. I assure the right hon Gentleman that the previous answers which he and his colleagues have been given, which is that no decision has been taken to modernise British battlefield nuclear weapons, are the case.

Ulster Defence Regiment

8. **Dr. Mawhinney** asked the Secretary of State for Defence how many members of the full-time and part-time Ulster Defence Regiment are Roman Catholics; and how these figures compare with those five years ago.

Mr. Lee: Between 2 and 3 per cent. of the Ulster Defence Regiment have declared their religion as Roman Catholic. Information on the position five years ago is not available, but it is probable that the proportion has not changed significantly since then.

Dr. Mawhinney: Does my hon. Friend agree that the chances of cross-community acceptance of the UDR would be increased if more of its members were Roman Catholics, and that it is precisely because the IRA recognises that fact that it has been deliberately attacking Catholic members of the UDR in recent weeks?

Mr. Lee: I entirely agree with my hon. Friend. We encourage volunteers from all sections of the community in Northern Ireland, but it is most necessary to build up Catholic numbers. However, tragically, intimidation and brutal murders have undeniably had an effect on Catholic recruitment, and a particular brand of courage is required for Catholics to participate in the UDR.

Mr. Duffy: Is the Minister aware that, contrary to the statement of his hon. Friend the Member for Peterborough (Dr. Mawhinney), what is exercising the minds of Catholics in Northern Ireland is not whether they should be members of the UDR but whether they can avoid being killed by members of the UDR — [HON. MEMBERS: "No."] Does the Minister not recall the recent stories of convictions of members of the UDR for criminal offences and linking them with illegal Protestant paramilitary organisations? How does he think that such a tarnished organisation can possibly enhance the name and the role of the British Army?

Mr. Lee: I am very sorry that the hon. Gentleman has gone over the top in this matter. There are about 6,500 members of the UDR, and only a very small proportion of them have had allegations brought against them. There is bound to be the occasional black sheep in any group of that size. The whole House and whole country should be deeply appreciative of all those involved in the UDR. They have served with considerable bravery, integrity and dedication.

Sir John Biggs-Davison: Do not the court cases mentioned by the hon. Member for Sheffield, Attercliffe (Mr. Duffy) in his hysterical supplementary question demonstrate the determination of the authorities to ensure that any crimes committed by members of the UDR are properly punished? Does not the fact that so many Roman Catholics who were members of the UDR have been murdered show a deliberate policy of the terrorists to intimidate Roman Catholics out of the UDR? Will the Ministry of Defence acquaint the House and the public with the extent of the Roman Catholic sacrifice?

Mr. Lee: My hon. Friend is right on all counts, but it would be inappropriate for me to comment on particular cases before they come to the courts. One is very conscious of the intimidation and the seeming picking off by terrorists of Catholic members of the UDR.

Mr. Flannery: When will the Government face reality in regard to Northern Ireland and realise that the overwhelming majority of Catholics would no more dream of joining the UDR than of flying in the air? The reality is that they believe in a united Ireland, and that due to British imperialism there will never be peace in that benighted country until Ireland is united.

Mr. Lee: The hon. Gentleman is at least consistent in his minority view.

Mr. McNamara: Is the Minister aware that when anyone dies in Northern Ireland, whether it is a member of the UDR, a British soldier, a terrorist — however misled he may be — or an innocent civilian, that is a blow to their families, their friends and to everybody, and that we cannot but sympathise with them? That having been said, is the Minister aware of the utter alienation of the minority population in Northern Ireland from the UDR, partly because of its origins in the B Specials and partly because of its continuing conduct over the years in the treatment of individuals, whether they have been guilty of criminal offences or not?

Is the Minister also aware that the future of the UDR is one of the main issues under discussion between the British Government and the Government of the Republic, and that a sensible policy of trying to move away from having too much reliance on the UDR, together with a reduction in its numbers, would be far more effective in achieving peace in Northern Ireland than most other actions taken by the Government?

Mr. Lee: Once again the hon. Gentleman's views are consistent, and he frequently expresses them on the UDR. The Army and the UDR are required at all times to operate within the law.

Local Overseas Allowances

9. **Mr. Speller** asked the Secretary of State for Defence if he will list the local overseas allowances of Property Services Agency staff stationed in Northern Ireland, West Germany or Gibraltar in comparison with those payable to airmen with the rank of sergeant or flight lieutenant; and if he will make a statement.

Mr. Lee: The overseas cost of living allowance for civil servants in the Property Services Agency or other Departments is known as foreign service allowance. Because of differing conditions of service and salary levels it is not directly comparable with the local overseas allowance paid to service men.

Local overseas allowance for the ranks mentioned varies between nothing and £2,248 per annum. Foreign

service allowance for equivalent civilians varies between £220 per annum and £2,613 per annum. I have written to my hon. Friend with further full details.

Mr. Speller: I thank my hon. Friend for his answer. However, is he aware of the deep resentment that is felt by the armed forces, who are clearly at a disadvantage compared with their civilian counterparts in similar positions? Is he also aware of the number of young officers and non-commissioned officers who have said that they will be leaving the services at the end of their present engagements? Will he ask that changes in the local overseas allowance should in future be treated more sympathetically and phased in more cleverly?

Mr. Lee: I am grateful to my hon. Friend for his interest, but there is no evidence to suggest that the reduction in the local overseas allowance in Germany has caused many of the younger officers and non-commissioned officers to give notice of their intention to leave. The overseas foreign service allowance paid to civil servants employed by the Property Services Agency and the Ministry of Defence is also subject to periodic review. The foreign service allowance in Germany was reviewed in November 1984. Substantial reductions were involved, which came into effect on 1 January 1985. The reductions in the local overseas allowance are being delayed by two months beyond the normal implementation date.

Mr. Skinner: In answer to an earlier question about how many people are employed by the British Government abroad the Minister said that he did not know; he did not have a clue about how many people the Government employ. Now he tells us how much money the Government are spending on these people, although he does not know how many he has. If the Minister knows how much money the Government are spending, he ought to know how many British citizens are employed abroad.

Mr. Lee: The hon. Gentleman should listen more carefully to questions and answers. The original question that was put to me related to the nationality of those we employ, not to the numbers. I made it quite clear that in the Ministry of Defence we employ about 500,000 people — about 330,000 in the armed forces and 170,000 civilians.

Mr. Gorst: The last thing that I would wish to do is to accuse any of my right hon. or hon. Friends of complacency, and I do not. However, in view of my hon. Friend's answer a moment or two ago, may I ask him to have another look at the effect that the local overseas allowance may have in future upon the availability of both skilled and ordinary employees, particularly in the posting in west Germany. If there are no figures at the moment which prove that people will leave the services, will my hon. Friend carry out a survey to find out what are the attitudes that may lead to people leaving the services?

Mr. Lee: We shall keep the situation under review. There is a specific question on this point from the hon. Member for Woolwich (Mr. Cartwright), which will be answered by my right hon. Friend the Minister of State for the Armed Forces. There was a reduction in the local overseas allowance for those serving in Germany, and this was not well received, but about 6,000 people benefited in almost all other postings, including the United States of America, Gibraltar, Hong Kong and Belize.

Service Personnel (Retention)

11. **Mr. Cartwright** asked the Secretary of State for Defence whether he is considering any measures to improve the rate of retention of service personnel within the armed forces.

Mr. Stanley: The present Government have implemented the recommendations in successive reports of the Armed Forces Pay Review Body. Retention throughout the lifetime of this Government has to date been significantly better in the armed forces overall than it was immediately prior to May 1979. The services have in hand certain measures to improve the retention rates of particular categories of personnel.

Mr. Cartwright: In view of the very angry reaction from service men in Germany to the cuts in the local overseas allowance — a reaction of which all hon. Members have been made aware—is the Minister saying that what are real cuts in the living standards of those personnel will not lead to any problems over retaining key personnel in Germany?

Mr. Stanley: As my hon. Friend the Under-Secretary said, we are all aware of the disappointment that was felt in Germany about the outcome of the LOA review. I remind the House, as my hon. Friend explained in the Adjournment debate on 20 May, that the LOA is not pay but is in addition to pay to compensate service men for the differential in the cost of living between the United Kingdom and overseas. When that differential narrows the LOA is reduced, and when it widens it is increased. It has to be seen in that light. The overall view in the three services across the world is that the LOA is an important protection for service men so that they know that when they are posted overseas they will not suffer a major reduction in take-home income because of having to bear the increased costs of the overseas postings to which they are sent.

Mr. Nicholas Winterton: Does my right hon. Friend accept that the reduction of the LOA, particularly in BAOR—I have just returned from a visit there because my son is serving in that part of the world—has had a dreadful effect not only upon young officers but on skilled NCOs? Is he aware that these young people are likely to come out of the Army, as my hon. Friend the Member for Devon, North (Mr. Speller) said, as soon as their period of service is ended? Therefore, will my hon. Friend take up some of the points made by my hon. Friend the Member for Kensington (Sir B. Rhys Williams) in a recent Adjournment debate and look at the possibility of providing further free transport to and from Germany and the United Kingdom?

Mr. Stanley: My hon. Friend has already kindly written to me on that point and I shall be sending him a considered reply. We are continually looking at the various allowances that are available to our service men to try to ensure that we give them, within the limits of justifiable public expenditure, the best possible conditions of service package. We shall continue to do that.

Mr. Ashdown: Will the hon. Gentleman accept that one of the things that keeps service men in the service is professional pride in their job? Does he realise that the Government's cost-cutting exercise—*[Interruption.]*

Mr. Speaker: Order. I think that the hon. Gentleman speaks from personal experience.

Mr. Ashdown: Does the Minister realise that the present cost-cutting exercise undertaken by the Ministry of Defence has resulted in a reduction in training ammunition for the services and has meant that in many cases they are not able to afford the fuel for aircraft and military transport that is needed for effective training? What will the Minister do to ensure that there are reasonable professional standards in the services?

Mr. Stanley: Judging by the enormous increase in real terms — 20 per cent. — under this Government, professional satisfaction among our service men is at a higher level than it was when the hon. Gentleman decided to come out of the services.

Mr. Stokes: Is my hon. Friend aware that, in spite of the marked increase in morale in all the armed forces since 1979, there has been some deterioration in the services in recent months, particularly among Army officers, and some disquiet about their future and that of other ranks? Is this not a matter of the gravest importance, into which we should look very carefully?

Mr. Stanley: I can confirm that the Department, and Ministers as they go around the services, are very much aware of my hon. Friend's point. That is why we are continuing, with the principal personnel officers, to look for ways in which we can do our best to improve overall conditions of service for the armed services. Our record on service pay is altogether better than that of our predecessors.

Mr. O'Neill: Is it not the case that the rate of outflow of naval officers is reaching crisis proportions and that it is now the highest figure since the 1970s? Is he aware that in the recent Southampton incident, involving a collision, there was a direct relationship between the lack of experienced officers and the difficulties in which the ship became involved? Is it not arch complacency for the Government to say that officers are in good heart when they are leaving the Navy in such dramatic numbers?

Mr. Stanley: I think that the hon. Gentleman is in a very poor position to accuse the Government of complacency. I remind him that in the financial year 1978-79, the last financial year of the Labour Government, premature voluntary retirements by men in the armed services had risen to 4·4 per cent., which is a record high over the last 10 years. This is in comparison with the last financial year 1984-85, for which the figure was 2·5 per cent.—a very substantially lower figure than when this Government came into office.

Chemical Weapons

13. **Mr. Greenway** asked the Secretary of State for Defence if he will estimate the proportion of Union of Soviet Socialist Republics and Warsaw pact defence expenditure devoted to producing chemical weapons and personnel trained to use them; and if he will make a statement.

Mr. Stanley: It is not possible to isolate those elements of Warsaw pact defence expenditure which are related solely to chemical warfare. However, it is estimated that the Soviets now have some 300,000 tonnes of chemical warfare agents at their disposal, which is sufficient to cause death and incapacitation on a massive scale.

Mr. Greenway: Is my hon. Friend also aware that 191 Soviet divisions have current training in this area, and that since we have no chemical weapons ourselves we need to look at this very carefully? What is my hon. Friend saying in response to the NATO supreme commander's calls for a specific response to this terrible challenge?

Mr. Stanley: I can certainly confirm what my hon. Friend says about the very extensive training and equipping of Soviet forces with not merely a defensive capability, but an offensive chemical capability. As to the Government's policy, it was set out in the answer which my right hon. Friend the Prime Minister gave to my hon. Friend the Member for Bexleyheath (Mr. Townsend), when she said:

"The facts are that Britain abandoned its chemical warfare capability in the late 1950s. There has been no change in Government policy since then, nor is any change now proposed. However, as a responsible Government, we have a duty to keep defence policy under review in the light of what my hon. Friend said about the massive Soviet capability in chemical weapons." —[*Official Report*, 10 January 1985; Vol. 70, c. 901.]

Mr. James Lamond: If that is an outline of the Government's policy, why did they not welcome the proposal made by Mr. Gromyko at the United Nations in 1982 when he put forward a detailed proposal suggesting that there be an end to the development, manufacture and deployment of chemical weapons, that existing stocks be destroyed under supervision, and that there be on the spot supervision to see that no further chemical weapons are developed? Why did the Government not welcome that?

Mr. Stanley: The hon. Gentleman seems not to be aware that we have been engaged in continuing negotiations on the chemical warfare treaty, which would have the very desirable effect of banning these weapons worldwide. The Government have played a very active and positive role in trying to make progress in those negotiations. We have contributed a whole series of working papers on the vital issue of verification and enforceability, but as yet there is no detailed agreement on how the verification provisions of that treaty can be operated. However, it is very much the Government's intention to go on working constructively towards the banning of chemical weapons.

Miss Foulkes: How do the Government intend to remedy the serious weakness that is posed to our troops in the central area in Germany?

Mr. Stanley: As I have said to the House, it is not part of the Government's policy to give themselves an offensive chemical weapon capability, but it is very much part of our policy to ensure that we give our own forces the best possible defensive equipment, and that we invest considerable sums in ensuring that their defensive equipment is kept up to date.

Mr. McNamara: Are the Government aware that Labour Members support the Government in their continuous efforts to try to get a ban on all manufacturing and deployment of chemical weapons? It is one aspect of the Government's policy which we fully support. Is the Minister also aware that there is considerable concern in the House that our major NATO ally, the United States, and its Administration, are still pursuing their policy of trying to get new chemical weapons developed for the United States forces in the NATO sphere? We urge Her

Majesty's Government to continue to put pressure upon the United States Administration not to take that foolhardy course of action.

Mr. Stanley: These are matters for the United States Administration. On this issue, as the hon. Gentleman will know, the President of the United States has recently set up a commission to advise himself on the policy way forward.

Defence Procurement

14. **Mr. Thurnham** asked the Secretary of State for Defence when he will be reporting on potential savings on his defence procurement policy.

The Minister of State for Defence Procurement (Mr. Adam Butler): The significant improvements in value for money which are resulting from our drive to extend competition in defence procurement have already been reported in this year's Statement on the Defence Estimates. Chapter 5 gives some notable examples, including the new Royal Air Force trainer, where the final price was as much as a third lower than the original estimate of what we might have had to pay. I also gave evidence to the House of Commons Defence Committee on 11 December 1984.

All our recent experience clearly indicates that there are further and greater potential savings to be achieved from the continuing exercise of our competition policy.

Mr. Thurnham: Is my right hon. Friend confident that he can achieve the savings that are implicit in the Government's future expenditure plans?

Mr. Butler: Of course, no targets are set, but if present trends continue I hope for a very good result. It is significant that during the last month for which I have complete figures more than two thirds of new contracts by value were brought about through competition or priced otherwise by reference to market forces.

PRIME MINISTER

Engagements

Q1. **Mr. Gareth Wardell** asked the Prime Minister if she will list her official engagements for Tuesday 4 June 1985.

The Prime Minister (Mrs. Margaret Thatcher): This morning I had meetings with ministerial colleagues and others. In addition to my duties in the House, I shall be having further meetings later today. This evening I hope to have an audience of Her Majesty the Queen.

Mr. Wardell: As one of the aims of the social security review is to simplify the system, why will the Prime Minister not establish a legal minimum wage and retain wages councils rather than subsidise employers through the new family credit scheme?

The Prime Minister: There is a consultative document about the future of wages councils, which has still to be decided. Evidence shows that if we set a legal minimum wage that tends to lead to increased unemployment.

Mr. Latham: When my right hon. Friend met Mr. Shamir, the Israeli Foreign Minister, this morning, did she stress Britain's total commitment to resolution 242 and to the right of Israel to exist within secure borders?

The Prime Minister: We referred to the Camp David agreement, which sets out explicitly that the legitimate rights of the Palestinian people should be honoured. As my hon. Friend knows, we fully support resolution 242.

Mr. Kinnock: Can the Prime Minister explain why, in the social security proposals outlined yesterday, no figures were given for the amounts that the unemployed, the sick and disabled, pensioners and families may expect to receive under any new arrangements? Why were no figures given for the number of households which can expect to lose as a consequence of the loss of housing benefit?

The Prime Minister: In accordance with custom, we have still to decide the figures for this year's uprating—*[Interruption]*. It is according to custom. It is done either on a historical basis or on a forecast. We rejected the forecast and chose the historical basis. That means that we must wait for the May retail price index figures, which are not published until June—*[Interruption.]* That method has been approved by the House. It is more certain than forecasting. As we have yet to decide this year's figures, we are hardly likely to decide figures for two years hence.

Mr. Kinnock: We have been told that this is a major shake-up of the social security system. Is the Prime Minister really trying to tell us that after thousands of hours of civil servants' time, endless wrangling in Government committees and three Cabinet meetings, she has no facts, no figures and no estimates? We are not asking for precise figures; we want dependable estimates of what the effect will be on families who need the benefit incomes of which they are about to be deprived.

The Prime Minister: The right hon. Gentleman clearly drafted that supplementary question before he heard my reply to his original question. He might recall that even his Government determined the uprating annually on a forecast basis. We do it on a historical basis. His Government followed that procedure. We uprate each year and we like to know precisely what the figures are before we decide the uprating.

Mr. Kinnock: With the celebrated toings and froings, the postponed Cabinet meetings and the wrangles that took place, absolutely nobody can reasonably be expected to accept what the Prime Minister has said. Is it not a fact that she is trying to hide what the outcome of the proposals will be, and that even she is ashamed of her proposals? Can she not give figures? Is she afraid? Is she innumerate, or simply mendacious?

The Prime Minister: No, Mr. Speaker, factual. There has been an annual uprating of social security benefits for many years. That is the fact. It is only the right hon. Gentleman who is capable of ignoring the facts. He cannot be expected to be believed if he does.

Mr. McCrindle: Does the Prime Minister think that we ought to draw any conclusions from the fact that the Leader of the Opposition is no longer prepared to leave social security matters to the hon. Member for Oldham, West (Mr. Meacher)?

The Prime Minister: I am not sure whether that is an improvement or otherwise.

Mr. Steel: Will the Prime Minister confirm one aspect of the proposals announced yesterday? Is it the case that elderly people on low incomes, living in purpose-built

housing, will in future find themselves losing part of their rate rebate and also, unless they are on supplementary benefit, housing benefit as well? If that is the case, does the Prime Minister not recognise that that means that many elderly people will not be able to afford to go on living in accommodation which successive Governments have encouraged to be specially built for them?

The Prime Minister: In the Green Paper, as the right hon. Gentleman is aware, it is intended that everyone shall be expected to pay some contribution towards rates, save possibly those on supplementary benefit. I think it is right that everyone should be expected to make a contribution towards rates so that we do not have a position in which those who make no contribution at all can demand enormous increases in local authority expenditure at the expense of other people.

Sir Ian Gilmour: Can my right hon. Friend clear up one point? Why is it suggested that everybody should have to make a contribution to rates when we understand that rates are to be abolished?

The Prime Minister: My right hon. Friend will have heard that point referred to in my right hon. Friend's statement yesterday, if in fact he heard it. In the meantime, there are rates. We cannot say what will happen if we bring forward legislation to change rates to other taxes.

Q2. **Mr. Kirkwood** asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Kirkwood: Returning to the dearth of information in terms of detailed figures in the social security review, may I ask the Prime Minister to confirm that in the Rowe report on housing benefit, paragraph 319 refers to the detailed analyses and computer studies that were available. Why have the Government not made them available to the House? I warn her that if she does not do that, and does not put some arithmetical flesh on the bones of the new structure, she will stand accused of wilfully attempting to stymie comment or, worse, she will be accused of political cowardice.

The Prime Minister: No, Mr. Speaker. This is a Green Paper. If the hon. Member looks in some of the separate volumes he will find many figures already there on a number of things. There are far too many to have been absorbed in the short time that the paper has been out. We are not yet prepared to put figures to particular benefits for very good reasons because we believe in sound finance — *[Interruption]*. Yes, Mr Speaker. It was the Government whom the right hon. Gentleman's party supported who did not believe in sound finance. It was the Labour Government who took us to the International Monetary Fund. We believe in sound finance and we shall wait until we are nearer the time to determine the uprating. It is the Labour party that believes in spend, spend, spend, with no thought of where the burden will be put on the working population.

Q3. **Mr. Forth** asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Forth: Does my right hon. Friend agree that the present social security system to which the Opposition seem irretrievably wedded is so complex that many people in need do not take up the benefits to which they are entitled? Does she therefore believe that the bold reforms proposed yesterday by our right hon. Friend will enable many people in real need to take up benefits to which they are entitled—something effectively denied them by the Opposition?

The Prime Minister: Yes, Mr Speaker. I hope that it will also enable most of those entitled to benefit to understand how the benefits are calculated, which is virtually impossible at the moment.

Mr. Foot: Can the Prime Minister tell us whether the real figures which have been discussed in Cabinet and which were suppressed in the Green Paper will be published in the White Paper?

The Prime Minister: We have yet to determine what the upratings and figures will be. I said earlier that we had not yet decided on the upratings, which are due to take place in November. It is, therefore, not the time to decide what will happen in a few years' time.

Mr. Tracey: Given the prediction that there will be many more pensioners in the first quarter of the next century and the fact that the Opposition would change nothing, will my right hon. Friend confirm the estimate of one leading journal that our children could be paying a basic income tax rate of up to 45 per cent. to fund pensions?

The Prime Minister: Bearing in mind the promises that the Opposition regularly make for increases on everything, this country would soon be bankrupt with the policies that they propose.

4. **Mr. Loyden** asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Loyden: At a time of mass unemployment and growing poverty, how can the Prime Minister justify what will clearly be seen as a blatant and vicious attack upon the poorest sections of our community? Is it not a fact that the Prime Minister fails absolutely to understand the reality of poverty and that her intention is to make the poor pay for the crisis which she and her Government have brought about?

The Prime Minister: If the hon. Gentleman had listened to the statement made yesterday he would have heard that one of the objects of restructuring the welfare state is to see that those in need, especially needy families who are in work as well as those out of work, profit more from the social welfare system than they do at present.

Mrs. Rumbold: Some years ago the right hon. Member for Glasgow, Hillhead (Mr. Jenkins), in a different incarnation, said that the permissive society was a civilised society. In the light of the recent football hooliganism, would my right hon. Friend care to comment on whether that might be the approach of the Social Democratic party to such behaviour?

The Prime Minister: In any society, we all have to live by rules. We all have to uphold those rules and the law. Beyond that, we live within our own self-discipline or become prey to every whim, appetite and instinct. Most of us prefer to live by the rules of society.

5. **Mr. Cartwright** asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Cartwright: Does the Prime Minister stand by the suggestions made by some of her Ministers that any pay settlement for the nurses which is above 3 per cent. must be paid for by savings inside the National Health Service? Does that not mean that a pay settlement for nurses which is only at the rate of inflation will result in cuts in nurses' jobs? Is that not an appallingly unfair way to treat a dedicated profession?

The Prime Minister: I hope that the decision on the pay review bodies will be announced shortly. I must remind the hon. Gentleman that if everything demanded is in the upward direction the burden on other taxpayers will be enormous. Therefore, we have to live in total within the means that have been set out in the White Paper.

Sir Anthony Kershaw: Does my right hon. Friend recognise that the social security changes that were announced yesterday are simpler, fairer and saner than ever before? Nevertheless, when my right hon. Friend, as Prime Minister, reviews the position in the year 2010, will she ensure that I receive the pension that I deserve?

The Prime Minister: I believe that our proposals can be properly financed and delivered. That would not be so unless we had embarked upon this exercise to restructure the social services.

Mr. Madden: Does the Prime Minister understand that the resentment felt by many people in Bradford when the Bradford fire disaster was linked with the riot in Birmingham has been greatly intensified by the linking of the Bradford and Birmingham incidents with the Brussels incident? Will the right hon. Lady instruct Mr. Justice Popplewell to complete his inquiry into the Bradford disaster quickly? When will she announce what money the Government will give for the rebuilding of the Valley Parade ground so that it can become a community sports facility serving all the people of Bradford?

The Prime Minister: The terms of reference of Mr. Justice Popplewell's inquiry have been set, and I believe that they were the right ones. Spectators who go to grounds must be protected on safety grounds and must be protected from hooliganism. Both aspects are being considered by Mr. Justice Popplewell, and I believe that that is absolutely right. The hon. Gentleman will have heard what I said yesterday about money. A good deal of money is going through the Football Trust and the Football Grounds Improvement Trust for these matters. Last year an extra £3·3 million was paid out of the Football Grounds Improvement Trust because there were no further applications for improvements. We are considering the finances through a working party, and all the groups concerned are represented on it. We shall need to know the results of that working party's inquiry, and what the fire investigators and surveyors say before we decide on giving any extra money for the grounds.

STATUTORY INSTRUMENTS, &c.

Ordered,

That the draft Pool Competitions Act 1971 (Continuance) Order 1985 be referred to a Standing Committee on Statutory Instruments, &c.—*[Mr. Lang.]*

CHILD ABDUCTION AND CUSTODY BILL *[LORDS]*

Ordered,

That the Child Abduction and Custody Bill *[Lords]* be referred to a Second Reading Committee.—*[Mr. Lang.]*

Rolls-Royce, Derby

Mrs. Margaret Beckett (Derby, South): On a point of order, Mr. Speaker. Is it in order for the Secretary of State for Trade and Industry today to release to the press on or about midday a written answer to the hon. Member for Southampton, Itchen (Mr. Chope) giving notice that the Government's merchant banking friends are being given another chance to dip their spoon into the gravy by working on proposals to privatise Rolls-Royce? That move will put the jobs of thousands of people in my constituency at risk. Has a breach of privilege—*[Interruption.]*

Mr. Speaker: Order. I must listen carefully to this point of order.

Mrs. Beckett: Has a breach of privilege occurred in the timing of the answer? Its manner shows the Government's customary contempt for parliamentary democracy in not allowing hon. Members to question the proposal in the House.

Mr. Speaker: Did the hon. Lady say that the answer to the question was released before 3.30 pm?

Mrs. Beckett: Yes, Mr. Speaker.

Mr. Speaker: The answer should have been released at 3.30 pm and not before. That is the rule.

Mr. Alan Williams (Swansea, West): Further to the point of order, Mr. Speaker. That is a most helpful ruling. The point made by my hon. Friend the Member for Derby, South (Mrs. Beckett) is that the answer was released to the press before 3.30 pm. As far as we know, it will not be released to the House. What course of action is available to my hon. Friend? What breach of privilege has been committed?

Mr. Speaker: I shall look into the matter. If the answer was released to the press, it would have been embargoed until 3.30 pm and should certainly not have been published before that time.

Mr. Jack Straw (Blackburn): On a point of order, Mr. Speaker. I represent constituents who are employed by Rolls-Royce at Barnoldswick. I was telephoned earlier this afternoon by the *Lancashire Evening Telegraph* and asked for my comments on this release by the Secretary of State for Trade and Industry. There was no suggestion when I was telephoned by the journalist that there was any embargo on the information.

Mr. Speaker: I shall look into the matter.

Local Government (Proportional Representation)

3.34 pm

Mr. David Alton (Liverpool, Mossley Hill): I beg to move,

That leave be given to bring in a Bill to provide for the single transferable vote system of proportional representation for all local government elections in the United Kingdom.

Arguments for proportional representation have been heard many times in the House, and will no doubt be heard many times again. But, day by day and week by week, the need for the reform of the absurd, undemocratic and unrepresentative system which has blighted our nation for generations grows ever more clear.

Many people outside the House must wonder how a Government can be elected when their vote decreased by 700,000 in the general election, yet their majority increased to 140 seats, when only about one in three of electors voted for that party. But that was two years ago, and I am sure that all Conservative Members will have noticed the recent opinion polls by Gallup and Marplan. The handicaps with which they are now faced have been suffered by third parties under the first-past-the-post system for many years, and are well known by my right hon. and hon. Friends in the alliance. If any Conservative Member would like me to explain them, I should be more than happy to do so, but if they prefer an academic opinion they should read the pamphlet written by Dr. Gordon Reece, which is available from the hon. Member for Hornchurch (Mr. Squire). It explains with admirable clarity that the Conservative party would be reduced to a rump of 66 seats on its present standing of 29 per cent. in the polls under the first-past-the-post system.

Nevertheless, many Conservative and Labour Members may remain doubtful about the introduction of proportional representation in elections to the House. I do not share their doubts, but I invite them to consider whether they extend to elections for local authorities, which is the subject of my Bill today. The electorate in the area of a local council, be it county, region, district or borough, is not being asked to elect a Government; it is being invited to choose men and women to deal with the problems of its community, and it deserves an electoral system which gives people the opportunity to have their views reflected in the council chamber.

That is not the present system, and examples of distortion in local government are not hard to find. In 1984, in Liverpool, 90,000 voters supported the Labour party and 100,000 people voted against it, yet a Militant administration was elected there with a majority of about 15 seats on the city council. In the same year in Edinburgh, 66,000 people voted for the Labour party and more than 100,000 voted against it, yet the Labour party has a majority on the council of six. The policies of those councils are well known, and Conservative Members have frequently deplored them, yet every Conservative Member who votes against my Bill today is saying, "I want those Left-wing policies to be implemented in those cities against the wishes of the majority of their inhabitants."

I would not want it to be thought that the Bill is aimed only at Labour-controlled councils. In 1982, in the London borough of Sutton, the Conservative party won just more than 50 per cent. of the vote. I fully accept that that would entitle the Conservatives to control the council, but I do

not accept that it entitles them to 82 per cent. of the seats. Only last month in Surrey county council the Conservatives won more than two thirds of the seats on fewer than half of the votes. Every Labour Member who votes against the Bill today is saying: "I want Conservative policies implemented in Surrey against the wishes of the majority of the people."

The Bill is not aimed at any party. It does not seek to stop parties from winning absolute control of local councils, but it will stop them from achieving such power if the electorate does not agree with them. The results of our apology for an electoral system are often ludicrous. In 1982, in the London borough of Brent, the Conservatives won 6 per cent. more votes than did Labour, but finished with fewer seats. In the same year in Islington the Labour party took 51 of the 52 seats on just more than 50 per cent. of the vote. The Conservative party won 24 per cent. of the vote—1 per cent. more than the alliance—yet it was rewarded with no seats compared with our one. In Tunbridge Wells in the same year, again on just more than half the vote, the Conservative party took all 16 seats.

How can anyone pretend that such outcomes are justified? How can it be right not to have any minority interest representation, or only a derisory representation? How can it be right for total, almost unchallenged, power over the affairs of any local community to be vested in the hands of any one party?

That the powers are often abused is all too evident. Rigged agendas, denial of the right of democratic debate and the appointment of council officers on the basis of their political views happens in authorities such as Liverpool where the majority party is grossly over-represented. In Tammany town halls, officials know that their future is dependent on their relations with the members of a single political party. In such circumstances, the majority party may believe that it can get away with anything.

The report of the Royal Commission on standards of conduct in political life stated:

"The local authorities most vulnerable to corruption have tended to be those in which one political party has unchallenged dominance. Not only are such authorities at particular risk because of absence of an effective opposition which can scrutinise their decisions, but investigations and the making of complaints in such areas may also be inhibited by the feeling that there is no way round the party machine".

The Bill seeks to end that. It would introduce the single transferable vote system of elections to local government elections everywhere. Under the system voters elect a number of councillors for each ward. They number the candidates in order of preference on their ballot papers, and thus can transfer their lower preferences between parties, within parties, and even to independents. They can vote for whom they like and will be sure that, whatever the choice, their vote will not be wasted—unlike under the present system—since if their first choice candidate is not elected their vote will transfer to their second choice and so on.

Evidence from other countries which already use that system show that it results in the election of more women and more representatives of ethnic minorities. It results in a higher turnout, which is of special importance for local government.

Evidence from opinion polls in the United Kingdom shows that this system, or any other PR system, is supported by a large majority of the population. It is also supported in the House of Lords. Earlier this year Lord Blake, the distinguished Conservative historian, pressed for such a measure and a Bill passed through all its stages without Division.

My Bill should commend itself to the House. It commands support from all parties and there may even be some support for it in the Government. I draw attention to the comment by the Minister of State, Northern Ireland Office, the hon. Member for Brent, North (Dr. Boyson) who, when referring to parental choice, in a debate on appeals procedure under the Education Act 1980 said:

"There is a similar disappointment for the people who voted Conservative in Stockport, North and those who voted Labour in my constituency. They might ask what the point is in voting. Whatever people may think of the person who represents them, it is a funny system. People vote and then find that they are not represented."—[*Official Report*, 20 December 1982; Vol. 34, c. 802.]

I hope that hon. Members will support the Bill, which allows proportional representation to be tested at a level at which it is most clearly needed. It will sometimes lead to parties having no overall majority on a council; but so does our present system, as I am sure everyone who has studied the results of the county council elections is well aware. Most importantly, the Bill will bring back to local government democracy, representativeness, and accountability.

3.43 pm

Mr. Dennis Skinner (Bolsover) *rose*——

Mr. Speaker: Does the hon. Gentleman wish to oppose the motion?

Mr. Skinner: Yes, Mr. Speaker. I shall not take long to oppose it, but some of us are more than a little tired of hearing Liberal spokesmen talking about proportional representation and transferable votes. I think that the Liberals want proportional representation in local government because there is such a row between the Liberals and the Social Democrats that they want the opportunity to stand against one another. That is the plan. If we are not careful, we shall finish with something like the system in Northern Ireland. Is not that a wonderful hotch-potch?—*[Interruption.]* I did not do that.

Mr. Speaker: Order. We should not be considering what the hon. Gentleman did not do.

Mr. Skinner: I am opposing the Bill because I believe that a majority in the House wants to ensure that we do not allow it to go forward.

There have just been elections in Northern Ireland on a transferable vote system. We can see the result. According to the news today, all hell has been let loose in various councils. They have had to bring in the police—*[Interruption.]* — and countless other incidents have occurred—*[Interruption.]*——

Mr. Eric S. Heffer (Liverpool, Walton): On a point of order, Mr. Speaker. It is generally accepted in the House that hon. Members listen to speeches — *[Interruption.]* As one who listens to speeches, I object most strongly to the so-called alliance rabble barracking my hon. Friend the Member for Bolsover (Mr. Skinner) —*[Interruption.]*

Mr. Speaker: Order. I entirely — *[Interruption.]* Order. The hon. Member for Liverpool, Walton (Mr. Heffer) has raised a point of order with me, not with the alliance. I agree with the hon. Gentleman.

Mr. Skinner: I am pleased that you agree, Mr. Speaker. I shall not complain about the hooligan-type conduct of the Liberals and Social Democrats because they do it continually. I do not need an extra microphone, as the leader of the Liberal party does. He had an extra mike put in at a cost of £10,000, and there is an extra one on the Tory Benches——

Mr. Speaker: Order. Let us get back to the subject.

Mr. Skinner: I was just trying to explain that it does not worry me what the alliance does, because at the end of the day there will be fewer of them after the general election that there are now irrespective of whether they have the local government transferable vote.

The Liberal party and the Social Democratic party can agree on hardly anything. I should like to know what the local government candidates would do on matters affecting policy. Would they be able to put out joint manifestos — *[Interruption.]* The hon. Member for Leeds, West (Mr. Meadowcroft) is rabbiting on again. Would they put out joint manifestos on the abolition of the welfare state? The leader of the Social Democratic party is quite anxious to see the changes that have been put forward by the Government. However, the Liberals are not very happy about it, or at least they have slight reservations—not in principle, simply on the arithmetic. Therefore, it would be interesting to see those manifestos.

I suspect that we would have not joint selection for candidates in local government, but almighty rows based not on democracy but on some sort of quasi-regional vote, in which delegates would come from the various areas —*[Interruption.]* No, that is absolutely wrong.

Those are some of the problems that would occur. I do not believe that the Bill will get very far because the Government will kill it as they have killed many others on a Friday — *[Interruption.]* Does the hon. Member for Leeds, West wish to intervene?

Mr. Michael Meadowcroft (Leeds, West): I cannot.

Mr. Skinner: I am prepared to break with precedent.

Mr. Meadowcroft: Standing Orders do not allow it.

Mr. Skinner: I appreciate that.

The cause of proportional representation, rather than being on the upward trend, is now, according to the Liberals and Social Democrats in their pamphlets, going downhill just a little bit. I do not want to over-egg the pudding, but I read a pamphlet the other day by the alliance which said that whereas it had been generally in favour of proportional representation for everybody in the British Isles, it now had some reservations about the Orkney and Shetland constituency, and Caithness and Sutherland — [HON. MEMBERS: "And the Isle of Wight."] Indeed. The reason is, rather strangely, that members of the alliance realise that they could not guarantee that their candidates in those three parliamentary constituencies would win on the basis of a transferable vote. They are happy with the present system for Orkney and Shetland, Caithness and Sutherland and Isle of Wight so that they can keep their Members of Parliament. We are witnessing the alliance parties indulging in hypocrisy. We oppose the motion so that we can establish clearly in the House that there is a massive majority against this barmy idea—another one—from the Liberals this afternoon.

Question put, pursuant to Standing Order No. 15 (Motions for leave to bring in Bills and Nomination of Select Committees at Commencement of Public Business):—

The House divided: Ayes 29, Noes 188.

Opposition Day

[12TH ALLOTTED DAY]—*considered*

Rural Communities in Wales

4.1 pm

Mr. Brynmor John (Pontypridd): I beg to move,

That this House, noting with alarm the Government's complacency in the face of deteriorating economic and social conditions in rural communities in Wales, urges the Government to change to policies which by improving transport and other services and employment opportunities will reverse the decline of those communities.

Mr. Speaker: I have selected the amendment in the name of the Prime Minister.

Mr. John: Even in a week when a great deal of our attention has been focused on the malaise that affects urban communities, it is right that we should consider this afternoon the problems of rural communities in Britain, in particular those in Wales. It is necessary to state, so that Conservative Members do not get the wrong idea, what the motion does not say. It does not say that rural depopulation and decline started with the election of a Conservative Government in 1979. Since members of the Welsh Grand Committee know that the Secretary of State's political memory goes back only to 1976, let me assure him that we do not say that it started then, either. It predates 1976.

Mr. David Harris (St. Ives): Will the hon. Gentleman give way?

Mr. John: I think that the hon. Gentleman ought to refrain from commenting until he has heard a little more.

Mr. Harris: On a point of order, Mr. Speaker. As the hon. Gentleman has mentioned what the motion does not say, may I have your ruling on whether its true meaning ought to have been put before the House? May I also ask the hon. Gentleman to explain why the words "Brecon and Radnorshire" are not included in the motion?

Mr. Speaker: Order. The hon. Member for Pontypridd (Mr. John) has been on his feet for only two minutes. I took his opening remarks to be a preamble before reaching what the motion actually says.

Mr. John: That is absolutely right, Mr. Speaker. There is no more coincidence regarding Brecon and Radnorshire in the motion that is being moved by the Opposition than there is in the announcement this morning by the Welsh office that Brecon and Radnor have been selected for a new experiment in education affecting rural Wales.

If I may complete the point that I was making before the intervention of the hon. Member for St Ives (Mr. Harris), for many years there has been a history of shortage of opportunity which has led to the ablest and the most ambitious leaving rural Wales. There have been fewer facilities for people in rural Wales. That much we must accept. What is completely new in the situation is the acceleration of this decline after 1979. So far from the Government's policies and priorities having tried to arrest that decline, they have contributed to it. The Government's approach is wrong. Their complacent attitude is wrong. Their policy and their attitudes must be changed.

[Mr. John]

I can understand why Thatcherites ask whether it is right for any community, whether rural or otherwise, to be artificially preserved. We say unequivocally that it is right for such communities to be preserved. Thatcherites should accept, as we do, that in so far as rural communities have been maintained since the Second World War this has been done by means of far-sighted public expenditure on health, education, transport amd employment. Nobody will deny that since the war British agriculture, the lynch pin of the rural economy, has been enabled to flourish by the expenditure of public money.

We must assess, if we can, the needs and aspirations of rural communities in Wales in order to reshape policies and create conditions in which it will be possible for everybody to remain in those communities throughout their lives. The lack of one or more of the basic facilities is swelling the exodus and undermining the viability of rural areas. The lack of local employment is the most important factor in driving young people away from rural communities at an alarming rate. For the want of convenient education, families with young children are being forced to choose between moving and subjecting their children, from the most tender age, to sizable daily journeys to and from school.

Between January 1979 and January 1984, 41 primary schools were closed in the four most rural counties of Wales. Closures in Powis meant a reduction of over 7·5 per cent. To social isolation at home for those living in remote homes is added the isolation of children who are unable to play a full part in the social life of their schools, because their lives are dominated by the school bus timetable. They have to go home on the only available public transport.

Many of the schools were built before 1903. Over a quarter of the schools in Powys are in that category. Over 40 per cent. of the schools in Dyfed were also built before 1903. Those are the schools which Her Majesty's Inspectorate described in its recent report as "crumbling away". That was the headline which was to be seen in the *Western Mail* during the Whitsun recess.

Mr. Dafydd Wigley (Caernarfon): Does the hon. Gentleman accept that the effects of sparsity of population are aggravated by the rate support grant formula which does not adequately recognise that sparsity and has led to chronic problems in areas such as Powys?

Mr. John: It is a cyclical problem. Because schools cannot be maintained parents are faced with the agonising choice of either moving or allowing their children to make long journeys to and from school. For the want of decent employment people move out of rural communities. This historic movement makes the unemployment figures seem better than they are in reality. Even though depopulation and the drift away from country areas masks unemployment, the unemployment rate is 17·3 per cent. in Dyfed, 18 per cent. in Clwyd, 18·2 per cent. in Gwynedd and 13·3 per cent. in Powys.

If people are lucky enough to find local work, the choice of jobs is limited and the rate of pay is much lower than the average for Great Britain. In 1983, gross average earnings in rural Wales were only 88·2 per cent. of the gross average earnings in Great Britain as a whole. The gap had widened by 2·5 per cent. in the two years between 1981-83, showing a widening disparity between employment in the rural and urban communities. More up-to-date figures will show a further widening. That condemns many rural youngsters to unambitious, underpaid jobs and for the ambitious rural youngsters, even in these times of institutionalised mass unemployment, there is no freedom of choice in employment.

There are over 50,000 employed or self-employed in Welsh agriculture. Of these, over a third are in Dyfed, 18·5 per cent. in Powys and over 14 per cent. in both Clwyd and Gwynedd. Apart from its pivotal position in the rural community, agriculture is important as a source of livelihood. Everyone knows that the next decade will bring monumental changes in agriculture. The insupportability of the increasing commodity surpluses, which is now coming to crisis point, concern about the natural environment and questions about diet and health are all helping to bring about this change. Those engaged in agriculture are all anxious to begin discussing how to modify the current agriculture industry to effect these changes with the minimum dislocation.

People engaged in agriculture are still reeling from the fiasco of the unprepared imposition of the milk quota scheme, which brought ruin to some, hardship to many, and uncertainty to everybody. In scrabbling around to try to repair the blunders made by the milk scheme, the Ministry of Agriculture, Fisheries and Food has fallen behind by almost six months in its payment of grants and allowances, and caused further hardship to the farming community in Wales.

The shambles demonstrates that there is almost a complete lack of confidence in the Government, for even in the midst of all this crisis, they are hesitant and unwilling to show any leadership. Doubts about the future will be avoided only if the Government issue a White Paper on the future of agriculture, and that is what the Minister of Agriculture, Fisheries and Food is avoiding with much more energy than he devotes to defending our interests in Brussels.

Sir Anthony Meyer (Clwyd, North-West): I hope that the hon. Gentleman will favour the House with his solutions and suggestions for dealing with the problem of persistent surpluses of dairy products, and that he will not run off into suggestions that every country in the EEC should reduce its output, but not the United Kingdom.

Mr. John: I realise that a campaign of intense rehabilitation is being mounted by the hon. Gentleman to try to work his passage back into the good graces of his Front Bench. We all know how he wore the penitent white sheet in the last Welsh Grand Committee because he was pressed to do so. I said that the structural production of surpluses is insupportable. To anybody who was listening to me, that would have meant that I do not believe that they can continue. At the moment, we are facing the problem of cereal surpluses. The hon. Gentleman has said, and I agree, that if other measures can be taken, we should try to avoid artificial restrictions such as quotas. However, if necessary, I make it clear that some restriction that will cut the amount of unwanted cereals being harvested and stored should be taken.

Mr. Keith Raffan (Delyn): The hon. Gentleman is not answering about milk.

Mr. John: The hon. Gentleman is not writing knocking copy for the *Daily Telegraph* but is taking part in a debate, so perhaps he will restrain himself for a little while.

There must be measures to restrict output. If price cutting can do so, by all means let that be so, although the present negotiations are unhappy. I criticise the milk quota scheme not because of quotas but because the Minister of Agriculture, Fisheries and Food went off one weekend saying that he would never accept quotas and came back the following Monday at the head of a quota scheme. There was no time to prepare for it, there had been inadequate preparation in the Ministry, it had not been anticipated and it brought unprecedented disaster to many people who made the mistake of taking the Minister at his word.

I have no doubt that the Government's reluctance is being masked by their Back Benchers. However, a White Paper on the future of agriculture in the next decade is desperately needed not because it will be a solution to all the problems but because a number of hard-pressed people in agriculture are pondering their future. Such a White Paper would be a welcome sign of what, if any, the Government's thinking on this matter is.

Health provision in rural areas is weak and distant. In many of the rural areas, there are some of the worst health problems. I again refer to perinatal mortality, in which Powys has the highest sub-regional rate in the United Kingdom. Despite that, many villages are without any surgery, hospital provision is being cut, whether by the closure of a whole hospital as with the geriatric hospital in Brecon or by the reduction in the number of beds, as with the 90 beds in the three hospitals serving the East Dyfed health district. Casualty and emergency treatment causes great problems for the inhabitants, in part because three of the four Welsh health authorities with rural areas consider themselves to be under-funded in hospital provision. In particular, in sparsely populated rural areas, this is inhibiting the development of community health service for the inhabitants.

Between 1980 and 1982, one in eight of the chemists, shops in Wales closed, and rural areas suffered far more than their fair share of that. Other measures necessary to support rural life, such as local shops and post offices, are declining. To make life tolerable, transport is needed for access to all facilities. Car ownership is high in Wales and is highest in Powys because of necessity, but not everyone can afford a car or is able to drive one. The poor, mothers with young children, the elderly and the infirm depend upon a public transport system that even now is inadequate. That is why I am alarmed by the Transport Bill, which will add to that problem. Its ban on cross-subsidies will stop the off-peak services that now run, because they will no longer be able to use commuter services to subsidise daytime services.

The privatisation that threatens the three largest bus companies, which now have reported losses, according to the *Western Mail* of 16 May, of £4·25 million, will cause even more severe cuts. That is bound to make the inhabitants of rural Wales feel as if they were marooned on a desert island. I beg the Government, for the sake of the health of Welsh rural communities, to rethink their policies on the Transport Bill.

Mr. Keith Best (Ynys Môn): Is it right that transport in rural areas should be subsidised by taxpayers and the ratepayers in the urban areas, in which case what message does the hon. Gentleman have for them, or is it right that rural transport services should be subsidised by the Government?

Mr. John: I thought that the Government's revenue came from taxpayers, but perhaps the hon. Gentleman is privy to information that I do not have. I have never been one to tell my urban electorate that the highest aim of government is higher take-home pay and lower taxes. I have always said that social public expenditure is necessary to preserve a healthy state of society in Britain. If that means the use by the population, through government, of subsidies for transport in rural areas, I am willing to stand by that and to advocate it. I hope that the hon. Member for Ynys Môn (Mr. Best) is as willing to say the same.

It is possible at present to see the impact of existing conditions on the communities of which we speak. Such communities are not only collections of people who happen to be living in an area at any given time. They also embody the culture and the cultural values of those societies. If one changes the composition of those communities or if, by indifference, one allows the composition of those communities to change, one is changing not only the very nature of the communities but the culture itself.

The latest population projections for rural Wales are that deaths will exceed births in those areas for the rest of the century. It is anticipated that there will be a rise in population — indeed, the Government's amendment to the Opposition motion speaks of a rising population. But where will this rise in population come from? It will come from outsiders moving into the area. In Dyfed, for example, inward migration may be as high as 2 per cent. per year.

Unless the Government shed their complacency and stop believing that the very existence of public services is a challenge to their virility, our country villages and small towns will be transformed into dormitory areas for the affluent young who work some distance away and retirement havens for the affluent elderly. Unless local employment and local services exist, one will abandon an all-age population structure in much of rural Wales.

Let me give some examples in support of that. In Wales, the proportion of retired to those at work is 31 to 100, but in Gwynedd at present it is 38 to 100, in Powys it is 35 to 100, and in Clwyd and Dyfed it is 34 to 100. All the rural communities have more retired people to working population than the Welsh average. That imbalance will worsen unless the Government stop destroying healthy communities for the many in favour of healthy bank balances for the few.

We must devote more public resources to increase opportunities locally of education, jobs, health and shopping. We must increase transport provision and adopt imaginative ideas, such as the social car plan, that will enable an immobile population to get to necessary services.

Sir Raymond Gower (Vale of Glamorgan): The hon. Gentleman will be aware that many Welsh people who have worked all their lives in other parts of the United Kingdom have planned to retire in parts of Wales. I presume that the hon. Gentleman does not object to that.

Mr. John: Of course I do not object. However, I do object if the burden of retired people in any area so unbalances the structure of the population that it produces an unhealthy rather than a healthy society. I object if that happens because a Government, through indifference,

[Mr. John]

force away the young people, particularly young people with families, because there are no jobs or schools for them locally, and there are no surgeries and no health provision. If the Government provide all those services and allow the choice to be a completely free one, then I agree—let people come to enjoy the beauties of Wales in retirement. But, for heaven's sake, let us not drive one segment of the population out through benign neglect and then pretend that we are being hard if we draw attention to the fact that an abnormal number of retired people are coming into the area. The hon. Member for Ynys Môn will know that the problem of an imbalance of elderly people in an area imposes a great strain on hospital and medical services which is insupportable in view of the present provision of such services in rural Wales.

Above all, the Government must be seen to be active in shaping the future of rural Wales rather than appearing, as they do at present, as rather bored spectators of inexorable decline.

On 24 May 1985 there was a feature on the Secretary of State by the political correspondent of the *Western Mail* in which the following paragraph appeared:

"Mr. Edwards is allowed his limited freedom of action in the Principality—to subvert Thatcherite policies if necessary—as the reward for unswerving loyalty to the leader on the great national issues of the day."

We have to know now whether that estimate of his powers is true. If it is not, I am sure that the right hon. Gentleman will hasten to tell us, if only to avoid disappointment, but if it is true, then it is an opportunity and a challenge. By ignoring Thatcherite policies, the Welsh Office can start to strengthen rural Wales, giving us a vision of the future rather less hellish than the one we currently see. Alternatively, the right hon. Gentleman can choose not to exercise this power and, by his inertia, increase the spiral of decline in rural Wales.

All those who value Wales as a living organism, as a cultural heritage and as a trust to be passed on to future generations must call upon the right hon. Gentleman in the terms of the motion to wipe the sleep from his eyes and begin to lead the fight back.

4.25 pm

The Minister of State, Welsh Office (Mr. John Stradling Thomas): I beg to move, to leave out from "House" to the end of the Question and to add instead thereof:

'recognises the difficulties faced by the farming industry and by rural communities in a period of change, but welcomes the reversal of the long period of depopulation in much of rural Wales, and supports the continued efforts of the Government to improve the services provided and to develop employment opportunities in the countryside.'.

Our debate on rural communities in Wales today will lack the contribution from Tom Hooson that we would have had in different circumstances. As I think all hon. Members will agree, he was a great friend and defender of the rural areas of Wales, and he will be sorely missed.

Having listened to the speech of the hon. Member for Pontypridd (Mr. John), I am sure that Tom Hooson would have regretted as much as I do the terms of the motion in the name of the Opposition. The terms are vague—as was the speech of the hon. Gentleman—ill-defined and do nothing to recognise the strengths of rural areas in Wales and the considerable developments there in recent years.

On the other hand, our policies are clear and effective. We must of course—there will be agreement on this point—continue to guard against depopulation. The hon. Gentleman in my view got himself into a slight trap. On the one hand, he says that we are driving people out, and on the other hand, despite the demographic points that he made, he says that outsiders are flooding in. He cannot have it both ways. We must ensure that the local economy draws from as wide a base of activities as possible, and we must recognise the need to sustain the social, cultural and environmental fabric. I agree with the cultural point made by the hon. Gentleman.

I think it is right to say that a debate on rural communities in Wales should start with agriculture. Milk quotas have dominated the past year. The hon. Gentleman was very critical of my right hon. Friend the Minister of Agriculture, Fisheries and Food and of the quota scheme, but in fact the main objectives of the outgoers scheme in England and Wales have been achieved. The majority of Welsh producers will benefit from the decision to bring back the quota of small producers to the 1983 production levels. Quota awarded by the tribunal fo exceptional hardship will also be met in full. Dairy producers will welcome the outcome of the common agricultural policy negotiations. A 1·5 per cent. increase in support prices is accompanied by a 1 per cent. fall in co-responsibility levy payable in 1985-86. I would be the first to recognise that difficulties remain. We are reviewing the situation to see what can be done, but, as is obvious to everybody, the room for manoeuvre is bound to be limited.

On beef and sheep, we have secured the continuation of the support mechanisms and successfully resisted the imposition of measures that would discriminate against United Kingdom producers. We have secured a significant amelioration of unsatisfactory aspects of the seasonal scale for sheepmeat. The industry has welcomed the increase in the wool guarantee price for the 1985 clip. Consumers will benefit from supplies of both lamb and beef at reasonable prices which would otherwise go to supplement the intervention stocks. There are lessons to be learnt from our recent experience. Sheep farmers demonstrated last year how responsive they can be to market signals. There was a decided shift in the marketing of Welsh lamb, especially leaner lamb, to take advantage of the higher prices available early and late in the season. Despite the problems they have faced, dairy farmers are adjusting their patterns of production to the quota. The hon. Gentleman recognised none of those facts, which are absolutely essential to any debate on rural economy.

The new structures regulation has been widely welcomed. Assistance to farmers in the less-favoured areas will be continued. Fifteen thousand Welsh farmers now qualify for assistance following successful negotiation of the redefinition of the area in 1984. The industry has welcomed the wider grant coverage that is possible under the regulation. Decisions on the new capital grants scheme will be made shortly. That is not a picture of inertia or complacency, but of realistic action. — *[Interruption.]* I am not saying that everything is all right. There are many problems. However, it is not the picture of inertia or complacency suggested in the Opposition motion.

Mr. John: Does the Minister recognise that many people in Wales, including both the farming unions, are desperately waiting for the Government to indicate what

the future of agriculture in Wales will be? If the Government are not being complacent in refusing to issue a White Paper and to give guidance, what is the explanation?

Mr. Stradling Thomas: It is not a question of complacency. As was clear from the hon. Gentleman's speech, he has not one original idea or contribution to make, despite his strictures on milk quotas. It would be easy to rush in and produce White Papers or even to delay them. It is a fast-changing situation. Everyone agrees that there must be proper reform of the CAP. We are in Europe. Those facts must be recognised in the current position.

The impact of the new development of the paper mill at Shotton will be to create nearly 400 jobs either in or serving the mill and to provide a firm market for more than 800 people in the United Kingdom forestry industry. That is a development of first importance.

There is further evidence of our commitment to realistic action in the work of the three development agencies in encouraging enterprise in rural communities. Under our policies, growth is being stimulated within existing towns. The aim is to have self-sustaining communities as a centre and economic anchor for their surrounding areas.

Newtown has become a thriving community. Unemployment rates have remained consistently below the average for Wales. My right hon. Friend was especially pleased recently to be able to approve proposals to develop a major factory which will be used by Laura Ashley Ltd. as its base for a new phase of development resulting in 500 jobs and protecting 1,200 jobs in and around Mid-Wales.

Mr. Allan Rogers (Rhondda): In speaking of the activities of the Welsh Development Agency in Wales, will the Minister confirm that it is his Department's intention to privatise the commercial investment section of the WDA next year?

Mr. Stradling Thomas: No, Sir. To the best of my knowledge that is a piece of fiction. I have no way of confirming any such thing—*[Interruption.]* As others have said at this Dispatch Box, wait and see. I cannot confirm any such thing.

In total, some 6,500 job opportunities have been brought to mid-Wales through factories which Mid-Wales Development either owns or has sold. A further 800 will follow from factories now under construction or at an advanced stage of planning.

Since 1980 the Welsh Development Agency has completed over 200 new factories in rural Gwynedd, Clwyd and Dyfed. The provision of rural sites and factories now concentrates on smaller-scale units for the benefit of local industries, and in Gwynedd the agency has built rural workshops to provide premises for craft-based industries.

The agency has also been involved with the Wales tourist board in the sponsorship of tourism studies. Tourism is particularly important to rural areas and the Wales tourist board is hard at work in promotion and in giving advice and financial assistance over a wide area, including farm tourism.

The hon. Member for Pontypridd made some points about education provision. Let us look at the facts, not the misrepresentations. First, in real terms, expenditure on education in Wales has been virtually constant over the past five years — despite the massive fall in public numbers. Secondly, expenditure on education per pupil is higher now in real terms than ever before. Thirdly, pupil-teacher ratios are at their best ever level. Fourthly, in a period of continually falling rolls, the education service in Wales has not only been maintained, as is clear from HMI reports but in many respects improved.

Of course I understand the problems of that local education authorities face in ensuring the most effective use of resources, including village schools, to secure what is in the best educational interests of our children, especially in sparsely populated areas. The answer must be founded in realism. The crucial need is to provide a system of education suited to the ages, abilities and aptitudes of the young people concerned. That may cause problems in the very small schools in our rural areas, and it is for that reason that we are supporting projects designed to improve the quality and range of the curriculum in such schools, as well as funding a research project in Powys that is looking at ways of supporting groups of small rural primary schools in a reasonable and cost-effective way.

Mr. Peter Hubbard-Miles (Bridgend): Does my hon. Friend agree that the standard of education depends to a great extent on the standard of teaching? Would not the standards of teaching in certain areas of Wales be greatly improved if the appointments system were taken out of the hands of politicians and put into the hands of the professionals? It should not be allowed to continue in the way supported by the hon. Member for Rhondda (Mr. Rogers).

Mr. Stradling-Thomas: I know that that is a vexed question in many areas, not least in my hon. Friend's home patch.

Mr. John: If I accept what the Minister has said about the gradual improvement in funding under this Government, and how they will put matters rights, may I ask when the quarter of Powys schools and the 40 per cent. of Dyfed schools that are pre-1903 will start to be replaced?

Mr. Stradling-Thomas: The hon. Gentleman made great play in his speech of pre-1903 schools. It is the quality of provision with which we are concerned, not the age of the building. That is not a vital symbol. As resources become available, development in that direction, which is highly desirable, will continue—*[Interruption.]* As a matter of fact, almost every school that I attended was pre-1903—indeed, some were pre-1600.

Education cannot be divorced from training—we are planning one of the most dramatic increases ever undertaken in the quantity and quality of training in both urban and rural areas. Our aim is to bring more training, better training and, above all, more relevant training closer to the people who want it and the industries that need it.

To take specific examples, next year alone we plan in Dyfed, Gwynedd, Powys and Clwyd an increase of well over 60 per cent. in the number of people trained. More generally, there are grants to help employers train and upgrade the skills of the work force; training for enterprise to help small businesses and those planning to set up such businesses to establish themselves and grow; access to information technology for adults as well as for the young people who have up to now so clearly benefited from such

[Mr. Stradling-Thomas]

training; and the extension of open access to technical education and training mainly for technicians and supervisors.

As part of these plans we have carried out a thorough-going review of the role of skillcentres. The existing skillcentre network needs to be rationalised, and in the context of this debate on rural communities I wish to say something about training in the area served by the Llanelli skillcentre.

It is our view, after careful consideration of all the arguments advanced by local interests, that the needs of the area of Dyfed currently served by the Llanelli skillcentre can be better and more effectively met by using local college and employer-based facilities, together with private trainers and making more use of the skillcentre at Port Talbot. It is intended to retain a smaller skillcentre training agency presence at Llanelli, probably at the Llanelli technical college, and to expand the use being made of the MSC-funded information technology centre in the town.

I do not for a second deny that for a small number of people, many of whom in any case already board away from home while training, some extra travelling will be involved. However, for the vast majority of people in the Llanelli area, in the area served by the west Gwent skillcentre, which is also to close, and throughout Wales, these plans offer a wider range of better training nearer home than at present.

Mr. Neil Kinnock (Islwyn): How will the closure of the skillcentre whose specific purpose was to provide for the mid-valley area in west Gwent bring training nearer to home when there is in everybody's estimation no adequate replacement for a skillcentre like that at that point?

Mr. Stradling Thomas: We will be expanding the facilities at Newport. As the right hon. Gentleman knows, the local authority at Blaenau Gwent has a facility at the Tafarnaubach opportunities centre. In addition, discussions are going on with Gwent local education authority to make provision which in many cases will mean less travelling although I cannot say that in every instance. Also, we have made sure that the skill training agency and the training division of the MSC are prepared to be extremely flexible about timing and also to consider the extra cost involved for individuals who are put at a disadvantage.

In regard to transport, of course I agree that adequate provision for transport, both public and private, is vital for the future of our rural communities. The hon. Member for Alyn and Deeside (Mr. Jones) will recall once again that when he was Under-Secretary of State for Wales in 1977 he held a symposium at Aberystwyth to discuss what he described as a

"steady decline in rural transport services".

Since then, of course, the decline has continued so that we now face a much greater problem than he did.

Mr. Kinnock: The services are being terminated.

Mr. Stradling Thomas: It is against this background of continuing decline that we have put so much emphasis upon taking positive steps to make radical and lasting improvements to public transport services such as the support for railways announced by my right hon. Friend in the Welsh Grand Committee on 15 May. British Rail has also recently announced that it has already spent £1·3 million on strengthening the Barmouth viaduct and that these works are to be completed in May 1986. These major investments will mean better, more cost-effective services for the rural communities served.

Mr. Best: Will my hon. Friend say whether the view of the Leader of the Opposition that rural transport in Wales is to be terminated is commensurate with the announcement of my right hon. Friend the Secretary of State in the Welsh Grand Committee on 15 May that £100,000 will be provided for the Mid-Wales and Cambrian line and £76,000 for the central Wales line from Mid-Wales Development? Is that commensurate with the knowledge of the Leader of the Opposition or does he need to do a little more homework?

Mr. Stradling Thomas: I would say that it is not commensurate.

In regard to buses, our efforts are concentrated on the proposals contained in the Transport Bill. I do not accept the amendment that has been tabled on the Order Paper in the name of the Alliance. Our proposals will help to improve and modernise rural transport by encouraging new, more responsive services which are often better suited to rural areas than the conventional big bus, and by introducing a system of competitive tendering for subsidy, thereby ensuring that local authorities get better value for the subsidies they will be continuing to provide. A point was made earlier about cross-subsidy. It has never seemed to me that there is any logic in relatively low income people in some areas having to cross-subsidise perhaps better-off people in other areas.

Our proposal for an innovation grant will act as a pump primer for new transport schemes for rural areas. The hon. Member for Pontypridd said that he wanted imaginative ideas. I am sure he welcomes the innovation grant. In addition, to ensure continuity of services during the transition from the old to the new system, we are making available £50 million over four years in Great Britain as a whole in the form of a transitional rural bus grant. In the first full year this grant will amount to £20 million.

Mr. Alex Carlile (Montgomery): Will the Minister of State tell us how he expects such an innovation grant to help in the provision of continuing services for routes which are uneconomic anyway? What is the use of an innovation grant rather than a continuing grant? Secondly, will he tell us when we shall hear that a decent road is to be provided across mid-Wales for the public transport services to run on?

Mr. Stradling Thomas: The innovation grant is intended to encourage new ideas to find out what profitable and imaginative schemes——

Mr. Alex Carlile: Everyone knows the answer to that.

Mr. Stradling Thomas: The hon. Gentleman may be omniscient but I certainly think that the day of the big bus trundling empty round country lanes is finished. Therefore, new and imaginative ideas, as called for by the hon. Member for Pontypridd, will be encouraged by the innovation grant. It is not meant to sustain the system ad infinitum. As the hon. Gentleman will know, a massive road building programme is laid down in "Roads in Wales". We are proceeding as rapidly as possible with that and hope in the not-too-distant future to provide better information and more up-to-date facts.

Health was referred to by the hon. Member for Pontypridd. The Government have remained committed to the development of hospital services in Wales with full regard to the needs of rural areas. The new district general hospital at Bangor is now fully open and those at Wrexham, Bridgend and Morriston are in their final stages of building and all should be open within a year. These hospitals have a wide rural catchment area. The community hospital at Mold has been open for over a year and has received wide acclaim. Construction of the new community hospital at Ystradgynlais is well under way and should be completed early next year. Those hospitals allow people to be treated nearer their homes when they do not require the more highly specialised facilities of a district general hospital. All those major developments have been funded by my Department.

Mr. Gareth Wardell (Gower): Does the Minister agree that it was not sensible for the West Glamorgan area health authority to decide to close the casualty department at the Singleton hospital? That has deprived constituents from virtually the whole of the Gower peninsula. The tourist inflow into that area in the summer will make it extremely difficult, in terms of time, for people to reach the accident centre at Morriston hospital.

Mr. Stradling Thomas: I understand the point that the hon. Gentleman is making. He will be aware that it is a matter for decision by the area health authority. For us to spend our time second-guessing at the Dispatch Box is not the appropriate way to proceed.

My analysis has concentrated mainly on what is being done by way of public sector support to help encourage and stimulate the private sector. The Opposition will try to deny that this is a success story in difficult changing circumstances. They are wrong, and they will not succeed. The infrastructure is being developed. A wider range of industrial and service employment is being created while agriculture will continue its central contribution to the way of life and work. Most rural communities, far from being under threat, can now look forward to a future in which the prospect is not of migration but of increasing opportunities and a better quality of life.

I commend the amendment to the House.

4.50 pm

Mr. John Morris (Aberavon): This Session, the House cannot have heard a more complacent speech from a Minister opening a debate of this kind than that of the Minister of State. If we were at the Royal Welsh show as opposed to the House of Commons, I am confident that the Minister would receive first prize for complacency. He would have the blue riband and be led around the grandstand, because he has failed to recognise that there is any problem in rural Wales.

I was born in rural Wales, most of my education was in rural Wales, and my home is in rural Wales. I therefore have some knowledge of what goes on. The economy is bound up with three aspects of our life there. The first is agriculture and forestry, the second is tourism and the third is small industry. I leave on one side the service industries, local government, the universities and some defence work. There is nothing constant in this world, but some things are more constant than others. There is a greater degree of inconstancy and uncertainty in the three primary points to which I have referred.

I shall deal immediately with agriculture as a supplement to what was said so well by my hon. Friend the Member for Pontypridd (Mr. John). Agriculture in Wales feels that it has been let down badly. It has no confidence in the Minister of Agriculture, Fisheries and Food or in the Secretary of State for Wales. They fail to recognise a growing problem and when they went to speak in Brussels allegedly on behalf of British agriculture, they failed miserably. The result was that action had to be taken far too quickly, without preparation and with insufficient warning to the industry. That caused misery and agony in the dairy industry.

If the Minister is unaware of the deep feelings in the Welsh dairy industry, he has no idea of what is happening in Welsh agriculture. The result has been a loss of confidence. It is all very well for him to say that he is confident about the future of Welsh agriculture, but when it comes down to pounds and pence would he today be able to put his hand on his heart and say to Welsh farmers that the climate for investment was right? If he is confident of that, will he firmly say in what sector it is right to invest?

Yesterday, we had a problem, which remains, with the over-production of milk. Today, the problem is cereals but that does not affect us so much. Tomorrow, the problem for beef and lamb will be much greater, I fear. I welcome every effort that is made to improve the quality, availability and attraction of Welsh lamb on the continent, where I believe there is a growing market.

The Minister must recognise that there is a change in people's eating habits. People are going off fats. If one talks to young people today, one finds that there is a tremendous growth in vegetarianism. There is a reaction against red meat. It is therefore time for the Government to recognise that today's fads may well be tomorrow's fashions. Welsh agriculture should receive some sign of where it is to go, upon what it should concentrate and what its prime aims in the future should be. It cannot afford a cut in another part of its production without greater hardships. When the Minister says that dairy farmers are adjusting, he means that they are tightening their belts.

In the Welsh countryside, we are all aware that the dependence upon agriculture is not solely that of the farmer or his farm worker; there is a four to one dependence, which was the factor that we used. When we add the carpenter, the schoolteacher, the cabinet maker and the rest there is a repercussive effect upon the agricultural economy. If the Minister goes to a garage, a shop, a restaurant or anywhere else in rural Wales, as I hope he will during the summer recess, everyone will tell him how tight are the belts in rural Wales and what the repercussive effects of the difficulties are upon agriculture.

The Government have had to cave in to the position in Brussels, but they must recognise that they have done agriculture a great disservice by not warning it sufficiently or taking adequate steps in time. Are they prepared for the next round of cuts in whatever product that may be? Will they give the industry sufficient warning in the future so that there can be planning and so that those young people who want to invest in agriculture can do so with confidence? I see the reports of the prices that farms are fetching, and the picture that I have is one of a lack of confidence in agriculture in rural Wales.

I come now to the problem of transport in rural Wales. In the old days, Brecon and Radnor had the highest proportion of car owners in the country. Car ownership

[Mr. John Morris]

then was not a luxury; it was a necessity because there was no other means of transport for dozens of people. When the head of the household has to use the family car to go to work because there is no other transport, the wife, the youngsters and the elderly are left with no transport. I welcome the innovations that we have heard described today, given that the Government are pursuing their philosophical dogma and selling the nation's buses and having a free-for-all under the Transport Bill.

What kind of transport will remain in rural Wales? Will the valleys in which I grew up remain as I know them? Will the valleys in the old counties of Cardigan and Carmarthen and the west of mid-Wales remain as other families know them? Will there be more or less transport in those areas? The Minister should be honest and tell the House that, whatever innovation there is, whatever piece of plaster is put on the wound, there will be greater deprivation in rural Wales. That is a great tragedy of the Transport Bill.

There has always been cross-subsidisation in rural Wales. It is written into the electricity legislation. If cross-subsidisation were not applied to the Post Office, letters to rural Wales would be charged at five times the price of those to urban London. If that is the Government's free market philosophy, it could mean that life in mid-Wales and rural Wales would not be a life worth living for anyone except the extremely affluent who had the resources to look after their own affairs. The poor will be driven out and these areas will become reservations in which the rich may enjoy themselves. They will be playgrounds for people from the urban communities and those who have the necessary affluence to afford basic services.

I commend the work of various chairmen and members of the Wales tourist board. How do the resources of the Wales tourist board compare with those of the English tourist board and the Scottish tourist board? Do we receive our fair share of the money available for tourism? I hope that the Minister can put me out of my misery and tell me that we in Wales receive more than our fair share for tourism. I hope that the hon. Gentleman fights a fair fight, and I would be happy if he were to tell me that that was so. I would, however, be surprised to hear it.

Could not a little more be done with respect to innovation? On Saturday, I heard the suggestion that the Wales tourist board could do more for fishing, which is an enormous attraction in the Principality. I declare an interest as an occasional angler. I know that there are some problems and that we cannot fish the number of fish that were available in the past. During the past few years, the catch has not been all that good. There have been suggestions that a small area could be set aside for a man-made lake providing employment and offering fishing facilities. If we had the resources of the Wales tourist board, the Development Board for Rural Wales and the Welsh Development Agency, encouragement from the Welsh Office and funds from Brussels, we might be able to do more.

The Government have nothing to their credit with respect to innovations in machinery to deal with the problems of Wales. The Labour Government set up the Welsh Development Agency and the Development Board for Rural Wales. But for those prime weapons, this Government would have no machinery to deal with the problems of Wales.

Sir Raymond Gower: What about investment?

Mr. Morris: The hon. Gentleman may make his speech in his own time. The machinery which I have described and the economic activities which are not encouraged were decried by the present Secretary of State for Wales when the measure were put before the House.

Mr. Donald Coleman (Neath): Surely my right hon. and learned Friend is not surprised at this, in view of the fact that a number of Conservative Members voted in the Welsh Grand Committee against setting up those institutions.

Mr. Morris: My hon. Friend was the Whip on those occasions. Conservative Members opposed the setting up of the WDA when we tried to get the matter speedily passed through the House. The Wales TUC carried a resolution deploring the activities on the Floor of the House. The present Secretary of State for Wales initially opposed the formation of the Development Board for Rural Wales, but realised that that was a mistake and eventually went along with the idea. No new machinery has been developed since then. Without the weapons of the Welsh Development Agency and the Development Board for Rural Wales, the Government's cupboard would be bare.

I am grateful to my right hon. Friends who were in the Labour Cabinet for accepting my views on the need for WDA. They gave me every support in setting up that body and giving it the necessary resources. I felt, however, that mid-Wales needed more. Thirty-two years ago last Saturday, when I was 21, I came down from university and was asked at a young farmers' rally whether I would like to be the parliamentary Labour candidate for the county of Cardigan. I went to the selection panel, having been asked by a distinguished "Cardi" to accept the candidacy. I had to do my military service, so the constituency rightly rejected me. I made my speech at that meeting on the basis of a famous report by a distinguished Welshman, H. T. Edwards, who was chairman of the Council of Wales. He said that a statutory board was required to deal with the problems of mid-Wales. It was my great privilege more than 20 years later to put that into effect and to carry out the promise I made at that conference.

Not many people wanted that board. The provision was not in any party policy. The Welsh Office and the present Secretary of State did not want it. I discovered, after three awful months, that the man in the Welsh Office who was supposed to be organising the matter, had been taken off the job. If I had not realised that and had not taken immediate steps to correct the position, the legislation would not have been ready in time. That was one of the few occasions on which I blew my top in the Welsh Office. I had Eric Varley's support. He recognised the needs. All the difficulties in the Department of Trade and Industry were overridden, and the body was established.

The Welsh Development Agency was necessary because I believed that it could tackle the major problems of Wales. Something more than a broad-brush approach was needed in mid-Wales. We needed the fine touch of the paint brush. We needed a few thousand pounds here and there to prime the pump in the rural community. We were afraid that depopulation would occur in rural Wales to such an extent that we could not put the clock back. If the population comprised only the elderly, with no one able

to earn his livelihood, the cost of providing social services would be so enormous that it would mean the end of the road for mid-Wales.

I very much welcome the arresting of the depopulation trend in some parts of Wales. We must, however, analyse the age of the population and ascertain the extent to which the arrest has been caused by people retiring to rural Wales rather than by the retention of people in that area. Only a tiny minority of the people who were in the same form as I was in Aberyswyth are still earning their livelihood in the old county of Cardigan. We have continued to lose our life blood. Major steps were taken with the Development Board for Rural Wales. I was convinced that only a statutory board could solve the problems. The development of Newtown is a shining example of the improvements. The DBRW needs more resources. If it had those resources, it could provide those pockets of industry that would enable the quality of life to be changed in many parts of the community.

Lack of resources is the problem in mid-Wales. I believe passionately that, such is the quality of life in that area, with a little help—I am not talking about a lot of money—something could be done to achieve a better balance of population. I fear that rural Wales will have an aging population, and not a broad-based population able to hold its own and provide sufficient employment for the best of its young people. For far too many years, we have educated for export. That is why we have lost so many of the best of our young people. Until I am convinced that we have done more than merely arrest the depopulation trend, and have provided job opportunities to retain more young people, I shall not be confident about rural Wales.

I hope that I have underlined the point that, even if the Minister of State is not concerned about the problems of rural Wales, many of us are. It is not the time for complacency. Years of work must be done to ensure that the clock is put back and that there is a thriving community. It will take years for agriculture to recover from the damaging blows during the past few years. It will be years before people have the necessary confidence to invest in it in Wales. We must ensure that, whatever the crisis—perhaps because of problems of over-production in other industries—funds are available. Vitality, funds, drive, imagination and investment are needed for Wales to cope with the problems that may occur during the next few years.

5.9 pm

Sir Raymond Gower (Vale of Glamorgan): Without detracting from what the right hon. and learned Member for Aberavon (Mr. Morris) did for mid-Wales, I am sure that he would agree that he was greatly assisted by the self-help groups which had set up an organisation there before Mid-Wales Development was created and which had done extremely valuable work.

Mr. John Morris: I certainly accept that. I built the Development Board for Rural Wales on that basis, and incorporated on the initial board some of the distinguished people who had served on those bodies.

Sir Raymond Gower: To that extent, I subscribe to what the right hon. and learned Gentleman said, but the foundations had been laid by the self-help initiatives of the county councils.

The hon. Member for Pontypridd (Mr. John) misled the House when he asked for a White Paper. He spoke as though we were not in Europe, and almost gave the impression that we need not conduct difficult international negotiations before deciding on many of those changes.

Mr. John: I do not know whether the hon. Gentleman knows whether we are in Europe. I am not clear whether he lives in the modern world. If I am misleading the House—that is a fairly serious charge to make—I am doing it in common with the NFU in Wales and the *Financial Times* last week. If the hon. Gentleman would read about farming, he might learn a little more.

Sir Raymond Gower: That is a facile remark which does not take us much further. The tenor of the hon. Gentleman's speech was that we could produce a White Paper now just as easily as we could have done before we joined the Community. That has the result of misleading the House.

The right hon. and learned Member for Aberavon seems to want the Minister to be a soothsayer who can anticipate the eating habits a few years hence. It is inconceivable that we can work along those lines. He and the hon. Member for Pontypridd must know that any Minister with responsibility for agriculture is in a difficult position and must, in some respects, follow rather than lead events. It is not easy for Ministers to say what will happen next year or the year after, and I hope that hon. Members will be fair enough to accept that.

Despite the undoubted problems of the predominantly milk-producing areas, agriculture still makes a formidable contribution to the economy of the Principality. However, there will be difficulties ahead, and the hon. Member for Pontypridd was correct to say that we must expect problems in other sectors of agriculture. It is conceivable that there will be over-production in other sectors. In a Community it is difficult to anticipate future needs and to produce exactly the right amount. These are highly technical matters, and I would not condemn a Government of any party for having difficulties in this area.

Welsh farmers will have problems, but there is still a splendid future for agriculture in Wales, even taking into account the manifest difficulties owing to geographical conditions, to the fact that many of our areas have suffered for a long time from inaccessibility, and to the fact that we do not have a large proportion of the higher-grade land that can be found in some parts of the United Kingdom. In the past, many of our farmers were too small to be economic, but there has been some improvement in that respect. Much of our land is in the upland and hill-farming areas, which have benefited from the special provision that has been made by the Community for less-favoured areas.

It is noteworthy that, after about a century and a half of serious depopulation in parts of mid-Wales — especially in the old county of Montgomery, which suffered constant depopulation for well over a century—there is evidence that the worst of that has been stopped.

I echo the tributes that have been paid to Mid-Wales Development, the Welsh Development Agency and the Wales tourist board for their efforts in rural mid-Wales.

Despite the economic recession, successive Ministers in successive Governments deserve congratulations on maintaining the broad impetus of the road building programme. The extension of the M4 motorway to the west has produced great benefits to the farming areas of Dyfed, Carmarthen, Pembrokeshire and Cardigan. Similarly, north-west Wales must have benefited from the

[Sir Raymond Gower]

steady improvement in communications. I take the point of the hon. and learned Member for Montgomery (Mr. Carlile) that the road system in mid-Wales must be improved. However, when I have driven through Powys, I have been greatly impressed by the quality of many main roads. The county council must be congratulated on them. It is an amazing achievement that so many roads have improved, and it is certainly much more pleasant and easier to drive through Builth and Llandridnod to Newtown than it was a decade ago.

Mr. Alex Carlile: Has the hon. Gentleman recently tried to drive from Powys via Wrexham to Merseyside or the Manchester area? If so, will he confirm that it is a journey which few would undertake, unless they had strong reasons for doing so, because of the appalling roads along that route?

Sir Raymond Gower: I admit that I have not done that during the past few years, but when I wished to travel that way, I usually drove to Shrewsbury and then north.

Mr. Alex Carlile: Through England.

Sir Raymond Gower: That is so. I repeat that I have been impressed by the condition of the roads in large areas of Powys.

The right hon. and learned Member for Aberavon and the hon. Member for Pontypridd expressed their legitimate doubts about the new plans for the bus industry. However effective or ineffective they may be in other parts of Wales, it seems likely that the flexibility of the new system is almost designed to effect some improvement in rural areas. In recent years, in some parts of mid-Wales and Powys, adequate transport has been almost non-existent. Some villages have had no real bus services for a long time. The new arrangements cannot be worse than the present position, and the chances are that they will lead to an improvement. Hon. Members are on the wrong tack when they relate the future of the bus industry to the subject of today's debate, because, in this narrow area, there is a great prospect of considerable improvement.

In addition to some of the matters mentioned by the right hon. and learned Member for Aberavon (Mr. Morris), rural Wales, especially mid-Wales, needs continued road improvements. I would set that above many of the other things that have been referred to. The inaccessibility of so much of mid-Wales must be cured.

Parts of mid-Wales would benefit from the adoption of the methods and practice of Mid-Wales Development to adjacent areas in north-west Wales, northern Dyfed and Carmarthen. I echo the right hon. and learned Member for Aberavon in that I hope that my right hon. Friend will be able to give us some information about the degree of real help given by the Exchequer to the Wales tourist board. Is it having a fair deal as compared with the tourist boards in England and Scotland?

In addition, I should like continued provision of the smaller purpose-built advance factories in suitable parts of rural Wales where there is an adequate population for them. Finally, additional steps should be taken to assist the increasing number of craft industries, which are a valuable adjunct to our tourist industry. In the past, our craft industries have been poorer than those overseas. Although there has been a radical improvement in this industry in the past few years, some extra assistance here could be fruitful.

Although I am not as pessimistic as some hon. Members who have spoken, I recognise that the problems of rural Wales are considerable. Despite the world recession and our economic difficulties, matters are not nearly as bad as the right hon. and learned Gentleman suggested.

5.22 pm

Mr. Geraint Howells (Ceredigion and Pembroke, North): Although I am pleased that we have been given an opportunity to debate Welsh affairs once again, it is rather disappointing that the Labour party should have asked for only half a day in which to debate such a crucial aspect of our national life.

It is a significant, not to say cynical, gesture on the part of a movement that largely ignored the rural population when in power, to decide to debate the matter at all now. The Labour party is, broadly speaking, out of sympathy with a large sector of the rural community on whose vitality and resource the economy of these areas depends —the farming community.

The Labour party has campaigned vigorously to get us out of Europe, yet, despite the several and serious shortcomings of the common agricultural policy, agriculture in Wales would be in a much worse state if we withdrew. It is interesting to note that, when a Tory Member tried to bring in a Bill to rate agricultural buildings a couple of weeks ago, the most solid support for it came from the Labour Benches. In my view, such a policy would harm Welsh farmers more than most because livestock farming which uses buildings, is important to them.

The Secretary of State for Wales (Mr. Nicholas Edwards): I should be grateful if the hon. Gentleman would explain why, if that is so, the Liberal-Social Democratic policy document on local government states:

"There is only one exclusion from the rating system which can no longer be justified: the derating of agricultural land and buildings. The re-rating of agriculture would strengthen the rate base of many local authorities with low resources."

Is that the policy of the alliance or is the alliance split on this as on everything else?

Mr. Howells: With respect, I was talking about the Bill which was defeated in the House only a fortnight ago. Tory and Labour Governments have been given opportunities to help farmers in hill and marginal areas, but they have been remarkably reluctant to take them. It is one thing to say today that more acres in Wales have been taken under the marginal land scheme, but the farmers of Wales know—I do not think that they will forgive Tory or Labour Governments for this—that they did not receive the full hill compensatory allowance. That was a retrograde step. Farmers should not have been penalised when the Europeans were willing to provide the money.

It is good that we have a chance to highlight the serious problems facing rural communities, despite the limited time given to the subject, because the problems have been exacerbated by mindless and insensitive Tory policies. During the past six years, Wales has been treated shamefully by the Tories and, in many respects, rural Wales has suffered as much as industrial areas.

One example of insensitivity and incompetence in policy making is the Government's dealing with the milk quota system. It is important not to underestimate the effects of the milk quota on rural Wales. Although there are now only about one quarter as many milk producers as there were 30 years ago, we now produce twice as much milk. The economy of certain areas in highly dependent on milk production. The milk quota system has hit those areas hard and farmers have suffered severe financial losses.

It is generally agreed that the tribunals set up to deal, with hardship cases have not succeeded in helping all those who need and deserve help. There are serious anomalies, and steps must be taken to amend the system so that producers receive justice. It would be helpful if the Secretary of State could tell us of any plans he may have in this direction. It is unbelievable that Ministers should say that it is all right to introduce a quota system for small dairy producers in Britain when they have no plans to introduce a quota system for cereal growers, but that is what the Minister for Agriculture, Fisheries and Food said a fortnight ago.

The Government have ignored the importance of agriculture in Wales. They do not recognise the problems and have failed to give any indication of policies for the future that would help to give the industry stability. Instead, they have concentrated on cutting money for research services and have curtailed the activities of the agricultural development and advisory service. Welsh farming has special problems and is bound to suffer as a result of those cuts.

One of the Government's worst-thought-out measures this Session—and there have been many—is to be found in the Transport Bill, which is going through Parliament on the payroll vote. The privatisation of the bus networks would do untold damage in Wales. We might have efficient services connecting sparsely populated areas with villages and towns, but they would be destroyed if the Bill in enacted. So-called uneconomic routes would be ignored in the fight for lucrative long-distance or town routes and those least able to afford their own transport — the young, the unemployed seeking work, the elderly wishing to visit a doctor, a post office or shops—would be left stranded.

There is a constant attack on rural schools. With the recent Tory trend of insisting on value for money in education, more rural schools will come under threat. As these schools are closed, so the communities they serve will decline. How can one place a value on education or on community ties? Why deprive our children of a first-class amenity in the name of prudent money saving? The alliance believes that any school with two teachers or more should be kept open and that special consideration should be given to social and community aspects before deciding to close even the smallest school.

The Government's mania for so-called efficiency and cost cutting is also threatening our rural post offices and telephone kiosks. We hear daily of small sub-post offices closing in villages where there is an aging population. This forces the inhabitants to travel miles to collect their pensions and allowances. No efforts are made to find new tenants for vacant sub-post offices. In all their calculations, the Government have left out the social consequences of their scrimping and saving and they have succeeded in making the quality of life for rural dwellers much poorer.

I am also concerned about the effect on large parts of rural Wales of cuts in the National Health Service. Many patients already travel long distances for hospital care and treatment and now more local and cottage hospitals are to close. If we are to help the rural communities, it is essential that we take an enlightened view and that we spend more money on amenities and services. We must begin by restoring and improving the infrastructure, by building and maintaining better roads and encouraging the development of our rail services. This in turn could help to encourage more light industry and to provide stable and rewarding jobs for the people of the area. I am glad that the Mid-Wales development board is doing an excellent job, within the limits laid down for it. I should like to see its scope extended and its work better funded. It is essential to extend a lifeline to small business in rural areas. During the years of Tory rule, thousands of them have gone to the wall. The small business and self-employed sector is of vital importance to the economic well-being of rural Wales. Small businesses have been shabbily treated by this Government. They must be encouraged to grow and thus take on more employees.

Tourism is now an important fact of life in many rural areas. It could save the economy of many areas from foundering. The Wales tourist board has accepted the challenge. The Government should recognise that by giving special additional grants, bearing in mind the needs of Wales.

We must revitalise rural Wales. We must give it more hope by creating real jobs and by providing essential services. The Tory Government have completely failed. It is no wonder that the Welsh people rejected them so resoundingly during the recent county council elections.

The suggestion has been made today that the Government should introduce a White Paper on the future of agriculture in Wales. To restore confidence among the agricultural community in Wales we need a ten-year plan for the industry so that farmers in all sectors can plan ahead. To help young men entering agriculture, we should set up a land bank to give them special facilities, like their counterparts in Europe.

Our smallholdings system has worked well in many parts of Wales. I am proud of Dyfed county council and other counties which have not sold their smallholdings. To save the infrastructure of agriculture the Government must give extra financial aid to county councils to ensure that they provide more smallholdings for those who want to start in agriculture.

The Minister said that everything was rosy in Wales and that grants were forthcoming. Even in Powys, Brecon and Radnor farmers are aware of the cuts in grant that have been made in the last twelve months. The Government promise more cuts in the years to come. Welsh farmers should have the opportunity to use a capital grant scheme, which has worked exceptionally well in the past decade or two, or they should be able to obtain cheap credit. Farmers would have the choice if the scheme became optional. Such a system works well on the continent and our counterparts in Europe are willing for our Government to introduce such a scheme, which would be beneficial to everyone in Wales.

Now that the Secretary of State has full responsibility for Welsh agriculture he should go to Brussels to represent Welsh agriculture during negotiations on the price review. If I am wrong I am willing to be corrected, but to my

[Mr. Howells]

knowledge, he has been only once, when he negotiated the sheepmeat regime for 1979-80. It is his duty to go to Brussels on behalf of the people involved in agriculture.

There is another problem in the east Dyfed health authority area. Many beds are to go at Llanelli, Carmarthen and Aberystwyth. I hope that the Secretary of State can do something to avoid hospitals having to cut spending in the next twelve months.

The Government have said that they plan cuts worth £30 million in research establishment expenditure. Many of us are afraid that untold damage will be done to the Welsh plant breeding station at Aberystwyth. It would be a great shame because it is the only national institution of its kind in Wales. We do not think that it will be closed, but it needs to be restored so that it can continue to provide work for the people in the area. It should be available to help those who want to develop different types of grasses in the Third world.

I have received many letters lately from people who are worried about policing in the rural areas. It is a pity that crime is on the increase. Many people in the rural areas would like a different method of policing to be used. Methods are the responsibility of the chief constables, but some people believe in a more flexible policy. The police should travel in cars round the rural areas, but there is much to be said for the village bobby. In my view we need both.

Those of us who live in the rural areas are proud of our culture, heritage and language. Many of us have pressed —I have pressed in particular—that we should have a board to look after the interests of the Welsh language and its development in the years to come. It should be preserved. It is our duty to do so. I hope that the Government in their wisdom will accept the plea that has been made by many Welsh-speaking Welshmen throughout the Principality, that we should safeguard our culture and our language.

Dr. Roger Thomas (Carmarthen): Does the hon. Gentleman appreciate that the Welsh Joint Education Council recently came out flatly against such a board for securing the future and even distribution of facilities for the Welsh language? I believe that it is a disappointing state of affairs and I think that the hon. Gentleman will be disappointed, too.

Mr. Howells: I accept what the hon. Gentleman has said. I expected the council to say just what it did, but I believe that we need a board to look after the interests of the Welsh language.

5.41 pm

Sir Anthony Meyer (Clwyd, North-West): I am sorry that the Labour party should choose to introduce this interesting debate in the terms that it used. I am sure that at the conclusion of the debate Labour Members will be sorry about that. However, I found myself reluctantly nodding in agreement with a great deal of what the right hon. and learned Member for Aberavon (Mr. Morris) said about an enhanced role for the Welsh development agency. Whoever else will be glad of the debate, I am sure that the Liberal party will not wish to study too closely the report of today's proceedings, particularly the demolition of its agricultural policy by my right hon. Friend the Secretary of State.

The story of rural Wales is in fact a success story, though Heaven knows there is plenty of room for improvement. Those of us on the Select Committee who visited mid-Wales recently during our inquiry into tourism are still in the process of making up our minds about the overall performance of the Wales tourist board, but for the work of Mid-Wales Development—or the Development Board for Rural Wales, as we used to call it—we all have nothing but praise. Of course the withdrawal of assisted area status, necessitated by the overdue rationalisation of regional policy, was a blow to its efforts, but by energy and adaptability, it has done much to overcome that, and in particular to find ways of continuing to draw support from the EEC. I hope that my right hon. Friend the Secretary of State for Wales will continue his efforts to make such aid available, and to extend it to those areas of rural Wales that are no longer formally designated as assisted areas.

There are limits to the expansion of industrial activity in rural Wales, though the Laura Ashley saga, which reflects the greatest possible credit on all concerned, suggests that there is still considerable scope for expansion in the right sort of manufacturing industry. But, of course, the industry where expansion is most clearly called for is tourism. It would be out of order as well as premature to discuss tourism at any length today, but we would do well to keep it at the back of our minds, for tourism, which can provide so many jobs and create so much prosperity, cannot itself flourish unless the environment and the infrastructure are adequate to nourish it. Here there is a virtuous circle that needs to be initiated.

No doubt the debate will be used to attack the Government's Transport Bill. There is an element of risk in the Bill, for unless the entrepreneurs come forward to provide the local transport services that can now be made profitable by the removal of restrictions, we shall have wrecked a poor transport system and left ourselves with nothing. I do not for one moment believe that that will happen. I am sure that there is enough wit and will in Wales to provide flexible transport services, not merely to meet the present known needs, but to create new travel opportunities for the countryside, and in the process to make that countryside more attractive to tourists.

The railways of Wales are among the major tourist attractions as well as the vital artery in the economy as a whole. The most stupid rumours are being circulated by those who ought to know better, such as the hon. Member for Crewe and Nantwich (Mrs. Dunwoody). I am sorry to say that normally sensible local papers have been picking up those rumours and giving them currency. My right hon. Friend the Secretary of State has demonstrated in the most tangible fashion his support for railway lines in Wales. It should not be necessary, but I have to ask him yet again to make it perfectly plain in his winding-up speech that there is no question of closing the north Wales line or any of the other major lines in Wales.

Mr. Best: My hon. Friend will not be aware that yesterday I spoke to Mr. Harewood, the area manager based at Chester, who found it quite extraordinary that statements were being made about possible closure of the north Wales line. A large amount of investment is going into upgrading that line so that it can take trains that travel at 90 mph.

Sir Anthony Meyer: That shows how foolish it is to listen to anything said by the hon. Member for Crewe and Nantwich.

There are other areas where misgivings may be more justified, and if my right hon. Friend the Secretary of State can give any reassurance, it would be much appreciated. The first concern is smaller schools. It is hopelessly uneconomic and educationally unsatisfactory to try to keep every school open as the numbers dwindle with falling school rolls. The school is the heart of a community and the closure of a school can be a terrible blow to the spirit of that community. There are already rumours that large and successful comprehensive schools may be closed if their numbers fall below 1,000. In that climate, there is a natural anxiety that the criteria for the closure of schools in rural areas may be continuously raised until few of them qualify for survival. I ask my right hon. Friend in his winding-up speech to give me some assurance that his Department will not merely take into account — and encourage local education authorties to take into account — the cost of running the schools or even their educational efficiency, but will give some weight to the place of those schools in the life of the communities that they serve.

The other matter that worries me, which has been referred to by the hon. Member for Ceredigion and Pembroke, North (Mr. Howells) relates to sub-post offices. Some of the same considerations apply here as apply to schools. The Post Office Corporation in its entirely laudable pursuit of profitability, is now closing down a number of post offices, so far mainly in urban areas, on the grounds that they are unprofitable. I believe that that is a faulty calculation based on the concept of reducing activity until the point of profitability is reached instead of expanding until one reaches the other end of the profit curve. The closure of sub-post offices in urban areas inflicts inconvenience and occasional hardship on individuals. If such a policy of closure were extended to the countryside—I accept the assurance that so far there is no intention to do so—the consequences would be a good deal more serious. A village without a post office or a school is a poor thing, and an inexorably decaying thing.

By far the most important activity in rural Wales is agriculture. Agriculture in Wales, especially milk producing, has passed through a worrying period. The worst has not happened largely because of the dismal expectations aroused by the announcement of milk quotas. There are other worries ahead and for other sectors of agriculture. Welsh farming has done well in past years out of the common agricultural policy, and much of it is still doing well. It is within a common agricultural policy for Europe that the best future for Welsh agriculture lies. However, the immense and insuperable difficulty of getting decisions out of the Common Market makes it impossible for Ministers to operate the changes that would enable agriculture in Wales to make a far greater and better directed contribution to the well-being of the countryside by, for example, concentrating subsidies much more on the less favoured areas, and by reducing the excessive prices paid for crops or production already in surplus. However, it is not for those who stoutly defend the right of each member state to veto a decision which it may find mildly inconvenient, to complain that the EC has been reduced to paralysis and that the common agricultural policy is not contributing as it should to the well-being of the countryside. I have never concealed my view. If we want the EC to work—there is no point in being in it, if we do not—we must accept far more limitations on our right of veto than any Minister seems ready to contemplate. If the Liberal party takes that as a sign of approval for some of its policies, it is the only sign of approval that it will get from me today.

One thing is certain: rural Wales gets a better deal from a Conservative Government than it would from a Labour Government, who would knock the props from agriculture and lay heavy burdens on it, or from an alliance Government, who, we learn, would impose other such burdens on agriculture, and who have yet to show that they can sustain the long-term policies necessary to revitalise the countryside, or from Plaid Cymru, whose policies would cut Wales off from the desperately needed flow of outward investment. I have no hesitation in supporting the Government amendment.

5.51 pm

Dr. Donald Coleman (Neath): Both the Minister and the hon. Member for Vale of Glamorgan (Sir R. Gower) referred to the halt in the depopulation of mid-Wales. It is to be welcomed, and they welcomed it, as I do. When I first came to the House we established the Welsh Office. Our first Secretary of State for Wales, James Griffiths, made it his work to ensure that the depopulation of Mid-Wales should and must be halted. He was undoubtedly given the most expert advice on the matter from no less a person than the late Tudor Watkins, who represented Brecon and Radnor for a long time, and knew the problems of mid-Wales and its counties well.

Our motion condemns the Government's complacency. We listened to the Minister of State, whom the Opposition regard as both likeable and affable, introducing the subject, but, despite our kind feelings and thoughts towards him, I must agree with my right hon. and learned Friend the Member for Aberavon (Mr. Morris), who accused him of complacency. I found nothing to convince me that the Government were as serious as they should be about the problems of rural Wales.

The motion goes on to talk about the need for a change in Government policies towards rural communities in Wales. Almost a year ago I listened intently, as I always do, during a debate in the Welsh Grand Committee about rural affairs in Wales. Many hon. Members drew the attention of the Secretary of State for Wales to the problems that were created by last summer's drought, especially its serious effect on the rural communities in Wales. I re-read the report of that debate, and it does not seem that members of the Committee were satisfied with the answers that they received from the right hon. Gentleman. Each of us hopes that we shall have the benefit of fine weather again this year, but we do not want a repeat of the experience that was complained of in the Welsh Grand Committee last year.

When the Minister replies to the debate, it is not too much to expect from him an assurance that the problems caused by the drought last year will not take place this year if we are fortunate enough to have a long dry spell this summer. We want to hear from him that the Welsh water authority has made funds available to implement the work known to be needed to avoid the problems of drought, especially in rural areas.

The rural areas are places of exceptional beauty, and living in them should be nothing short of idyllic. Unfortunately, the Government and their policies are as

[Dr. Donald Coleman]

much a blight on those rural areas as on urban areas. Many of the problems are the same, but many are intensified in their effect in rural areas. The Transport Bill, which is now in another place, is an example of that. Indeed, hon. Members have already alluded to it today.

People in rural areas cannot be confident that under the new legislation the existing network of bus services in rural areas will survive. When the process of privatisation gets under way and the National Bus Company disappears from our roads, there can be no certainty that a benevolent privateer will jump in to provide the bus services, poor as they may be in rural areas. The poor and the elderly will be returned to the Prime Minister's much-loved Victorian times when the boundaries of their world were the distance that they could walk.

Supporters of the Government have expressed their conviction that privatisation of bus services will provide a better and cheaper service in rural areas. They are certainly easy to convince, but perhaps it is because their experience of these matters is limited. From my experience of the valleys of my constituency, many of which are semi-rural, I do not see the chances of rural areas as being bright. If there is not a publicly owned operation which is required by statute to provide services, and if one thinks that a privateer will do so, one is whistling in the dark. Because of the Government's transport policy, rural communities will find themselves having to pay fewer bus fares, but greater shoe repair bills.

I shall touch briefly on another matter of Government policy which will cause serious trouble in rural areas, if it is implemented. In his recent Budget statement, the Chancellor of the Exchequer foreshadowed the dismantling of the wages councils. On Sunday new minimum wage rates for farm workers came into effect. The workers should ponder whether this will be the last time that they will have such an award, and whether the future will return them to the bad old times that they experienced in the past. They should concentrate their minds on that.

The hon. Member for Ceredigion and Pembroke, North (Mr. Howells) talked about the culture of Wales. Within the upper regions of the Swansea valley the Craig-y-Nos hospital is about to close. It was the home of Adelina Patti. Proposals have been made which would ensure that that building, in a beautiful rural setting, could be used for the advancement of culture, and to promote the study of the area. Some parts of the building could be used for the establishment of rural industries. But we are being told by the Government and by the Welsh Office that the building must appear in the auctioneer's catalogue and be sold to the highest bidder. Yet it is part of our cultural heritage in Wales, and we have the right to expect a different attitude to be taken to it. Therefore, I urge the Secretary of State to look carefully at the proposals and to preserve that part of our national heritage.

A year ago there were complaints that the decline in rural Wales was continuing. There were indications of it in the reduction in the number of agricultural workers and in the reduction in educational opportunities in the rural areas. Churches and chapels and even public houses were closing. There has been nothing from the Government in the debate today to indicate to us or to the Welsh people and those who live in the Welsh rural communities that the decline has either halted or decreased. We have been made aware, as I have tried to demonstrate, and as other hon. Members have, that Government policies are under consideration which will make the situation even worse.

I hope that people in the rural areas of Wales will take note of the debate and will recognise that they are part of the Government's policy of neglect which has left Britain a very much worse off place than it was when the Government came on the scene in 1979. The only remedy for that neglect will be to get rid of the Government as soon as is possible.

6.2 pm

Mr. Robert Harvey (Clwyd, South-West): I shall be very brief, because this seems to me to be a most curious debate. A deep concern for the countryside has not been evident in Labour party pronouncements in the past. Farming is still a major producer of wealth in rural Wales. Even though only 4 per cent. of the Clwyd labour force is directly employed in it, the prosperity and jobs that it generates go much wider.

What is Labour party policy on agriculture? The indignation that emanated from the Labour benches when milk quotas were imposed — to cheers from the Strangers' Gallery from Dyfed farmers—would lead one to assume that the Opposition were determined to maintain food surpluses, would keep in being the old dairy arrangements, and would go on allowing producers to expand as if there were no tomorrow. Yet what would the Labour party do? The answer that we heard from the Labour Front Bench today was not altogether clear.

At a *Financial Times* conference last year, the right hon. Member for Islwyn (Mr. Kinnock) said bluntly:

> "We can reduce the number of products which are covered by guarantee, and we can cut the guarantee to an economically justifiable level. More important, we can begin an assault on surplus capacity, reducing rather than increasing the amount of uneconomic production."

That at least has the virtue of honesty. The position taken by Conservative Members is that, in view of the economic contribution that farming makes to the rural communities, the cuts should be as small and as gradual as possible, although in my view the cuts imposed last year went too far. But the Labour position is that "an assault" should be made on farming incomes, on the very lifeblood of our rural communities. I wonder what is now the attitude of the Labour party to the repeated resolutions for the nationalisation of the land passed at Labour party conferences. Is nationalisation of the land official Labour party policy or is it not? The rural communities of Wales deserve an answer.

I am glad to see that even Labour Members have welcomed the retention of the beef variable premium, and recognise the staggering victory that was achieved by the Government in the recent settlement on land when a concerted EEC attack on the price was beaten off. That will be a major reassurance to the hill farmers of rural Wales.

The other lifeline of our rural communities is tourism. Tourism in our Principality is growing apace, thanks to Government action in encouraging the small business sector, in raising the threshold at which small businesses pay tax, and in easing the employment protection legislation that prevents them from growing.

Much has been said about bus services in the debate. The fact remains that bus services have been declining steadily under the existing system, which has encouraged

high fares, high subsidies and fewer services. The hope —I recognise that it is only a hope—arising from the Transport Bill must be that a more competitive bus system can halt the decline in the vital services to the neediest people in our rural communities.

It is hard to fault the Government's record on roads. The A470, A465, A40, A47, A438, A48, A487 and A55 have all helped to open up rural Wales. The straightening and widening of roads in rural areas such as Powys has indeed gone beyond the point at which it might be environmentally desirable.

With regard to railways, the £176,000 recently pledged for the improvement of the mid-Wales and Cambrian lines must be taken as a vote of confidence in the future of those services, which so admirably serve rural areas. However, any attempt by British Rail to single-track the Chester to Shrewsbury line would be a hammer blow to the urban and rural communities along that line, which serves a great deal of Wales, and I urge the Secretary of State to do everything in his power to influence British Rail on the matter.

Our record in helping rural communities is admirable, and I hope that it will lead to—

Mr. Alex Carlile: The hon. Gentleman says that the Government's record in helping rural areas is admirable.

Through his rose-coloured glasses, will he tell us the admirable reasons which have led to Powys being the only county in Wales which is no longer eligible for assistance from the European social fund?

Mr. Harvey: I have outlined in great detail the areas in which the Government's record is extremely favourable. I have some doubts about the way in which regional support was changed, and I have expressed those doubts in the Welsh Grand Committee. Nevertheless, the overall position has been one of considerable success in regenerating the rural communities of Wales.

I urge the Secretary of State to look at one other area in which he might contribute to helping the rural communities in Wales. I refer to the funding of small craft workshop projects of the kind being pursued by Clwydfro in Clwyd as a cheaper and more direct way of stimulating local employment, in keeping with the character of rural areas, than advance factories necessarily are.

With regard to the Opposition's motive in calling the debate, I was puzzled to find in a recent policy document on Wales put out by the Labour party no mention of rural Wales—not a word. The rural communities of Wales have shown in the past two decades how much the Labour party cares for them by converting themselves into Conservative seats. I would not for a moment suggest that the Labour party, in calling the debate, was motivated by anything as dishonourable as the prospect of an approaching by-election in a seat with a large rural hinterland, but the party should look at the rather curious outlook of some of its political advisers. Some of these advisers are very strange indeed and very anti-agricultural. I understand that the research department of the Labour party has just produced a children's book on trade unionism which tells the story of farm animals—

Mr. John: I would not expect the hon. Gentleman to know a great deal about politics; he has had enough difficulty in keeping to his Central Office brief. The Labour research department is not a vehicle or a department of the Labour party.

Mr. Harvey: I am glad to have that reassurance. I was a little surprised to see that this document had been published by the research department, and I am glad to have it on record that it reflects in no way the sentiments of the Labour party. This children's book on trade unionism tells the story of farm animals going on strike to protest at dangerous, rusty machinery that they work with and the rotten food that they get from Mr. Moneybags, the farmer, in return for working a 12-hour day. I might enlighten the Opposition by saying that no farmer would become Mr. Moneybags if he did not use modern machinery and high yield feeding stuffs and if he did not work a 16-hour day.

The value of this debate is that it reveals the extent of the Labour party's knowledge of and attitude towards farming and rural Wales and those who work there.

6.11 pm

Mr. D. E. Thomas (Meirionnydd Nant Conwy): I was disappointed by one point in the Minister of State's otherwise excellent opening speech. The propaganda machine at the Welsh Office has for once neglected to make any announcement about "goodies". No doubt we shall have to wait for the winding-up speech of the Secretary of State for Wales before those "goodies" are announced.

The Minister of State asked for a positive approach to be adopted. I shall try to make a positive suggestion: it is about time that the Welsh Office became a serious Department of policy making. We are referring to rural communities in Wales. I should prefer to describe it as the countryside of Wales or, in the predominant language of that countryside, as cefn gwlad. The countryside of Wales is the responsibility of the Welsh Office in terms of policy. It is a territorial Department of State. The Welsh Office is the department for agriculture in Wales, for the environment and for the national parks, housing, social services, planning, overall economic oversight, transportation, tourism, education and training. The Development Board for Rural Wales is also answerable to the Welsh Office. Many more aspects of territorial policy are dealt with by the Welsh Office.

After a long and detailed study of all the circulars that have been produced by the Welsh Office, and after comparing them line by line and clause by clause with similar circulars produced by other Departments in London, there seems to be very little difference between them, apart from certain policy aspects relating to the Welsh language. The Welsh Office does not appear to have a distinctive policy-making function, yet it ought to have a positive strategy for dealing with the future of rural communities in Wales. The failure of the Welsh Office over adopting such a strategy has already been mentioned by the hon. Member for Ceredigion and Pembroke, North (Mr. Howells), who said that the Welsh Office ought to be the agricultural department for Wales and should represent Wales directly in the European Community. The Welsh Office did not demand, as it should have done, an additional quota for Wales which would have prevented last year's milk industry crisis from which so many farmers are still suffering. I represent a sheepmeat area, and I welcome the achievements on sheepmeat, but it is essential to put on record the failure of the Welsh Office to represent Welsh interests directly in the European Community.

[Mr. D. E. Thomas]

The Welsh Office ought to be able to make a departmental response to last year's report by the Countryside Commission relating to a better future for the uplands. In 1984 I had the opportunity to speak at the national parks conference in Llandudno. I referred in some detail to the report and its recommendations. Can the Secretary of State say what is happening inside the Whitehall machinery and Cathays Park about the report of the Countryside Commission? Is it being shelved? Is action being taken? Are the positive recommendations contained in the report being taken on board by the Government? Do the Government intend to respond fully to the report? In what way do they intend to respond to it?

The report is a serious attempt by the Countryside Commission to deal with the needs of the upland areas. The Countryside Commission's report recommends additional public investment in country areas in order to sustain upland communities, improve their quality of life, provide adequate levels of income and good employment opportunities. It also recommends the examination of ways in which economic development can be sustained. Another recommendation is that there should be an examination of ways in which capital can be invested in manufacturing and service industries, using European Community sources, where possible.

The report also considered the strengthening of the socio-economic advice of the agricultural department of the Welsh Office. It looked in particular at the need for additional housing investment in rural areas — at the need for the provision of low cost but well-designed accommodation in both the public and the private sectors to meet the needs of people living in upland areas. It also considered the need for the housing investment programmes of district councils with large rural areas to have increased allocations. That applies also to the allocations to housing associations. A series of recommendations in the report point to the need for additional public investment in rural areas. I should like to hear the full response of the Government to the most important study of the countryside that has been produced in recent years.

We have seen not the strengthening of the fabric of the countryside but its weakening by a process not only of centralisation which operates through market forces, with commercial enterprises usually situated in larger towns within rural areas, but of centralisation in the public sector — telecommunications, buses, gas and water. All of these utilities are now threatened by privatisation, or they have already been privatised by the Government. The result is centralisation. The Welsh water authority recently objected to the privatisation of its services. If that were to take place, there would no doubt be further centralisation of the water authority's services.

Local government has also been centralised, and the health districts operate in a centralised way. I have discussed recently with people in Gwynedd the health authority's proposal to remove ambulance cover from large parts of rural north-west and mid-Wales. There will be no 24-hour ambulance cover in an area stretching from Tywyn through to Corwen and nearly to Wrexham, from an area from above Llanrwst in Conwy valley at the top of my constituency right down to the Dyfi estuary. These proposals are a disaster in particular for the elderly who live in rural communities. They live in fear. They realise that if they are taken ill there will be no proper ambulance cover. It is time that the Welsh Office responded to the request from Gwynedd health authority, and ensured an adequate allocation for the ambulance service and that the £400,000 overspend by the Gwynedd ambulance service does not lead to a cut in the service.

Mr. Best: The hon. Gentleman will know that I have considerable sympathy for the view that he has just advanced about the ambulance service, but can he say whether the Welsh National party has any policies for rural Wales? If so, can he assure the House that there will be a Welsh National candidate in the Brecon and Radnor by-election, or is the Welsh National party so demoralised that it will not bother to put its policies before the electorate?

Mr. Thomas: I do not intend to use this debate, as have other hon. Members, as a means of referring to any particular by-election. All I will say is that a candidate for Brecon and Radnor will be selected on Saturday.

As for the way in which Government policies have affected the fabric of the economic life of rural communities, I ought to say that I would not have given way to the hon. Gentleman if I had thought that he would not make a serious point about the ambulance services. It will be a lesson to me that the hon. Gentleman does not make serious points. As for the effects of the Government's policies in the commerical sector, there have been a large number of bankruptcies among small firms in Wales. This is the unacceptable face of Thatcherism. The number of bankruptcies notified to the courts has risen from just over 279 to nearly 600 in 1984. Many of these businesses were operating in the Welsh countryside.

There is a tendency for us to examine rural society — many speakers have contributed to that syndrome today — in terms of problems. I have to live part of my life in inner-city London, part in inner-city Cardiff, and the better part of it in the Conwy valley and the Wnion valley in the Snowdonia national park. My experience of the rural communities is that they have massive resources. In particular, there are economic resources that do not materialise because people do not have the entrepreneurial opportunities to make them do so. Therefore, I welcome the new emphasis in the Government's economic and education policies on training initiatives.

One should also appreciate the strong cultural and social resources of these rural communities and the extent to which they are communities of participation, and take part in deciding their future. One of the most exciting developments in recent years—I know that the Minister of State is aware of this and has supported it — is the development of the community enterprise initiatives in Powys, in the Tanat valley and other areas, and particularly in the valley in Dyfed that I know best, the Teifi valley. I pay tribute to the support that the Minister of State has given to the work of Antur Teifi with help from the development board and the local authority in Dyfed. Antur Teifi and the other community co-operatives represent the way forward for many of these smaller communities in rural Wales where economic enterprise can be developed on the basis of community collaboration and control.

I stress the need for rural communities to have the resources to plan for themselves rather than to be subjected

to the structure planning of a central county council or a Welsh Office department. I pay tribute to the work of the Development Board for Rural Wales. I was fascinated to hear chapter 1—or was it chapter 6, or bits of both?—of the memoirs of the right hon. and learned Member for Aberavon (Mr. Morris) and I look forward to hearing more revelations from the Welsh Office in due course.

I pay tribute to the work of the board and to some of its long-serving staff. In particular, I mention Mr. Peter Garbett Edwards, who served us in mid-Wales so well, nobly and efficiently over the years. He was involved with the Mid-Wales development association, then with the Mid-Wales development corporation and now with the board. The work of the board shows the need for a sensitive approach to rural development and I am particularly pleased that the board has now increased its support for co-operatives and social programmes.

I welcome British Rail's investment on the Cambrian line. If it were not for this ill-timed debate, I should have spent today on the sprinter train going from Machynlleth up the Cambrian coastline. That would be a much more enjoyable and better way to spend my time than sitting here. We welcome this investment on the Cambrian coast, and the Barmouth bridge investment.

However, what is the point of having the highest quality of train service for our rural lines if the highest quality of bus service is not there to connect with it? Taking away from local authorities the overall co-ordinating role in transport through the Transport Bill means there is a danger that such connecting services will not continue. When the Welsh Office looks at that Bill before it concludes its passage through the other place, I hope that it will examine the need for co-ordination on an all-Wales level for passenger transport services so that we do not lose, as a result of this legislation, the co-ordination of bus and train services.

6.23 pm

Mr. Keith Best (Ynys Môn): The hon. Member for Meirionnydd Nant Conwy (Mr. Thomas) and I have crossed swords on a number of occasions, I hope in a friendly way. I agree that it would be much more pleasent to be in rural Wales than standing here making a speech. I shall be brief because the House will want to listen to the right hon. Member for Cardiff, South and Penarth (Mr. Callaghan).

The Opposition have done a great disservice to the people of rural Wales by tabling this motion. Once again, they have painted a picture of doom and gloom without hope—a picture that is unrepresentative of what has been happening in rural Wales. No mention has been made of the science parks of Aberystwyth and Newton or of the factory building programme of 17,500 sq ft in 1983-84, to add to the 47,867 sq ft already built in the town of Llandrindod Wells. No reference was made to the financial support for the formation of a "heart of Wales" tourist association to promote specifically the tourist facilities and attractions of that part of Wales. No mention was made of the construction of two 3,000 sq ft advance factories at Rhayader. No mention was made of the five factories at Builth Wells.

To listen to Opposition Members, one would think that nothing has been happening in rural Wales. Remarkable by its absence was any reference to the total United Kingdom economy. There was no reference to the CBI report which shows that our export order books are at a record high for 25 years, that productivity has increased and that we have the highest rate of growth in western Europe. There was no reference to the facts that United Kingdom investment rose by 15 per cent. last year and that there is a new confidence in our economy at home and abroad.

There has been a sharp drop in net investment in overseas equities, to its lowest annual figure since the abolition of exchange controls in 1979. That has been because pension funds' and life assurance companies' net purchases of overseas shares fell to £590 million last year, compared to a peak of £2,840 million in 1982. Instead of going abroad, funds went largely into domestic equities and cash. Pension funds allocated 37 per cent. of their new money to net investment in United Kingdom companies' securities, compared to 23 per cent. in 1983. That is the measure of the confidence that the market has in our economy, but one would not believe that to hear the speeches from the Opposition Benches.

Wales has become the overseas investors' El Dorado. To obtain 25 per cent. of new jobs attributable to inward investment in the United Kingdom coming to Wales is not a good record for my right hon. Friend the Secretary of State and not a job well done. It is a superlative record and a herculean task to ensure that so many new jobs are coming to Wales, in comparison to what is happening in the EEC.

We have a higher proportion of Japanese industry than any other comparable region in the EEC. The United States has a larger number of firms in Wales than in any other country. Second come the Germans. My hon. Friend the Member for Conwy (Mr. Roberts), who has just come back from Germany, tells me that 35 factories in Wales have some German involvement, and I believe that his visit has been successful in drumming up further investment for Wales.

However, there is no room for complacency. I accept that, and one has to face the fact that a domestic economy that is doing well does not necessarily solve the problem of unemployment. That must concern us deeply in Wales.

We can stimulate more jobs in rural areas in three sectors. The first has been mentioned already. We need to promote Wales as a tourist centre far more, particularly abroad. Far too few visitors to Wales come from abroad. Secondly, we must continue the road building process. It is significant that not one Opposition Member mentioned the more than £400 million being spent on the dualling of the A55 carriageway, which will open up development prospects to north-west Wales in the same way that the M4 has opened up south Wales. There are also the bypass projects that I have been pressing for on the Isle of Anglesey.

To judge from their remarks about bus services, Opposition Members have never spoken to the private operators who are waiting in the wings ready to come in to provide the services that are so badly needed in Wales. It is not all gloom and doom in Wales—there is success. The people of Wales acknowledge that, even if the Opposition do not.

6.29 pm

Mr. James Callaghan (Cardiff, South and Penarth): The hon. Member for Meirionnydd Nant Conwy (Mr. Thomas) referred to the beauties of his constituency and also to the inner resources that his constituents need. They certainly have them. Every rural community possesses

[Mr. James Callaghan]

resources perhaps to an even greater extent than urban areas and, my word, the rural communities need them at present. The strength is there. As to the beauties of his constituency, I was reminded of what Ruskin, or Carlyle, said, that there is only one thing more beautiful than the drive from Dolgellau to Barmouth, and that is the drive from Barmouth to Dolgellau. If we are going for the tourism that the hon. Member for Ynys Môn (Mr. Best) mentioned, we can do no better than inscribe that on our shields.

I wish to put one point to the Government. The Minister of State is such a delightful man that it is difficult to quarrel with him. Nevertheless, underneath that confident exterior today, in the almost brazen speech that he made, there must have lurked some elements of doubt. The market economy to which the Government are devoted applies in many areas, but it does not apply in the rural areas, least of all in agriculture. Therefore, there are residual responsibilities upon the Government. It is not sufficient for the Government to tell the rural communities that they have their inner strength in the great self-reliance upon which they have depended for many years. The Government have a responsibility to offer the rural communities, and especially the agricultural community, some advice and guidance. As my right hon. and learned Friend the Member for Aberavon (Mr. Morris) said, in a powerful speech, the rural communities, and the agricultural community in particular, are very uncertain about their future.

What guidance, if any, do the Government offer? They have a responsibility to offer that guidance precisely because the market economy does not operate in that field, precisely because the price for cereals is fixed, the price for milk is fixed, the price for beef is roughly fixed and the price for sheep is fixed. What do the Government advise the hill farmers and the small farmers of Wales to do when they themselves are partially responsible for fixing prices through the common agricultural policy?

We know that the income of the small farmer has been reduced as a result of the milk quota. What do the Government advise those who grow cereals to do? My right hon. and learned Friend said correctly that we in Wales are not as much affected by the cereals situation as the people in East Anglia are. Nevertheless, there is a growth of cereals in Wales. What is the advice? Should farmers grow more cereals? But the Government want us to grow fewer cereals. Do the Government believe that we should go over to quotas, or will they rely upon a price reduction? If the Government are in favour of going over to quotas, no farmers in Wales will grow fewer cereals, because, when the quota comes in, the farmers will find, as the dairy people found, that their quotas will be adversely affected because they have tried to diversify into beans or something else. What then is the Government's advice on that?

What do the Government advise those people in rural communities to do whose incomes have been reduced? Is the advice to substitute cereals for milk? Surely not. Is the advice to go for beef or for sheep, and then to find a market such as the present one, with over-production of cereals and of milk? If fewer cereals are to be grown and the milk quota is to be reduced, what are people supposed to do? Are they supposed to take the reduction in income and go into the bed and breakfast business, or try to get into some other field—and, if so, what?

The Government have some responsibility for this situation. If the market economy prevailed, then I would agree — let the weakest go to the wall, let the communities be wound up or rely on whatever it is they can find to do—but that is not the situation.

The Government say that they want to preserve the rural communities and to strengthen them, so what advice do they offer the small farmer whose milk quota has been reduced so that his income is smaller and who certainly ought not to be encouraged to go over to cereals, in view of the ensuing surplus? Is he supposed to accept the reduction in income? If not, what alternatives do the Government propose to preserve, to safeguard and to strengthen those rural communities?

6.34 pm

Mr. Barry Jones (Alyn and Deeside): The House will await with interest the reply of the Secretary of State for Wales to the potent questions of my right hon. Friend the Member for Cardiff, South and Penarth (Mr. Callaghan), the former Prime Minister.

The hon. Member for Ynys Môn (Mr. Best) used the word herculean. He made a spirited defence of the policies of his right hon. Friend in recent years, but I should like to point out to him the herculean task that he and his right hon. Friend have with regard to unemployment in the largely rural county of Gwynedd. It amounts to 14,103, and male unemployment tops 21·5 per cent. I know that the hon. Gentleman will be listening hard to his right hon. Friend the Secretary of State for signs of change of policy and new job projects.

The Minister had a good story to tell on sheepmeat particularly, but I think that he greatly understated the agony of the small dairy farmers in Clwyd and in Dyfed. My right hon. and learned Friend the Member for Aberavon (Mr. Morris) strongly emphasised the impact of Government policies on some of the more vulnerable aspects of agriculture in Wales.

I remind the hon. Member for Ceredigion and Pembroke, North (Mr. Howells), who attacked my party, that it was the Labour Government under the premiership of my right hon. Friend the Member for Cardiff, South and Penarth which legislated into existence the Development Board for Rural Wales and the Welsh Development Agency. Without these statutory bodies, Wales today would be an industrial desert and rural Wales would be without hope economically and socially. The Labour party, under my right hon. Friend's leadership, showed its imaginative interventionist care for rural Wales when it created the DBRW and the Welsh Development Agency. Unrestrained market forces would destroy the Welsh economy and, as my right hon. Friend the Member for Cardiff, South and Penarth implied, would annihilate rural Wales.

There are towns in rural Wales well distanced from the remaining industrial activity in Wales which have grave economic problems. I mention Pwllheli, Lampeter, Cardigan, Bangor and Caernarfon. They are united by the experience of suffering more than 22 per cent. male unemployment. Therefore, I believe that the Minister in his speech was complacent with regard to unemployment in the Principality and in the rural areas.

The Government have not told us today of the Mid-Wales Development Board's apprehension at the designation of the west midlands as an assisted area or the Telford new town enterprise zone. In today's cut-throat competitive world, rural Wales may be paying a high price for the right hon. Gentleman's failure in 1982 to keep mid-Wales as an assisted area. Nor did the Minister tell us how Dyfed and Gwynedd rural counties will fare economically after the hammer blows of the BP Oil Ltd. and Courtaulds closure plans. New jobs are unlikely to pass westwards to Dyfed and Gwynedd when west Glamorgan and Clwyd are desperately trying to shore up their industrial economies.

The Minister of State did not explain why he has allowed the European Commission to exclude Powys from eligibility for social fund aid. Powys sees this as a gratuitous kick in the teeth, given that other counties of Wales, and the neighbouring counties of Hereford and Worcester, are eligible. Powys, I know, wants, with social fund aid, to bestow high-class modern skills training upon its younger citizens.

I listened with sadness to the Minister of State pronouncing what was in effect the death sentence for the skillcentres at Llanelli and west Gwent. It appears to me that the rural county of Dyfed will be deeply disappointed, as will west Gwent, on hearing the news that the Minister released today.

Right hon. and hon. Members have mentioned education. I do not think that any hon. Member would deny that the rural counties of Wales have distinguished themselves in the provision of high quality classroom education for many generations. But today there is an atmosphere of crisis—the administrators, teachers and parents are all exhibiting deep concern. Her Majesty's inspectorate report says that there is

"a slow but persistent decline in the quality of the learning environment . . . a substantial backlog of work has built up for repairs . . . pupils learning experiences are impoverished as the replacement of worn and outdated stock is being postponed . . . the drab appearance of many buildings does little to enhance the learning of pupils in schools where pressure on resources has already led to some impoverishment of experience."

Local education authorities in rural Wales are concerned. They have exhibited the most careful housekeeping in their budgets. Everyone in the education service in Wales knows that the widespread reductions in staffing are having an undesirable impact on the curriculum. Powys is a sad example—34 teaching posts are to be axed; the school meals service is under immense pressure; and it is proposed to raise the age of entry to nursery schools. In Powys as many as eight village schools are earmarked for closure in that very rural county. The system of targets and penalties is deeply injurious to the prospects of the most vulnerable of our pupils in the state sector in rural Wales.

Hon. Members have referred to the Transport Bill. It was a reflection of the deep concern felt throughout Wales. The Conservative proposals will crucify non-car owners in rural areas; their mobility will be drastically restricted. Bus users in outlying areas could be cut off if the Bill is enacted, not only from their employment and their social life, but from their recreational facilities.

Rural bus users could find that regular timetabled services disappear. Hon. Members are concerned about the potential decline in the safe maintenance of buses. The employees of the National Bus Company tell me that they are worried about their pension prospects and deeply concerned about potential redundancies. The Bill threatens to injure the quality of life in the more far-flung settlements of rural Wales. It can be summed up as a charter for less service and more costs.

I know that the Mid-Wales Development Board and the Welsh Women's Institute will have nothing to do with the Bill. They believe that it is a disaster. They have been highly critical of it from the start and have not lessened their criticisms as the Bill has progressed.

The Cabinet can best help rural Wales by a strategic change in economic policy. Specifically the Mid-Wales Development Board is entitled to a vote of confidence, it needs new, enhanced powers and it should be enabled to build even more advanced factories and science parks. It should have a guaranteed enlarged budget for several years ahead.

It is clear that the road links between south and north Wales must be considerably improved, and specifically the A483 and the A470 should be tackled. In the Mid-Wales heartland the A44 between Rhayader and Leominster must be upgraded as soon as possible.

I hope that, even at this late stage, the Secretary of State will fight to give eligibility to Powys in the EEC social fund. The Government should redouble their efforts for a larger social fund in the Community. Mid-Wales is desperately vulnerable because it is not an assisted area. Moreover, rural Wales will be vulnerable for as long as that territory lacks a strong regional policy. The right hon. Gentleman has presided over a weakening of regional policy in Wales. A strong regional policy would help us to hold on to some of our school leavers. My fear is that we shall lose able youngsters to Telford and the west midlands.

Local authorities could help the right hon. Gentleman create more work. What is needed for them to be effective is a freeing of the county and district authorities from the yolk of targets and penalties. To be without a job is a desperately demoralising experience. To be unemployed in our rural villages and towns is to know the true meaning of loneliness and isolation. Unemployment is gradually becoming a frightening reality in our country communities.

Government cuts in the public sector have vastly decreased job vacancies in the largest employers in rural areas—the local councils, the hospitals and the schools. The jobless move away permanently and the tightly knit family communities that comprise the heartland of Britain and Wales are torn apart. We believe that the quality of life must be improved for those living in our scattered rural counties. The Conservatives have cut the lifeline to our rural areas, and the way of living preserved for generations has suddenly come under threat. The Government are guilty of adopting a complacent attitude towards rural Wales.

6.47 pm

The Secretary of State for Wales (Mr. Nicholas Edwards): In his concluding remarks, the hon. Member for Alyn and Deeside (Mr. Jones) referred to a system of targets and GREs in local government finance. It is because we very much appreciate the problems of rural areas, especially those in Wales, that the targets and GREs for Powys and Gwynedd are the highest of any local authority in England and Wales. It is just one sign of the importance and priority that we attach to the particular problems that they face.

[Mr. Nicholas Edwards]

The motion and the Opposition's speeches accuse the Government of complacency, but have singularly failed to put forward positive proposals—as my hon. Friend the Member for Clwyd, South-West (Mr. Harvey) pointed out in a devastating speech.

The hon. Member for Pontypridd (Mr. John) spoke somewhat curiously about shaping the structure of society. He deplored the historic depopulation that has gone on for a century and a half. He seemed to be unaware that during the past decade the population in mid and rural Wales has been rising strongly. He was wrong to give the impression that it is simply a matter of old people retiring to the beauties of rural Wales. The fact is that over the same period the working age groups have grown in every county in Wales. That is hardly a sign of an area in a desperate state of decline.

The hon. Member for Pontypridd called for imaginative proposals. He did not put them forward himself, but he and the right hon. and learned Member for Aberavon (Mr. Morris) warned about the difficulties facing agriculture and the need to cut the surpluses of and expenditure on the system of agricultural support in Europe. I agree with a great deal of what the right hon. and learned Gentleman said about future consumption trends that may affect agriculture. They both called for a White Paper.

It was perhaps the speech of the former Prime Minister, the right hon. Member for Cardiff, South and Penarth (Mr. Callaghan), that showed not only the need for guidance but the need for taking time and for consultation before giving such guidance. In his very short contribution he spelled out a great many of the difficulties that confront us and agriculture. Whilst I agree with him about the need to map a way through these uncertainties, nothing would be more disastrous for agriculture than to draw that map without properly ascertaining the way forward. I and my Department have been spending much time in recent weeks and months talking to those in the industry and those concerned with it, and discussing these matters with everyone with expert knowledge.

I regard it as one of the highest priorities for my Department to devote much attention to what I regard as a central issue — the need to devise systems of agricultural support that support the rural areas and do not contain within them the seeds of their own destruction, as so many of our systems of support have in the past. I am consulting on these issues with my right hon. Friend the Minister of Agriculture and with those who have responsibility for agriculture. I hope that we shall be able to come forward with some guidance. I would have wished that we might have from the Opposition a positive injection in the debate on these important matters.

The Liberal party's amendment represented a direct and outright by-election bid—"Vote for us, and we promise you a jolly ride on the gravy train." The hon. Member for Ceredigion and Pembroke, North (Mr. Howells) was careful not to say who would pay. He said that he was against agricultural rating but, as I pointed out in an intervention, his friends in the SDP have made it clear that they believe that it is the farmers who should pay for all these goodies through the rating of farms and agricultural land. No doubt these contributions will be charmingly and politely explained to the electorate of Brecon and Radnor by the candidate who fought me in 1979 and who achieved the lowest vote for the Liberal party in my constituency for over 100 years.

The entry of young people into agriculture was referred to by the hon. Member for Ceredigion and Pembroke, North. He will know that the Northfield committee came out against the introduction of grants or subsidised loans for young farmers. We have made it easier for young farmers to enter the industry via smallholdings and by security of tenure changes for agricultural holdings. These will help to make holdings available for letting, encouraging smallholding tenants to move on. The Agricultural Holdings Act 1984 also introduced compulsory retirement at 65 for smallholding tenants, as recommended by the Northfield committee. We are currently revising the capital grants scheme. One proposal under consideration is the best way to help young entrants.

Nowhere was the extraordinary paucity of ideas from the Opposition more strikingly illustrated than in what they had to say about transport. We were reminded by my hon. Friend the Minister of State how in 1977 the hon. Member for Alyn and Deeside (Mr. Jones) presided over a conference in Aberystwyth at which he said:

"We have all watched with growing concern, particularly in recent years, a steady decline in rural transport services".

Later he said:

"We still have to face the fact, however, that there are many areas in which conventional services would be an expensive luxury. It is not good economic sense to run ordinary buses on routes when passenger loadings are in twos and threes; and where the terrain makes such operations physically difficult anyway."

Of course, the Labour party did nothing about that, and the decline that he described has gone on since. It is illustrated in the Mid-Glamorgan public transport plan and by the announcement that there may have to be a closure of the National Bus Company facilities in my constituency. The Opposition have failed to face up to the fact that the decline has been going on and that it is this Government who are bringing forward proposals to give the opportunity for new services to be introduced.

During the debate there has been a good deal of emphasis on the need for improved access to the rural areas of Wales. Certainly this Government have carried out a massive improvement of the road imfrastructure in Wales. When I look back at the threats that hung over the railway lines of Wales when we came into office, it is extraordinary to consider the posititon as it is today. My hon. Friend the Member for Clywyd, North-West (Sir A. Meyer) spoke of wild rumours about closing railway lines. Of course, they are wild and wholly false. The reality is established by what has been happening to the central Wales, the mid-Wales and the Cambrian coast lines. A sustained effort involving local authorities, Mid-Wales Development, the Wales tourist board, the Welsh Office and British Rail, involving more than £5 million of investment by British Rail, has given those railway lines a security that they have not had for many years.

The right hon. and learned Member for Aberavon asked about the relative support for the national tourist boards in England, Scotland and Wales. When I got the information it came as a pleasant surprise because I had not realised how relatively well we were doing in Wales. We have total expenditure by the Wales tourist board in grant in-aid and projects in 1985-86 of over £7 million. In relation to our population that compares very well with the expenditure by the Scottish tourist board of £8·8 million and of the expenditure by the English tourist board of £16·7 million.

The improvement in the level of expenditure by Wales tourist board over the last few years also compares favourably with expenditure in the other countries.

The hon. Member for Meirionnydd Nant Conway (Mr. Thomas) asked about the Government's response to the Countryside Commission's report on the uplands. I know the hon. Member takes a great interest in these matters. No doubt it was because he has so much research going on that he overlooked the fact that the Government printed their response on 31 January. If he looks for it, I am sure he will find it and be able to read it.

My hon. Friend the Member for Clwyd, North-West referred to the importance of rural post offices. I must emphasise that the closures that are taking place are of urban post offices that are within about a mile of other post offices. The position is different in rural areas and the Post Office has given assurances that the rural network will be maintained.

My hon. Friend also asked about consideration given to proposals made by education authorities to close rural schools. In considering the balance of educational advantage we are concerned about the ability of the school to deliver a broad, balanced and relevant curriculum, but we also take account of distance and travelling time. I made it clear that I sympathise with those who believe that village schools have an important contribution to make to the community, although that has to be balanced against the need to devote adequate resources to the education of children generally and to provide the quality that we need. We have launched the new initiatives that my hon. Friend the Minister of State mentioned because we attach importance to those matters.

The hon. Members for Alyn and Deeside and for Meriionnydd Nant Conwy mentioned the recent action taken by the European Commission to exclude Powys from access to the social fund. We have already made strong representations to the Commission, and the Government are now taking the matter up at ministerial level. It is a mistaken and misguided action with which we disagree.

It is absurd to accuse the Government of complacency over the problems facing farming. Milk producers face a difficult period of adjustment. No one who represents Pembrokeshire could have any doubt about that, but the Opposition should be honest. They have been calling for savings in the common agricultural policy and they have been criticising surpluses, but it is idle to pretend that change can be achieved without discomfort and hardship. The hon. Member for Ceredigion and Pembroke, North (Mr. Howells) voted against the legislation that established the outgoers scheme which is now the lifeline for more than half the Welsh milk producers.

The vigorous fight that the Government have put up to ensure the future of the beef premium scheme and the sheepmeat regime has been mentioned. I remind the House that it was this Government who introduced the sheepmeat regime in October 1980. It has been the bedrock upon which the industry's prosperity has been established. It was this Government who extended the less-favoured areas and gave an additional 400,000 hectares of coverage within Wales so that 80 per cent. of the agricultural area of Wales is now covered. Hill livestock compensatory allowances are expected to be claimed by 15,000 farmers —a 50 per cent. increase—and enhanced rates of grant are now available to about 9,000 extra farmers.

It was ironic to hear the remarks made by the hon. Member for Alyn and Deeside about employment in a week during which Laura Ashley has announced that it is proposing to move its headquarters accounts and personnel departments to mid-Wales, and that it is involved in a massive extension which will provide over 500 new jobs. It is also ironic at a time when Shotton Paper has given the biggest boost in modern times to employment in forestry in Wales, and when we are announcing a massive extension of training facilities in Wales.

The Government are accused of complacency by a party that lives in the past, that fails to recognise the certainty of change or its desirability, but clings tenaciously to the ideas, prejudices and myths of the past and seeks to prevent and obstruct the road to progress in every way that it can.

Question put, That the original words stand part of the Question:—

Question accordingly negatived.

Question, That the proposed words be there added, *put forthwith pursuant to Standing Order No. 33 (Questions on amendments), and agreed to.*

MR. SPEAKER *forthwith declared the main Question, as amended, to be agreed to.*

Resolved,

That this House recognises the difficulties faced by the farming industry and by rural communities in a period of change, but welcomes the reversal of the long period of depopulation in much of rural Wales, and supports the continued efforts of the Government to improve the services provided and to develop employment opportunities in the countryside.

Higher Education

7.16 pm

Mr. Giles Radice (Durham, North): I beg to move,

That this House deplores the Government's short-sighted and defeatist policy on higher education which, because it fails to match the nation's need for a sustained supply of graduates, for increased opportunities for continuing education and for high quality research, is a recipe for national economic, industrial and social decline.

Mr. Speaker: I must announce to the House that I have selected the amendment in the name of the Prime Minister.

Mr. Radice: No education paper in recent years has received such universal condemnation as the Green Paper "The Development of Higher Education into the 1990s". *The Guardian* comments that it elevates

"anorexia nervosa into a public policy."

The Times Higher Education Supplement concludes:

"we knew already how negative and philistine the Government's approach to higher education had become, but to have it so wretchedly confirmed is a shocking, and chilling, experience."

It is not just the newspapers of the Liberal establishment, so despised by this Government and one or two hon. Members, that are critical; even *The Times* compares the breadth of vision shared by the University Grants Committee and the National Advisory Body for Public Sector Higher Education with the Green Paper's lack of vision. The *Financial Times* predicts that it

"will probably please nobody who is seriously interested in the matter."

The Economist criticises the Green Paper for getting student numbers wrong, for being anti-feminist, for failing to encourage practical co-operation with industry and for failing to plan for more rather than fewer students. Even the pro-Tory popular press is uncertain about how to present the Green Paper. The *Daily Express*, searching for a popular theme, talks about

"a crackdown on left-wing student bully boys"

as if the Federation of Conservative Students did not exist.

Only *The Sun*, with its customary maturity of judgment, accuracy and sureness of touch, is on the Secretary of State's side. It proclaims:

"There need be no tears over Sir Keith Joseph's proposals to reduce the number of universities . . . Some of the new centres of learning are universities in name only, with low academic standards and unchecked left-wing intolerance and hooliganism. If, for example, Essex were to crumble into the North Sea, the only disadvantage would be an increase in coastal pollution."

Those were not the Secretary of State's words, but the words of *The Sun*, which is his friend.

Of course the academic world has been hostile to the Green Paper. That is perhaps not surprising. What is surprising is the almost total absence of support even among the Government's friends. Most fair-minded observers would agree that the Secretary of State's statement to the House on 21 May when he introduced the Green Paper got an almost uniformly hostile reception. A few hon. Members may be hoping that what they perceive to be the merits of the Green Paper will win through, despite the barrage of criticism, and that is obviously what the Secretary of State hopes. But the trouble with the Green Paper is that it is not just a public relations disaster; if implemented, it would be a disaster for Britain.

By any standards, the Green Paper is a grossly inadequate state paper. It has few new ideas, and there is little, if any, attempt to justify its conclusions by argument and evidence. Above all, it lacks vision and imagination.

[Mr. Radice]

The enormity of the Green Paper's failure is highlighted by the background against which it was produced and by our national requirements. Hon. Members will remember that there was a cut in the recurrent university grant of 7 per cent. in real terms between 1980-81 and 1984-85. That cut has meant 11,000 to 12,000 well-qualified students being turned away every year, and the loss of nearly 6,000 jobs. Above all, given the scale of the cuts and their uneven distribution, it has meant a collapse of academic morale — hardly the best spur for the increased efficiency for which the Secretary of State calls.

The universities had barely recovered from 1981 when, on 9 May this year, the UGC wrote to all vice-chancellors and principals telling each institution to prepare for Government support to decline by an average of 2 per cent. in real terms over the next three years. That is equivalent to the closure of a middle-sized university such as Southampton, Exeter or Durham, each year.

Under the selective system of support for research, which the UGC favours, and which the Government support, the grant to some universities may be cut by far more than 2 per cent. The UGC says that universities which suffer less than the average can do so only at the expense of other universities. Therefore, at a time when student numbers are at their peak, the universities have been told to make do with less and less money.

It is true—the hon. Member for Ealing, North (Mr. Greenway) has reminded me of this a few times, although I did not need reminding of it — that, so far, polytechnics and other institutions of higher education have taken many of the students who would formerly have obtained university places. All credit to them for doing so without receiving adequate additional income. Indeed, the National Advisory Body says that there was a 20 per cent. real cut in expenditure per pupil between 1980-81 and 1984-85. It has warned the Secretary of State that taking on extra students without sufficient extra resources puts a heavy burden on staff and is a threat to the maintenance of quality. Despite the Prime Minister's commitment at the general election to maintaining level funding for universities, and despite the Green Paper's pious words about providing sufficient resources for higher education in the current planning period, cuts have been made and are still being made, and more are planned for the future.

The position could and should be different. If we are to survive and prosper as a nation, we need a sustained supply of highly skilled, highly motivated and highly adaptable graduates, capable of responding to the pace of change and of participating effectively in our democratic society. We need a sustained supply of high-quality research, not only to satisfy the needs of industry, but to advance learning. There is little reference to learning in the Green Paper. Above all, if we are to survive as a nation, we need a dynamic, vigorous and innovative system of higher education.

Mr. Harry Greenway (Ealing, North): Does the hon. Gentleman accept that 66,000 more people are in higher education now than in 1979? Is he saying that the quality of their studies is now inferior? Can he confirm whether a future Labour Government would restore any cuts?

Mr. Radice: I said that the National Advisory Body has advised the Secretary of State that if the unit of resource in polytechnics and other institutions of higher education is not maintained, quality will be threatened.

Mr. Geoffrey Dickens (Littleborough and Saddleworth): But it is not under threat at the moment?

Mr. Radice: I simply quoted the NAB, which advises the Secretary of State. I do not know whether the hon. Gentleman has read that advice, but if he did, he would discover that that is the case.

The Labour party believes that the Government are wrong to cut resources as they have. The NAB and the UGC should have the security of funding—the truly level funding—for which they ask and should not have to make cuts, as the Secretary of State is asking them to do. In 1990, there will be no case for cutting resources to higher education in the way that the Green Paper suggests.

If the Secretary of State will not accept that description of our national requirements from me, he should at least heed his advisers, which are the UGC and the NAB, whose chairman is the Under-Secretary of State for Education and Science. I am sad that he is not present this evening. Hon. Members will remember the advice given last year to the Secretary of State in the eloquent joint statement from the UGC and the NAB. They called for measures to broaden access, including introducing the new principle of ability to benefit. They called for a new emphasis on continuing education, which they saw as essential economically and socially. They called for a sustained research effort, and warned that

"to curtail research would in the long run impoverish the nation materially as well as culturally."

They rejected the Department's forecast of student numbers after 1990 as under-estimating the participation rate of women, the numbers of mature students, and the impact of the changing social composition of the population. The UGC asked for truly level funding and NAB wanted extra resources, to cope with additional student demand among other things. What is the Green Paper's response to those vital issues? On most of them, the Government have ignored their advice or stated a contrary or modified view without arguing out the case.

On ability to benefit, the Government accept the principles but then qualify them so heavily as to make their acceptance virtually meaningless. The chapter on continuing education is so cursory as to amount to a deliberate snub. Clearly, the Prime Minister's blue pencil has been at work.

Mr. Greenway: No.

Mr. Radice: Well, it is three and a half pages long. That is not good enough for a Green Paper on what the NAB and the UGC said was a most important addition to the Robbins principles.

The Government say that their aim is that the contribution of higher education to the nation's research effort should continue on about the present scale. That is a misleading statement because the Government are well aware that the amount of public money going to university research will decline over the next three years. Indeed, they propose that some departments and universities could lose their research function altogether. The Government say that they hope that industry will fill the gap. If so, how and by how much? We need concrete answers, not pious hopes.

Sir Kenneth Lewis (Stamford and Spalding): Of course research has been cut, and quite rightly. Some of it has not been justified in terms of national need. The hon. Gentleman asked how we can be sure that industry will fill the gap. Industry will fill the gap if the research that it wants is followed up in universities that research is in the interests of industry and hence the nation.

Mr. Radice: The problem with that theory is that industry wants short-term gains.

Mrs. Elaine Kellett-Bowman (Lancaster): Be fair.

Mr. Radice: The problem with research is that pure research sometimes takes 20 years to become effective in the form of applied research. I am surprised that the hon. Gentleman, who is knowledgable about industry and many other matters, is not aware of that obvious point.

Mrs. Kellett-Bowman: Will the hon. Gentleman give way?

Mr. Radice: I hope that the hon. Lady will forgive me if I do not—many hon. Members want to speak and this is a short debate.

On student numbers, the Green Paper accepts variant Y which, predictably, is the lowest Department of Education and Science estimate of student numbers in the 1990s, without even bothering to argue the case. The Government's response is discourteous and intellectually disreputable.

On resources, the Government cannot decide whether their justification for the cuts that they want to make is that the economy has been so unsuccessful that the country cannot afford its present higher education system and that the Government's economic policy has been so unsuccessful that we cannot afford it, or that student numbers are falling. The problem with the latter argument is that student numbers, as even the Green Paper admits, will be at a record level until 1990. The argument until 1990 must be in terms of insufficient resources. After that date, argument is about rationalisation or, to use the Under-Secretary of State's unhappy phrase, "rolling the wicket for rationalisation". I should have thought that it is much more like "digging up the wicket for destruction".

A muddle runs throughout the Green Paper. The Government wants higher education to contribute more effectively to the national economy but appears to believe that an impoverished and contracting higher education system will serve our economic needs best. That is nonsense.

Despite the lip service paid in the Green Paper to the importance of arts subjects for their own sake and that of industry and commerce, the shift to science and engineering will take place — contrary to the UGC's advice and what the House of Lords Select Committee said —at the expense of the arts. That also is nonsense.

Despite the Jarratt report's recommendation about long-term planning and long-term planning horizons, and despite the experience of 1981, the Green Paper appears to believe that a higher education can become more efficient against a background of contraction and closure. That again is nonsense. The Government want to cut resources to higher education not because there are rational arguments for doing so but because the Cabinet wants to cut public spending. That is the reality behind the Green Paper.

The Green Paper is a muddle and its arguments are weak — when they are stated at all — because the Government's higher education policy is not shaped by educational considerations, demography or sound economics but because they believe in cutting public spending. The consequences of this ideological fixation are likely to be appalling — loss of opportunities for young people, the closure of whole departments or even institutions, loss of jobs, redundancies, institutions' research functions being downgraded or abolished, little expansion in continuing education and the collapse of morale throughout higher education.

As our motion says, the Green Paper

"is a recipe for national economic, industrial and social decline."

The Labour party rejects the Government's barbaric, Philistine and defeatist approach. We accept the advice of the UGC and the NAB—the Government's advisers—about access, continuing education, student numbers and resources.

Mr. Dickens: But will Labour restore the money?

Mr. Radice: Yes. We have said that we support what the UGC and NAB are asking for in their advice to the Government. Higher education will have, however, to adapt to changing needs. We offer higher education a future that serves the nation's needs and we shall campaign throughout the country for our positive alternative and against the Government's Green Paper.

7.38 pm

The Secretary of State for Education and Science (Sir Keith Joseph): I beg to move, to leave out from "House" to the end of the Question and to add instead thereof:

"congratulates Her Majesty's Government on its policies for ensuring that higher education is better managed and more attuned to the needs of the economy, for maintaining and enhancing standards, and for broadening the criteria for access to higher education; urges Her Majesty's Government to continue to seek ways of making more effective use of the resources available for higher education; and welcomes the framework for the future development of higher education set out in Cmnd. 9524.".

Higher education should not be debated in the terms which the hon. Member for Durham, North (Mr. Radice) has chosen to use. Higher education is to be judged by quality. It can be judged properly only by quality, excellence, fitness for purpose, scholarship, research—basic and otherwise—[HON. MEMBERS: "Access?"]—learning, cultivation of the intellect—[HON. MEMBERS: "And access."]—and maturity. Access must take all of those factors into account. Access for the sake of access is of no service to those who are given access or to the country.

Mr. Gordon Wilson (Dundee, East): That is elitism.

Sir Keith Joseph: If it be elitist, I am one who wishes to see thoroughly well trained surgeons, thoroughly well trained engineers and thoroughly developed intellects among those who take decisions on our citizens.

I do not suggest that all those qualities can be secured only by those who have higher education. However, we can judge the higher education available by the possession of those qualities. I do not believe that many people in higher education would disagree with that.

The Government frame their approach by those criteria. It was by those criteria that I spoke to the British Academy a couple of years ago. I hoped that the Green Paper would be discussed on the basis of those criteria both outside and

[Sir Keith Joseph]

inside the House. I say this diffidently, but I hoped that my own fairly well-known preoccupation with quality would have earned that much.

In recent decades, under Governments of both parties, the country has gone through a period of relative economic failure. Judging by what we hoped to achieve and by what has been achieved by some of our neighbours in north-west Europe, we have had less prosperity and therefore less well-endowed public and social services.

It is open to all to apportion blame as they wish between Governments of all parties or between managements and trade unions, but relative economic failure is a fact.

Mr. Jack Straw (Blackburn) *rose*——

Sir Keith Joseph: I am sorry, but I want to make as brief a speech as possible because many hon. Members want to take part in the debate.

Mr. Straw *rose*——

Sir Keith Joseph: Very well, I shall give way once.

Mr. Straw: The Secretary of State seeks to apportion blame——

Sir Keith Joseph: I was about to deal with that.

Mr. Straw: The Secretary of State cannot know the question that I wish to put to him unless he is clairvoyant. He seeks to apportion blame for our current economic difficulties, which have become worse in the last six years. Does he recall that in speeches such as that at Preston in September 1974 he persuaded the Conservative party to follow its monetarist policy with the conviction that that policy would generate employment, prosperity and wealth? What has gone wrong?

Sir Keith Joseph: At Preston I spoke of the need to restrain public spending if we were to abate inflation. The forecasts have come true, to that extent.

The hon. Gentleman interrupted an analysis on which I had embarked. We have been through decades of relative economic failure. I am certainly not putting the blame on higher education, but there is no evidence from the last decades that rapid expansion of higher education in itself secures economic success. Of course it does not. Much more is involved in economic success.

Some outside the House have quoted, against what they see as the Green Paper's approach, the vision of the great Cardinal Newman 130 years ago. His was a vision which we can still universally admire and to which I adhere. However, I ask the House to remember that Newman spoke at a time when such universities as there were—they were few and there were no equivalents to polytechnics — were not tax-financed. They were financed privately and to some extent by local authorities.

Because we have not done as well as we would have wished economically over the past 40 years, and because higher education is now largely tax-financed, it is valid to say—as the Green Paper says—that we must spend public money sensibly and that part of higher education should make its contribution to the success of the economy. I emphasise that I am referring only to some aspects of higher education being involved in that contribution.

The Green Paper does not suggest that higher education is merely an instrument for improving economic performance. I should never suggest that, nor would the Government. The Green Paper takes for granted the purpose of higher education of which I spoke earlier. In my British Academy lecture I explicitly recognised that among the chief purposes of higher education is the pursuit of learning as something to be valued in its own right, the general cultivation of the intellect and the "refinement of the ideas of the age."
That is the essence of Newman's ideas.

Those purposes are not, nor should they be, directly concerned with economic benefit. Indeed, some teachers and scholars in many fields have traditionally and properly distanced themselves from such concerns to achieve a greater degree of profundity, accuracy and dispassionate understanding. That capacity for dispassion is one of the glories of higher education which I cherish and wish to see preserved.

The pursuit of learning for its own sake and the general cultivation of the intellect are not incompatible with greater enterprise or with a contribution to economic success. On the contrary, only to the extent that we are economically successful can we continue to find the resources to support pure learning, reflection and the refinement of ideas.

We must also remember that, although some treasured parts of higher education are concerned with learning for its own sake, much of higher education is not of that character. Much of what is taught in departments of engineering, science, law and medicine, for example, is directly economically relevant and involves the pursuit of knowledge and understanding at the highest levels.

When the Green Paper asks academics to pay due attention to enterprise and economic success, it does not argue in favour of a philistine disregard for scholarship. It asks for recognition that the refinement of the intellect and a contribution to economic success are not incompatible but are mutually dependent and that the pure pursuit of understanding and the acquisition of directly economically relevant skills are equally valid aspects of higher education. Neither is to be despised. The Government know that, and so should their critics.

It is because the Government so well understand that higher education's function is the pursuit and expansion of learning through scholarship and research, the transmission of values, knowledge and skills and the cultivation of the intellect and of maturity that we set such store by rigour, excellence and fitness for purpose. That is why the Government so strongly welcome the appointment by the committee of vice-chancellors and principals of a committee under the vice-chancellor of Lancaster university to examine universities' internal validation procedures. That is why the Government set up the Lindop committee.

We need the pursuit of learning, the cultivation of the intellect and vocational education. There is nothing new about vocational education in the history of the universities.

We rightly spend large sums of public money on higher education. We believe it to be our duty, without being dirigiste or going in for manpower planning, to try to predict the broad trends that higher education should consider serving. Now that the Jarratt committee has reported, it is plain for us all to see that a combination of the review of the UGC, recommended by that committee and accepted by the Government, and the encouragement of universities to organise their decision-making process

so that they can make judgments across the whole of their area will make them perhaps more capable and willing to make the predictions about broad trends that the Government have ventured to make in the Green Paper. It is because we believe that in this highly competitive world more jobs will depend to a greater extent on science and engineering skills, and more jobs, relying as they do upon consumers, will depend not only upon technical but upon management and enterprise skills in those subjects — I say that without denigrating the skills of management and enterprise in non-scientific and non-engineering departments — that we have on several occasions openly suggested a switch in the proportion of places——

Mr. Max Madden (Bradford, West): Will the right hon. Gentleman give way?

Sir Keith Joseph: No, because I am anxious to finish my speech.

Mr. Madden *rose——*

Sir Keith Joseph: I am sorry. I shall ask for the leave of the House to reply to the debate, when I shall deal with hon. Members' questions.

Several times we have suggested a switch, as the House knows. There is an increasingly pervasive indispensability, for economic success, of science and engineering in entrepreneurship, management and technical skills. Unless we prosper economically, whatever the hon. Member for Durham, North hopes one day to be able to do, we shall not be able to afford to support learning, scholarship and research to the extent that we all want.

We are not the only country making that judgment. Yesterday I was in Luxembourg, where all the members of the Economic Community talked of making the same switch. I hope that the House will remember that we face a fall in the age cohort in the 1990s of no less than 33 per cent. The hon. Member for Durham, North carefully avoided giving figures for that fall. That fall is not a prediction because it follows ineluctably from the births that have already occurred, and it is against that fall that the Government are proposing in the Green Paper, and not in final form, a 14 per cent. reduction in the number of places. I hope that the House will remember also that this Government and their predecessor have made possible an expansion of no fewer than 60,000 places in higher education as a whole during the past six years, a rise of no less than 15 per cent. Therefore, we now have a record proportion of a record age vintage in higher education.

The proposals in the Green Paper are such that that record proportion of the age vintage will be exceeded. After the fall in the age cohort and in the number of places, and if the Green Paper's proposals are validated by Government decisions to be made later, there will be a rise from 13·5 per cent. of the age vintage now in higher education to 15·5 per cent.

Mr. Andrew F. Bennett (Denton and Reddish): What about the Prime Minister's target of 22 per cent. in 1972?

Mr. Dickens: Listen and learn.

Sir Keith Joseph: Moreover, we are proposing to accept the UGC and NAB proposals to widen the Robbins eligibility. It is true that we have emphasised the importance of the fact that institutions of higher education should take into account motivation and maturity when admitting students, but surely that would be agreed in all parts of the House as being sensible. We have not only widened eligibility, but provided for places that will increase the age participation index, we are encouraging continuing education and expecting more women to go to higher education, and we are making provision for more mature people to do so.

If the Government's hopes, articulated in the speech that I made at Sheffield nearly two years ago, for more successful school education come true, and if the trends of eligible applicants for higher education prove that we are not being optimistic enough, we have declared our intention to review those trends and reconsider the provision that we are making.

The hon. Member for Durham, North skirted three main facts. He skirted the fact that Labour, in office, cut higher education spending by 8 per cent. in one year. He skirted the fact that this Government and their predecessor have increased the number of higher education places by 15 per cent. He never once laid emphasis on quality, which, in our view, is the key essential of higher education. I hope that my right hon. and hon. Friends will reject the motion and will support the amendment.

7.57 pm

Mr. Clement Freud (Cambridgeshire, North-East): I should like to begin by commending the hon. Member for Durham, North (Mr. Radice) on selecting this subject. I commend him the more because had he not done so, on our Supply Day on Thursday we should have selected the same subject.

One complaint about the Green Paper involves the astonishing and archaic procedure that we still pursue in the House. The Green Paper, which was promised many years ago came to us at 3.15 one afternoon, was then the subject of questions to the Secretary of State at 3.30, by which time no one had a proper chance of reading it or realising its implications.

I think that it is right to say that after one looks at the Labour motion, with which we basically agree, even if we would not pursue the inelegance of its language, one cannot help being appalled by the humbug of the Tory response. There are no proposals. There is nothing to make higher education more effective. Let me remind the House of what I said when I first read it. The first major weakness is

"to believe that anything worth preserving can be measured and that anything not susceptible to quantification is thus expendable. The second is to accept that the demographic decline condemns us to a decline in the supply of graduates."

I believe that there is a particular flaw in the Green Paper, exemplified in the Secretary of State's motion, when he says:

"higher education is better managed and more attuned to the needs of the economy".

There is a considerable paradox in that the right hon. Gentleman recognises the need for skilled manpower, but does not acknowledge the implications for higher education. The Green Paper states:

"unless the country's economic performance improves, we shall be even less able than now to afford many of the things that we value most".

Surely that is the reverse of the truth. Unless we invest, our economic performance will not improve.

Annexe B gives figures for the social rate of return on investing in a place of higher education as between 5 per cent. and 7 per cent. Such a return is similar to that which one gets on Government stock. Therefore, it is presumably

[Mr. Clement Freud]

respectable investment in the eyes of the Government, considerably better than the average investment in nationalised industry, very much better as well as a substantially better gamble than De Lorean or Lear Fan. One would expect such an analysis to result in positive action—but all there is is a £43 million investment in "the switch", to create 4,000 reluctant engineers—if we can find them, and *The Guardian* is highly doubtful about whether we shall be able to do so.

Rather than using the opportunity of the falling 18-year-old population to promote non-traditionals and continuing education, this is being used as an excuse for contraction and cost cutting. Look where one will in the Green Paper, one does not find what one is looking for.

We would have liked something done about the 21-hour rule—that legislation for despair and wasted opportunity. People who study when they are unemployed, one would have supposed, are most dear to the Prime Minister in that they have got on their bikes, yet nothing is being done for them, and the 21-hour rule stays.

The Open university is a most cost-effective source of academic and vocational excellence, yet in paragraph 3.12 the Green Paper contains the plumb dishonest remark:

"In the case of the Open University, the level of fees is closely related to the amount of grant made available by the Government, but the decision on the fee nevertheless rests finally with the University."

It rests finally with the university, which has no money to do anything about it or to get more students.

Many hon. Members on all sides of the House feel passionately about overseas students. They see this as a marvellous investment in mankind as well as something that we owe the former Commonwealth and Third world. *The Times Higher Education Supplement* sums it up succinctly:

"there is a section compounded of humbug and hypocrisy on overseas students which one can only hope will escape the notice of foreign critics".

As for embracing the new Robbins principle, the Green Paper states:

"courses of higher education should be available to all those who can benefit from them and who wish to do so. So long as taxpayers substantially finance higher education, however, the benefit has to be sufficient to justify the cost. The intellectual competence, motivation and maturity of the student should be consistent with the course, which must itself be of a standard appropriate to higher education."

That makes it more restrictive.

On planning, Jarratt blamed the Government for not giving universities information about their funding. Jarratt says that often the information came at the last moment, and made it impossible for the higher education sectors to plan in advance. However, this discussion document says:

"The UGC, the NAB and most recently the Jarratt report have argued that the absence of a longer funding horizon inhibits necessary planning. The Government accepts that it should give the best indications of longer term policies for higher education that it can. But planning also requires that institutions should manage their commitments and the funds available to them so as to be able to pursue their objectives effectively in circumstances of change and some inevitable uncertainty."

Therefore, it shuffles off the problem.

If pushed to find something kind to say, one would welcome the modest experiment in two-year degree courses. That ought to be looked at with care. I am also sure that the review of the UGC is welcomed everywhere. But to whom did the Department of Education and Science listen? On staffing, the UGC

"wanted at least 900 new appointments per year".

The NAB

"saw scope for tighter staffing, moving towards a staff/student ratio of 12:1".

Although we have a Green Paper, there is nothing green about it, in that it does not discuss anything. It simply holds out no hope for anyone. *The Times Higher Education Supplement* carried an article entitled "Did the Government Listen?". For anyone reading much of that excellent article, the answer was monosyllabic—they did not.

We have an X factor and a Y factor. The X factor is probably realistic, but the Y factor is simply the contention that in a changing world nothing will change in the number or composition of entrants. We would all reject the Y factor.

Instead of factors we need commitments. There should be a commitment to level funding, not least as the Government's earnest of the value of higher education. There should be a commitment to set targets for participation and to work towards them, rather than projections which never materialise and whose assumptions are dubious.

We need a commitment to use higher education to revamp the economy — as an access to national employment opportunities. If local markets collapse, higher education is the entry to the national market, and without higher education those workers would be abandoned.

I recognise that economic needs will cease to be met by traditional three-year intensive courses, so we should be planning for more and shorter courses, such as a short, sharp educational blast perhaps after five years in a job which may not be entirely suitable.

There should be a rethinking of the 21-hour rule. We should recognise the need to distinguish genuine from fraudulent claimants, but if the claimant is willing to give up a part-time course, it is likely that he will give up a full-time course.

Above all, perhaps, there should be a commitment to deploy flexibility in the skills of graduates. Instead of giving up arts students as lost sheep, let us make them all numerate and keyboard literate.

If higher education can play a positive part in making the British economy perform better, why not give more young men and women the opportunity to benefit? I and my hon. Friends will support the Labour motion, and we urge the House to do likewise.

8.7 pm

Mr. Michael Shersby (Uxbridge): I must first declare an interest as I am a member of the court of Brunel university which is situated in my constituency.

The Green Paper is of great concern and importance, not only to that leading technological university but also to higher education in general. As it covers a very wide area, I shall confine my remarks mainly to its effect on the technological universities. That is the area in which I am specially, but not exclusively, interested.

I agree with the Government that it is vital for higher education to contribute more effectively to the performance of the economy. I share my right hon. Friend's view that unless the country's economic performance improves, we shall be less able to afford many of the things that we value most—as the Green Paper put it:

"including education for pleasure and general culture and the finance of scholarship and research as an end in itself".

How can this be achieved? The Green Paper stresses the importance of the initiative announced in March to increase the number of places in engineering and other shortage subjects. That amounted to £43 million over the next three years to increase the number of graduates, and postgraduates particularly, in electronic engineering, applied physics, materials science and computer science. Why has a university such as Brunel, which leads the country in these sciences, not yet been allocated one of the additional 4,000 places?

As I understand it, the intake to selected courses has reflected the value to industry and the degree of industrial commitment secured. Will my right hon. Friend tell the House a little more about how the value to industry is assessed? That leads me to ask what steps he and his colleagues can take to match the requirements of the traditional British industries, which in the past have provided a great deal of employment — the so-called heavy or metal-bashing industries — with the ability of the technological universities to produce the graduates to enable the industries to survive, expand and prosper. Surely industry must say clearly what it needs, and the universities must provide the graduates.

Why is it that in half a dozen areas of technology, which I could mention, the expertise which makes our universities world famous is now being deployed by foreign manufacturers who export their products to Britain, or the industries which should benefit from it are in decline or defunct?

Belfast university is world famous for its expertise in the small internal combustion engine, but is it being used to build Britain's motor cycles and motor car industry, or to assist foreign manufacturers who export their products to Britain?

I am told that Loughborough university is a leader for the textile industry. How much of its expertise is used to improve our textile industry? Brunel university is a leader in ship's strength and offshore construction, but why is it that Korea and Japan are the major shipbuilders, and offshore construction takes place mainly abroad? Where are the industrial scholarships to support those areas? We must concentrate on that.

I am not an expert in ships' strength, but many people at the universities with which I am familiar are. At Brunel there are fee-paying Chinese, Japanese and Turkish students who are anxious to obtain the best expertise in Britain and all that it has to offer. I wonder whether British Shipbuilders takes the same keen interest, and what the extent of its sponsorship is. It may be already satisfactory, but if we are looking for industrial sponsorship in and support of the technological universities, more must be done.

Why does Britain have to import steel? I believe that we must even import steel to build our submarines. Is our steel not of the right quality? Does British Steel put cash into the metallurgy departments of the British technological universities to ensure that it gets the graduates that it needs for the future? I hope so, because I have a high regard for British Steel and its recent achievements. Can my right hon. Friend say how the requirements of the steel industry, for example, are made known to the universities, how we get the follow-through and the funding, and how we ensure that the universities provide the sort of graduates that such an industry needs?

Paragraph 1.6 of the Green Paper discusses the importance of developing links with industry and commerce, and of industrial contracts. That is important, but the House knows that research costs about 10 times less than development. Consequently, it is important for universities to resist the temptation to go for development too soon and to remember that research is the primary consideration.

I am glad that the Green Paper refers to the well-established principle of sandwich education. My experience of seeing it in action has demonstrated that it can enable small technical universities to vie with our most famous and historic universities. If the House were to judge its success, hon. Members may well ask how it is that the last of the colleges of advanced technology vie with, for example, Cambridge. The answer is the success of the sandwich course.

I now come to the important question of future resources for higher education. A 2 per cent. cut over three years means less cash in real terms. Does that include pay settlements? Are they to be settled by the Government or, as in the past, on the basis of agreement with the unions?

If, as I assume, it is the latter, an additional £500,000 a year may have to come from the funds of the small technological universities. That worries me. In addition to the effects on graduates and academic staff it could mean fewer jobs. As the academics have tenure, it could mean fewer lab technicians and supporting staff, which is also worrying.

I also worry about the vexed question of academic tenure. I know that the Government intend to introduce legislation to limit it. Can my right hon. Friend say whether they also intend to introduce Government-funded compensation schemes for those with tenure who may decide to leave in future or who may leave as a result of the changes foreshadowed in the Green Paper?

Sir Keith Joseph: I wish to clarify that point before it becomes widely spread and misunderstood. The Government's proposal to legislate to remove tenure is for future contracts, not for those whose contracts already give them tenure.

Mr. Shersby: I understand that, and it is clear that that is the case from the Green Paper. However, I was thinking of those who already have tenure but who may suffer if they decide to leave in the future, and I was wondering whether the Government were considering a compensation scheme for them.

I now turn to the adjustment in higher education, to which paragraph 1.13 refers, and which could lead to a closing or merging of some institutions of higher education during the next 10 years. What will be the criteria for closures or mergers? Will they be based on size, on numbers or on a judgment by the Secretary of State of the day whether a particular university is contributing adequately to

"the improvement of the performance of the economy"?

One sometimes gets the impression that the Department of Education and Science and the University Grants Committee have different assumptions and make different statements. Through the Green Paper, the DES makes many statements that are good for the technological universities, but the UGC administers the resources. How then are the choices to be made? Brunel university, for example, makes money by turning out the right product in terms of its graduates, but the system throws all

[Mr. Shersby]

universities into the same pool and considers them together, although there are enormous variations in character and what they produce. Does a technological university follow the DES and what it says, or the UGC? That presents a difficulty, because the UGC is the paymaster.

Dr. Keith Hampson (Leeds, North-West): My hon. Friend keeps referring to universities in this context. I remind him that the Green Paper talks of some institutions of higher education, and does not say that some universities will have to close or merge. Will he press our right hon. Friend to make the matter absolutely clear, and ascertain whether our right hon. Friend is thinking about the future of colleges of higher education rather than the closure of universities?

Mr. Shersby: I am sure that our right hon. Friend has taken account of that point and that he will enlighten the House on it when he replies.

I trust that the question of closures or mergers is unthinkable for the technological universities that are producing good graduates and meeting the needs of industry. Will my right hon. Friend think about the example which is being set by the French, who are planning greatly to multiply the more technological universities, such as that at Compiégne, which is well known? How does one use the same yardstick, for example, for Edinburgh and for a university such as Brunel, when the two institutions are different in character but are both fine universities? Do we need a different yardstick for technological universities?

I welcome the paragraph in the Green Paper about the arts. I am glad that the Government are convinced of the importance of providing adequately for the arts. That is to be greatly welcomed. The arts contribute valuably to our society, and the events of the past week in Brussels demonstrate only too clearly how necessary and valuable it is for us to have higher education which helps to produce a decent and civilised society.

I consider this to be a thought-provoking Green Paper which, despite its shortcomings, poses many of the real questions that have to be faced in higher education in the next decade. It also contains some solid, good horse sense. The Government have to reconcile efficiency in the use of resources with improvement in the quality of higher education, while at the same time assuring the future of the universities and those who work in them. I want to see increased private funding of research and good use of public funds. I want to see dedicated members of the teaching staff receiving proper financial rewards for their work. The future of our young people is in their hands.

Dr. Jeremy Bray (Motherwell, South): Will the hon. Gentleman give way?

Mr. Shersby: No, if the hon. Gentleman will forgive me. I am just coming to the end of my speech.

The teaching staff must feel that the country has confidence in them, and they have a crucial role to play in advancing the national interest. I want to see the best brains available to higher education. I believe that that can be achieved by a combination of proper rewards, based on merit, coupled with the efficient use of public funds and the encouragement and sponsorship of the private sector.

8.21 pm

Mr. Sean Hughes (Knowsley, South): The hon. Member for Uxbridge (Mr. Shersby) referred to the events in Brussels last week. Many people may consider that in the midst of our post-mortems on that disaster, and the day after the deep controversy over the Green Paper on social services, a debate on higher education is somewhat less urgent, but it is part and parcel of the same thing. It is about the sort of society that we wish to see developed, and it is also about whether we are serious in wishing to eradicate the abuses to which we can point today.

What we saw on the terraces in Brussels—admittedly in a more concentrated and brutal form—was the result of a society which is breaking down in various parts of the land. That is relevant to the debate. When whole areas of the country and whole sections of the population are written off with their potential unfulfilled, the price that we pay—and will pay in the future—is a heavy one.

References have already been made—and will no doubt be made throughout the debate—to the principle enunciated in the Robbins report. I believe that the way that the principle was translated into practice was not good enough. The fact that the recent Green Paper on higher education goes back even on that practice must not allow us to start applauding our present system of higher education as some sort of ideal, because it is far from it. The Secretary of State was forced by some of my hon. Friends to refer to access. It is apparently inappropriate in our present system for the vast majority of our people to experience higher education. The fact that that has always been so is no defence. The fact that our education system is so constructed as to produce that gross imbalance is no excuse.

Robbins outlined five goals for higher education, the fifth of which was the transmission of a common culture and common standards of citizenship — apparently something that the Secretary of State would support. That has never been achieved. Indeed, I would argue that today we are as far away from its realisation as we were 20 years ago.

Therefore, the first fact that we must accept is that our education system is inherently privileged, and the worst manifestation of that privilege is in higher education. In the Robbins report it was demonstrated that, of children born in 1940-41, 33 per cent. of those with parents in higher professional occupations went to university, while only 1 per cent. of those with semi-skilled or unskilled parets went to university. In the meantime, we may have changed the social categories but, according to the UCCA report in 1983, 23·5 per cent. of those with parents in the professions and 48·4 per cent. of those with parents in what were termed intermediate occupations went to university, while still only 1·1 per cent. of those whoe parents were unskilled went to university.

Where are the minority concentrated? Inevitably, they are concentrated in the most deprived areas of the country, those with the worst environment, the worst housing and the worst schools. I simply do not accept that there is some immutable law of nature which has decreed that it is inappropriate for people in areas such as my constituency to go on to higher education.

I will give the House one example of the regional variation. Less than 9 per cent. of 18 and 19-year-olds in the county of Merseyside entered university in 1983-84 compared with more than 14 per cent. in counties such as

Surrey. But even that does not tell the whole story, for within a county such as Merseyside there are gross disparities. In the more prosperous Wirral, 14·4 per cent. of the 18 and 19-year-olds entered university in 1983-84, while in devastated Knowsley only 4·4 per cent. entered university. That is the reality that the Green Paper ignores.

In a BBC radio interview, the Prime Minister described her dream of a society without class distinction. She said:

"I do not care what people's background is, where they come from. I want them to have the same opportunities."

The Government have a funny way of going about it.

It was the late Tony Crosland who said:

"the closest correlation in England so far as accent, social manners and style of life are concerned is with education. This interacting triad at the top of the social scale of education, style of life and occupational status is unquestionably a more important source of social inequality than income."

Mr. Patrick Thompson (Norwich, North): The hon. Gentleman is making a very interesting criticism of the education system of the past, particularly higher education, and there may be a lot of truth in what he says. But will he accept that he is therefore making the case for the Government, as we are trying to bring about change and improvement? Does he accept that the Opposition are trying to defend the status quo?

Mr. Hughes: Obviously the hon. Gentleman missed my introductory comments, when I said that I did not accept that the present position was good enough, and by implication I wanted to improve it. My argument is that the Green Paper will exacerbate the situation, far from making it better.

If Crosland was correct—I believe that he was—we have to expose the hypocrisy of those who say that we have a common culture and then deny the majority the opportunity to develop their cultural appreciation.

If the Prime Minister was serious in what she said, the Green Paper on higher education, in the form it has taken, would not have seen the light of day, because the Government have effectively declared their intention to do nothing to offset the gross imbalance of intake into higher education. Indeed, the Government are to compound the felony. Instead of the Robbins principle that a place at college or university should be available for those able to benefit from it — even though in reality that did not happen — the Government have added that the benefit has to be sufficient to justify the cost, as my hon. Friend the Member for Durham, North (Mr. Radice) emphasised.

As the 20th century draws to an end, after a decade of expanding educational development, the Government should now be addressing themselves to making some radical changes to benefit the community as a whole, rather than the privileged, and the proposals in the Green Paper will cut back most on those who are already most deprived. The Green Paper on higher education displays once again the short-term nature of Government policies, and it must be considered alongside the "Better Schools" White Paper and that on training for jobs. All of them are characterised by an appalling ignorance of what life is really like in the most deprived parts of this country. The Green Paper is a very timid document which fails to recognise the enormity of the problem. It exposes the Prime Minister's contemplations of a classless society as being no more than that—contemplations. Therefore, I urge Conservative Members who recognise that fact to join us in the Lobby and to support the motion.

8.30 pm

Dr. Brian Mawhinney (Peterborough): I, too, should start by declaring an interest, not only as one who was trained in our university system but as one who has spent most of his working life as an academic staff member of universities, mainly in this country. I am still a member of the board of studies of radiation biology of the university of London. This week my son started his A-levels in the hope of attending university next autumn.

I give two welcomes to the Green Paper. I welcome also the speech of my right hon. Friend the Secretary of State for Education and Science. I welcome his reaffirmation of the commitment of our party and our Government to the importance of universities both for the pursuit of pure knowledge, scholarship and training as well as for the application of that knowledge and the excellence of those who have been trained. Perhaps it needs to be explicitly said in a debate such as this that while we debate the future of our univerity system—there are legitimate differences of view about its future — we ought not to blind ourselves to the fact that this country has one of the best university systems in the world, a fact of which we ought to be proud. It stems in large part from the contribution that academic teachers, researchers and ancillary staff have made to that system over many decades. I say that as somebody who throughout his university career was a member of the Association of University Teachers and who is now a life-long member of the association.

It is important to talk about change, and the insecurity that change brings, against a positive background. We have to recognise that most of those who work in universities are good at their jobs and are dedicated workers.

My second welcome relates not just to the relative increase in numbers which will be available in the next decade because, as my right hon. Friend has pointed out, the projected decrease in places is much less than the projected decrease of those who are deemed to be eligible. I welcome also the greater flexibility in the admissions policy of universities which is proposed. Over the years, but particularly in recent years, there has been an acceleration in the O-level and A-level standards required of university entrants, yet most of us know that there is very little, if any, correlation between a pupil's performance in O-level and A-level examinations and his subsequent performance at university. I say that as somebody who has published academic papers on this subject, based on the findings of my own medical school. Therefore, the Green Paper's commitment to greater flexibility in university entrance requirements than simply ever-increasing O-level and A-level standards is to be welcomed.

I wish to concentrate upon one aspect of university life —management and decision-making. Academic departments were established originally as a vehicle for teaching and also as a means for protecting academic standards. In a bygone era it was necessary for professors to exercise a degree of autocracy in order not just to protect their departments but to protect their subjects. Academic tenure grew up in this context. Universities are being forced to reconsider their structure. For many of them it is a difficult process. There is no precedent for it. They have not been required by change over the years to develop management and decision-making systems which are responsive to the needs of a changing world. During the last few years I have

[Dr. Brian Mawhinney]

sat on senior committees within universities which have sought to balance the budget. Our systems are somewhat archaic. Time is not on the side of universities which are unwilling to change their systems. My right hon. Friend will need to provide not financial but advisory help to universities to help them through this difficult transitional period.

My right hon. Friend knows that teaching and research tend for the most part to be centred in academic departments. That is important from a teaching point of view, not least because it safeguards the standards of the subjects being taught in those departments. However, one of the consequences is that those who are in teaching departments are expected to carry out their research within those departments. In many cases there is a fragmentation of research endeavour. This is not a good use of resources. Too many people in our universities are carrying out what is almost solitary research. If resources are limited—we all agree that they are limited, wherever the limit may be drawn — we have to ask ourselves how best we can generate useful research, using the money that is available. Because of the nature of research one cannot say that a piece of work should not be done, because it might result in something that will be useful. One has to talk about probabilities.

When considering his response to the Green Paper I hope that my right hon. Friend will ask himself whether it is still sensible for academic members of staff to be assigned to one single department which covers both teaching and research, or whether they should be assigned to one department for teaching and become a different configuration of people for the purpose of carrying out research.

In that context it is important for universities to understand better than they do now the importance of good teaching. Too much emphasis is still placed in our universities upon research papers which have already been written and published. Too many of my erstwhile colleagues—I refer not to the medical school but to the whole profession—regard students as people who get in the way of a good day's research. That attitude must change not only for the sake of the universities and students, but, as my right hon. Friend has pointed out, for the sake of the country. I know that my right hon. Friend the Secretary of State agrees with my hon. Friend the Member for Uxbridge (Mr. Shersby) who said that good decision making in universities means that they must be given as much information as possible as early as possible. I have had to practise that art in recent years. Therefore I know that it is difficult to make coherent, long-term planning decisions when one does not know what the framework will be. I am not being critical of my Government any more than I am being critical of the previous Government under which I had to operate in the same circumstances.

Finally, I welcome the review of the role of the University Grants Committee. It is overdue. There is a feeling among academics in particular that the role of the UGC has changed in recent years. It needs to be thought through again and redefined. However, I am sorry that the research councils are not to be included in that review. I say that as a person who served on the Medical Research Council for three years, while a Member of the House.

Research councils and the UGC are now inextricably bound together. The administration of the research councils is very powerful. Sometimes, questions need to be raised about the balance that is struck in them between pursuing fundamental research that is of itself important and research into problems that are of national concern but that are not always treated with the respect that they deserve within the councils.

Change is seldom a comfortable or pleasant experience. If we are to have change — my right hon. Friend is right to say that we must have it—it needs to be carried out with support not only from the Government but from the House for the university structure and for the teaching staff who are being required to change within it.

Change there needs to be, not least in the universities' ability to be more flexible in the changing world in which they operate and for which they are training their undergraduates. The Green Paper rightly focuses our attention on that change. I see an important part of that change being a much more detailed review of the existing decision-making processes within universities. I hope that my right hon. Friend will give thought to that as he considers the responses to the Green Paper.

8.42 pm

Mr. Gordon Wilson (Dundee, East): The arrangements for higher education in Scotland are deeply unsatisfactory, and I am sorry to say that the Green Paper does not help to resolve the Scottish dilemma. Universities in Scotland, unlike the central institutions that are under the control of the Secretary of State for Scotland, are under the charge of the Secretary of State for Education and Science and, through him, the UGC. None of the Ministers in the Department of Education and Science is conversant with the Scottish educational system. It is interesting that the Minister responsible for education in the Scottish Office, who is present, is not to wind up, even though he has a distinct interest in the higher education system in my country.

The UGC circular of November 1983 was unhappy in its intentions when it gave universities a choice between self-multilation or starvation of resources. There is something even more offensive in it. Paragraph 6 says:

"Parts of this letter refer primarily to the situation in England and Wales. We would ask readers concerned with the different systems in Scotland and Northern Ireland to make the appropriate adjustments."

That is the sort of thing that those of us who are Scottish lawyers object to when the legal system of Scotland is amended as if it were an appendage to the English system. It does not work, and it causes distortion in the system.

The contempt that was first apparent in the UGC circular is extended by the Green Paper, which, although it is aware of the continuing review of the Scottish Tertiary Education Advisory Council, is unwilling to await the report. It directs that the council should follow the Green Paper. The Green Paper purports to deal with Scottish higher education, but its Scottish content is limited to some five paragraphs. Lip service is paid to the Scottish system and, to paraphrase the late Henry Ford, the Government obviously take the view that Scotland can have any kind of educational policy that it wishes so long as it is of English origin.

The Secretary of State is so notably interested in the Scottish education system that he has now left the Chamber. I point out to him that the Green Paper is deeply

offensive to anyone interested in education. It is also full of alarming statements. In paragraph 1.2, it asserts correctly—the Secretary of State has just admitted that — that the economic performance of the United Kingdom has been disappointing, and it then goes on to call for more technologists and engineers.

I agree that, for the functioning of a modern economy, we need experts in technology and the sciences to be available when required. However, it is not true that simply because one trains these people the economy will grow. In the 1950s, the university of Glasgow found that 80 per cent. of its technical graduates emigrated either to other parts of the United Kingdom or abroad. Therefore, while Scotland trained these people, its economy did not benefit because there were no jobs for the graduates. The Government should take on board the point that although there are advantages to the economy in training technologists, equally without an expanding economy the opportunities to use those experts will not be available.

Today I received an answer from the Department of Employment which showed that in the period between 1974-84, unemployment in the United Kingdom went up by 456 per cent., while in the European community countries it went up by 310 per cent. and in the OECD countries by 178 per cent. That underlines what has been said in the debate.

Strangely enough, the Green Paper is entitled, "The Development of Higher Education into the 1990s", but as we have heard, over the next 10 years it is reckoned that there may be cuts in funding of 2 per cent. a year. That is an impossible burden to place on higher education institutions. It was interesting that, although the Labour party spokesman skated round it, he did not give an explicit assurance that the Labour party in Government would restore the previous level of funding for higher education. In that, he was echoing the remarks made by the leader of the Labour party a few years ago when he was spokesman on education matters.

The committee of vice-chancellors and principals made it clear in the document that it sent me that it has found that business cannot make up the difference in funding for core education and research that is not necessarily pertinent to its business affairs. The Government are ambivalent about where they are going with the funding of universities. Will they keep to the system that we have had in the United Kingdom or are they trying to bring in the American system in which far greater aid is available from the business sector?

Leaving aside the fact that, until recently, the business sector has been in considerable cash difficulties, we should point out that if the Government wish to encourage private donations or business donations to the universities and central institutions, they must give tax concessions equivalent to those available in other countries. I prefer funding to come directly from central Government rather than to be parcelled out in that manner.

It is difficult for universities and institutions—here I declare an interest as the rector of the university of Dundee and a member of the court in that capacity—to finance replacement of equipment. The university tries to do this for its main sectors of vocational and technological education. For the university to make good and bring up to date the equipment is virtually impossible on the funding currently provided by the UGC.

Even in revenue matters such as the funding of the library, although the university had just been granted considerable funds for a new library, it is finding difficulty in meeting the costs of stocking the library with publications. The prices of periodicals have increased substantially, well above the rate of inflation in recent years, yet the finance being made available for them has not. The university is now considering what periodicals ought to be cut out as a consequence of the cuts that have been made.

There is also the question of non-replacement when vacancies occur. That university like others is now having to consider the 2 per cent. cut which it is expecting in the first financial year. When a vacancy arose on the departure of a professor in the department of mechanical engineering —incidentally, one of the areas that are supposed to be expanded—the first response of the university was to considering closing the department to save money, whereas normally the intention would have been to strengthen it because students wish to get in to study engineering. I do not share the pessimism which was expressed recently in that regard.

The hon. Member for Peterborough (Dr. Mawhinney) made a very good point when he spoke of the problems that the universities face by having to refuse applicants on the basis of their higher grade examination qualifications because of shortage of places so that they go for those with the best academic performance at school. That does not necessarily produce the best graduates. Even disallowing the experience of the hon. Gentleman, who has such expertise in the matter, it prevents the entry of students who in my day would just have walked into university on certain qualifications and could have produced a good honours degree. They no longer get the opportunity of entry because they are deprived of access by their peer group.

The Parliamentary Under-Secretary of State for Scotland (Mr. Allan Stewart): Will the hon. Gentleman concede that in Scotland not only is the total number of students in higher education at a record level but so is the age participation ratio?

Mr. Wilson: I am willing to concede that the central institutions play a part in that. Many students prefer to go to central institutions because they give a good education, but some who would have preferred to go to university no longer get in. Indeed, even though the numbers have increased, there is the effect, particularly in the last few years in which the birth rate has been so substantial and the bulge has come through, that some have failed to get into educational establishments altogether. I think that the Minister will agree that that is highly undesirable.

Next there is a difficulty in relation to teaching, and again I congratulate the hon. Member for Peterborough on his observations. If staff ratios worsen and it becomes increasingly necessary for staff to produce research papers in order to justify their existence, the amount of effort and attention that goes to teaching may decline. When I was a student at university, I took the view that the universities were there primarily for teaching and not for the purpose of research. Since then, I have had to amend my views a little in that respect. However, I think that the stage has been reached where research has become much more important to the universities than is the teaching of students.

With respect to numbers and the exchange that I had with the Minister with responsibility for Scottish

[Mr. Wilson]

education, I received information the other day that the Edinburgh group of the Royal Statistical Society was told on 14 May that major changes are to be made to the Scottish Education Department's statistical model which will likely show higher estimates of demand. It has not been possible for me to table a question to flush out exactly what those changes will be, but I hope that the Secretary of State in summing up may be able, from information supplied by his hon. Friend, to tell the House what changes in projection of demand there will be as a consequence of that review.

In summary, Scotland generally speaking has no confidence now in the UGC. In relation to the closure of the pharmacy department at the Heriot-Watt university, it proved itself ignorant and uncaring in relation to Scottish needs. The whole education system in Scotland is different. It cannot be governed in the same way as the English system. It requires different solutions. We know that the report of the Scottish Tertiary Education Advisory Council — STEAC — is due. The Green Paper is in a sense in limbo in relation to what will happen to Scotland thereafter.

I should like to urge on the Secretary of State and the Minister with responsibility for Scottish education the need to set up two bodies in Scotland — first, an independent UGC with proper interfacing with the research councils; and secondly, a body which is representative of the universities, the central institutions and all parts of higher education, with these bodies being responsible to the Scottish Office which, it is hoped, understands the whole pattern of education in Scotland. Until that is done, we will have disparate control, and higher education in Scotland will remain what it has been for the last few years, a decapitated rump without an ability to plan for itself the future which will obviously be difficult in view of the funding restrictions that the Government are predicting.

Mr. Deputy Speaker (Mr. Ernest Armstrong): The Front Bench spokesman hopes to catch my eye at half past 9. Most speeches have been commendably brief, but I hope that those of other hon. Members will be even briefer.

8.56 pm

Mrs. Angela Rumbold (Mitcham and Morden): My credentials for participating in the debate differ slightly perhaps from those of other hon. Members since I have been a governor of one of 29 polytechnics, and, I think, can claim to be one of the founder members of the National Advisory Body. That is the basis on which I wish to declare my interest.

I welcome this opportunity — although not the Opposition motion—to discuss the Green Paper on the development of higher education. It brings to all hon. Members a welcome opportunity to put their points of view.

I spent some time reading the paper carefully. I realise that it contains too much for comment on each section. I should therefore like to confine myself to three areas. The first, and most important in my view, relates to the second section of the paper which develops the thinking on the place of higher education in the economy and subject balance in our future. Although later in the paper there is mention of what has happened to mankind in the last few decades, I think that insufficient emphasis is placed on the phenomenon that now faces us. It seems to me that progress defined as the increase in the ability to replace new techniques by new machinery and advanced scientific application to almost every aspect of our daily lives has had a traumatic effect on how the individual fits into our society. Let me explain that.

During the past 50 years medicine has advanced dramatically so that life is, happily, extended well beyond the expectations of the majority, and certainly for the less well off matched against their counterparts of 100 years ago. Similarly, our everyday life is wholly different. Machinery has been developed that transports us long distances in a relatively short time. It has changed the whole domestic scene, bringing up women from the slower processes of home making and altering for both men and women the management of leisure.

At work, technology has made redundant many of the time-honoured skills and the general pace of life demands constant change and adaptability by the human being.

It will no doubt be said that society has experienced all those changes in the past, and indeed it has, but I am not certain that the change has been so rapid that it spans only half the life expectancy of men and women so that each person can see evolution speeded up at a rate as yet unknown.

The reason why I have spent these few moments on that is that I believe in looking at the future of higher education, and it is imperative that that factor is taken into account. Thus the whole theme of production of qualified manpower should be geared to an understanding that a qualification at 21 may be quite useless at 40.

The heavy reliance placed upon higher education in the Green Paper as a basis for the innovator and the entrepreneur strikes me as a little false. Although I can understand that many good graduates may well turn out to have these skills, it is not a prerequisite of the entrepreneur that he should have first been through the educational hierarchical route. Furthermore, emphasis is placed also on the employer wanting graduates with special skills relating to the expertise of industry and commerce. I believe that that is not necessarily always the case. Most employers look for manpower that is capable of being trained and adapted to the special needs of the individual or company concerned. That is something that we should think about as a philosophical point.

I come now to those who enter higher education and express concern at the lack of good teachers in both mathematics and sciences. That is undoubtedly true, and it is even more true that girls are more quickly disposed to abandon mathematics and science earlier than boys. Two matters need to be stated now. Children lose motivation for subjects at a much earlier stage than is generally recognised. I guess that between the ages of seven and eight it is possible to switch a young child off both mathematics and science. The importance of good teaching of those subjects needs to be considered well before secondary school begins.

Secondly, while the objective of a broad curriculum is highly desirable, we must begin to accept that if we are seriously looking for a body of highly skilled academics for the 1990s, we must start some process of weeding out the bright children throughout the spectrum of our school system, rather than allowing so many potentially bright

children to remain undiscovered. The hon. Member for Knowsley, South (Mr. Hughes) highlighted that point rather well.

It is hardly surprising that we cannot attract enlightened teachers into schools where the discipline is non-existent and the facility for seeing the fruits of one's teaching through the successes of one's pupils is constantly denied, especially when other factors such as pay and the general esteem of society for teachers are at their lowest ebb.

While words that suggest that the country needs more able scientists, more engineers, technologists and employers should be the ones to inspire the youngsters, I frankly think that we are not looking at the problem with any real hope of solving it. That hope lies in the abandonment of half-witted political dogma and the realisation that the raw material exists but needs to be discovered early enough and then cultivated in the right atmosphere much more ruthlessly than this country has acknowledged for the past 30 years. If we grab that nettle, perhaps some employers in future will show an interest in the processes of our schools and universities.

Following through my theory that education will have to respond to change at least twice for individuals during their lifetimes, the plans for the pursuit of mature education in the Green Paper and the career vocational study are much to be welcomed. In particular, like my hon. Friend the Member for Uxbridge (Mr. Shersby), I am pleased to note that sandwich education is to be looked at once again. It has always appeared to me that the argument that it was not cost-effective was simply a management problem, not an education problem. I believe that educationally there are bound to be students who benefit enormously from that type of higher education course.

I also welcome the enthusiasm shown for distance learning. Undoubtedly it is one of the advances that we can encourage with modern technology. It is relatively cheap as a method of updating, reproducing and overhauling the knowledge that students have acquired throughout their working lives.

The last area of interest that I single out for mention touches on the management of the institutions. Obviously, as my right hon. Friend said, the Government are taking note of the Jarratt report which has outlined proposals for change in the planning and management structures of universities. Rightly, the idea of stated objectives and structures to enable management decisions about allocation of resources has been outlined.

Speaking from quite a bit of experience in management on the other side of the binary line in local authority higher education institutions and, in particular the polytechnics, I observe that it is not before time. However, I stress that as with any other organisation the most important task for those who have the interest of managing public money and how it is spent, whether it be in schools, universities, polytechnics, or colleges of further education,is to ensure that the top management is of the highest calibre.

Vice-chancellors, polytechnic directors and heads of colleges need to be men and women with a range of academic and management skills that enable them to identify readily the needs of the institution. Whether it be on management of money or the planning of courses in conjunction with the rest of the country, it is their judgment that will affect the quality of staff and the final outcome of the student intake. With leadership of the highest order there should be coupled experience and a broad spectrum of people on the governing bodies who can make decisions and judgments about quality and quantity and at the same time can be relied upon to exercise effective controls on both capital and revenue expenditure in the same way as a board of directors holds responsibility for the same areas in any business.

For the better health of all institutions at this level of higher education, I welcome the consideration of the present system of tenure. It seems to be an admirable idea to link tenure with other institutional experience. Men or women on loan from commerce and industry both here and abroad will enable much wider spectrums to be seen. Certainly it is high time that the younger men and women coming through the universities should be given the hope of promotion and an understanding that a breakthrough either in research or production will be recognised not merely by academic acclaim, important though that is, and not in any way decided, but by the possibility of sponsored professional chairs for the front runner to encourage others to follow.

Whatever be the broad thrust of the Green Paper, the simple message that I would add to it is that if the United Kingdom wishes to compete with the world in any respect it must recognise and encourage excellence in a way that has been positively discouraged for far too long, especially in our schools and universities, and all too often for entirely the wrong reasons. Let us remedy that error and perhaps the future will look much brighter and more positive to the youth of tomorrow.

9.8 pm

Dr. John Marek (Wrexham): What I say will be concerned mainly with universities. Lest any of us on these Benches are accused of dwelling too much on universiy education, I stress that we are mindful that higher education consists of both sectors. Many of us want to see the binary system abolished, but that is another matter. Equally, it is not sufficient for the Secretary of State to say, after five or six years in office, that he is thinking about mature entry into higher education. Continuing education and adult education should have been dealt with many years ago, but again I have no time to talk at length on those important topics.

The debate has been very interesting. Conservative Members have introduced some useful points but they have been talking about the subject as from a distance, without knowing what was going on at ground level and what disillusion is being felt by teachers and researchers in higher education. *[Interruption.]* If Conservative Members raise their voices in amazement, they are not just ignorant: they are showing their ignorance. I do not want to accuse Conservative Members of being ignorant but such sedentary interventions only confirm what I suspect to be the case. It would be a great deal better——

Mrs. Elaine Kellett-Bowman: The Opposition do not give way to non-sedentary interventions.

Dr. Marek: If the hon. Lady wishes to intervene, I shall give way.

Mr. Deputy Speaker: Order. This only delays the speech that is being made and prevents other hon. Members from speaking.

Dr. Marek: This is an important matter because the Secretary of State has said that he needs to spend public money sensibly. It is difficult to take exception to that statement, but what does he mean by spending public

[Dr. Marek]

money sensibly? It has been said that we need to spend money so that industry can immediately take advantage of research. Hon. Members have asked where the money is to come from. That is another way of trying to cover up what is happening within the higher education sector.

Money must be found, because if it is not found for higher education and adequate research, this and the next generation may not pay for that failure but following generations will pay dearly. Some research is immediately applicable to industry. Other research may be applicable later. The hon. Member for Peterborough (Dr. Mawhinney) may have got near to the point but not many other Conservative Members did. We do not know whether some research will be applicable. Nevertheless, such research is highly valued by almost every other country and it should be valued by this country if we are to remain in the forefront as an industrial nation.

The Association of University Teachers sent me a copy of a letter from the Prime Minister dated 7 June 1983, just before polling day, when she was a candidate for Finchley. I dare say that other hon. Members had a copy of this letter.

Mr. Allan Rogers (Rhondda): It is not worth the paper that it is written on.

Dr. Marek: It may not be worth the paper that it is written on, but I shall quote it. It is addressed to Mr. Hennessy, who is a regional official of the AUT. Its title is:

"Funding for the university sector in general and those institutions in the London area"

The Prime Minister states:

"After decades of expansion, there has been scope for the elimination of waste and more effective use of resources both in universities and in polytechnics and colleges. Given this fact, and the general need to contain public spending, the Government decided in 1981 that, (in addition to removing indiscriminate subsidies for overseas students)"—

how shortsighted that is. If Conservative Members looked at the graphs of overseas students in the United States, France and Germany and saw how they have increased, could they say that all those countries are wrong and that this country is the only one that is right? Not on their life. We are the only country that is wrong. We shall pay for that dearly when those students who should have been studying in this country order all their equipment and goods from other countries once they have graduated.

The letter continues:

"spending on higher education over both sectors should be reduced by about 8½ per cent. in real terms over three years."

The Prime Minister then says:

"But the period of contraction is now nearing the end. In 1983/84, we are spending £2·75 billion on higher education; and the intention"—

I hope that hon. Members will listen to this clearly—

"is to hold the level steady in real terms after 1984/85."

My right hon. Friend the Leader of the Opposition called the Prime Minister a twister. I should like to ask the Secretary of State whether she is a twister. What has happened? Why is there a change? Why do we have the Green Paper when I have a letter, which is ostensibly a copy of a genuine article, that says:

"the intention is to hold the level steady in real terms after 1984-85"?

What is happening? Can it be that the economy is not what the right hon. Lady thought in 1983 it would be? I would not be surprised if that is so, because the more the Government cut, the more people are thrown on the dole, the less the Government have in taxation revenue and the more the Government have to cut. That has happened ever since the Conservative party took office.

If that is not the explanation, and the economy is buoyant, as the Chancellor tells us, why was that letter written in that form, saying that there would be constant funding after 1984-85? Why has the University Grants Committee written to the universities saying that they should budget for cuts of 2 per cent. until the end of the decade? I do not understand what is happening, and I should be grateful to the Secretary of State if he told us what is happening.

In point 2 of the letter, the Prime Minister referred to

"increasing access to university courses for those living in the London area".

The tenor of her argument was that access for those students would be increased. I hope that the Government stand by their commitment. They have patently not stood by that commitment during the past two years. Many students who could have gone to universities in London and elsewhere have not been able to do so. They may have managed to get into courses elsewhere in higher education, but they have been denied access to the universities.

The Government have produced various figures showing that student numbers will decline. That prediction has been made not for just the next few years but for the next decade and a half. With what certainty do the Government think that they are right? It is possible that, in 10 years, there might be a higher take-up of adult education places. If so, the Government should budget and ensure that there is a provision for those future students.

Sir Keith Joseph *indicated assent.*

Dr. Marek: The Secretary of State nods his head. I welcome that agreement. I hope that he will say something about this matter, because there is dismay throughout the higher education sector about the cuts that have taken place.

Instead of carrying out research and giving proper attention to teaching, many university teachers wonder whether they will be able to keep their jobs — and, indeed, whether there will be jobs in two or three years. There is much to be said for an interchange of academics and mobility between universities, but those jobs may be temporary and without security of tenure. What will the Government do about that?

Academics wonder, even if they do not move, whether they will keep their jobs. Their salaries have been eroded. I am not saying that their salaries are too high or are inadequate. In April 1979, the maximum salary of a university lecturer was 98·5 per cent. of the maximum salary of a principal in the Civil Service. By April 1984 that percentage had fallen to 87 per cent. I have not checked whether those figures are accurate. Civil servants are also not happy with their wage increases. The average earnings of university teachers have fallen by 36·5 per cent.

We cannot run a country with research and teaching in higher education, which is vital to our continuing prosperity if there is continual unhappiness about levels of salary, conditions of work, the moral benefits of having a job and the lack of pride in not having a job. I wish that

I could get that point across to the Government. We are creating this problem not just in higher education but throughout society.

Will the Government pursue a policy which, in two or three years, will cause those who work in higher education to take pride in their jobs and to say, "We are doing a good job, and we are happy with it."? At the moment, they have failed to do that. If they do not manage to do that, not this generation or the next one, but succeeding generations will pay dearly for the short-sighted policy set out in the Green Paper.

9.19 pm

Mr. Robert Key (Salisbury): In a debate on such an important subject as higher education, we must not neglect historical or international perspectives. The roots of our education spring from our language, which continues to give us influence in the world, and from our culture which continues to make a considerable contribution to civilisation. Together, they produce the branches of education, arts, science and technology which we can give to the world. The education that we export to other countries either directly, or indirectly by accepting overseas students at our institutions of higher and further education, not only promotes our cultural influence, but creates markets overseas.

Mrs. Kellett-Bowman: And good will.

Mr. Key: Yes, and good will. Students familiar with British products and equipment, and with British ways of doing things, will become leaders and opinion-formers who will buy British and create jobs here.

There are at least three groups in British society that are outstandingly internationalist. The first are the exporters of the industrial and commercial community. The second is the cultural community, and the third is the academic community. They are all interrelated, and they all win friends for Britain. Indeed, British business men seeking to penetrate overseas markets have problems with the British Overseas Trade Board and the Export Credits Guarantee Department, because they are constantly helped less than their competitors inside and outside the European Community. While many exporters give fulsome praise to the work of embassies and consulates in their commercial support, they also pay tribute to the pro-British climate that has been created by British education, whether acquired in Britain or overseas, and by the work of the British Council.

There is much misunderstanding about the work of the British Council. Only 13 per cent. of its activities are concerned exclusively with the arts. Most of its work is about people, notably students, teaching and libraries, but also about official visitors to Britain. I should stress that it is not the English Council; it is the British Council, and it should include more activities, for instance, in Wales and Scotland.

Recently, the British Council's Government grant has been cut by more than 20 per cent. Consequently, English language teaching has been cut, British Council libraries have less money, and academic and youth exchanges have been reduced. But there is a plus factor. The British Council has increased its revenue considerably and has started some imaginative schemes for funding by sponsorship of English teaching. One example is the joint project by the Cambridge local examinations syndicate and Suntory whisky for an English language institute in Japan, managed by the British Council.

The Green Paper acknowledges all that in its section on overseas students. The Government have decided that such students, welcome as they undoubtedly are, should not be subsidised by the British taxpayer. Instead, the Government are committed to a policy of targeted support that meets the needs of overseas countries.

Indeed, there has been a sea change in our contribution to international education in recent years. That is evident from the British Council's market surveys of overseas demand for, and perceptions of, British higher education, and its establishment of an education counselling service in three pilot centres in Malaysia, Hong Kong and Singapore. It is also evident in the new approach of the Overseas Development Administration. I have the honour to be one of the three parliamentary chairmen of the Council for Education in the Commonwealth, and I must say that there has been alarm and despondency at the large reduction in overseas students in Britain, largely following the replacement of marginal costs by full-cost pricing, which has led to the significant salting away of money in some of our universities.

However, in discussing higher education with the Council for Education in the Commonwealth, my right hon. Friend the Minister for Overseas Development explained how he is targeting his contribution towards encouraging a skilled, literate and environmentally aware work force in the recipient countries. His educational advisers are seeking new priorities and programmes overseas, with clear objectives and time limits that fit into national development programmes. That can only be an improvement.

We should acknowledge the considerable and largely unknown ways in which our higher education is promoted overseas and why it is so highly valued. The British Council and some universities operate the key English language teaching scheme. In countries where English is not usually spoken, such as Indonesia and Brazil, they operate the English for special purposes scheme. It is important because non-English speaking nations are rapidly becoming aware that English is essential for education in advanced science and technology.

Paid for by the Overseas Development Administration, London university recently organised a conference at Cumberland lodge, which brought together the education Ministers of eight African countries faced with rising demands for education and dwindling resources. The results will be published shortly in a book entitled "Education Priorities in Sub-Saharan Africa".

The Government support in-country training and third country training, where it is more convenient or appropriate to establish regional education centres such as the university of the West Indies or the university of the south Pacific, which are partly funded by the United Kingdom. For more than 25 years, the Commonwealth scholarship and fellowship plan has facilitated student mobility — it currently funds 800 students at British universities and medical schools.

The Pym package of 1983 led to an important increase in student numbers. The Department of Education and Science continues its scheme for research students and the British Council has its highly successful fellowships programme. There are now some 16,500 overseas students in Britain, 71 per cent. of them from Commonwealth

[Mr. Key]

countries, but it is important to help more overseas students, especially from developing countries. That is why I am especially pleased about the fact that, in answer to my parliamentary question, my right hon. Friend the Minister for Overseas Development was able to announce yesterday the introduction of a new scheme called the shared scholarship scheme. Up to 450 scholarships will be available over five years, funded jointly by the Government and universities and polytechnics that wish to participate. They will probably seek commercial sponsorship and partnership and a closer relationship with their local industrial and commercial communities.

The scheme is a start but, in the interests of higher education and the country, student mobility should increase. I hope that when Commonwealth education Ministers meet later this year during the UNESCO general conference, they will ask themselves whether they have achieved the objectives that they agreed on in their Nicosia communiqué of last July.

The Green Paper is a tough and realistic document born of the hard reality that the population of university entrance age will fall by more than one third in the next 12 years. No Government could afford to ignore that stark fact, so we should not get carried away in condemnation but should consider the positive proposals that have been presented for discussion in the Green Paper. It is not a short-sighted or defeatist policy, and I urge the House to support the amendment.

9.27 pm

Mr. Stuart Randall (Kingston upon Hull, West): I have a college of further education, a college of higher education, and a university in my constituency. I am sceptical about the Green Paper. The consequences of cuts in 1980-81 and again in 1984-85 are serious for higher education. There have been numerous course cuts and place losses at the university in Hull.

I feel sorry for the young people who are affected. I vividly remember seeing the disappointment on the faces of 18-year-olds with A-levels at a school that I visited last year. When I had the privilege to go to university, entrance was simple compared with what those kids have to go through. It is disgraceful that top calibre people are being wasted. It is wrong that people should be treated in that way. It is no wonder that there is a "Why bother?" attitude among young people.

There are not enough qualified people in Britain. A recent report compared the number of qualified people in Japanese and German industries with the number in our industries. A tremendous gap must be filled particularly in the technological industries about which we hear so much.

I am worried by the staff cuts at the Hull college of higher education. The student-staff ratio is moving towards 12:1. That is being achieved by not replacing staff. That reduces the course options. The consequence is a loss of skills and an aging teacher population. The new blood and new degrees are not there to refresh our universities and colleges.

I talked to people connected with our colleges today before taking part in the debate. Morale has been affected by the cuts. The cuts create pressure for teaching at the expense of links with industry and consultancy work. That is serious. Morale is affected because the number of career opportunities for college staff is restricted.

Expenditure per student at the Hull college of higher education is falling. Although there was a general increase in the amount of money spent between 1980-81 and 1984-85, it has not kept pace with the increased number of students. That means serious cuts in support services such as career guidance and counselling, the milk round —which is costly in terms of man hours—links with employers and the general environment.

The Green Paper will not result in an improvement in higher education in Hull. I see it as an excuse for cutting expenditure. I referred earlier to students who had lost their opportunity. The cuts mean that future students will also lose their opportunity.

9.33 pm

Mr. Andrew F. Bennett (Denton and Reddish): The Secretary of State received a poor reception for his Green Paper when he presented it to the House last month. The press also gave it a poor reception. Only *The Sun* came out in its defence. Tonight few hon. Members have given unqualified support for the Green Paper.

At times during his speech it was doubtful whether the right hon. Gentleman was in favour of his own Green Paper. Sometimes he talked more about the sections that had been cut out than about the contents of the Green Paper. He must admit that the Green Paper is a bad harbinger of doom and despair for higher education and for the economy. It discusses cuts and the general malaise in our economic climate into the 1990s. Surely the Government should at least be hoping that their monetarist policies will work.

The Green Paper is not only about cuts but about a total reversal of Governments strategy over the past 100 years. There has been almost a political consensus for 100 years that we should expand higher education and recognise the intrinsic worth of education and its importance for our economy. Now, suddenly, the Government are talking not about a few short-term cuts because of economic difficulties but about a long-term strategy of contraction in higher education. The fact that we should single out from the Green Paper is that total change of attitude.

There were cuts in the resources of the polytechnics and colleges of higher education right from the start in 1979. There were savage cuts in university funding in 1981. It seems difficult to take seriously the Government's claims that they want to put resources into science and technology when three of the science and technology universities suffered the biggest cuts. The people at Bradford, Salford and Aston are now asking, having had those savage cuts, whether they will have to take 2 per cent. cuts each year for the next three years.

We were told by the Government that those cuts were to get round the short-term economic problems. There is no talk in the Green Paper of hoping to restore those cuts. Now the UGC is talking about 2 per cent. cuts over the next three years, probably the next five years. The NAB is warning the Government that standards are falling in polytechnics and colleges of higher education because of the shortage of resources. Finally, on top of all that, the Government are talking about wanting to cut the numbers of students in universities by 14 per cent. in the 1990s, and cutting resources by that amount. That is the most disturbing thing. It might be difficult to keep up the number of students, but we should pump in the resources to make sure that we can attract more students. It may well

be that developing more science courses will be more expensive, but we should be talking about maintaining level funding for those institutions into the 1990s.

Mr. Richard Tracey (Surbiton): I ask the hon. Gentleman to pause for a moment over the age participation rate. Does he deny that the previous Labour Government cut it from 13·6 per cent. to 12·6 per cent? Does he further deny that now the Conservative Government have raised it above the target set by Robbins and are aiming for 15·5 per cent. by 1999?

Mr. Bennett: If the hon. Gentleman wants to talk about the age participation rate, the most useful thing to do is to look back to the target that the Prime Minister set in 1972. She talked about a participation rate of 22 per cent. as the aim. I accept that there have been mistakes and disappointments in terms of short-term cuts, but what is wrong with the Green Paper is that it is not setting us a long-term target of trying to move up towards that 22 per cent. figure. It says that 15 per cent. is the most that we can hope for in the 1990s. Surely we must get back to a policy in which we try to expand higher education rather than complacently talk about cutting the resources that need to go into it.

I should like to move on to a series of specific points in the Green Paper. I refer first to the number of students. The key is the level of Government support for students, particularly the missing section in the Green Paper about the level of student support. Almost everybody believed that the Green Paper would come out in January, then the Government said that they could not produce it in January because they wanted to include a section on student support. That was perfectly valid. If the Government put off publishing the Green Paper until May, why did they still leave out the section on student support? The suspicion that is growing in the country is that the Government want to slip out their proposals on student support in August, at a time when there will be least opportunity for students to protest and for the Secretary of State possibly to get into the same difficulties that he faced in the autumn. The Secretary of State must explain to us whey he has not come forward with his proposals for student support, because if it was important that the section on support should be an integral part of the Green Paper in January, why is it not there now?

My hon. Friend the Member for Knowsley, South (Mr. Hughes) referred to participation among working class youngsters. The Secretary of State talks about improving the participation rate, but to make that a reality some financial support must be given to encourage youngsters to stay on at school. In Tameside in my own constituency, about 24 per cent. of 16-year-olds who achieve good O-level results do not stay on in education. If they obtained good apprenticeships or other opportunities, that would be fine, but many of them end up on the less reputable YTS schemes or in unemployment. I wish that the Government would encourage youngsters with working class backgrounds to stay on to obtain a further education and participate in higher education.

The Government must also address themselves to a far greater degree to the participation rate among ethnic minorities as well as to the problem of attracting mature students. The Green Paper pays lip service to this but does not refer to resources for further education to give mature students a second chance or to the problems faced by the institutions. The Secretary of State must address himself to how we can make it financially possible for mature students to enter universities and polytechnics. That aspect of student support is also missing.

The Green Paper also contains two of the Government's obsessions, one of which is sponsorship. They seem to think that sponsorship which may work for snooker or football can apply to many other areas. They began by wanting more and more sponsorship for the arts, and took away Arts Council funding. They are now talking about sponsorship or advertising for the BBC. Does such sponsorship exist within industry, and does industry have the money to pay for it? There is no evidence that industry will pay.

The Government should stop this obsession with sponsorship—or perhaps the Secretary of State intends to come to the House wearing a sweater advertising a brand name product and claim that he is the sponsored Secretary of State. The right hon. Gentleman should recognise that, once there is sponsorship, the sponsor becomes the dictator and the manipulator.

Mrs. Kellett-Bowman *rose*——

Mr. Bennett: No, I shall not give way.

The Government also want to bash the trade unions and other unions. I am surprised at their attack on students unions' sabbatical officers. During my visits to academic institutions, I have been struck by the high quality of most sabbatical officers. More often than not, the good sabbatical student union officials ensure that those unions are effective, democratic institutions which cannot be hijacked by a small band of extremists.

The Secretary of State talks about the importance of freedom of speech in the universities and students unions. I agree. However, the last time that I was shouted down at a students union meeting — also attended by the Under-Secretary — it was by the Federation of Conservative Students. It organised the hooligans on that occasion.

Mr. Patrick Thompson *rose*——

Mr. Bennett: No, I will not give way.

Does the Secretary of State now accept the views of the visiting committee that the Open university is doing a first-class job? If so, why is he not prepared to come up with the money so that development can continue in areas such as PICKUP and the turning of its loan into a grant?

The right hon. Gentleman also talks with great enthusiasm about switching from the arts to the sciences, but he does not talk about the cost implications. He does not point out that in many cases science courses are nearly twice as expensive as arts courses. Such a switch will either mean a cut in the number of student places or that the new science courses will have to be run on the cheap.

The right hon. Gentleman must also address himself to the fact that there is a shortage not of scientists but of those with an arts education who are literate in the sciences and technologies. It is most important to encourage people who receive arts degrees to study further and make themselves literate in science and technology. In the Green Paper the Secretary of State firmly talked about discouraging the longer degree courses. Although their attraction is that they try to bridge the gap between the arts and the sciences, he attacks them most.

Will the Secretary of State comment briefly on his views about pay? Several hon. Members raised that

[Mr. Bennett]

question, and its implications for morale. He should consider that both the Green Paper and pay problems are beginning to make many people who work in universities and polytechnics extremely disillusioned. Evidence shows that in some key areas of science and technology, on which he is so keen, it is becoming increasingly difficult to recruit staff.

Will the Secretary of State tell the House who has given the Green Paper an enthusiastic welcome? When did he convince the Prime Minister that her target in the 1970s of 22 per cent. was wrong, and that the most that we could aim for was 15 per cent.? Why, after six years of the Government's monetarist policies, must we set our targets for education for the next 10 years increasingly low, rather than raising them and our expectations?

9.45 pm

Sir Keith Joseph: I shall try to answer as many questions as I can in the time available.

The hon. Member for Cambridgeshire, North-East (Mr. Freud), in a not altogether friendly discussion on the Green Paper, pointed out that the universities would like to be able to engage at least 900 more lecturers and senior staff during the next period. He was right. However, I must tell the House that during the same period about 700 vacancies are expected to occur. There will still be a worrying gap, but it will be of the order of at least 200, rather than at least 900.

The hon. Member for Knowsley, South (Mr. Hughes) in a good speech—[HON. MEMBERS: "Hear, hear."] I always find his speeches well worth listening to. Although he and I would disagree about some of the reasons behind his diagnoses, he always makes a solid diagnosis. He reminded the House that we are still far from achieving the common standards of citizenship to which Robbins and his committee aspired. The hon. Gentleman spoke of his aspiration for more and more of his constituents to attend higher education. He will agree that if that is to come to pass, as we all should like—there is no reason why his constituents are inherently inappropriate for higher education—we must make our schooling more effective. Both sides of the House will agree with that. The Opposition may criticise us for having aspirations and yet not being able to find the resources which they think are necessary. However, I hope that the hon. Gentleman will agree that the way to worthwhile higher education for more people is through better schooling.

My hon. Friend the Member for Uxbridge (Mr. Shersby) asked some awkward questions. He asked why Brunel university had not been selected for sharing in the switch money. The invidious matter of selecting universities, and in due course some polytechnics, for sharing that money was carried out by the University Grants Committee on behalf of the universities and by industry.

Industry has had the invidious job of identifying those universities which it judges could most usefully receive the switch money. Against the background of not enough money being available and having to spread it widely, the choice has been made. It is no discredit to Brunel; there are some very strong competitors.

My hon. Friend asked why more higher education skills have not been used to modernise British industry. Indeed, it is a question which goes to the heart of our relative failure over the past four decades. We can all make speeches on the combination of reasons, and I am sure that successive Governments have played their part in those discouragements, but one has to identify patchy management as one of the factors. No doubt management would say that it has not been altogether encouraged by the attitude of trade unions. At any rate, I think that we are now all agreed that there should be more links between business and higher education, and that is manifestly taking place.

My hon. Friend the Member for Leeds, North-West (Dr. Hampson) made an awkward intervention. He asked how a decision might be made in due course if any institutions, in the Government's view, had to be closed. It is not yet clear whether any whole institutions will need to be closed, although that may be necessary to preserve standards as student numbers fall. The Government would, of course, discuss with the UGC and the NAB the way in which judgments about scale and scope are to be made. The criteria governing all such judgments—those concerning expansion and selectivity as well as rationalisation and closures — should, in the Government's view be excellence, fitness for purpose and cost effectiveness. Where institutions, departments and courses are excellent, fit for their purpose and cost-effective, they need not fear for their future, regardless of whether they are in the university or the public sector.

My hon. Friend the Member for Peterborough (Dr. Mawhinney) thought that higher education institutions should be able to manage change. He echoed, effectively and eloquently, the views expressed by the Jarratt committee. In its report, the committee suggested the ways in which institutions could, without losing the decentralised judgment making which occurs in higher education institutions, decide together the best way to deploy their resources. I commend the Jarratt report to my hon. Friend and to the House.

My hon. Friend the Member for Mitcham and Morden (Mrs. Rumbold) rightly focused on quality and effectiveness in the schools, and spoke with particular interest about the scope that there still is to encourage girls to participate more fully in some parts of the curriculum which they have tended — probably under parental pressure and expectations—to neglect in the past. The trends are moving in the right direction. As my hon. Friend knows, more girls are studying the sciences, the technologies and engineering, but there is much more room for them. We are giving every encouragement so that there may be movement in the direction that my hon. Friend wants. I have a large number of examples, if she is interested in them.

The hon. Member for Wrexham (Dr. Marek) asked several questions. If eligible demand grows—he was particularly interested in adult education — the Government will certainly review policy, as they have said in the Green Paper. On a Green Paper basis, they are making some projections based on trends, in so far as they can be predicted. If the trends prove to be too pessimistic, the Government will review policy.

With regard to overseas students, as my hon. Friend the Member for Salisbury (Mr. Key) said in his interesting speech, an addition was announced yesterday to the number of overseas students for whom we shall provide finance.

However, I do not want hon. Members to mislead themselves. Although there has been a fall in the number

of overseas students attending universities since 1979, that number has recently started to rise again. The number still here, including those who are paying their own way, is not so dramatically below the 1979 figure as was predicted at the time.

The hon. Member for Wrexham also asked me to deal with the Prime Minister's letter to the Association of University Teachers and explain why level funding has not been provided. Since that letter was written, the public purse has incurred a number of expenditures that were not predicted at that time—for instance, the small matter of the miners' dispute—*[Interruption.]* The hon. Member for Durham, North (Mr. Radice) belongs to a party which suffered more than hiccups during its last period of office. In one particular year it had to cut expenditure on higher education by no less than 8 per cent.

The hon. Member for Kingston upon Hull, West (Mr. Randall) shared the disappointment of A-level students who have not obtained sufficiently good examination results to gain places in higher education. I accept, as was pointed out by the hon. Member for Dundee, East (Mr. Wilson), that A-level results are merely the least bad indicators that are available. It is realised generally that they cannot be wholly replied upon. Nevertheless, surely we must agree that there have to be certain standards for entry to higher education and that those standards must be reached.

The hon. Member for Denton and Reddish (Mr. Bennett) asked me when the student support finance paper will be published. I hope that it will be published by the end of next month. He also asked me to comment upon the visiting committee's views on the Open university, which it highly esteems. However, he failed to point out that the visiting committee also said that the Open university is unable at the moment, because of its management arrangements, to cost the different options that are available to it. It said that, provided that the Government stretched out the reductions—in other words, did not impose them so quickly—the Open university should be able to cope with all that it wanted to do by making economies. The Government have met the recommendations of the visiting committee, and I hope that the Open university will now be able to cope.

I now wish to deal with a point that was emphasised by the hon. Members for Dundee, East, for Denton and Reddish and for Durham, North. The hon. Member for Dundee, East asked whether we really expected private money to be put into universities and polytechnics to help them to support their building programmes. The hon. Member for Durham, North once again emphasised that more money from the taxpayer should endlessly be made available. He said that the Government should not predict a fall in the number of students, even for demographic reasons, and that therefore there should be more spending upon education. The fact is that under successive Governments huge funds have been provided for higher education, running into billions of pounds. They should surely result in more efficient management, as has been identified by successive committees. Against that background, is it really the view of the Opposition and of the hon. Member for Dundee, East that the Government should not encourage higher education to raise, if it can, more money privately?

Mr. Radice: Will it?

Sir Keith Joseph: Not only will it, but during 1983-84 the universities raised an extra £54 million in that way. This is not a total answer, but it shows what can be done.

The Opposition are still hooked on the old 1960s fallacy that more means better, but more does not necessarily mean better. That is why it is essential that, if more is spent, it should be accompanied by the policies to make sure that more is better. The Opposition have ignored those policies; I hope that the House will reject the motion and accept the amendment:

Question put, That the original words stand part of the Question:—

The House divided: Ayes 176, Noes 254.

Question accordingly negatived.

Question, That the proposed words be there added, *put forthwith pursuant to Standing Order No. 33 (Questions on amendments), and agreed to.*

MR. SPEAKER *forthwith declared the main Question, as amended, to be agreed to.*

Resolved,

That this House congratulates Her Majesty's Government on its policies for ensuring that higher education is better managed and more attuned to the needs of the economy, for maintaining and enhancing standards, and for broadening the criterial for access to higher education; urges Her Majesty's Government to continue to seek ways of making more effective use of the resources available for higher education; and welcomes the framework for the future development of higher education set out in Cmnd. 9524.

BUSINESS OF THE HOUSE

Ordered,

That, at this day's sitting, the Coal Industry Bill may be proceeded with, though opposed, until any hour.—*[Mr. Peter Lloyd.]*

Orders of the Day

Coal Industry Bill

Not amended (in the Standing Committee), considered.

Clause 1

DEFICIT GRANTS TO NATIONAL COAL BOARD

10.15 pm

Mr. Michael Fallon (Darlington): I beg to move, in page 2, line 16, leave out '600' and insert '400'.

Mr. Speaker: With this it will be convenient to discuss the following amendments:

No. 2, in page 2, line 20, leave out '800' and insert '600'.

No. 3, in page 2, line 20, at end insert—

'(6A) No order shall be made under subsection (6) above unless the Secretary of State is satisfied that supply of, and demand for, coal have been brought into reasonable balance.'.

I remind the House that these are narrow amendments.

Mr. Fallon: At least one reason for moving amendment No. 1 and speaking to amendments Nos. 2 and 3 is that not only is the Bill reported from the Committee unamended but no amendments were even considered in Committee. Therefore, there was a danger that had no amendments been tabled for the Report stage the full implications of clause 1 might have passed unnoticed.

The power in subsection (1)*(a)* is not unreasonable, in that the group deficit of the board in the last financial year is known or is at least capable of being ascertained because the date is past and the money has been spent. Beyond noting its enormity — the ceiling of £1·2 billion established in subsection (4)—there is not much that the House can do about it, having supported the Board and the Government in the year of the miners' strike.

Whereas that may be so, the power in subsection (1)*(b)* is of a different order, in that it is in effect a licence to my right hon. Friend the Secretary of State for deficit funding of the board in two forthcoming years, one of which has barely started. Deficit funding in itself has long been recognised as a far from ideal way of financing a nationalised industry. In this case, it means that in each of the two forthcoming financial years the incentives are to a certain extent removed for prudent financial management by the Board, for cost saving and for improvements in the Board's financial and budgetary arrangements as proposed by the Monopolies and Mergers Commission report.

Confronted with such proposals, if the House is concerned, as it should be, with the enormous sums that are to be handed over to the Secretary of State for him to forward to the board, it seems that the House can do only one of two things—either it can tighten the monitoring arrangements to make the Board's budgetary performance month by month and quarter by quarter more accountable and more transparent to the House, or it can tighten the ceilings that my right hon. Friend has proposed in the Bill.

I accept that the former course is difficult. Day to day management of the board's affairs is a matter for the board and not for the Department, let alone for the House. The extent of the Board's technical insolvency is now such that I believe the House is looking to the Department and to my hon. Friend the Parliamentary Under-Secretary of State to assure us that the monitoring arrangements which already operate will be conducted more rigorously and on a more regular basis than for some years. I hope that he can persuade me that the moneys being provided are being properly and necessarily spent. I am sure he will be able to reassure me on the scope and persistency of the monitoring arrangements. Nevertheless, the second course, that of tightening the financial ceilings proposed in the subsection, is obviously the course that should be preferred.

Amendments Nos. 1 and 2 merely provide that the ceilings in each case be lowered. It may be objected that the reduction proposed is as arbitrary as the ceiling. However, there is some merit in reducing the original sum which is to be lost in the next two years—some £600 million, which is nearly 10 times the amount that De Lorean lost in four years, is to be lost by the coal board in two—by one third or some £200 million because that represents the minimum improvement that could be achieved in the board's performance by a greater liberalisation of its activities, by the expansion of its profitable activities, for example, the open-cast operation and by the improvement of its marketing and sales arrangements.

Amendment No. 3 seeks to make the final increase of £800 million — £600 million if amendment No. 2 is accepted by the House—dependent upon my right hon. Friend the Secretary of State satisfying himself that demand and supply in the industry had been brought into reasonable balance. That might be thought to be a rather radical amendment to be tabled on Report for a Bill of this kind, but it is a Bill which prints public money for the board—this time to the tune of some £2 billion—but which yet again does not touch upon the duties of the board as laid down in the Coal Industry Nationalisation Act 1946.

As I believe I pointed out on Second Reading, the Bill is deficient in that it does not address itself to that problem. The board is charged under that Act with the duty of securing the efficient development of the coal industry. However, a board which has come to the House virtually

[Mr. Fallon]

every two years has failed in its principal and mandatory duty and is as insolvent on its statutory basis as it is financially insolvent.

Ample evidence has existed from the late 1970s, from the report of the Monopolies and Mergers Commission in 1983 and the events of the past 12 months to show that the duties imposed in the 1946 Act are not just out of date but are redundant and that a new statutory framework is required.

Amendment No. 3 seeks only to provide the minimum foundation for that framework.

Mr. Peter Hardy (Wentworth): *rose——*

Mr. Fallon: I shall not give way, because I am just finishing.

I should have thought that it was a condition which any extractive industry would welcome and could meet. I hope that such a condition might be a preliminary to a more general review of the legislation underpinning the board, might also serve as a sign of good faith to an increasingly sceptical taxpayer and might find favour not just with my right hon. Friends but with the House.

Mr. Alexander Eadie (Midlothian): I intervene briefly for the sake of accuracy and for the information of the House. It is not true that no amendment was tabled in Committee. A new clause was tabled. The hon. Member for Darlington (Mr. Fallon) might have studied the report of the Committee stage before he made that statement.

Mr. Hardy: I did not wish to speak, because I had hoped that the hon. Member for Darlington (Mr. Fallon) would have been gracious enough to allow me to intervene merely to ask him to tell us what he means by the word "reasonable". He talks about the demand for coal being "brought into reasonable balance". My hon. Friends and I are eminently reasonable people. We should have liked to hear the hon. Gentleman's definition of "reasonable", as it may not be the same as ours.

One important factor in the decline in the demand for coal to which the hon. Gentleman did not refer is that the level of industrial activity in Great Britain today is much lower than was anticipated when some of the costly investment schemes began. For example, the demand for engineering steel made by the electric arc process, which indirectly consumed enormous quantities of coal, has been slashed dramatically and, therefore, the demand for coal has decreased dramatically. If unemployment remains at the real level of 4 million and industrial levels of activity stay as they are, our coal production may be higher than was planned a few years ago when unemployment was markedly less and industrial activity was markedly higher than today. The hon. Gentleman gives counsels of despair, because if there is not some economic and industrial recovery, it will not be the coal industry alone but his party that will be in jeopardy. The electorate, not just people from the coalfields, are not prepared to tolerate the current levels of activity and, therefore, the current low levels of demand for energy.

We must have an element of forward vision. I hope that the Under-Secretary of State, even in this benighted Government, has more vision and hope than the hon. Member for Darlington displayed in his sad and sorry amendments.

The Parliamentary Under-Secretary of State for Energy (Mr. David Hunt): I hope that my hon. Friend the Member for Darlington (Mr. Fallon) will concede that the careful consideration that a Committee gives to an important Bill of this nature cannot be judged by the number of amendments that may or may not have been tabled, because I believe that the Bill has had the most careful scrutiny. The fact that it has been greeted with approval by both sides of the House demonstrates the good will that is attached to this great industry, especially at this crucial stage. I can readily understand that hon. Members feel impatient with successive requests for additional deficit grant for the NCB. I assure my hon. Friend the Member for Darlington that these requests must cease. I reiterate the Government's firm objective that the NCB, like any other commercial enterprise, should earn a satisfactory return on its assets in real terms after payment of social grants. Only by returning to profitable enterprise and operation can the NCB offer lasting jobs and good wages to those employed in the industry.

It is in the interests of no one, whatever his political views, for the NCB to be dependent upon continuing handouts from the taxpayer. There is a pressing need to put matters right, to regain markets and to recover lost ground. During this period of reconstruction, it is right that the Government should continue to support the coal industry in the manner that we propose in this legislation.

The figures proposed in the Bill give an upper limit of £600 million on deficit grant payments for 1985-86 and 1986-87. Although the Bill provides for that ceiling to be raised by up to £200 million, in the first instance we look to the NCB to live within the £600 million. Any increase beyond that level must be subject to debate in the House. I hope that my hon. Friend the Member for Darlington recognises that it is still too soon for the NCB to assess with any precision how fast production can be restored and those important markets rewon. I very much hope that we shall soon see the end of all industrial action in the industry so that everyone can move together in the right direction. In the meantime, it will be difficult to arrive at precise estimates of the level of loss this year and next. The figures in the Bill are no more than a framework within which the board must operate. We believe that £600 million is, in the first instance, a sensible and realistic ceiling. I shall expect the NCB to do everything it can to remain within that figure.

I move to the other comments of my hon. Friend the Member for Darlington. Clearly, balancing supply with demand is one essential part of the NCB's return to viability. It figures in the objectives given by my predecessor in this office and given to successive chairmen of the board. For the coal industry to be profitable and to be able to provide lasting jobs for its employees, it is essential that the key problems of excess capacity and the high cost of uneconomic pits be tackled.

10.30 pm

However, it would be wrong to link that aim to the provisions for deficit grant, as amendment No. 3 does. As I have told the House several times, we have given the National Coal Board the objective of breaking even without the need for deficit grants by 1987-88. That must be our central goal. If we are to secure the future of the industry, bringing supplyand demand into balance is

clearly an important component of the task. But other factors must be included, such as productivity, efficiency, reducing costs and achieving a proper return on assets.

Moreover, I must tell my hon. Friend that it is not for the Secretary of State for Energy to judge the future demand for coal and to require the NCB to tailor its production accordingly. Those judgments are the responsibility of the NCB. The Government's role is to set the objectives, not to specify in detail the means of achieving them.

Officials from my Department and the National Coal Board meet regularly every month to review the year's figures and especially to compare performance against forecasts. All the figures supplied by the NCB to the Department of Energy, as the hon. Member for Midlothian (Mr. Eadie) will know, are subject to thorough and critical scrutiny. Detailed financial planning and monitoring is, of course, a matter for the National Coal Board. However, I stress to the House that the public expenditure implications are such that we must be satisfied about the overall financial position.

I share the anxiety expressed on both sides of the House that the present state of the coal industry serves neither the taxpayer nor those who work in the industry. But the problems can be solved. We have given the NCB the firm objective of breaking even without deficit grant by 1987-88, and we expect it to meet that objective. But in the meantime it is right to make the deficit grant provisions set out in the Bill. I hope that, in the light of my comments, my hon. Friend the Member for Darlington will withdraw the amendment.

Mr. Fallon: I am sure that the hon. Member for Midlothian (Mr. Eadie) will wish to check exactly what I said. I did not say that amendments were not tabled, but that amendments were not considered by the Committee, which is very different. I should tell the hon. Member for Wentworth (Mr. Hardy) that I accept that measuring the reasonableness will be a difficult concept, but I did not rule out an increase in demand. What I wished to establish through amendment No. 3, which I notice he did not completely reject, was some relationship between supply and demand, whether supply increases or demand increases.

I thank my hon. Friend the Minister for his assurances. I agree with him that the framework is there, although we might disagree about how tight it is. I especially welcome his expectation that the board's expenditure should remain within the lower figure in clause 1 for as long as possible, and the way in which he dealt with amendment No. 3. He did not seem to rule out the importance of the relationship between supply and demand, although I accept that the principal balance should not necessarily be linked with the deficit grant in the way that it must be to meet the technical requirements of the Bill.

Having said that, and with the assurances from my hon. Friend on the monitoring arrangements and the thorough scrutiny that he has promised, I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Motion made, and Question proposed, That the Bill be now read the Third time.—*[Mr. David Hunt.]*

10.34 pm

Mr. Eadie: The Opposition were conscious on Second Reading and in Committee that the industry badly needs this money. Because of that, we have given the Bill a fair wind. Because of the Bill's financial implications, however, hon. Members were able to debate the coal industry.

The Minister has made little attempt to answer the points that have been raised. We asked about investment, new pit sinkings, power station generation from coal, the pit closure programme and the statement of the chairman of the National Coal Board which appeared in the *Sunday Telegraph* of 10 March. We asked about manpower envisaged for the industry, about the output that is anticipated during the next five years, how many pits will be left and, of course, what the Government are doing about victimised miners.

I said on Second Reading that we could understand the Minister not being able to answer all of our questions in his winding-up speech but that he might like to write to me or deal with the issues that had been raised in Committee. Anyone who glances at the Minister's speech in the second sitting of the Committee will be struck by the poverty of his reply. I have had no letter from the Minister. We are therefore entitled to charge him with failing to give the information for which we asked and for allowing the chairman of the NCB to walk all over the Department of Energy.

As to the victimised miners, I quoted the Coal Industry Nationalisation Act 1946, the consultation and the conciliation procedures; and all we got was the bald statement that they did not apply during the strike. There was no attempt to say why victimised miners cannot be represented and have their cases dealt with in accordance with natural justice. The Minister and the Secretary of State echo the line of the chairman of the NCB more than common sense. Their line has been that victimised miners had recourse to industrial tribunals.

Ministers seem to sit back with their arms folded, pleased that they have given the House the advantage of their worldly wisdom. I have news for them—they can start unfolding their arms right away. I attended the public sitting of the Select Committee on Employment to which Mr. MacGregor gave evidence, which makes it clear that, although an industrial tribunal found in favour of a victimised miner, the chairman was not prepared to give an assurance that he would reinstate the man.

I should add that Mr. MacGregor said to the Select Committee only what he told me personally at a meeting that I had with him. Industrial tribunals were further debased at that sitting of the Select Committee. I took down what the chairman of the NCB said in cross-examination. I hope I have it right. He said,

> "I believe most of my employees are law abiding and therefore I do not need to go to industrial tribunals to find out what goes on. I would not want to insult them by thinking they are all criminals and would have to go through industrial tribunals."

That is a disgraceful public statement.

Mr. David Ashby (Leicestershire, North-West): Why?

Mr. Eadie: How long can the Minister support Mr. Ian MacGregor in his capacity as chairman of the NCB? I am asked why. Is the chairman of the NCB to be allowed to say that industrial tribunals, set up by the House of Commons, are the only bodies which can discuss criminals who have recourse to an industrial tribunal? That is disgraceful.

[Mr. Eadie]

The Minister said that he would take up individual cases of victimised miners. I questioned him yesterday at Question Time. I asked the Secretary of State for Energy "following representations to him for reinstatement of sacked miners arising from the miners' strike, how many have been reinstated as a consequence of inquiries to the National Coal Board."

The Minister replied:

"I understand from the National Coal Board that of the 1,013 employees dismissed for offences related to the dispute, 373 have subsequently been re-employed."

That was not an answer to the question which I asked.

I came back and asked:

"Will the Minister tell us about the cases that have been referred to him?"

The Minister made specific promises at Second Reading and in Committee that he would take up the cases of victimised miners referred to him. I asked him how many cases he took up and in how many cases there was reinstatement. I said:

"In Scotland, he has failed abysmally, because no miner has been reinstated following a request by the Minister."

The Minister replied:

"I have taken up every case that has been referred to me. I should tell the hon. Gentleman that all of us have been impressed by the responsibility of the vast majority of miners, who are now working together to repair the damage caused by the strike." —[*Official Report*, 3 June 1985; Vol. 80, c. 20.]

That is a classic example of doublethink. Even at the second attempt the Minister could not tell me how many victimised miners had been reinstated as a result of his request. That is deplorable.

We have been the rounds on the Scottish aspect of the problem. We have met the chairman of the board of Scotland, Mr. Wheeler. We have also met Mr. Ian MacGregor. We have met the Secretary of State for Energy and the Secretary of State for Scotland. Since the Department of Energy wishes to abdicate its responsibilities we are asking for a meeting with the Prime Minister.

I wish to put on record a letter sent to the Prime Minister by the Scottish group of Labour MPs. It reads:

"There is a great deal of disquiet about the high number of dismissals in the Scottish Area of the National Coal Board. There has not been a single re-instatement which is out of line with other areas, and there is a strong feeling that justice has not been seen to be done. It has been repeatedly said by NCB officials in Scotland that all dismissed miners were guilty of serious offences against working miners' their families, or Board property. Recent written answers from the Solicitor-General for Scotland have established that in Scotland, of the first 603 people convicted as a result of the industrial dispute, only 38 involved offences of violence or vandalism. This does put a question mark against the circumstances in which many of the Scottish miners were dismissed. In the light of this, I ask if you would be prepared to meet a delegation from our Group to discuss the situation. Exchanges at Question Time give the impression that you too have been misinformed."

The responsibility for misinforming the Prime Minister lies with the Department of Energy.

The letter continues:

"I am sure you appreciate that this is not an issue in which concern is confined to the Labour Movement, but it also shared by many Scottish Church Leaders and a call for re-consideration has come from three Chief Constables in Scotland.

I hope, therefore, that you will agree to meet our delegation and look forward to your early reply."

The letter is signed by the secretary of the Scottish Labour group.

I am grateful for the tolerance of the House in listening to that quotation. It is deplorable that the sponsoring Department is not able to inform the Prime Minister or do anything. It allows the chairman of the NCB to walk all over it, yet it is the sponsoring Department. A group in the House, having met every agency available in the House, has to go to the Prime Minister and tell her that she has been misinformed, and ask her for the opportunity to present her with the facts on victimised miners. That is an indictment of the Department.

The answers that we are getting are a classic example of what has been happening during the passage of the Bill. We suspect that the Minister cannot produce from anywhere in Britain a single case where his intervention has resulted in reinstatement for a victimised miner. When I referred to two cases, which I quoted on Second Reading, the Secretary of State told me that if I was dissatisfied I should take up the matter with the chairman of the NCB. If that is not an abdication of responsibility, I do not know what is.

The House is about to give the Bill its Third Reading in the knowledge that the industry is still gripped in an industrial dispute because NACODS feels that it has been betrayed by the NCB in relation to an agreement, described by the Government is sacrosanct, on a modified colliery procedure on pit closures. I mentioned yesterday at Question Time that the overtime ban, decided by a ballot vote of NACODS members, was costing the nation about £24 million every week. It is humiliating that the Secretary of State seems to be paralysed about taking any action to make the NCB keep its word, which was agreed in October 1984 under the aegis of the Advisory, Conciliation and Arbitration Service. The Government, with the NCB, claimed that conciliation and consultation were suspended during the strike. With the strike now over, they seem to be still buried. The Minister goes about the country speaking to miners in the language of conciliation and consultation, yet they are buried, and the Department stands back and allows the NCB to bury the spirit of conciliation and consultation.

This industry of ours—I say "of ours" because many of my hon. Friends, like myself, spent a lifetime in it before we were fortunate enough to be elected Members of this honourable House—is crying out to get back to normality. What are the Government doing about it? We do not know yet what output is expected of the industry. We do not know yet what manpower is expected to be retained. We do not know yet officially how much manpower will be shed, or in what areas, and we do not know how many pits will close, the numbers to be retained, or in what areas, despite the substantial sums of money involved in the Bill.

The Government's reluctance to give us information —I say this more with regret than with anything else— and the statement in the Bill about breaking even in two years lead us to believe that the Bill is designed to contract the coal industry. This is a pit closure Bill. It seeks to restrict coal production and cause job losses in many mining areas. The Minister is the third Minister responsible for the coal industry in the last six years. It is logical to assume—I say this without personal rancour —that he will not be in office to defend his handiwork when the Bill's life expectancy expires—*[Interruption.]* Conservative Members may giggle when I say that I make that remark without personal rancour, but I mean it. I speak to the Minister in his capacity not as an ordinary hon. Member, but as a member of the Government. Although the Minister may have left office in two years'

time, many of my hon. Friends will still be here. We will be seeking to defend the industry because we believe that the nation needs a strong and powerful coal industry.

The Bill will involve the payment of large sums of money as a consequence of the miners' strike, yet the Government give little information to Parliament. I advise the Minister to read the analysis of the miners' strike, by the Fraser of Allander Institute, which is not a predatory Left-wing organisation. The hon. Gentleman deceives himself and, more importantly, the House of Commons if he believes that there is now a proper industrial relations climate in the mining industry. Even at this late stage, we appeal to the Department of Energy, as the coal industry's sponsoring Ministry, to exert its authority, to deal with the problems of the NCB, and to get the industry back to normality.

10.52 pm

Mr. Geoffrey Lofthouse (Pontefract and Castleford): I shall detain the House for only a few minutes, but there are several points arising from the Bill that I wish to make.

As the House is aware, the Bill comes before us after 12 months of strife for miners and their families. That cannot be refuted by any hon. Member. In some coalfields, many members of management take the view that for the victor there should be the spoils. As a result, we now have the worst industrial relations in the mining industry since I joined it 46 years ago. If Conservative Members do not believe that, it is obvious that they do not understand what is happening in the mining communities.

There are several points to which we have a right to expect answers, even though the Minister failed to answer some of them in Committee. If it is the Government's policy that the mining industry should break even by 1986-87, they should tell us what that means. How many men will remain in the industry and how many pits will be closed? I cannot accept that the Minister is unable to give these figures, because I am sure that the chairman of the NCB has totted them up and knows full well how many pits will be closed by 1986-87. I believe that the figure is far in excess of any figures which have previously been given to the House.

The Government's policy is wiping out mining communities. In my own area — and some of these decisions have been taken since the strike ended—seven out of 10 pits are now on the closure list. I shall give the names of the pits, and if my information is wrong, I invite the Minister to refute it. The closure of the Ackton Hall pit, which is in the constituency of my hon. Friend the Member for Hemsworth (Mr. Woodall), has been announced. All that the small township of Featherstone has is that pit. In the late 1800s, miners in it fought for their jobs and some were shot and killed by soldiers for defending them.

Mr. Geoffrey Dickens (Littleborough and Saddleworth): So were the Luddites in the textile industry.

Mr. Lofthouse: I shall treat that remark with the scorn it deserves.

When the pit closes, that small town will have nothing left.

The other pits to be closed are the Savile colliery, the Glasshoughton colliery and the Ledston Luck colliery. Wheldale colliery and Fryston colliery are to go within four years. The Government are wiping out not only the pits, but their communities. When the pits disappear the communities will be in a similar position to that which they faced during the strike. The local economy will be destroyed. During the strike the local chamber of commerce showed that if the pits closed, between 25 and 30 per cent. of all businesses would close. During the strike the local economy was denied the income of miners, and now it will be denied their income through pit closures, which are part of the Government's economic policy.

The House has a right to know what the Government intend to put in the place of those communities, which will face such devastating blows. Do not tell me that between £5 million and £10 million has been made available to the National Coal Board enterprise scheme. We need clarification of that. I was disappointed that the Minister would not accept new clause 1 in Committee, when my hon. Friends asked for that sum to be increased to £50 million. That is not a large sum, considering the great tasks that face the mining communities. It is not good enough to say, "We shall meet the demand when it comes."

What is the NCB enterprise board doing? Is it waiting for people to borrow a specified sum to set up a company? The areas involved are not attractive to other industries. Those areas receive no Government grants. The Government cannot deny that mining communities will be wiped out. They have a responsibility to put something else in their place.

I admit that for many of the older miners—men of 50 and upwards—the blow will be cushioned by the Bill and by the redundancy payments scheme, but what is to happen to the youngsters in mining communities who would usually have found their way into the mining industry, bearing in mind that, apart from a few odd pockets here and there, there are no other industries for them? What are we creating in the mining communities where youngsters can see no hope whatever of employment? They are not asking for attractive employment; they are asking for a chance to go into a hole in the ground to work, because there is nothing else in those areas. The Government's policy is denying them that chance.

The Government have an obligation towards the mining areas. If they fail them, they will be storing up trouble which it will not be possible to control. I hope that the Minister will do better then he did in Committee and answer some of the questions that I have put to him. It is not sufficient to say that we have Selby in the north Yorkshire area and that men who wish to go there can do so rather than be made redundant. That argument is wearing a bit thin, because I understand that we are talking of about 3,500 or 4,000 members in that coalfield, and there are about 16,000 men in the north Yorkshire area.

If the jobs of 10,000 of those men are to be destroyed, something must be put in their place for the youngsters who are leaving school without any hope whatever. If the Government fail to consider those youngsters they will have failed miserably. Ian MacGregor was appointed to butcher the industry and the livelihood of men who have relied on the pits all their working lives. The Government are destroying something that no one should have the power to destroy.

11.1 pm

Mr. A. J. Beith (Berwick-upon-Tweed): We are addressing the question whether the Bill should be now

[Mr. A. J. Beith]

read the Third time. Although several criticisms have been made of it, I do not thank that any hon. Member will say that the Bill should not be read the Third time, or that anyone will vote against the motion. I think it is recognised that the money has to be expended in the industry. The one hon. Member that I thought might argue for the opposite course is the hon. Member for Darlington (Mr. Fallon), but perhaps even he will not go so far as to resist the expenditure of the money.

For the expenditure of the money to be worth while, the working atmosphere in the industry has to be improved. Those who were critical of the strike strategy into which the National Union of Mineworkers locked itself might, I suppose, have expected that the factor that would militate against getting a better atmosphere in the industry after the strike would be the attitude of the majority in the NUM —those who resented the fact that others worked during the strike and disagreed totally with that strategy. It might have been expected that the real difficulty would come from that quarter, and that many problems would be faced in many pits, with some of the ghoulish threats uttered during the strike being carried out, and with men being prevented from working after the strike because they had worked during it. But I think we all know that that is not what has happened. Many of those threats proved to be as empty as they were foolish.

Unfortunately, there is now another problem, and it is being created by the NCB itself. In many areas of the industry, the board is in two ways preventing the establishment of the atmosphere that it needs to have in order to get the industry back on its feet. The first is the board's handling of the sacking of miners who were accused of vandalism or violence during the dispute. It is beyond argument that the board's handling of the matter has caused sufficient concern for criticism to extend far beyond those who supported the strike or who are associated with the coal industry. It includes church leaders, chief constables and others who express reservations and doubt about the board's attitude. The difference in attitude between different areas of the board illustrates that it is possible to handle the problem in better ways than has happened in some areas, notably in Scotland. Unless there is a pulling back from the collision course on which the NCB is involved in certain areas, the re-establishment of a decent working atmosphere in the industry will not be possible.

Secondly, the NCB has given the impression that it is seizing the opportunity provided by what for the board was a successful outcome of the strike, to bypass and avoid any procedures which will in any way slow down the process of closing collieries. I say that despite partly sharing the view of both the NCB and the Government that some parts of the industry's capacity are such a drain on it that they represent an obstacle to the future success of the industry.

There are pits which have to be closed, but in recent weeks the NCB has made it harder for the right atmosphere to be created in which the industry can be restructured and get going again. Various devices have been used. The excuse has been used of damage done during the strike. The claim has also been made that a colliery is not being closed but de-manned. For example, Bates colliery in Northumberland is not being closed, but voluntary redundancy and the opportunity for miners to go elsewhere are bleeding the colliery of its labour force. It will reach the point where it has no future.

Mr. Jack Thompson (Wansbeck): Bates colliery announced on 22 May that it is to close.

Mr. Beith: I was using the original decision of the National Coal Board about Bates colliery to illustrate that there is more than one way to skin a cat. Initially, it avoided announcing its decision to close Bates colliery by using the redundancy procedure to reduce the number of men working in the colliery so that closure would eventually become inevitable. That procedure was widely and understandably seen as bypassing the review procedure. The new NACODS dispute is precisely about that issue. A union which adopted a highly responsible attitude throughout the dispute is now involved in a separate dispute over colliery closures. It demonstrates clearly that the NCB has handled this aspect badly, too. Unless the NCB pulls back on both those matters, the opportunity to get the industry going again will have been lost.

There must be investment in the future of this industry. As I argued at question time on Monday, there is no sense in closing collieries with high production costs unless one creates capacity with low production costs. Therefore, it is essential to open collieries in areas which provide such an opportunity. I argued that coastal collieries in the north-east would provide that opportunity. The Minister has been to Ellington recently and has seen what has been achieved there. I have pointed out to him that, if another colliery were to be opened at Amble, more opportunities of that kind could be provided. Such collieries would provide employment in that area and they would also be within daily travelling distance for men in Blyth who have lost employment opportunities through the closure of Bates. They would also provide employment for men in other parts of the north-east. We must invest in new capacity in order to create a competitive future for the industry.

We must also invest in the communities which will suffer as a result of closures. That is why it was right for my right hon. Friends the leaders of the Social Democratic Party and of my own party and also for the hon. Member for Midlothian (Mr. Eadie) to argue that the scale of investment in NCB (Enterprises) Ltd. must be much higher than the Government have conceded so far. The pace of development of that organisation must be sufficient to ensure that it can make effective use of much bigger financial investment.

The coalfield communities are ready to take up every opportunity and to explore every avenue in order to provide help where it is known that closures are to take place. Differences about the strike strategy have been set aside in the colliery communities. People who adopted different views during the strike are getting together on the principle that, whatever happens, they must work for new employment to be provided in those areas where closures are to take place. The NCB and the Government must match that determination by investment in communities whose future will not lie in coal mining. It is a tremendous task, but if it is not undertaken the social damage caused to a crucial part of our nation will be enormous.

11.9 pm

Mr. Jack Thompson: It is a pleasure to follow the hon. Member for Berwick-upon-Tweed (Mr. Beith). I should like to refer to a few of the points that he has made and follow them through. They relate to the expenditure of £1·2 billion that is provided for in the Bill. Having worked in the industry for many years, I believe that this considerable sum of money ought to be used in a slightly different way from that suggested by the National Coal Board. The NCB can be criticised for the way in which it has spent the money that was made available to it in the past.

I hope that the hon. Member for Berwick-upon-Tweed and my hon. Friend the Member for Blyth Valley (Mr. Ryman) will allow me to move into their constituencies, because my constituency is between the two. I have only one colliery left in my constituency, and in the whole of Northumberland, since 1947, we have gone from having 70 pits to five. I accept that some were closed under a Labour Government, but most of them were closed because of exhaustion. It is a very old coal field—the Romans took coal from it, and we have taken coal from it ever since.

Some of the collieries that were closed are now being open casted. The economic argument about that is fair and reasonable—one can argue the pros and cons of open casting certain coal or continuing to deep mine it. My constituency has the biggest open cast site in the whole of Britain but the coal that is being taken is the residue left when the collieries closed.

The hon. Member for Berwick-upon-Tweed spoke of the coastal pits, which are a different proposition. Some time ago, a colleague of mine was sitting on the same Committee of which I was a member. He was unaware of the facts of the coal industry. I spent 20 minutes trying to convince him that we took coal from under the sea, but I did not succeed. Many people are not aware that one can extract coal from the sea bed. It is common practice on the north-east coast.

In the constituency of the hon. Member for Berwick-upon-Tweed, Lynemouth colliery used a particular technique for working under the sea called a board and pillar system. In that, one uses coal pillars in the working to support the sea bed. The planners decided to carry out total extraction. Some of the coal fell behind the face workings and caused a spontaneous combustion. There was a fire, and the southern part of the mine was closed. Before the fire started, the chairman of the coal board said that the mine had 80 years' worth of reserves left. The workings of the southern part had to be flooded to prevent the fire from spreading. The mine was closed in 1983, with the loss of 500 jobs, although some of the men were redeployed.

Those jobs were not lost because of the inefficiency of the miners, who at that time had the record for productivity, in a profitable pit. During the strike, the illusion was given that where mines were being closed because they were uneconomic, that was the fault of the miners. It was not. It was because of poor geological and dangerous conditions, bad management and planning and so on.

Another reason is the definition of uneconomic pits. Last week, the Minister visited a mine that in 1950 was not worked because it was held to be uneconomical. The coal was available to the private mine owners, but they did not use it. However, the coal could be used for power stations, and after the second world war, the demand for that market began to build up, and the pit became economic. Now, the workings are six miles out under the North sea and about 1·25 million tonnes of coal a year comes out of the pit.

What will the future give us? The Bates colliery, in the other side of my constituency, in that of my hon. Friend the Member for Blyth Valley, has about 29 million tonnes of coal, again under the North sea. The NUM has not said that—the NCB has. Apparently, no consultation was made about the closure of that pit. That situation—and I refer again to open cast—is not a possibility. The coal reserves will be written off completely. The mine must be closed. It is six miles under the North sea. When that colliery closes, the working and the reserves that are left will be flooded and lost for ever unless at some time in the future another King Canute can push back the North sea. With those reserves having been written off and with new technology coming along and new developments almost daily in the coal industry, we have to look to new markets in the future.

I will be interested to hear the Minister's comments about how much of this £1·2 billion will be invested in experimentation and research into issues like gasification of coal, liquefaction of coal, the fluoride bed combustion systems and new techniques and ideas as to the ways of using coal. In my view, future generations will look rather askance upon that pit closure and the loss of those coal reserves, given the views and attitudes of the current intake. We cannot in future afford to write off the coal reserves that we are writing off these days in the old mining areas. It is too much to give away. It is a sheer waste.

I am somewhat sceptical about the proposals that are being put forward now in terms of opening new mining areas such as the Selby coalfield and areas in Nottinghamshire and Derbyshire at the expense of the old coalfields. some of this coal can be economically worked. At the Bates colliery in February 1984, before the miners dispute, there were discussions about reducing the manpower and about the new equipment that was available. Experimentation had taken place in that colliery because of the bad roof conditions, and there was success in coping with the conditions. Just over one year later in May 1985, the divisional director of the coal board made an announcement that the colliery was going to close. What had intervened, of course, was the miners dispute. One wonders whether it is a question of revenge or victimisation in terms of the attack, as I would describe it, upon the miners who work in that colliery.

We have to consider carefully the value of the coal industry as a whole. I read in a recent report produced by an independent source that the demand for coal in the next 15 to 20 years will go up because the other resources are going down. The other facilities of oil and gas, but excluding nuclear energy, are going down, so there are two options, coal or nuclear energy. Massive resistance is building up in the country towards nuclear energy, so we are left with coal.

11.17 pm

Mr. Fallon: The last two speeches reflect the widespread concern of all parties with regard not only to the resources that have been provided under the Bill but

[Mr. Fallon]

to the way in which those resources have been allocated in the past and the way in which they are likely to be allocated by the board and by the Government in future.

I have to disappoint the hon. Member for Berwick-upon-Tweed (Mr. Beith) in that I never had any intention of voting against the Bill tonight, but I should certainly vote for it with greater confidence if I were clearer about the future of the industry for which these resources have been provided.

While the scale and scope of the industry—and this point has been made by Opposition Members—remain so uncertain, and while its ownership, structure, management and marketing remain more or less the same as they were when it was established nearly 40 years ago, I cannot see how we can offer those who work in the industry any longer-term guarantee of job security and satisfaction under the new arrangements than we were able to offer them under a loss-making nationalised industry in the past.

I fully understand why my hon. Friend has been unable to go into these matters during the long and tragic miners' dispute or, indeed, during the passage of the Bill, whose primary purpose obviously is to restore the finances of the board as a consequence of that dispute. However, I hope that when he sums up, or in some future debate, he will give us some inkling of the Department's longer term thinking. I should like to know, for example, what is happening to the sensible recommendations that were made by the Monopolies and Mergers Commission in its report in 1983; when the review of the opencast operations is likely to be completed, and what the implications are for the licensed operators and local authorities; when the small mines are likely to be further liberalised; and, above all, what steps can be taken to give the miners a much more genuine and realistic stake in the industry.

11 pm

Mr. Frank Haynes (Ashfield): To a certain extent, I sympathise with the Minister. I believe him to be the piggy in the middle. I have heard the Secretary of State and the Prime Minister say from the Dispatch Box — not so much now, but in the past two years—that uneconomic pits must close.

I sympathise with the Minister because he is not really party to that decision—he must, as the Minister with responsibility for coal, just get on with it. I give him credit for having got around the industry. He has been to see what it is all about and how it works. Recently he said that he had visited a certain pit. Indeed, in Committee he said that he had made visits to other pits. He has even been to a school for Nottinghamshire miners, talking to them about the mining industry.

The Minister knows as well as I do that I and many of my colleagues worked for many years in the mining industry, and we experienced the bad old days and the good days. Many of us were responsible for setting up first-class industrial relations in the industry — and it worked. The miners participated in all decisions at local, area and national level. That has been destroyed by the Government's policy on the energy requirements of the nation.

The real problem is that bloke from America. The sooner that we return to proper discussion about where the mining industry is going, the better we will all be. But we need to get rid of the shackles. Make no mistake: the men in the industry will not play ball with a deceitful chairman of the NCB dictating to the board, the area directors and the men. My hon. Friend the Member for Midlothian (Mr. Eadie) was correct: the chairman is walking over everybody. The Secretary of State and the Department are allowing that to happen. That can go on for so long, but then it will blow up in his face. There is ill feeling in the mining industry at pit level.

I wonder who is in charge. I have listened to Ministers and I have read some of the things that the chairman of the NCB has said, and I am convinced that he is walking over everybody. It is time that he went. I am sure that the Minister believes that in his inner self. We must return to some normality.

The Government are living in cloud-cuckoo-land if they believe that the mining industry will break even in 1986-87. It will not work. I worked in a big hitter with a production of 1 million tonnes a year and big profits, but it had a bad year with low production and its profits disappeared. That can happen to any highly profitable pit at any time. I can remember that when we went back after our fortnight's holiday the pit was never normal. We lost strip after strip of the coal face before we got back to normal. Sometimes it took a month.

The hon. Member for Darlington (Mr. Fallon) had the audacity to submit amendments to reduce the amounts proposed by the Government. He has not got a clue. He is talking about finances and not about pit production, pit communities or how the industry works. He does not know the facts. If he had had experience in the mining industry, he would not have submitted those amendments. He would have had a completely different point of view. My hon. Friends and I are expressing views gained from our experience in the mining industry over many years.

The break-even policy that is proposed is almost unachievable. Two or three years ago the Prime Minister withdrew a long list of proposed pit closures. The hon. Member for Darlington was not here then. More money was given to the National Coal Board to help it on its way. Those pit closures were not carried out. Many were withdrawn after argument from this side of the House and also from the Government side about what the Government wanted to do. If the Government intend to follow that policy now, they will achieve their figures, but, as my hon. Friend the Member for Pontefract and Castleford (Mr. Lofthouse) said, they will destroy mining communities and put more people on the dole.

It is all right to talk about the redundancy money that will be provided, but that is not the be all and end all of it. A pit in my constituency is to close within eight weeks. Just down the road in the Broxtowe constituency another pit is to close at about the same time. Those pits are not far apart. When they are both gone there will be no other employment in that area. In the past when the youngsters left school they went to those pits, but they will not be able to do that in future. Where will all those youngsters get jobs? What will we do with the youngsters who cannot get work in that area?

The Government may talk about £10 million enterprise money. When I heard that those pits were to close, I went immediately to the chief executive of the district council to get him to apply for enterprise money. I knew that the board had made up its mind, with the agreement of the trade union, to close the pits; I must admit that the union had agreed.

There will be no jobs for the kids leaving school unless additional or alternative industry is brought in.

There does not seem to be any reaction; I have not heard a word. This has been going on for weeks. I am waiting for the chief executive to tell me what will happen. The board representative has been in the area, but we are still waiting to hear what will happen. No action has been taken and the closure is only eight weeks away.

The Government and the board need speeding up. The £10 million will go nowhere. We need much more money. What worries me more than anything is from where we will get the coal when we need it if the Government and the board get away with the pit closures that they want. I can remember the days, which are not that long ago, when we could not produce enough coal to supply the nation's industry. What did we do? We imported it and affected the balance of payments. I believe that the extension of nuclear power is behind the Government's thinking. That is what I believe is wrapped up in the Government's policy.

I have a good memory and I remember the Prime Minister talking about 10 new nuclear power stations. Other people might have forgotten that, but I have not. I have remembered it because I believe in the mining industry and the country's energy requirements.

If the Government want to expand nuclear power, they had better have another think because people are reacting against such policies. The Sizewell proposal has been going for a long time and still has not been agreed. Inquiries go on and on. It is all right to accept a pressurised water reactor which people in the United States will not accept because of what happened at Three Mile Island. It is said, "Let them dump it on our shores because we will have it." We need only one mistake because we are a small island. We shall be in one hell of a mess with the problems involved with nuclear power.

I hope that I have spelt out my feelings about the Bill. I am not rejecting it; I am accepting it because it means more money for the industry to help it on its way. The Government must think again about the nation's future energy requirements. We shall need every cobble that we can produce in the future. If we do not have the pits to produce those cobbles, the future speaks for itself.

I am trying to look at the matter sensibly. I am not a Luddite. I have worked in the industry. I know how it works. I understand it from A to Z. I have worked on every job underground. I know what I am talking about. I have served on numerous committees to discuss progress with the National Coal Board and any face that we should stop. Before we stopped one face, we opened another to replace it so that the men could transfer.

The board guarantees a job elsewhere to any man who wants to stay in the industry when his pit closes. The Minister did not say at the Dispatch Box or in Committee that if a coal face worker on £200 a week transfers from a pit that is to close to another he will enjoy that £200 a week at the other pit. That man has a reduction in his standard of living. There is an agreement whereby he is protected for 12 months, but after that if he is in a lower paid job he is on lower earnings. People are thinking about that again. It is an encouragement for them to take redundancy. The manpower therefore decreases. That is what the board and the Government want. The result will be that we shall be short of the coal that we shall need desperately in the future.

I do not know how many times I have said that the Government have closed down industry. That is why they are not calling on coal for their energy requirements. The Minister says that slowly but surely industries are returning and they need coal. What will happen when industries clamour for coal, which is the cheapest fuel that we can provide? From where will the Government obtain that fuel? We shall import again. The Under-Secretary of State shakes his head. We have imported before and, if we are not careful, it will happen again.

I am putting over this message in the best way I can. I know what I am talking about, and that is why I felt that I had to make this speech. I played a part in Committee. Some answers were given, but some questions were not answered in the way hon. Members required. There were difficulties in some matters, and the Minister was not able to give the requested answers. I understand that, because we have been told that we cannot have the answers to questions that we have asked about welfare benefits. I understand what is going on in the Government's mind and why they are deceiving the workers in the industry and the nation generally about the mining industry.

I wanted to be brief, but I have not been. I am sorry about that. I wanted to get this off my chest. I wanted to remind certain Conservative Members—not the Under-Secretary of State, because I do not think that he believes this—who believe that we are a load of rabble and Luddites who are just having a go at the Government that we have thought this matter through sincerely. The Government are going in the wrong direction. The NCB is also going in the wrong direction, but it is supposed to be under the direction of the Department of Energy. That is not true. It is the other way round—the NCB is running the Government. I hope that there will be a change. I hope that the Government will get the message that the NCB will have great difficulty in achieving the objectives that the Government want the industry to achieve. I hope that at some time the Government will accept what is said and will change their mind so that the coal mining industry will flourish and we shall produce every cobble of coal that is required. It is a matter not just of the United Kingdom's requirements but of winning overseas markets.

11.37 pm

Mr. Gerald Howarth (Cannock and Burntwood): I hope that the hon. Member for Ashfield (Mr. Haynes) does not feel that Government Members have any doubt about his sincerity. Those of us who have listened to him in debates over a number of months recognise that he speaks with great sincerity. We certainly would not class him as in the rabble-rouser category. However, I preferred his style of delivery tonight to his previous style. The sotto voce approach is more compelling than the megaphone-type amplified argument that we have heard in the past.

I disagreed with much of what the hon. Member for Ashfield said. I hope that, as we accept his sincerity, he will accept the sincerity of Conservative Members which has been well articulated by my hon. Friend the Member for Darlington (Mr. Fallon). My hon. Friend has spoken for a great many Conservative Members who, throughout the life of this Parliament, have felt great concern about the level of public expenditure. We have had great debates on a succession of issues. There were, for example, many outcries and great agonising about the savings of £39 million in the education budget. Tonight we are talking

[Mr. Gerald Howarth]

about expenditure of £1,200 million in the current financial year and possibly £800 million in the next financial year. I know that Opposition Members accept that those are substantial sums. Therefore, I hope that they understand that Conservative Members who express views about the Bill are interested in the industry but are also interested in the wider issue of public expenditure and the need to curtail it, and the need to ensure that the industry gets back to financial equilibrium so that we can allocate resources to other areas. To spend this volume of money on one industry is to concentrate resources somewhat unhappily, when there are so many other claims on the public purse.

Although much anxiety has been expressed by Conservative Members, we welcome the commitment made by my hon. Friend the Minister tonight to ensure that the board makes every endeavour to meet the targets that have been set. I sympathise with the suggestion of the hon. Member for Ashfield that the target of reaching a balance by 1986-87 will be hard to achieve, but I wish my hon. Friend and the board every success. We shall give them every encouragement to do so.

There has been much rhetoric from Opposition Members about the destruction of the industry. However, the figures prove that the Government, far from being anxious to destroy the industry, have demonstrated their commitment to it by the sheer size of the grant that we are discussing. A comparison of this sum with the amount that was spent by the Labour Government makes it clear that the Government have committed themselves to the industry with a large slug of taxpayers' money. In 1978-79, total grants were £172 million; in 1983-84, the figure was £1,146. Those figures demonstrate clearly the concern of the Government, especially when they are set against the Government's determined efforts to restrain public expenditure. It is not true that we are talking about the destruction of the industry.

I understand how Opposition Members and the mining communities feel about the destruction of communities where the one industry is the pit. Since the war, in my constituency, 10,000 jobs have gone from the coal industry, and not one day's strike has been undertaken over those losses. I accept that, in the past, in the west midlands there have been other jobs to go to, and that that is not true of localities where, if the one pit closes, there are no other jobs. However, in some areas, major employing industries have closed, and those affected have not had the same privileges as are available to miners who have been made redundant.

The £10 million that has been allocated to NCB (Enterprise) Ltd is a fairly modest amount when compared with the sums that we are discussing tonight. If the board can live within the £800 million target, the amount by which it can do so might go some way towards increasing the money that will be made available to the enterprise scheme to enable communities that are adversely affected to set up industries, a good example of which is Corby. I make that positive suggestion to my hon. Friend, which he will not be able to deal with now, but which I hope he will bear in mind.

We should all be glad if the industry could live within the proposed limits and thereby make funds available to the enterprise scheme.

In 1978-79, £17·6 million was spent in redundancy payments. That figure rose to £202·1 million in 1984.

Mr. Hardy: There were more redundancies last year.

Mr. Howarth: I accept that, but the sums have increased considerably. It is also important to note that the rates have also increased considerably. Many of my constituents look longingly at people in the coal industry who have been able to take voluntary redundancy and who have received large sums and continuing payments. Such facilities have not been made available to people in equally important industries. I hope that those who have been made redundant understand that they have been accorded something that has not been available to any other group of workers. That in itself is a tribute to what the Government have done for the industry. Opposition Members must recognise that the sums available to miners have increased. I hope that they accept that that is not a sign of destruction.

The hon. Member for Midlothian (Mr. Eadie) mentioned victimised miners. There are working miners in my constituency who suffered victimisation and continue to suffer victimisation, even in pits which worked throughout the dispute. I hope that he shares my anxiety for those who have received pretty rough treatment from some of those who were not working. It would do his cause no end of good if he associated himself with that sympathy.

11.47 pm

Mr. Hardy: The hon. Member for Cannock and Burntwood (Mr. Howarth) should recognise that, although there might have been redundancies and closures under Labour in the 1970's, they were uncomfortable and were like a bad cold which required medication. We now have amputation and provision for redundancy, however generous, can be described as an anaesthetic. When that anaesthetic wears off, the amputation remains. Our anxiety about extensive closures and redundancies concerns their crippling effect on our communities.

There is and must be a continuing obligation. In the 1950s, the 1960s and possibly before, those of us who felt that there should be economic diversification in the coalfields found obstacles because the NCB, which then paid much lower wages than it did after the 1972 and 1974 strikes, was fearful of losing manpower. The nation was therefore protected at the cost of inadequate diversification in the coalfields. That is why, when pits in our constituencies close today, there is little other work for our young people. It is right to treat their fathers, elder brothers and uncles decently, because they will never work again and we must be worried about the waste of men in their forties or early fifties, but our main concern is about the boys at school today. They will lack jobs and purchasing power. The lack of development of other industries and the creation of economic capacity will threaten the prospects of their sisters and brothers who would not work in the pits.

We shall not oppose the Bill, but I hope that the Minister has detected the latent optimism in the speech by my hon. Friend the Member for Ashfield (Mr. Haynes). I share that optimism, despite my fears. The Minister will be optimistic about the prospects for the industry — about the 12·5 million tonnes capacity for Selby and the 12·5 million tonnes capacity from investment in and

reorganisation of existing collieries which will allow the board to produce coal more cheaply than it can from existing pits which are limited by their age.

If Selby and Belvoir go ahead and existing collieries are reorganised, coal will become much more competitive. If the Government pursue an intelligent energy policy they will seek to draw back into the coal market the 1,000 or more firms which could return to it. If that happened there could be a shortage of coal by the 1990s, despite the astonishing stocks which were built up before the dispute.

Some Government Members are prepared to go to the world market to buy coal at its cheapest, but international coal prices might not always be lower and Britain might not always have the oil revenues to enable us to buy abroad. National strategic interest requires us to match our coal demand with home produced supplies.

I hope that the Minister will resist pressure from hon. Members such as the hon. Members for Darlington (Mr. Fallon) and for Cannock and Burntwood to ensure that we have the capacity to stand firm, meet our needs and save our overseas expenditure when the oil and gas have gone.

The lead time for the development of new power stations is long. I hope that the Government are not foolish enough to go along the PWR course, against which they have been warned, but we must be careful not to require the Minister to curtail support for the NCB if Government Members persist.

The basic reason for the large stocks of coal before the dispute was as much to do with Government economic policy in discouraging industrial activity and creating 4 million unemployed as through any fault of the NCB. Coal is a basic industry. If the economic infrastructure does not allow that industry to be profitable, it will feel the cold first and be relieved of it last.

I am delighted that the Government have recognised that the coal industry is important and must continue. I trust that the Government will ensure that the capacity of the industry is sufficient to serve the nation's needs when our oil and gas resources are diminished , and to provide the coal required for the basic chemical feedstock for industry.

Closing a steel works such as that at Corby to develop a funfair might be right in the short term, but we have to create wealth as well as spend it. If we are to retain a national capacity to create wealth, we have to retain a national coal industry of considerable size, although the hon. Member for Darlington, may not feel that to be a particularly reasonable proposition.

I am relieved that we have been discussing the Bill in recent weeks, because it has given many of my hon. Friends and I an opportunity to make public comment on matters that are exceedingly serious. Recent experience has probably given some reason for the Minister to accept that the views that we expounded in 1983 and the first weeks of 1984 were probably wiser than they were seen to be at the time. It is a pity that the 1984-85 coal dispute occurred and that that enormous cost was incurred—it could have been avoided. The experience since that strike ended has demonstrated the point that several hon. Members on both sides of the House have made in recent weeks, that the NCB's conduct since the strike has been unwise, there was an absence of magnanimity when it would have been entirely profitable, and there was a deceit, which was utterly contemptible, with regard to the agreement that was made with my association last autumn.

The Minister is aware of that, as are some other Conservative Members. In Committee, one of them described the coal board's behaviour as ham-handed and stupid. So it has been. It may have been worse than that. Conservative Members realise that last autumn my association was persuaded not to go into dispute with the board although it had secured an enormous majority for that purpose. The board came along and made an agreement that the Prime Minister described as sacrosanct. We have had some embroidery of the word, of its meanings and limitations, in the past few weeks. Repeatedly, Ministers, including the Parliamentary Under-Secretary, in all good faith at the Dispatch Box, gave absolute and categoric assurances that that agreement stood. As soon as the National Union of Mineworkers' dispute appeared to end, the NCB decided, in my view deliberately, that it could ride a coach and horses through that agreement. That is no way for a public or even a private sector company to behave, to breach such agreements.

There have been further costs in the industry as a consequence of the industrial action taken by NACODS. It reached the view, as a result of a democratic exercise, that it could no longer trust the NCB, and was being treated with contempt. It believed that the agreement into which it had entered in all good faith and which I believe the Government had accepted with an element of integrity was treated with contempt by Hobart house.

The Minister may know as much as I do at this stage. I hope that the comments that have been made today will lead to a restoration of stability in the industry. I do not know whether that will happen. Much will depend on what happens next week. I do not know whether the Bill will come back to the House as their Lordships might not feel disposed to amend it. I hope that the Minister will use all the influence that he can bring to bear to ensure that when the NCB and the unions meet next week, the modified procedure will be established.

I know that the NCB does not particularly like that procedure. One reason was touched on by my hon. Friend the Member for Wansbeck (Mr. Thompson). As many of my hon. Friends who spent many years in the industry will know, miners have said repeatedly that sometimes in the past the NCB deliberately underinvested or misinvested to secure the failure and therefore the closure of a colliery that it wanted to get rid of. When they were in the pit, my hon. Friends knew a lot about the industry, and could have drawn attention to misinvestment or erroneous management by the NCB. The Minister may have formed the view over the past year or two that the coal board has its imperfections. It may be that there is some value for the community in the unions within the industry having that early warning capacity which is built into the agreement which the Prime Minister said was sacrosanct. I trust that that procedure will be rapidly established and that the NCB will be kept to the promise which it repeatedly made. Ministers have repeatedly referred to that procedure in the House and outside, but it now seems that by trickery and deceit the NCB is trying to find ways around the commitments which Ministers have properly and honourably made.

Our concern is that a coal industry must be retained. There are prospects for that industry of real size and importance, and we should not make short-term calculations which will bring long-term disadvantage.

[Mr. Hardy]

At the same time, the fears that I and my hon. Friends have expressed about our communities are very real. Some Conservative Members sometimes imagine that the threat is merely to a few collieries in the peripheral coalfields. There is often talk about retaining capacity in the central area. The area of my hon. Friend the Member for Pontefract and Castleford (Mr. Lofthouse), who made an important speech, is part of the central Yorkshire, Nottinghamshire and Derbyshire area. So is my own constituency and that of my hon. Friend the Member for Ashfield. I understand that later this week the south Yorkshire area will be told its fate.

If there are pit closures in my area, it will be at astonishing cost, because unemployment rates in parts of my constituency where such closures are possible are as high as anywhere in Britain, and whose closures could mean unemployment rates that are higher than in parts of Northern Ireland. If any Conservative Member thinks that the trouble in Northern Ireland is entirely religious in its basis, and that it has nothing to do with the appalling and obscene levels of unemployment there, he is guilty of extremely shallow and superficial consideration. Therefore, the need to invest in our areas to create the economic opportunity that is essential if we are to give hope to our young people is overridingly important.

I have looked at some of the documents provided by the coalfield campaign. This is a serious attempt to have a mature and sensible debate in order to escure economic steps that will give sustenance and succour to our areas. One of the studies carried out by Mr. John Winterton of Bradford university—I do not think he is any relation of Conservative Members of the same name—appears to recognise that 80 pits could be closed and 180,000 jobs lost within two or three years.

I calculate that if some people in the NCB have their way — those responsible for stimulating rumours to engender a new fear in the coalfield in recent weeks— my own area could see 5,000 coal jobs go within two or three years. One of the local newspapers has tried to telephone me because it cannot believe those figures, but I gather that it has looked at the possible pit closures in the locality and worked out that the total job losses would be slightly less than 5,000.

The Minister and my hon. Friends who represent mining communities are aware that redundancies do not occur only at collieries that are closed, because automation and change is taking place, and job contraction, even at successful collieries, is proceeding apace. I cannot set foot out of my home without encountering people in Wath upon Dearne where I live who are accepting redundancy.

On Saturday afternoon I got out of my car in the centre of Wath and the first man to whom I spoke and whom I have known all my life said that he had accepted redundancy and was leaving the following week. Another man for whom I have enormous respect, who is the sort of man that Conservative Members, who were slamming the mining communities last year, would not recognise as a miner, who is a devout member of the same church as me and who has run our scouts since he left the airborne forces after the war has also accepted redundancy. Neither of them are at pits or coal board establishments, which face imminent closure. Thousands of men have accepted redundancy or early retirement since the end of the strike.

Mr. Geoffrey Dickens: I do not blame them.

Mr. Hardy: Nor do I. If a man has spent 40 years or more underground, he deserves the generous treatment that the constituents of Conservative Members may question or criticise. We do not object to our constituents who have worked for 40 years being treated decently at the end of their labours, but we are worried about our communities. We are not prepared to see our communities destroyed, young people who should be entering employment with verve and hope without any, or villages unable to offer even one young person an ordinary job. In Dalton Brook there is not a boy, girl or scarcely a teenager in normal employment—I checked recently.

If Conservative Members think that our society can survive that sort of experience for long, they are idiots. They may not think that it matters because we are in the Labour part of the country. They may think that they can maintain power by dominating the political representations of England, or the southern two thirds of England, but this island is far too small to suffer that for long. The Conservative party cannot run Britain without recognising that sooner or later it must command respect in Scotland, Wales, Yorkshire, Northumberland, Durham and the other areas which in the past have created the great wealth that the southern areas have cheerfully spent.

It is time that the Government understood that our communities will not allow their young people to face an utter and complete blight. I cannot accept that my constituents should be in that position, nor can hundreds of my hon. Friends. The Government must act with wisdom now. The Bill suggests that there is the possibility of wisdom. I deeply resent the fact that the modest display of wisdom in the Bill is being criticised and carped at by Conservative Members, who may be articulate, but who have not displayed a scrap of wisdom, which the country is entitled to expect from its Parliament. I hope that the Minister will reject his hon. Friends' criticisms, and that he will ensure that the coal industry is sustained. I hope that he believes that the coal industry, is, has been, and must continue to be important in providing energy for the United Kingdom. For that reason the Bill is necessary.

It is necessary to provide adequate funds for the NCB to serve a proper energy policy and—no hon. Member should have to say this in the House now — for the industry and its chairman to recognise that the sooner we return to decent relationships in the industry and the sooner that the legacy of deceit and dishonesty, and the contempt for sacrosanct agreements of recent weeks is put behind us, the better.

If the chairman or deputy chairman of the NCB is not prepared to recognise that their conduct in recent weeks has been contemptible, I suggest that it is time that the Prime Minister was told very clearly by the responsible Ministers that her choice, Mr. MacGregor, has cost Britain billions of pounds and brought an industry which has an important future into a disorder that should not have been experienced. The sooner those two gentlemen change their ways, the better. If they are not prepared to change their ways, the sooner they go the better it will be for Britain and our coalfields.

12.11 am

Mr. Andy Stewart (Sherwood): I do not wish to detain the House any longer than is necessary, because it knows my commitment to the coal industry over the past two years.

I should like to reinforce some of the comments made by Opposition Members about the low morale in the coal industry today. It is lower than it has ever been in the past 40 years. I know that the Minister has taken a personal interest in going round the coalfields, and trying to reassure the miners in those coalfields that they have a viable and long-term future in the industry.

I should like to take issue with my hon. Friends who think that a deficit grant to the coal industry is a subsidy to those who work in the industry. The coal industry, like the agricultural industry, is given subsidies and deficit grants for the benefit of the customers and consumers of its products. We should not forget that.

I welcomed the Minister's commitment in Committee to NCB (Enterprise) Ltd., and I was delighted that the clause asking for £50 million was withdrawn, because the Minister said that, whatever was required to make new jobs available for the areas where pits were to be closed — whether it was £15 million, £50 million or £100 million—the money would be available if the case was made out. If, as the hon. Member for Ashfield (Mr. Haynes) said, the chief executive of his district council has been in touch with the NCB with regard to the setting up of new enterprises and has had no reply, I agree that that delay should be ended at once.

12.12 am

Mr. Allen McKay (Barnsley, West and Penistone): The hon. Members for Darlington (Mr. Fallon) and for Cannock and Burntwood (Mr. Howarth) talked about the money side of the Bill. The hon. Member for Cannock and Burntwood mentioned redundancies and the sheer cost of the Bill. I am pleased that they did not have to live through the 1940s and the 1960s in the coal industry, when many difficult problems arose. Had they lived then, they would have known that, in the 1940s, the coal industry suffered hundreds of losses, and willingly so, because the men in the industry, believing in nationalisation, which had been championed for many years by Members of this House, realised that they had to slim down the industry to make it viable after the owners had wrecked it.

When there was a market for coal, and when coal could have commanded any price in the market, the miners sold their product well below the market price because they were asked by Parliament to do so for the benefit of the country. Therefore, it is only justice that the money that should have been theirs at that time should now be returned by the grants to the industry. Had they been able to sell coal in the market in the way that Conservatives always like to advocate, the money from those sales could have been invested, and there would now be no need to provide money for the industry.

When my hon. Friend the Member for Ashfield (Mr. Haynes) referred to the importing of coal, he noted that the Minister was shaking his head. If the Minister shook his head about the importing of coal, that is a step forward. if the Minister knows that coal imports are not to be increased, he must also know what the ultimate size of the industry will be. The Bill gives every indication of a massive rundown of the industry. As the new capacity in Selby and Belvoir comes on stream, there will also be the advent of MINOS. This system has been brought to perfection in various coalfields and will result in completely automated pits. The restructuring of the coalfields in the Barnsley area will result in a 21 per cent. increase in output and a 20 per cent. reduction in manpower. It means that we shall be facing not a manpower loss of 20,000 but the closure of 80 pits, and that 70,000 or 80,000 men will be made redundant.

The recent strike was all about the contraction of the industry and the resulting fight for jobs and the preservation of coalmining communities. About 54 local authorities, all with a common interest, have now got together. They represent 16 million men, women and children, 1·16 million unemployed and 254,000 businesses. That is the size of the coalfield community campaign. They are looking at ways and means not only to save the industry but to bring alternative employment to those areas. By creating 3,000 jobs, Barnsley took a step backwards. The recent review showed that the closure of the Darfield main colliery and the restructuring of the coalfields in the Barnsley area would mean the loss of exactly the 3,000 jobs which it had taken Barnsley five years to create.

The story does not end there. It is only the beginning of the closure programme. My hon. Friend the Member for Wentworth (Mr. Hardy) referred to a fuel policy. I wish that we had the co-ordinated fuel policy for which we have asked for many years. That is the only sensible way in which to deal with the use of energy. We were close to having such a policy when the British National Oil Corporation and British Gas belonged to the nation. The Government have decided that they will no longer belong to the nation. That is a backward step in the effort to create a co-ordinated energy policy. Only with such a policy will the energy resources of this country be used sensibly. Instead, we shall be producing as much oil and gas as we can as fast as we can, not only for home consumption but for sale overseas. This means, that unless new oil and gas fields are discovered our oil and gas reserves will have been depleted by the year 2010.

The closure of 80 collieries means that production will be limited to about 100 million tonnes and will lead to a crazy position. In that period coal should be at a premium, with the gas and the oil running out, and coal should be coming back into its own again. However, we shall no longer have an industry if the Government continue with their intention to decimate the coal industry.

Not long ago, I asked the gas board what it would take to replace the natural gas that customers are now using. It said that 100 million tonnes of coal would be needed, but we shall be producing only that amount. Therefore, where will the coal for industry, for chemicals, for liquefaction and the power stations come from? The energy can come only if we are to import coal on a vast scale, or if the Government have decided on a nuclear energy policy, with gas needs supplied from the 100 million tonnes of British coal and foreign imports.

It is time for a debate on our energy policy, and it is time that the Government came clean about what they are thinking will provide the energy resources for the future. If we run the coal industry down in the planned way, and if gas and oil are to be run independently, we shall leave a legacy for the next generation for which they will not thank us, unless we go flat out on a nuclear energy policy.

My feelings about the chairman of the NCB and his attitude are well known. I have great respect for him as a manager, but that is all. I have no respect for the way that he treated the steel industry, and even less for the way that he is treating the coal industry. When he was chairman of the steel industry, I went to see him about the process of making steel from powdered steel, a process that was

[Mr. Allen McKay]

taking place in a steelworks in my constituency, which Ian MacGregor decided to close. He said that he was closing it because he could make steel more cheaply than by the powdered steel process, which was probably true at that time.

Lo and behold, our competitors from Japan and Europe are now making steel through the powdered steel process, which MacGregor decided was no good for Britain. It looks as though the liquefaction plan in the coal industry, and the fluidised bed experiments are in jeopardy if MacGregor brings to the coal industry the attitude that he had in the steel industry.

The 1939 war started from the Versailles agreement. The next war in the coal industry may start from the treatment of the dismissed miners. I attended two sittings of the Select Committee on Employment when it interviewed the chairman of the NCB in the afternoon and Arthur Scargill in the morning. There was a vast difference in the conciliatory approach to the problems of the NUM —the Minister shakes his head, but I was there for the whole day—and that of the NCB.

The attitude of the chairman of the NCB was belligerent —so much so that the attitude of the hon. Member for Hendon, North (Mr. Gorst), who is no friend of the unions and certainly not a member of the NUM, changed as he questioned the chairman; the Minister can ask his hon. Friend about that. The chairman said deliberately that, as far as he was concerned, the dismissed miners would remain dismissed. His attitude was, "I am the chairman." His distaste for this place, his distaste for politicians, his distaste for being questioned was there to be seen, and he made no effort to hide that distaste.

I spent a period working at Hobart house, and I could not get away fast enough to go back into the coalfields. I do not think that I would like to work there now under the present chairman. Having said what I have about him, I do not suppose that I would get a chance anyway. After observing that attitude, I can understand why the late Geoff Kirk and Ned Smith and others decided to leave.

I want to turn next to the union officials at collieries who, following the central directive, have been sent underground, on which I have views for and against. After 20 years of encouragement by management not to go underground, but to be at their place on the surface to help the manager to quell disputes before they started, it was decided that they should go underground. It was the wrong move at the wrong time. Students who attended day release courses have now been told that day release will finish. That is a wrong move at the wrong time. Members of local authorities who have hitherto been allowed time off to attend council meetings or to change shifts to attend council meetings can no longer change shifts or have time off.

I wish to draw to the Minister's attention the Employment Protection (Consolidation) Act 1978, and I ask him to discuss this with his right hon. Friend the Secretary of State for Employment. The Act is clear:

"The right, available to a relevant employee, is a right to claim time off work for specified public duties. There is no statutory right to pay during absence (though there may be a contractual right) . . . The employer does not comply with his statutory obligation to allow time off merely by allowing the employee to rearrange his duties so that the employee can make up for lost time elsewhere . . . They include the duties of a lay magistrate, a local councillor, a member of a tribunal, a member of various National Health Service bodies, a school governor or manager"

and members of the health authorities, as they used to be.

"An aggrieved employee may make a complaint to an industrial tribunal that his employer has refused to allow him time off . . . It may also award compensation for any loss suffered by the employee or any insult or injury occasioned to him by reason of the employer's default".

I suggest that the chairman of the coal board is wrong in the central directive to say that councillors should no longer have time off.

From the chairman's attitude, it appears that conciliation and consultation will no longer exist within the ambit of the National Coal Board. He seems to be taking the view that that will be replaced by industrial relations tribunals, and that he will have nothing to do with it.

It appears that we are going to rely on imported coal or all-out nuclear power unless the Minister can alleviate those fears by what he has to say in winding up. Those fears would be alleviated if we could be told what is the policy of Government towards the coal board, what is their energy policy now and for the future, what the number of pits is to be and what is to be the output. Unless the Government intend that the economy will remain as stagnant as it now is, where will the extra coal come from when it is needed? Will the Minister also meet the communities campaign people to ascertain how investment will be made in the areas to meet the further closures that have to take place?

12.30 am

Mr. Dickens: I shall not detain the House long as I have the Adjournment debate and I am anxious to get home. I have listened patiently to the debate, which has been a good debate. Almost every Opposition Member has kicked Ian MacGregor and the Government around the Chamber, but there has been no mention of our Mr. Scargill.

I was one of the few Conservative Members who attended the coalfield community campaign meeting. I want to tell Opposition Members a few home truths. represent an area dominated by the textile industry. In many villages and towns the textile mills were the sole employer. Villages built up around the mills and the towns grew from that, as did the outworkers to the mill and those who supplied it. Therefore when a mill closed it was equally as devasting as a pit closure. However, its workers did not get massive redundancy handouts; they did not have the guarantee of a certain job, even if at slightly reduced rates. The mills closed. I know that Opposition Members may say that that is different because the workers could do something else in the mill, but they could not because the mills had been felled to the ground.

I could not listen to Opposition Members kicking the NCB and the Government around the Chamber without their taking any of the blame. I mention the Luddites because Opposition Members said that soldiers had been at the pitheads. Of course, exactly the same happened at the mills, where the soldiers got the looms into the mills when they wanted mechanical means of producing cloth. It is almost a mirror image.

The mill workers did not receive the handouts that have been offered to the miners. I make no complaints because Opposition Members have always attended such debates, fighting their corner for their constituencies. That is right.

However, they must remember that the very people in my constituency who were put out of work with no handouts have mushroomed into small businesses that are growing and booming; they are paying taxes that are going towards the redundancy payments for miners and the money that we shall nod through this evening to support the miners. We make no complaint, but we feel rather sore when Opposition Members blame the Government for falling order books.

We cannot produce coal at a price that no one wishes to pay. It is futile to produce coal on that basis. Ian MacGregor was moved into the steel industry, but we must remember that he was No. 2 to Edwardes at British Leyland, which is now in good shape. There would have been no steel industry in Britain if MacGregor had not reduced the manning levels. We had to vote £75 million through this Chamber to buy off some of the workers with attractive redundancy payments. We had to buy a solution. The world was not impressed by the fact that the Japanese used only three men to produce a tonne of steel while we used seven men.

I ordered 5,000 tonnes of steel from BSC and it could not meet the price. I could not win overseas orders on that price and had to go overseas for my steel. If we had a steel industry that could not compete—not sharpen its pencils for competition—it would fail and there would be no steel industry. The Government are wholly committed to the coal industry, but the recent terrible strike was inflicted by the leader of the NUM. Hon. Members shouted at me during Prime Minister's Question Time when I said that he was a Marxist surrounded by Communists. Opposition Members went for me, but I was not far off the mark. They cannot just put the blame on the Government.

Let me give an example of how things slip up. In Northern Ireland they are putting a power station at a lignite mine in County Antrim. If it had not been for the coal strike, Kilroot power station might have converted from oil to coal. It has been delayed, and I hope that in the fullness of time it will be a coal-powered station. As a party we are committed to coal, but we want to see fair play.

Do not let us have tears about the Government and about the National Coal Board. Opposition Members should keep their tears for Arthur Scargill and the way he led them up the garden path. They should fight the corner for their constituencies, but they should fight fairly.

12.36 am

Mr. John Home Robertson (East Lothian): The hon. Member for Littleborough and Saddleworth (Mr. Dickens) is perhaps too honest for his own health or for his own party's good. He was trying to suggest that it is an invigorating and good experience for whole communities to be scrapped and put in the dole queue. If he will not take it from me, I wish he had had a rear view mirror when he was making his speech because he would have been able to see the expression on the face of his hon. Friend the Member for Sherwood (Mr. Stewart) who has a legitimate concern. Some of us wish that he had expressed that concern about the future of the people working in the coal industry during the past 12 months instead of waiting until now to recognise the mayhem caused in the industry by the chairman of the National Coal Board.

Of course the Bill must have a Third Reading. The industry needs the money. I suppose this is part of the payoff for what the Chancellor of the Exchequer saw fit to describe as a good investment. Many of us feel that the money might have been better invested if the Government had reached a settlement a very long time ago. Perhaps not quite as much money would have been required if the Government had not been so obsessed with the need to obtain the kind of victory that they think they have achieved. We should consider the double-edged effort that that will turn out to be.

Several of my hon. Friends have referred to the broader needs of the coalfield communities. I join them in paying tribute to the local authorities who are waging such an effective campaign for the need to develop those coalfield communities which are being afflicted by the contraction of the industry afflicted on them by the Government.

My own constituency suffered from the contraction of the coal industry in recent years and I have some experience of how difficult it is to attract new industries and employment into areas which have suffered cutbacks in mining. Apart from the obvious economic difficulties and problems of remoteness, there is the physical problem of finding places to build factories in areas that have been undermined extensively because of the danger of subsidence.

To pick up a point made by my hon. Friend the Member for Wentworth (Mr. Hardy) and others, what will happen to the future of Britain's energy industry? What future is there for the coal industry? How will the nation find the sources of energy that it will need in the long-term or, indeed, the medium-term future? Our oil reserves will not last for ever. We shall need to tap our coal reserves. I fear that the massive contraction of the coal industry that the Government have in mind could leave us with severe long-term problems. I should like to see developments in areas such as Musselburgh upon which my hon. Friend the Member for Midlothian (Mr. Eadie) did so much preparatory work years ago. We shall need our coal reserves in the future. It is a tragedy that developments are not taking place now when they would be easy.

The Bill must have its Third Reading, but it will not have it until I have had an opportunity to express to the Minister how strongly I feel about the conduct of the National Coal Board and its chairman. If Conservative Members and the Minister are becoming fed up listening to Opposition Members complaining about that, I warn them that they will go on hearing about it over and over again until some fairness is shown towards the people who work in the coal industry.

Reconciliation in the industry is being hampered by the fact that we are dealing with an elderly man who suffers from paranoia. If there were any doubt about that we had only to listen to Mr. MacGregor giving evidence to the Select Committee on Employment two weeks ago when he said that he felt that it was his duty to do some of the things that he had been doing because he felt that he was facing an insurrection. It did not seem like an insurrection from where I was sitting or to the coal mining communities in East Lothian. It looked like the Dunkirk spirit where families and communities were trying to work together to protect their jobs and the jobs of people about whom they cared in similar communities elsewhere. However, other people evidently saw the matter differently.

We are now seeing stupid, vindictive repression by the coal board management in various areas of the country, and in particular in Scotland. We have seen petty vindictiveness about concessionary coal, the withholding

[Mr. John Home Robertson]

of holiday pay, taxation and other such matters. Above all, there is the unwarranted number of dismissals, especially in Scotland.

The Minister is aware, because I have written to him, the Prime Minister, the chairman of the coal board and almost everyone else who is supposed to be responsible, that 17 men in my constituency have been sacked for no good reason during the dispute. That problem will not go away. Those men cannot be written off. They are people. They have families, neighbours and communities that care about them. It is intolerable that they should continue to suffer from what any right-thinking person must recognise as being a gross and unreasonable injustice.

Those Opposition Members who are aware of such problems will go on about them until some fairness is shown to those people. It is about time that the Minister, who is supposed to be responsible for coal, addresses himself to that problem because there will be no reconciliation in the industry until something is done for people like the 17 men in my constituency.

12.43 am

Mr. David Hunt: This has been a good debate characterised by the sincerity and depth of experience of all Members who have contributed to it.

I hope that everyone shares the regret that all right-thinking Members should feel that it is necessary to make further provision for deficit grant. It is not healthy for the Government to have to support the coal industry in the way that they have had to do in recent years.

Like my hon. Friend the Member for Darlington (Mr. Fallon), I do not believe that dependence upon state aid is in the best interests of those who work in the industry. Many of those who care about our great coal industry have been deeply saddened by the events of the past year, because without the damage caused by the strike the industry would have made considerable progress towards the healthy future that would have been in the interests of the miners and the nation. The sad fact is that last year was not a year of progress, as it could so well have been, but a year of lost opportunities and lost coal faces. Seventy-three faces were lost during the dispute—48 working faces, 24 salvage faces and one development face. Writing off those faces will cost the NCB many millions of pounds. Recovering faces is proving to be an expensive business.

The scale of the losses is difficult to comprehend—£2·2 billion is a massive sum. How much better could it have been spent but for the needless, futile strike? The Opposition must stop trying to rewrite the history of the dispute. Surely the hon. Member for Ashfield (Mr. Haynes) recognises the damage that was done by Arthur Scargill. The Opposition's refusal to recognise that fact was responsible for sparking my hon. Friend the Member for Littleborough and Saddleworth (Mr. Dickens) into action. I am happy to tell my hon. Friend that the Kilroot conversion to coal has now been announced. He is right to recognise that coal will have a great future in this industry if it faces up to present realities.

The future is promising, provided that all those in the industry work together in a spirit of reconciliation, putting the divisions of the past behind them. We have enormous resources of coal that could be mined economically and efficiently. We have a skilled and able work force. We have the benefit of advanced technology. As my hon. Friend the Member for Sherwood (Mr. Stewart) keeps reminding us, there is so much going for the coal industry. The opportunities are there to be grasped.

The message from this debate must be that, to reap the benefits, we must produce coal at the right price. That means tackling the problems of the high-cost pits and excess capacity, improving productivity and cutting costs. That policy lies within a clear, coherent energy strategy. I say to the hon. Member for Barnsley, West and Penistone (Mr. McKay) that the fundamental objective of this country's energy policy is to ensure that the nation has adequate and secure supplies of energy at the lowest possible cost. We are lucky to have four options available—coal, oil, gas and nuclear fuel. It must be the effort of every Government to keep each of those options active and developing, maximising the contribution to the economy of the energy sector as a whole.

The hon. Member for Midlothian (Mr. Eadie) explained the Opposition's position on the Bill and stressed the urgency of the NCB's financial position. The latter point has been echoed in all the speeches. The hon. Gentleman accused me in serious terms of not responding to various questions that he had raised, and proceeded to criticise the answers that I had given. There is a crucial paradox in that. It is the solution to the problem that he raises. The fact is that the hon. Gentleman does not like the replies that he has received.

Mr. Eadie: The hon. Gentleman did not give any.

Mr. Hunt: How then could the hon. Gentleman criticise my replies?

On Second Reading, I promised to bring to the NCB's attention individual cases of dismissals about which hon. Members provided details. Several hon. Members subsequently wrote to me, and I immediately forwarded copies of their letters to the NCB chairman with a request that the cases be looked into and a reply sent to them direct. I know, and I have checked again today, that those letters are all receiving careful consideration. The board will write in detail to all the hon. Members concerned.

The hon. Member for Cynon Valley (Mrs. Clwyd) was particularly concerned that no appeal had been heard in the case of the five men dismissed from the Phurnacite plant at Abercwmboi who would soon run out of time to apply to an industrial tribunal. I made urgent investigations and was told that the internal inquiry procedure was completed on 24 May when the men's dismissals were confirmed. This was in time to enable those of the men who wished to do so to apply to an industrial tribunal.

I should tell the hon. Member for East Lothian (Mr. Home Robertson) that the decision to dismiss a man is never taken lightly. There is no question of victimisation or vindictiveness in the board's actions. The proper course for anyone who believes that he has been unfairly dismissed is to take his case to an industrial tribunal. That is true of any industry. I understand that more than 450 dismissed miners have already taken such action.

Mr. Eadie: The Minister says that we do not like the answers he gives, but he has given no answers. I hope that he will read the evidence given by the chairman of the National Coal Board to the Select Committee on Employment. When he talks about industrial tribunals, he is deceiving the House, because the chairman of the NCB made it clear to the Select Committee that not only will

he not re-engage miners who are successful at the industrial tribunals, but that he has absolute contempt for such tribunals.

Mr. Hunt: I hope that the hon. Gentleman does not believe that I am trying to deceive the House. I was not present at the proceedings of the Select Committee, and I understand that the transcript of that evidence has not yet been published, but, as I understand the position, it was stated that, of the 944 men dismissed by the board during the strike, at that time just under 450 had appealed to industrial tribunals; nine cases had been heard; seven miners were held to have been fairly dismissed; one was held to have been unfairly dismissed with no recommendations for re-employment; and one was held to have been unfairly dismissed who has since been re-employed by the board following that recommendation.

The hon. Member for Midlothian asked about the operation of conciliation machinery under the Coal Industry Nationalisation Act 1946. There is no question of the board failing to meet its obligations under the Act. It is unwilling to set up procedures to conciliate where a man alleges wrongful dismissal arising from incidents at his work place to be used in the different circumstances of strike-related dismissals for which the board believes they are inappropriate. The system of industrial tribunals ensures that miners who wish to appeal in those circumstances will be treated in exactly the same way as, and will have the same rights as employees in any other industry.

Hon. Members on both sides of the House asked about the enterprise company. In the early hours of the morning, I do not wish to respond in detail to the specific points made, because I wish to look into some of them further.

The hon. Member for Pontefract and Castleford (Mr. Lofthouse) asked specific questions about some pits. With regard to his alarmist comments about the number of redundancies, for which there is no clear foundation, and to similar comments from the hon. Member for Barnsley, West and Penistone, it is still too soon for the NCB to assess with precision how fast production can be restored and the markets re-won. Until that calculation can be made, no final decisions can be made on future capacity.

Mr. Lofthouse: Is the Minister telling the House that the pits which I named will not close?

Mr. Hunt: Of course not, because the hon. Gentleman knows the position of those pits. He knows that a decision has been made on Ackton Hall, Glasshoughton and Savile pits. He speculated about the future of other pits, but it is not for me to respond about them. That is a matter for the management of the coal board, and its right to manage was clearly established during the dispute.

However, there are real anxieties about the effect of closures on communities, which is why the Government place so much emphasis on the enterprise company. I shall investigate carefully the comments of the hon. Member for Ashfield and some other comments. I keep in close touch with the executive director of the enterpise company, Mr. Hewitt—indeed, I spoke to him today—and I can say that the company has made an encouraging start in creating alternative employment in coal mining areas. It has already established links with enterprise companies throughout the British coalfield.

Loans totalling nearly £500,000 have already been approved, and that money will initially create 200 to 300 new jobs, and up to 400 or 500 later. The company is actively considering requests for funds in excess of £3 million, with the potential to generate more than 1,000 new jobs. As my hon. Friends the Members for Cannock and Burntwood (Mr. Howarth) and for Sherwood said, I have stressed to the House on every possible occasion that further funds will be available as necessary.

The hon. Member for Berwick-upon-Tweed (Mr. Beith) spoke of the need for a better atmosphere. I share his welcome for the spirit of reconciliation in the pits, although I must disagree with his analysis of present circumstances. There were always bound to be exposed nerve ends in the aftermath of a dispute as tragic and bitter as the recent one. It was a strike that should never have been, and if there had been a ballot at the start it would never had taken place.

The hon. Member for Wansbeck (Mr. Thompson) is rightly proud of the board's operations under the North sea. I was deeply impressed by what I found at Ellington —the world's largest undersea coal mining operation— and was pleased to hear soon after my visit of further substantial investment at that pit. The hon. Gentleman made several other interesting observations which I was fascinated to hear.

My hon. Friend the Member for Darlington referred to the Monopolies and Mergers Commission report. He will know that it recognised that the two central problems of the industry are overcapacity and the tail of high-cost pits. The Government and the board agree with that analysis. We are committed to tackling these problems as quickly as possible and to returning the industry to viability.

I am aware that pit closures and redundancies are uppermost in some hon, Member's minds. The board is still assessing the damage done by the strike. The hon. Member for Wentworth (Mr. Hardy) mentioned a forthcoming meeting in south Yorkshire. There are still some meetings to come. I hope that the assessment period will be over as quickly as possible. The meetings are setting out the options for the future. Tragically, many faces have been lost and there is no longer a prospect of a viable future at some pits, but the board has given the firm assurance that no pit will close until it has been through the proper colliery review procedure.

I hope that the hon. Member for Wenworth will understand if I do not go into detail about what he said about the NACODS dispute, except to say that I hope that it will end as soon as possible. At pits that close, generous redundancy terms are available to those who wish to leave the industry and there is a job for those who wish to stay.

Because of the deficit grant situation, the setting of the figures for the Bill could not await the outcome of the review. I hope that hon. Members understand that. I confirm to my hon. Friend the Member for Cannock and Burntwood that we have given the board the firm objective of breaking even without deficit grant by 1987-88 and we expect it to meet that objective. There has been and will continue to be substantial investment in new faces, new plant and new machinery that will provide lasting jobs.

Work on sinking the shaft at Asfordby will begin soon, and I recently visited Selby and was greatly impressed by what I saw. The Government have invested more than £4 billion in the coal industry. That is a massive vote of confidence in its future, but investment will in future depend on tackling the problems of the past. The hon. Member for Wansbeck acknowledged that, albeit in a different context.

[Mr. Hunt]

The hon. Member for Wentworth said that, before the strike we expected 1,000 firms to convert to coal. We have continued the support for such conversion through the coal firing scheme, which has been kept open beyond the previous deadline at the end of last year. The industrial market is a clear growth area for coal and it is vital that the industry should take the opportunity to demonstrate that it is a competitive and reliable supplier.

It is also important that the coal supplied to the electricity industry is competitively priced, since the cost of coal represents half the cost of electricity generation. The competitiveness of our coal is vital to the industrial electricity users who face fierce competition from overseas.

I tell the hon. Members for Ashfield and for Wentworth, who talk about imports and exports, that when the Conservatives won the election in 1979 the United Kingdom was a net importer of 2 million tonnes of coal. By 1983 it had become a net exporter of 2 million tonnes. The strike has destroyed that and last year's imports were twice those of 1973. I must tell the hon. Member for Barnsley, West and Penistone that we hope to increase our share of the European market for coal if the NCB becomes more competitive in relation to supplies from other countries.

Some Opposition Members have said that insufficient coal will be produced in Britain to meet our needs. Those fears are completely unfounded. With the new high volume pits such as Selby and Asfordby, and with the substantial investment in existing pits, we shall have ample coal, not only for our own needs, but, providing that costs can be kept to a minimum, for exports in competition with supplies from all round the world.

As the hon. Member for Midlothian said, this industry of ours has a long and honourable tradition which I admire and respect. But if it is to survive, it must be built on the tradition of looking forward, and not backwards. A great future lies ahead and I hope and expect all those who work in the industry to take advantage of the opportunity which the Bill offers to secure a firm and prosperous future. I commend the Bill to the House.

Question put and agreed to.

Bill accordingly read the Third time, and passed.

Nurses' Pay

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Lang.]*

1.1 am

Mr. Geoffrey Dickens (Littleborough and Saddleworth): I am sorry that the clock has just turned one o'clock as we begin to debate the important nurses' pay issue. I have no doubt that the *Official Report* will be well read.

The whole question of nurses' pay has been sadly neglected over many years under successive Governments. The good will and decency of the nurses and the professions allied to medicine, such as physiotherapists and radiographers, has been abused for too long. We are debating the livelihood of a group of the most respected, dedicated and skilled staff who do not take strike action. Years ago, people were pleased to describe nursing as a "calling" for special pople who put the dedication of patient care in front of financial reward.

Let me be quite blunt and record that that is a most accurate description of the nursing profession even today. However, this is a profession which is admired and respected and we have a duty to ensure that its members can afford their rent, clothing and a few luxuries. Can there be a more deserving group within society entitled to be able to afford a holiday each year?

Periodic inquiries into nurses' pay have proved a failure. An example is that by Lord Halsbury in 1974 which led to large pay increases for nurses, only to be followed by a period of several years when the value of that increase was eroded.

The Parliamentary Under Secretary of State for Health and Social Security (Mr. John Patten): The Halsbury award was eroded by the end of the Labour Government in 1979.

Mr. Dickens: I accept that. I did not intend to score a political point, but that point was well worth making.

We desperately required a sound system, and I am delighted to applaud my own Government for their initiative. Full marks go to this Government for establishing a pay review body in 1983 for nursing staff, midwives, health visitors and professions allied to medicine. This system will create better arrangements for settling the pay of these staff within the NHS. Being independent, the pay review body is free to recommend levels of pay that it believes to be appropriate in all the circumstances.

My research tells me that NHS funding has risen by over 20 per cent. since we took office, enabling nurses' pay rates to rise faster than prices, working hours to be cut from 40 to 37½ per week without loss of pay, and an extra 57,000 whole-time nursing equivalents to be employed in Great Britain.

Returning to the review body, the Government are on record as stating that they will stand by their commitments to implement the review body's recommendations—this is where I part company from the Government—unless there are clear and compelling reasons for not doing so. That is the Government's safety valve.

But since the Government themselves always submit evidence to review bodies, on economic and financial considerations as well as such matters as the recruitment and retention of staff groups concerned, it is rather like one

group of witnesses at a trial stating that there may be clear and compelling reasons for not accepting the costs that the judge awards.

The review body will have taken evidence from all other interested parties, including the staff organisations. We are now waiting, with bated breath, for the review body recommendations and also to know whether the Government, having given their own evidence, now propose to act as judge—I really hope not. I have great confidence in the Prime Minister, as well as the Ministers and civil servants in the Department of Health and Social Security, and believe that that will not be the case.

Of course, it is fully appreciated that there is no such thing as Treasury money, only money raised from taxpayers—including nurses themselves. In the current financial year, a cash increase of 5·5 per cent. representing £500 million, has been made available in England, and there is a similar proportion for Scotland and Wales. Regional health authorities will also have available the extra resources produced by local cost improvement programmes. From that vast pool of money—and, I hope, a bit of central money—the NHS must strike the correct balance between all competing demands on those resources. That will need to include the pay of its staff and the development of patient services. In any public body or private company, there is always a direct relationship between pay, capital equipment, expenditure and the number of people employed.

However, as the pay settlement to cover the period from 23 August 1982 to 1 April 1984 of 12·3 per cent. was agreed between parties on the understanding of the proposed setting up of the pay review body, it is most important, in my view, to ensure that we have a contented, sensibly paid nursing staff who will feel motivated to continue their great patient care tradition.

I do hope that, in replying to the debate, the Minister will further enhance his own very high standing in the country in general, and within the NHS in particular, by clearly demonstrating once more to the nurses, the professions allied to medicine, and indeed to the population of the United Kingdom, that patient care is his no. 1 objective.

1.9 am

The Parliamentary Under-Secretary of State for Health and Social Security (Mr. John Patten): My hon. Friend the Member for Littleborough and Saddleworth (Mr. Dickens) is noted for his robust patriotism and firm common sense. That was admirably displayed during our last debate on the coal industry, when I listened to what he said. We have all been fortunate to hear him speak again on this important issue.

My hon. Friend is also noted for his interest in social issues. We know of his concern for the welfare of children, and tonight he has shown his deep concern for the welfare of those who work in the NHS as nurses and midwives. I thank him for raising the important subject of nurses' pay and for giving me the opportunity to set out the Government's record. However, I am in some difficulty, as I am sure he will appreciate, in that I must at the outset make it clear that I cannot comment in detail on this year's pay claim on behalf on nurses and midwives.

As my hon. Friend knows, we have received the report of the independent review body, and we are still considering its recommendations. I cannot tonight anticipate what our conclusions on that report, or those of the other review bodies will be. However, I hope that my hon. Friend and others will not have to wait long for the reports to be published.

Having said that, it is important to put the nurses' pay claim, and the evidence submitted by all parties to the review body, into context. As my hon. Friend said in his concise and characteristically clear speech, since April 1979, the basic pay rates of nurses have on average risen by 94 per cent. That is 23 per cent. more than the increase in prices over the same period. It is important to put that on the record. In addition, the Government found the necessary money—a substantial sum of around £116 million—to reduce nurses' working hours in 1980-81 from 40 to 37½ a week without any loss of pay, thereby enhancing their working conditions and, I hope, their quality of life. That was equivalent to a further increase of 6·5 per cent. on basic pay.

This Government have a lot to be proud of. We have paid the nurses substantially more than the rate of inflation, and we have substantially reduced their hours. But the number of nursing and midwifery staff has also risen steadily, not just to make up for the reduction in hours. We have actually increased the number of nurses and midwives employed overall, thus ensuring a steady and substantial increase in nursing care.

In England, an estimated 39,500 whole-time equivalents were employed between September 1979 and September 1984. Around 24,000 were additional staff to compensate purely for the much-welcomed reduction in hours. But the remainder—on average about an extra 3,000 staff per year—are providing additional services for patients. My hon. Friend was right to end his speech on that note. Consequently, more better paid nurses, employed during a shorter working week, are providing more care for more patients.

Current estimated average earnings—I stress that these are average earnings—of a staff nurse on the maximum of her scale are £147 a week, and those of a ward sister on the maximum £192 a week. I am not suggesting that the Government have provided everything that nurses want, but I am setting down our not inconsiderable record as a background against which this year's pay claim and review body recommendations, when published, must be judged.

The establishment of the review body is a major step forward in making better arrangements for determining nurses' pay. We established it because we recognised the special position of nursing and midwifery staff in not resorting to industrial action. People of all political parties and none, throughout the country welcome our recoghition of that.

I am happy to repeat our commitment to implement the review body's recommendations, unless there are clear and compelling reasons for not doing so. That was the arrangement made when we set up the review body, and I am glad that my hon. Friend gives us full marks for creating it. I know from my constituency that there has been a uniform welcome for the establishment of the pay review body and for the reduction in the working week.

The new arrangements that we have set up in this financial year for funding the NHS mean that there is a direct relationship between pay and service provision. It was important for my hon. Friend to stress the realities of life in this debate, as he did in the previous debate on the coal industry. Pay and service provision simply cannot be divorced. The NHS has no right to expect to be different

[Mr. John Patten]

from other employers in that respect, whether public or private sector employers. The public purse is not bottomless. There must always be a trade off between pay and services. High pay increases will eat into money for patient care, just as in any industry, and public or private body, they eat into its capacity to do what it sets out to do. That is simple common sense.

The more resources that are devoted to pay, the less will be available for services. That has been a fact for successive Governments of all political colours. Only a fool would seek to deny that truth. It cannot be wished away.

It is particularly important to remember that a 1 per cent. increase in the nurses' pay bill costs approximately £33 million. To meet a 20 per cent. pay claim would cost £650 million a year extra. We must put that message across to the review bodies. In doing so, we are not for one second saying that we do not want to see nurses and midwives paid properly. Surely our record since 1979, with a substantial increase ahead of inflation and the decrease in the working week demonstrates the Government's determination to those ends.

I should make a further point connected to the Halsbury report to which my hon. Friend referred in his wholly non-party political speech. He may have been right to point to my perhaps unnecessarily partisan references to what happened to the Halsbury pay award after 1974. In evidence to the review body, the staff side referred to increases allegedly required to restore pay to the Halsbury levels of 1974. Such an approach to setting pay is obsolete. We cannot return to it for two reasons.

First, huge pay awards such as the Halsbury award, which was 30 per cent. must be a thing of the past, if we are to maintain the low inflation which is necessary to continue the restoration of our economy. Without that restoration, we cannot increase provision in the NHS, as we are doing at this time of economic difficulty and hope to do at a greater level in a time of economic prosperity.

Secondly, any professional group chooses its favourite year for the purposes of comparison. To allow a group in pay bargaining to pick the year most favourable to its case will produce the leapfrogging in pay rises, which in the past contributed to high inflation, ridiculous rises in pay, and the feeding of inflation, characteristic of the 1970s. That led to the economic problems, especially of 1976, 1977 and 1978, and also to the substantial cuts in provision in the NHS which had to be made in real terms. There have never been cuts in provision in the NHS in real terms since this Government came into office in 1979. Year on year, by any measure, there has been an increase in provision in real terms.

My hon. Friend was right in saying that there is no such thing as Treasury money. Of course there is not. There is only money that is raised from taxpayers. Among those taxpayers are nurses, and with them there are midwives.

The crucial determinants of pay must be the need to deal fairly with staff and also to recruit and retain staff of the right quality. I must ask my hon. Friend to await our decisions on the review body's recommendations, which will, I am confident, satisfy him on that score. Recruitment and retention are not a great problem in nursing, although there are improvements which could be made. That is why we pointed, in our evidence to the review body, to the need to reward experience in the clinical grades, and to increase the attraction of remaining in those grades rather than opting for management or teaching—a road down which, sometimes unfortunately, a number of nurses have gone.

In addition, although this is not strictly a pay issue, we are following with great interest the proposals for revised education and training for nurses which are emerging from the statutory bodies and from the Royal College of Nursing. An improved approach to the training of nurses, midwives and health visitors which meets the aspirations of the profession and the needs of the NHS, and is affordable, should further attract qualified entrants to nursing.

I am sure that my hon. Friend will accept that we are as committed to the position of nurses in the NHS as we are to the service as a whole. Our record is one that we can be proud of. The extra cash that we have made available and the increased efficiency that we have sought to achieve have enabled record numbers of patients to be treated. That is a triumph not of the Government since 1979 but of the NHS, and of all who work in it — doctors, ancillary workers, ambulance men, nurses and midwives. It is their labours — supported by the Government's policies and the hard-won taxpayers' money which has gone into the NHS — which have enabled record numbers of patients to be treated year after year in the life of this Government. My hon. Friend referred to that in the closing moments of his speech, as I do in mine.

In 1983, hospitals in England alone treated nearly 1 million more in-patient and day cases than they did five years earlier. We are planning to build on that achievement with the help of all those who work in the NHS — including, of course, nurses and midwives.

Question put and agreed to.

Adjourned accordingly at twenty-two minutes past One o'clock.

House of Commons

Wednesday 5 June 1985

The House met at half-past Two o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

PRIVATE BUSINESS

PLYMOUTH MARINE EVENTS BASE BILL

Order for Third reading read.
To be read the Third time tomorrow.

ROYAL BANK OF SCOTLAND BILL *(By Order)*

Order read for consideration of Lords amendments.
To be considered tomorrow.

BATH CITY COUNCIL BILL *[Lords] (By Order)*

Order for Third reading read.
To be read the Third time tomorrow.

GREATER MANCHESTER BILL *[Lords] (By Order)*

LUTON BOROUGH COUNCIL BILL *[Lords] (By Order)*

Read the Third time, and passed, with amendments.

Oral Answers to Questions

TRADE AND INDUSTRY

Post Office Closures

1. **Mr. Tony Lloyd** asked the Secretary of State for Trade and Industry if, when he next meets the chairman of the Post Office, he will raise the closure of post offices.

8. **Mr. Bruce** asked the Secretary of State for Trade and Industry whether he has recently discussed the criteria for closing sub-post offices with the chairman of the Post Office.

The Parliamentary Under-Secretary of State for Trade and Industry (Mr. David Trippier): My right hon. Friend has not recently discussed the criteria for closing post offices with the chairman of the Post Office and does not propose to do so.

Mr. Lloyd: Is the Minister aware that many people will consider that answer to be unsatisfactory because of the way in which the Post Office is using its position as a monopoly supplier in relation to the closure programme? Why are the Government prepared to intervene in the nationalised industries when to do so is to the public disadvantage, but not when such action would help the public?

Mr. Trippier: I compliment the hon. Gentleman in his persistence, because he had an Adjournment debate on the subject on 23 May. I do not think that he has any quarrel with the Government or with the Department of Trade and Industry. His quarrel is principally with his right hon. Friend the Member for Chesterfield (Mr. Benn), who was responsible for setting up a Post Office Board with its own board of directors in 1969. It is interesting to note that when the Labour party was last in office it did not intervene once in any sub-post office closure.

Mr. Bruce: Will the Minister nevertheless recognise that the criteria applied by the Post Office to sub-post office closures are unsatisfactory because they do not take account of the wider implications, such as their importance to local communities and the fact that the presence of a sub-post office in a local shop can mean the difference between that shop surviving and closing?

Mr. Trippier: The criteria that are used by the Post Office in deciding whether to keep open or to close sub-post offices were discussed at great length in the debate which took place on the Floor of the House on 23 January. Much more lenient criteria are applied to rural sub-post offices.

Mr. Conway: My hon. Friend will be aware of the concern that has been expressed in Shrewsbury about a recent decision to close four sub-post offices. Bearing in mind the recent denationalisation of British Telecom and the responsibility for the provision of rural services placed on that now private company, is it not time that we reviewed the 1981 Act and the code of practice placed on the Post Office so that there is much wider consultation before sub-post office closures, perhaps with a better form of appeal?

Mr. Trippier: There is nothing wrong with the present system of consultation. I appreciate the concern about the proposed closure of some sub-post offices in my hon. Friend's constituency. I am sure that full advantage will be taken of the appeals procedure as it now stands. It may be of comfort to him to know that 10 per cent. of appeals are successful.

Sir Anthony Grant: I appreciate the constitutional relationship that exists between the Government and the Post Office, but is there a remote chance that perhaps on a social occasion, quite informally, Ministers might raise not only the subject of the closure of sub-post offices but the possibility that at some time in the future first-class post might arrive in somewhat less than three days from the date of posting?

Mr. Trippier: If my hon. Friend has a specific example of mail, especially first-class mail, being delayed, I should be grateful if he would bring it to my attention, and I, in turn, will draw it to the attention of the Post Office Board.

Mr. Ewing: Is the Minister aware that his statement that the Labour Government did not intervene over post office closures is grossly inaccurate? My right hon. Friend the Member for Glasgow, Rutherglen (Mr. MacKenzie), who is present in the House, intervened when Sir William Ryland was chairman of the Post Office Board and stopped it from closing post offices. The Minister ought to correct the misleading impression that he has given. Is he further aware that the Post Office's problem was created for it by the Government, who reduced its external financing limit and caused the closure of 5 per cent. of post offices? The Government were responsible for that policy, and the Minister ought not to shirk that fact.

Mr. Trippier: I do not disagree with the hon. Gentleman's point about the way in which his right hon.

Friend the Member for Glasgow, Rutherglen (Mr. MacKenzie) intervened. He did so under the general powers in section 11(2) of the Post Office Act 1969, which states that he has power to intervene on matters of a general character for remedying

"a defect in the general plans or arrangements of the Post Office for exercising any of its powers."

A particular closure decision cannot be regarded as a general plan or arrangement.

Floating Exchange Rates

2. **Mr. Knox** asked the Secretary of State for Trade and Industry how many individuals and how many organisations have made representations to him in favour of floating exchange rates in the past 12 months.

The Minister for Trade (Mr. Paul Channon): None, Sir.

Mr. Knox: Does my right hon. Friend agree that international trade was facilitated and that the British economy worked much better when there were fixed exchange rates? What steps are the Governnent taking to encourage greater order in international exchange rates? To that end, when will Britain join the exchange rate mechanism of the EMS?

Mr. Channon: As my hon. Friend knows, the exchange rate mechanism of the EMS is not a system of fixed exchange rates. There have been fluctuations in the exchange rates between European currencies and the dollar. Of course all of us, especially exporters, would like a more stable exchange rate, but it is impossible to imagine that there could be a system of fixed exchange rates without enormous pressures on currencies when the rates become substantially out of line with true market values.

Mr. Meadowcroft: How far would European financial stability assist this country in competing effectively with the United States of America?

Mr. Channon: As I said to my hon. Friend the Member for Staffordshire, Moorlands (Mr. Knox), in the last few months there have been enormous fluctuations in the exchange rates between European currencies and the dollar. We should not avoid that problem by joining the EMS.

Mr. Dorrell: Is it not important to do everything that we can to limit those movements? Is it not unrealistic to expect an expansion of trade in manufactured goods across international frontiers if we cannot tell from one month to the next what revenue we shall receive for given export orders because of fluctuations in exchange rates?

Mr. Channon: I understand and share my hon. Friend's concern about the problems faced by exporters, but it is not just this country which finds itself in that position. Every other country has the same system of floating exchange rates. We must try to obtain greater market stability by encouraging sound monetary and fiscal policies, not only in this country but in many others. That was one of the aims of the recent international summit.

Mr. Gould: Does the Minister accept that there is no such thing as a clean float and that one of the dirtiest elements is the current level of interest rates, which in the last six months has helped to push up the pound against the yen by over 6 per cent. and against the deutschmark by nearly 5 per cent.? Does the Minister think that loss of competitiveness of that kind is helping British business men who are trying to sell in international markets?

Mr. Channon: It is impossible to please the whole House on this issue. Whatever the rate of the pound may be, the Opposition will criticise it. The real point is that it is impossible to move against market pressures on any one currency if those pressures are sufficiently strong. It is an illusion to imagine that fixed exchange rates can work in a situation of that kind. We saw what happened when the Labour Government tried to operate such a policy.

Businesses (Departmental Assistance)

3. **Mr. Richard Page** asked the Secretary of State for Trade and Industry what assistance his Department now provides to Business in the Community and to local enterprise agencies.

The Secretary of State for Trade and Industry (Mr. Norman Tebbit): In the current financial year Business in the Community is receiving a grant of £75,000, and £175,000 has been allocated for support of local enterprise agencies on a pump-priming basis.

Mr. Page: I thank my right hon. Friend for those figures. Is he aware that not only has Business in the Community helped to set up many successful small businesses, but that it has helped to prevent one or two ill-conceived ventures from going ahead, thus avoiding the pain and the distress that would have been caused when the crunch eventually came? May I ask my right hon. Friend to build upon that success by asking the British Overseas Trade Board to liaise more closely with local enterprise agencies in order to encourage the enterprising smaller firms to become more involved in exports?

Mr. Tebbit: Certainly. My hon. Friend has made two good points. The Department's regional offices cover BOTB regional services. They have, of late, been increasing their links with the local enterprise agencies, and we have encouraged them to use the whole of the Department's services. We have also been making presentations on exporting to local enterprise agencies and to other organisations gathering small firms together. That is why, I think, some 75 per cent. of BOTB users are, indeed, small firms.

Mr. Lofthouse: Has the Secretary of State any plans to assist those mining communities which are about to lose their pits, which are their only source of employment? Has he any plans to assist areas such as mine?

Mr. Tebbit: I should be happy if local enterprise agencies were formed in such areas. The concept of the local enterprise agency is that it should be a community, and predominently private-sector, based organisation, although of course a good deal of the funding comes from local authorities and central Government. In addition to my Department's spending, the Department of the Environment contributed £843,000 last year through the urban programme, while the Development Commission contributed £12,000. The Welsh Office contributed £150,000 through the urban aid scheme and the Welsh Development Agency contributed £34,000. Furthermore, the Scottish Development Agency has contributed £280,000. In several areas where there are problems associated with pit closures, funding is clearly therefore

available for local enterprise agencies. I hope that some of them will be of help to those setting up in business in such areas.

Mr. Maclean: Is my right hon. Friend aware that in its first 18 months of operation Business Initiatives Carlisle, a local enterprise agency, helped to create more than 100 small businesses with more than 200 jobs? Does he agree that although his investment of £175,000 in local enterprise agencies is most welcome, it is desirable to give yet more resources to such agencies, because helping successful organisations, such as BIC, is one of the best investments for creating jobs that the Department can make?

Mr. Tebbit: I appreciate my hon. Friend's comments. However, one of the keys to the success of local enterprise agencies is that they have not become the mere creatures of Government but have very live and valuable support from local industry. It is local industry that benefits most from supporting other parts of local industry. Therefore, it is essential to ensure that funding is predominantly of a local nature.

Mr. Wrigglesworth: I welcome the Secretary of State's support for Business in the Community and local enterprise agencies, but will he say something about the future of the Department's small firms service? Is he aware that many small businesses welcome the service provided by his Department? Has the right hon. Gentleman any plans to pass it over to the agency or to other parts of the private sector, or to close it?

Mr. Tebbit: The Department is extremely interested in continuing with its support for small businesses. That is, not least, why we are very active in pursuing policies that are directed towards removing the burdens of Government from small businesses. That is something that is best done through the Government, not through any other agency. Thus, whatever happens, we will remain extremely active in our support for small businesses.

West Midlands (Regional Assistance)

4. **Mr. John Mark Taylor** asked the Secretary of State for Trade and Industry how many applications for regional assistance have so far been received in the newly designated assisted area in the west midlands.

The Minister of State, Department of Trade and Industry (Mr. Norman Lamont): Up to 24 May, 369 applications for assistance had been received by the Department's west midlands regional office.

Mr. Taylor: I thank my hon. Friend for that encouraging reply. Perhaps I could put to him the equally important question: is he satisfied that west midlands industry has been adequately informed about the range of assistance available under regional aid so that it might not say that it has not been given sufficient information?

Mr. Lamont: That is unlikely, as we have received more than 7,000 inquiries about regional selective assistance since the scheme's inception. Indeed, in case of doubt, we have gone out of our way to advertise such services, with about 40 seminars, which have been attended by more than 4,000 business men. My hon. Friend might like to know that the inquiries received by the Department and those that have become firm applications are equal to £100 million of expenditure—that is, grants of £11·8 million—which would create or safeguard about 7,400 jobs.

Mr. Winnick: Is the Minister aware of the large-scale redundancies and closures in the west midlands and the fact that, apart from Northern Ireland, that region now has the largest percentage of people unemployed for longer than 12 months? When will the Government recognise the tremendous harm that they have done to the west midlands by their disastrous economic policies? The people of the west midlands want to be able to earn their own living again, but there is no sign that such a policy will come from this Government.

Mr. Lamont: The Government have done two things. First, they have categorised parts of the west midlands as assisted areas. I have given information that shows that potentially there is a great deal of help available for firms in those areas.

Secondly, through their support of British Leyland, the Government have put a great deal of money into supporting not only the motor industry in the west midlands but those who supply it.

Mr. Brandon-Bravo: When dealing with the applications, will my hon. Friend ensure that they are not simply transferring existing jobs from one part of the country to another? Has he considered the possible inadvertence of enabling a foreign manufacturer to reduce his surplus manufacturing capacity at marginal cost by assembling in this country? Will he look carefully at the activities of the Sprick Corporation of West Germany and the possible adverse effects on TI Raleigh in my constituency?

Mr. Lamont: Obviously I shall consider the case my hon. Friend mentioned. When giving selective assistance to foreign investors in Britain, one of the major factors that we take into account is the impact on existing firms. Therefore, that is already part of the system.

On the point about transferring jobs, my hon. Friend will know that as a result of our review of regional policy we have tightened the criteria to reduce the element of job shuffling.

Mr. Geoffrey Robinson: On the question of Government aid to the west midlands, I am sure that the Minister is aware of the critical decision at Talbot, given the hold-up of payments on the Iran contract. Is he aware that with the barter trade arrangements, which we know are notoriously difficult, complex and at a difficult stage, the collapse of the Iran contract could prejudice the whole of the Talbot operation in the west midlands, with 10,000 jobs at stake? If his Department is not already active, will he consider taking an initiative to resolve the problem?

Mr. Lamont: I assure the hon. Gentleman that I am extremely involved in that matter. We are well aware of the position and are doing everything that we can to help.

British Leyland

5. **Mr. Strang** asked the Secretary of State for Trade and Industry if he will make a statement on the Government's future commitment to British Leyland.

Mr. Tebbit: The Government remain committed to the restoration of BL to commercial viability.

Mr. Strang: Is the Secretary of State prepared to go down in history as the saboteur of Britain's only major indigenous motor manufacturer? Does he admit the accuracy of the report in today's *Financial Times* that Austin Rover is to be forced to rely on Honda engines, which, combined with the privatisation of Jaguar and the proposed privatisation of Unipart, make industrial sense only if the Government are planning to facilitate the eventual takeover of BL by Honda or some other multinational?

Mr. Tebbit: The answer to the hon. Gentleman's first question is no. The answer to his point about the article in the *Financial Times* is that I have no intention of commenting upon an article that is a sort of bouillabaisse — a fishy stew; a mixture of truth, half-truth, inaccuracy and downright untruth.

Mr. Spencer: Before my right hon. Friend commits further sums of public money to BL, will he fully satisfy himself that it has learnt the first rule of business—that the customer is always right?

Mr. Tebbit: Yes; and I am of the opinion that that lesson has been well learnt.

Mr. Williams: Does the Minister realise that if he were as ready with decisions as he always is with insults, BL would not be waiting after six months and the British Steel Corporation would not be waiting after 11 months for decisions about their futures? Does he accept that this inexcusable dither and delay by himself and his Department is damaging BL and that the uncertainty is stimulating and provoking the very type of speculation —I hope false—that we have seen in the newspaper that used to employ the right hon. Gentleman? The standards there have not changed at all. Is not this speculation destroying the morale that has been carefully built up during BL's recovery period? Is the right hon. Gentleman aware that if there is any truth in the proposition that BL is to be forced to drop engine production and to buy Japanese engines, so giving up high value skilled work in exchange for low value Meccano assembly operations, that will trigger off a massive storm not only in the west midlands but throughout the car and components industries?

Mr. Tebbit: I have to say of my employer of some 30 or 40 years ago that the standards seem to have gone down as the pay has gone up. I take note of what the right hon. Gentleman says. However, although we received the original corporate plan for BL some months ago, at a late stage in our consideration of the plan, BL and Honda put to the Government some important proposals for collaborative projects. That changed the nature of the corporate plan. It is not unreasonable that we should have given extremely close consideration to those proposals. We are now nearing completion of our scrutiny of the corporate plan and the proposed further collaborative arrangements with Honda. I hope that I shall be able to announce our conclusions shortly.

Mr. Forth: Can my right hon. Friend assure the House that, at this stage in his deliberations, he fully appreciates the crucial importance of the continuation of engine production by motor manufacturers, such as the Austin-Rover group, to their viability as full-scale manufacturers, and the key importance to the west midlands of that production?

Mr. Tebbit: I fully undertstand what my hon. Friend says, but, having been firm in what I said to the right hon. Member for Swansea, West (Mr. Williams) about the fact that I shall announce our conclusions shortly, it would be wrong if I commented by way of half statements on bits and pieces of the proposals before us.

Mr. Wrigglesworth: Even in advance of that statement, can the Secretary of State agree that it is vital for the whole of the British industry and economy that we retain the volume production of cars at British Leyland? Will he give a pledge that he will do everything in his power to sustain the volume production of cars, which can be done only if engine production is continued?

Mr. Tebbit: I am anxious to ensure the success of BL from every point of view. I am conscious of the fact that motor cars that appear to the consumer to be British have had some foreign production. For example, on average, about half of a Ford motor car is British, about a third of a GM Vauxhall is British, and over 90 per cent. of a BL car is British. Therefore, we have a clear interest in that and also in the fact that BL is a British car exporter, alongside Jaguar, although on a different scale. We are acutely conscious of BL's importance in the British industrial scene.

6. **Mr. Dalyell** asked the Secretary of State for Trade and Industry what discussions he has had with BL on the future of the commercial vehicles industry.

Mr. Norman Lamont: The prospects of BL's commercial vehicles business are covered in the company's annual corporate plan.

Mr. Dalyell: What can Her Majesty's Government do to assist the continuation of commercial vehicle manufacture in Bathgate?

Mr. Lamont: As the hon. Gentleman knows, the decision about Bathgate has been made and, unfortunately, that decision will not be changed. As regards assistance to the area and alternative uses for the plant, my right hon. Friend the Secretary of State for Scotland is obviously prepared to view sympathetically applications for alternative use of the plant, or bits of it. As the hon. Gentleman knows, the travel-to-work area is a development area and therefore qualifies for the highest level of assistance.

Skill Shortages

7. **Mr. Latham** asked the Secretary of State for Trade and Industry what representations he has received from industrialists about pressures on output through difficulties in recruiting skilled or semi-skilled labour in recent months.

Mr. Channon: My Department has received a number of such representations, notably but not exclusively in the area of information technology.

Mr. Latham: In view of the concern expressed by knitwear firms in Leicestershire recently, will my right hon. Friend undertake to have discussions urgently with the Department of Employment to see what can be done to deal with the problems and in particular to encourage recruitment and training?

Mr. Channon: I agree with my hon. Friend and I shall do that. I know that as a result of his questions to my right

hon. Friends a special Manpower Services Commission investigation is taking place. My hon. Friend has raised a very important issue.

Mr. Eastham: May I remind the Minister that British industry does not compare with its foreign competitors in investment in training for skill shortages? Is he aware that France invests twice as much as Britain, and that in America six times as much is being spent on training? Is it not time that the Minister got in touch with industrialists, shook them and told them that they have responsibilities to provide trained personnel?

Mr. Channon: I agree that industry has responsibilities. If the hon. Member is talking about Government expenditure on training, I am surprised to hear what he says. After all, total expenditure has risen from £380 million in 1979 to £1·2 billion in 1985-86. That does not seem to me to be a reduction but rather an enormous increase and something that the whole House will welcome.

Mr. Cockeram: Is it not a criticism of schools and technical colleges that employers have so much difficulty in finding suitably qualified personnel? Has the Minister seen in the *Daily Telegraph* every Thursday 10 to 14 pages of advertisements for technically qualified staff? Is he aware that employers continually complain that they cannot get suitably qualified applicants?

Mr. Channon: That is one of the reasons why my right hon. Friend has authorised a substantial contribution of £12·5 million from the budget of the Department of Trade and Industry towards the package that has been made available to provide additional places in higher education for students in engineering and technology.

Mr. Ashdown: Is it not the case that this autumn, as last autumn, there will be a significant number of unfilled vacancies in apprentice training establishments, both in the public and in the private sector, because firms cannot afford to fill those places? In that case, will the Government urge the Manpower Services Commission to fill those places at public expense so as to overcome the skill shortages that are affecting British industry?

Mr. Channon: The hon. Member has raised a number of very important points that are primarily the responsibility of my right hon. Friend the Secretary of State for Employment. I must reiterate that expenditure on training is high. Special steps have been taken in higher education as well. I am sure that my right hon. Friends, and the Secretary of State in particular, are doing everything in their power to increase the amount of expenditure on training.

Mr. Holt: Does my right hon. Friend agree that while it is essential to train as many people as possible, there is a vast reservoir of trained and skilled people who are unemployed? Is he aware that the main reason why they are unable to find jobs is that they cannot find anywhere to live, however far they ride on their bicycles? Is he further aware that it would be a saving for the Government and the country if my right hon. Friend could ask the Secretary of State to suggest in Cabinet that, when a man has been unemployed for six months, the Government might give him an advance of another year's unemployment benefit as a deposit on a house in another part of the country, allowing him to fill a skilled job, thereby saving the unemployment costs and improving the efficiency of the country?

Mr. Channon: My hon. Friend has raised a very interesting point. I shall certainly make sure that my right hon. Friend the Secretary of State for the Environment is aware of it.

Mr. Williams: Does the Minister agree that it is to be deplored that the Government, through the trebling of company liquidations and the destruction of manufacturing industry at double the rate of our European competitor countries, have created conditions in which, even if there were world growth, Britain could not obtain its fair share because we no longer have enough industrial capacity? Does he not recognise that even more grotesque is the fact that, even with the present limited level of growth, many sections of British industry cannot take full advantage of it because of skill starvation? That is the direct result of the Government's blind destruction of the skill training system that they inherited.

Mr. Channon: The right hon. Gentleman churns out that gush at every Question Time and it is no more valid today. The growth in the British economy this year is likely to be the highest in western Europe, and certainly the highest in the European Community. The economy is expanding. Training is a problem, but the Government, as the figures show, have done their utmost to try to provide more money. As has been said industry also has a responsibility for training.

Rates

11. **Mr. Favell** asked the Secretary of State for Trade and Industry what representations he has received about the effect of rates on trade and industry.

Mr. Norman Lamont: A number of representations have been received from various bodies on behalf of industry and from individual business men expressing concern at the adverse effects of rates increases on industry.

Mr. Favell: Is my hon. Friend aware that Stockport and Manchester are next door to each other and that there is not a blade of grass between the two? Is he aware that the rates in Stockport are two thirds those of Manchester, that Stockport has half the number of local authority employees per head of population and that at the height of the recession, between 1977 and 1981, employment went up in Stockport by 4 per cent. when in Greater Manchester as a whole it went down by 9 per cent.? Does he draw any conclusions from that?

Mr. Lamont: My hon. Friend makes a good point. I am not sure that I need to underline his conclusions. Obviously, rates increases cost jobs. Perhaps he should send a copy of his question to right hon. and hon. Members on the Opposition Front Bench.

Mr. Crowther: Is the Minister aware that in my constituency the rates levied on industry and commerce could be at least 30 per cent. lower if the Government of which he is a member had not progressively reduced the rate support grant year by year? Will he therefore make representations in appropriate Cabinet circles for the terrible rate burden to be reduced by restoring the rate support grant to its former level?

Mr. Lamont: The hon. Gentleman's assertion would be more convincing if local authorities elsewhere in the country had not managed to combine a reduction in the rate support grant with modest rate increases. If empty buses did not travel half the night through Sheffield, the rates there would be a lot lower.

Mr. Teddy Taylor: Can my hon. Friend explain to hard-pressed employers in Southend, who pay a lot in rates despite the excellent prudence of the splendid Southend borough council, why they should pay quite so much when the agriculture industry makes no rates contribution whatsoever?

Mr. Lamont: Fortunately, I am not responsible for *The Times* this morning, the Department of the Environment or for agriculture so I shall pass on that question.

Mr. Andrew F. Bennett: Does the Minister accept that the hon. Member for Stockport (Mr. Favell) has his facts wrong, because there is a considerable area of grass between Stockport and Manchester? The biggest problem is that for years Stockport has neglected many of its old council houses. Is the Minister aware that, like the hon. Member for Stockport, I should like them to be modernised? Is not the problem that such modernisation involves local government expenditure, not only in money but in staff, to ensure that the work is done?

Mr. Lamont: Yes, but other local authorities have absorbed cuts in the rate support grant. Local authority expenditure in England has been rising by about 8 per cent. in real terms. There is no reason why people should expect to be subsidised by the general taxpayer in that respect.

British Leyland

12. **Mr. Roy Hughes** asked the Secretary of State for Trade and Industry if he has had any recent discussions with the chairman of BL concerning future investment.

Mr. Tebbit: Yes, Sir.

Mr. Hughes: When will the Secretary of State realise that unemployment is now the principal concern throughout the country? Will he bear in mind that the motor industry is a major employer of labour, and therefore that new investment is vital? Does he agree that without it we shall hear further redundancy announcements such as that recently made by the Girling company in South Wales?

Mr. Tebbit: I am able to assure the hon. Gentleman that I am aware of all those matters and, of course, as he will be aware, the number of people in work in the United Kingdom has been increasing since the first quarter of 1983.

Mr. Geoffrey Robinson: I think that all hon. Members will have been reassured by the measured and constructive tone in which the Secretary of State has spoken of the importance to the whole of Britain—the components industry, the capital goods industry—of British Leyland, but we are looking to him now to put his money where his mouth is. In that respect, can he confirm that he shares the view that an essential part of British Leyland to play will be in the continued manufacture of the power train—engine and gearboxes—in this country, and will he back the Austin Rover new engine project?

Mr. Tebbit: I have to say to the hon. Gentleman that, if it comes to a question of money and mouth, he should recollect that since this Government have been in office we have directly contributed something like £1·2 billion to the restoration to viability of British Leyland. Beyond that, I would advise him not to go too far in praising me—it might upset his hon. Friends. I hope that I shall be able to make a statement before too long which will please all those of a constructive frame of mind.

Local Investment

13. **Mr. Meadowcroft** asked the Secretary of State for Trade and Industry whether he will have discussions with representatives of local enterprise boards and of industry with a view to securing a co-ordinated approach to local investment.

Mr. Trippier: I frequently meet representatives of local and national bodies concerned with investment in industry, including local enterprise agencies.

Mr. Meadowcroft: Is the Minister aware that there will be a wide welcome in the House for the more constructive Government and business attitude towards the local authority enterprise boards? Will he accept the need for better co-ordination to give prompt help to new and expanded businesses? Can he give the House any assurance of the future of the West Yorkshire enterprise board and about its urgent need for further capital resources?

Mr. Trippier: The hon. Gentleman makes a very important point. It is essential that I should stress that local enterprise boards, as opposed to enterprise agencies, are companies limited by guarantee and not directly affected by the Local Government Bill currently before the House. I understand that West Yorkshire county council has asked for consent for funding of the enterprise board to a sum of £2 million in 1985-86, and that that is currently before my right hon. Friend the Secretary of State for the Environment. The hon. Gentleman may be aware that I am constantly trying to encourage the use of local enterprise agencies such as the Leeds business venture, with which I know he is very familiar, as a signposting service and as a one-stop shop. I think that that excellent enterprise agency is in a very strong position with regard to acting as a co-ordinator in getting small firms financed. That will speed matters up and, I hope, remove many of the obstacles and the confusion which the hon. Gentleman has identified in his question.

Mr. Haynes: I listened to what the Minister had to say, but he is not doing very well, is he? He visited a particular boat-building firm in my constituency and made certain promises, and then let it down. Why have these exhibitions been cancelled?

Mr. Trippier: I must confess to the hon. Gentleman that I have not the slightest clue what he is talking about.

Small Firms (Public Contracts)

14. **Mr. Hind** asked the Secretary of State for Trade and Industry whether he has any plans to seek to increase the level of public procurement placed with small firms.

Mr. Trippier: Contracts must be won on merit, irrespective of company size. However, we recognise that small firms often face particular difficulties in seeking public sector business, and we shall continue our efforts to reduce these.

Mr. Hind: Is my hon. Friend aware that one major problem for small firms is obtaining the details of proceedings in tendering for Government contracts? Can he tell us whether he has taken any measures to improve that situation and what he can do to assist those small firms?

Mr. Trippier: Only yesterday I published a new booklet entitled "Tendering for Government Contracts", aimed at helping small firms to sell to Government Departments. The booklet describes the types of goods and services that Government Departments buy, and explains how to apply and whom to approach in the major purchasing Departments. Obviously, I hope that it will be widely used.

Mr. Campbell-Savours: Does not the existence of 10 major defence research establishments in the south and south-east of England have a major effect on procurement policy for small high technology companies in the south of England? Does it not put such companies in the south at an advantage? Why cannot we have the same advantages in the north? Why cannot some of those defence establishments be moved to the north of England, bearing in mind all the spin-offs that they have for the information technology industry?

Mr. Trippier: It will probably interest the hon. Gentleman to hear that only this morning I was looking at the number of research establishments in both the public and the private sectors. It will perhaps come as a surprise to him, since he comes from the same region as I do, to discover that we in the north-west have a very fair share of the research establishments available north of Watford.

Mr. Bellingham: Although I welcome the booklet and the obvious benefit that it will bring to small businesses, may I ask my hon. Friend what effect it will have on public procurement generally?

Mr. Trippier: The most important development to have arisen out of the Government purchasing lead that we have taken in the Department of Trade and Industry is that it will encourage the use of interdepartmentally approved lists. Certainly it will improve the standarised procedures affecting small firms. I announced last May that tenders for most Government contracts worth less than £10,000 would be exempt from the normal procedures. That should help small businesses to obtain a share of those business opportunities.

Mr. Robert C. Brown: The Minister spoke about his researches this morning. Is he aware that the northern region of England has the highest unemployment in mainland Britain and is the only region of mainland Britain without a Government-backed research and development agency? Is it not high time that we had such an agency in the north?

Mr. Trippier: The problems of the northern region were recognised in the legislation on regional policy approved by the House last year. In that we said that we would concentrate——

Mr. Campbell-Savours: Cuts.

Mr. Trippier: The hon. Member for Workington (Mr. Campbell-Savours) talks of cuts. I had better tell him that his hon. Friend was referring to the northern region and not the north-western region. Some 97 per cent. of the working population in the northern region were assisted before the changes in regional policy, and the same percentage of people are assisted. In the north-west the numbers of people living in assisted areas have increased as a result of the legislation to which I referred. I am aware of the problems identified by the hon. Member for Newcastle upon Tyne, East (Mr. Brown), and recently we have received a report from Newcastle university entitled "The Location of R and D in Great Britain." We shall study that, and it will be taken into account in formulating future policy.

Manufacturing Trade

15. **Mr. Teddy Taylor** asked the Secretary of State for Trade and Industry what was the United Kingdom's surplus or deficit in manufacturing trade with the European Economic Community and the rest of the world, respectively, in the most recent annual period for which figures are available.

Mr. Channon: In the 12 months ending March 1985 there was a deficit on trade in manufactures with the other members of the Community of just under £8 billion. With the rest of the world there was a surplus of £3·5 billion.

Mr. Taylor: In view of this horrific trade deficit with the Common Market, which is equivalent to a loss of 800,000 British jobs, does my hon. Friend agree that there is an urgent need for a full-scale inquiry into why our trade with the Common Market is so appalling and why, according to an answer that my hon. Friend gave me the other day, our share of the Common Market's market for manufactured goods is less than it was the year before we joined?

Mr. Channon: It is only rarely that I do not agree with my hon. Friend , but this is one of those rare occasions. He was a member of the Select Committee on Trade and Industry which examined this matter last year, and the Secretary of State replied to its report a year ago. I must point out that 46 per cent., of British exports went to Community countries.

Mr. Roy Hughes: Answer the question.

Mr. Channon: I should love to answer the question if I were allowed to.

Mr. Speaker: Order. The hon. Member for Newport, East (Mr. Hughes) should allow the Minister to answer.

Mr. Channon: It is essential to look at all the facts affecting our trading position and not take any one area or any one component of the trading figures in isolation.

I repeat that 46 per cent. of total British exports went to the Community last year, compared with 30 per cent. in 1970.

Mr. Sheerman: Perhaps the Minister will come down from the clouds of theory and look at real closures. I refer him to the closure of Philips in Brighouse and the impending closures of Philips establishments in other parts of the country, with the result that manufacturing capacity in washing machines, tumble driers and television sets is being taken back to Italy. What does the Minister intend to do about closures, which take more jobs away from us with every day that passes?

Mr. Channon: I am sure the hon. Gentleman welcomes the fact that in the last quarter the volume of our manufacturing exports increased by 12 per cent., which

was a great increase, and that our exports are running at extremely good figures. It must be good for British industry to be competitive, and to be able to export competitively and profitably.

Mr. Gould: Does the Minister accept that the House is intelligent enough to read both sides of the trading account? Bearing in mind that the Minister of State told the House on 1 May that every 1 per cent. increase in import penetration cost the country 250,000 jobs, what connection does the right hon. Gentleman now make between our record trade deficit with the European Community and the record unemployment that we must now endure?

Mr. Channon: The House must also understand that the United Kingdom is and has been in trade surplus for many years. That was not a factor—[HON. MEMBERS: "Oil."] Opposition Members attack whatever commodity suits them. *[Interruption.]* We have heard it all before. Many Opposition Members want us to leave it in the North sea. As hon. Members want to talk about manufacturing, let me tell them that Britain sends 39 per cent. of its exports of manufactured goods to the other Community countries, compared with 29 per cent. 15 years ago. That is a massive increase in exports of manufactures, and many thousands of British jobs depend upon it.

Bosporus Bridge Contract

16. **Mr. Bowen Wells** asked the Secretary of State for Trade and Industry if he has raised with the general agreement on tariffs and trade the credit arrangements for the Bosporus bridge contract.

Mr. Tebbit: The arrangements for export credit operation involving elements of aid are handled under the consensus and development aid committees of the Organisation for Economic Co-operation and Development rather than under the GATT. The Government are currently exploring within those OECD groups the issues raised by the type of credit arrangements offered by Japan for the second Bosporus bridge.

Mr. Wells: Is it not unacceptable that the Japanese Government should put my right hon. Friend in the position of losing a major contract to the Japanese for bridge building although we produced the lowest contract price? Because of the use of subsidised export credits and trade in aid-type arrangements, the Japanese have won this major contract and, thus, are able to penetrate a market that was previously dominated by the British, with a consequent loss of jobs for the United Kingdom. Yet, the Japanese refuse to accept proper trade terms for the entry of our goods. Is it not essential that my right hon. Friend negotiates a watertight arrangement to put our manufacturers and exporters on the same basis as Japanese business men?

Mr. Tebbit: I well understand my hon. Friend's anxiety. As I said the last time when I answered questions on this matter, it does not appear that the Japanese broke any undertakings and agreements on aid. However—*[Interruption.]* If the House is finished, I shall continue. However, what I find—*[Interruption.]*

Mr. Speaker: Order. I seldom see the Secretary of State lost for words. Let him continue.

Mr. Tebbit: I am not lost for words, but I have no intention of shouting above this bear garden, and the sooner hon. Members stop shouting, the sooner we shall get on. *[Interruption.]*

Mr. Speaker: Order. Perhaps I should not have said that.

Mr. Tebbit: Of course you should have said that, Mr. Speaker. Mr. Speaker is always right.

The point about the Bosporus bridge contract, which I have sought to make both here and in discussions with the Japanese authorities, is that their dumping of cheap credit to obtain this contract is incompatible with the assurances and policies announced by Mr. Nakasone, under which the Japanese are seeking to limit their trade surplus. That matter is being taken up forcefully with the Japanese authorities, and unless they pay attention, before long other countries will take protectionist measures against them. I hope that they will draw back from the position into which they are getting before it is too late.

Mr. Gould: In the light of the predatory policies being pursued by the Japanese, and in the light of what the Secretary of State has just said, does he accept that this is hardly the time to contemplate unilateral disarmament in trade of the sort with which the Government seem to be flirting in the wake of the Byatt report? Will he listen to the views of the National Economic Development Office, published today, and of his Department's overseas projects board, and ensure that British firms which seek major contracts abroad are not left defenceless against the Japanese and other foreign competitors?

Mr. Tebbit: It is not my habit to flirt. When I get started, I get on with it.

Japan

17. **Mr. Phillip Oppenheim** asked the Secretary of State for Trade and Industry how many representations he has received from British exporters about non-tariff barriers in Japan.

Mr. Channon: My Department receives a number of representations from British exporters about non-tariff barriers in Japan.

Mr. Oppenheim: Does my right hon. Friend agree that the failure to export to Japan is often attributable not to non-tariff barriers but to weaknesses in British companies? None the less, last year, the Japanese exported to us £40 million worth of telecommunications equipment, and in return we exported to them only 1 per cent. of that figure. Does he accept that that occurred because we have liberalised our telecommunications market and thrown it open to imports from abroad, while the Japanese have no such policy and close their doors to overseas telecommunications products?

Mr. Channon: My hon. Friend raises a fair point which, coupled with the points made by my right hon. Friend the Secretary of State in answer to the previous question, is an example of some of the practices of the Japanese Government that are getting the world trading system into a dangerous position. During his visit to Tokyo my right hon. Friend the Secretary of State raised my hon. Friend's specific point, and we shall continue to press the matter.

18. **Mr. Willie W. Hamilton** asked the Secretary of State for Trade and Industry what further progress has been made in talks with Japan on the liberalisation of trade.

Mr. Channon: On 9 April, Prime Minister Nakasone announced a market-opening package of measures designed to bring about an increase in Japan's imports of manufactured goods, further liberalisation of internal financial markets and the internationalisation of the yen. We and our Community partners will be looking closely for evidence of practical steps to implement those intentions.

Mr. Hamilton: Is the Minister aware that the country is becoming increasingly angry about the courteous claptrap that we have heard from the Japanese in such matters during the past 20 years, and about the fact that no progress has been made? Does he accept that the House will give unqualified support if the Government take retaliatory action against the Japanese?

Mr. Channon: The feelings of the House are abundantly clear. However, it would be much more satisfactory and in the interests of Japan and the United Kingdom if the measures which the Japanese Prime Minister promised in July prove, in effect, to open the Japanese market to our exports. That would be a happier solution than having to take retaliatory measures, which would help neither the United Kingdom nor Japan in the long run. As my right hon. Friend the Secretary of State made clear, there is a grave risk of the world trading system falling into serious trouble and of retaliatory measures being taken.

Regional Policy (Tourism)

19. **Mr. Adley** asked the Secretary of State for Trade and Industry what contribution he envisages tourism makes to regional policy, and vice versa.

Mr. Norman Lamont: Tourism can make a positive contribution to employment in assisted areas, and tourism projects in those areas may also qualify in certain circumstances for regional assistance.

Mr. Adley: As flourishing regional airports are fundamental to an effective regional policy and to the growth of regional tourism, will my hon. Friend give the House a categorical assurance that he will do all that he can to encourage the growth of traffic at regional airports outwith the south-east of England?

Mr. Lamont: I recall that my hon. Friend led previous opposition to Maplin and Stansted on regional policy grounds. In view of the statement that may be made in two minutes' time, this is a case of my not venturing where angels fear to tread.

Tourism

20. **Mr. Greenway** asked the Secretary of State for Trade and Industry if he will make a statement on the prospects for the tourism industry in 1985.

Mr. Norman Lamont: In the first quarter of 1985 the number of visits to the United Kingdom by overseas residents was 10 per cent. higher than a year earlier, at a new record level for a first quarter. I am optimistic about the prospects for the rest of the year.

Mr. Greenway: Is it not true that a record number of jobs are being created in tourism, and that this service industry is one of the most promising areas for growth in employment? What was the value of tourism to Britain last year, and how many people were employed in the industry?

Mr. Lamont: Over 1 million people are currently employed in the industry. What my hon. Friend says about the prospects for growth in employment is correct. He may have noticed that we are now publishing, quarter by quarter, the growth in jobs in the tourist-related sectors. I hope that that will highlight the point that he is making.

Mr. Heffer: Does the Minister agree that while it is good to encourage tourism to underdeveloped areas such as Merseyside, it would be better if the Government concentrated on rebuilding industry in such areas in order to get the thousands and thousands of workers who are unemployed there back to work? Otherwise, we shall become a national museum.

Mr. Lamont: The hon. Gentleman has previously urged me to do more for tourism on Merseyside. We need to do things to help manufacturing and services, but we must face the fact that one of the best prospects for growth in employment lies in the services sector, and that includes tourism.

Mr. Ewing: On a point of order, Mr. Speaker.

Mr. Speaker: Does it arise out of questions?

Mr. Ewing: Yes, Mr. Speaker. The House is aware that the Prime Minister, who has fortunately just joined us, has told the nation that she has changed her style.

However, we have never been warned that the Secretary of State for Trade and Industry has changed his style. Could you do something, Mr. Speaker, to protect the House from the shock of the Secretary of State for Trade and Industry being nice to people, because if that goes on my hon. Friend the Member for Bolsover (Mr. Skinner) will change his style as well?

Mr. Skinner: Oh, no!

Mr. Speaker: Order. It is a consummation devoutly to be wished.

Mr. Skinner: Further to that point of order, Mr. Speaker. I too have noticed that the Prime Minister now has more voices than Janet Brown. Today, at Question Time, we have heard from the Secretary of State for Trade and Industry and he has been nearly as quiet as a tailor's dummy, but, I assure you, Mr. Speaker, I ain't changing.

Sudan (Famine Relief)

3.31 pm

Mr. Michael Meadowcroft (Leeds, West) *(by private notice)* asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on his action in the light of today's urgent warning of potential famine disaster in the Sudan.

The Minister for Overseas Development (Mr. Timothy Raison): We have been closely monitoring the serious food situation in Sudan. There are substantial supplies in Port Sudan. The problem is internal distribution. We are now providing £650,000 for the charter of a Hercules to be placed at the disposal of the Save the Children Fund within the next few days for a period of one month. That will airlift emergency food supplies to western Sudan where distribution problems have been acute. We are also providing up to £130,000 for the purchase of a light aircraft for use by voluntary agencies for moving supplies and personnel.

The European Development Council agreed on 23 May to my proposal to use emergency procedures to approve a £6 million project to rehabilitate the railway to western Sudan. I understand that the first phase, which provides special food trains, is already in operation.

We are holding further urgent discussions with the British voluntary agencies operating in Sudan to establish what immediate help we can give.

Mr. Meadowcroft: I am grateful to the Minister for his response. Does he accept that the House, and people in general, I suspect, will feel that it sounds very much like placing sticking plaster over a gaping human need? Surely much more needs to be done to enable the transportation of food from the east to the affected Darfur region in the west. One aeroplane and a light aircraft available to the voluntary agencies are not nearly enough. Will the Minister assure the House that the resources available are not limited by the existing budget, as with Ethiopia, but will be made available according to need? Otherwise a disaster far greater than that which occurred in Ethiopia will take place in Sudan?

Mr. Raison: The proposals that I have just announced amount to much more than sticking plaster. The problem is not the overall supply of food—there is a great deal of food available—but distribution. I believe that our aircraft, which will carry high priority supplementary foods, will be of great value. In addition, as I made clear in my reply, we have also galvanised the European Community to get on with the crucial job of ensuring that the railway line to western Sudan is fully operational. As I told the House, that process is already under way.

Mr. Bowen Wells (Hertford and Stortford): Is the railway capable of carrying enough food to western Darfur where the starvation is occurring? How much has the railway delivered to the western parts? Now that the rains are imminent, is it possible to distribute food in lorries from the railhead to the villages where it is needed?

Mr. Raison: I cannot yet say that I am satisfied that the railway is in a condition to provide all the food that is needed; it is a big job. However, I am confident that the steps that we have taken represent a substantial improvement. There is still more to be done on distribution from the railhead. It is a difficult problem, but we are determined to do all that we can to make sure that food reaches the people who are so desperately in need.

Mr. Tom Clarke (Monklands, West): Is the aircraft additional to the resources of the Overseas Development Administration, or is it coming from Ethiopia? Is the Minister bearing in mind the views of the Select Committee on Foreign Affairs, and will the additional resources be coming from the ODA budget or from the Government's contingency budget?

Mr. Raison: We shall be paying for the cost of the Hercules out of our own contingency resources. I stress that we do not intend to deprive our aid project in Ethiopia of anything to mount the aircraft operation in Sudan. It will be a new operation.

Mr. Mark Robinson (Newport, West): I am sure that all hon. Members will welcome the additional assistance that my right hon. Friend has been able to give to Sudan in recent months. Has my right hon. Friend any up-to-date information on the situation in the region mentioned in *The Times?*

Mr. Raison: We get regular reports of what is happening. I am not sure whether my hon. Friend is referring to the western part of Sudan or to the whole area. We get updated reports, and they show clearly that there is, overall, a substantial quantity of food, but serious limitations in the internal distribution of food. We are concentrating on that.

Mr. Tam Dalyell (Linlithgow): How about the provision of British-made trucks?

Mr. Raison: I know that the hon. Gentleman is keen on this matter, but large numbers of trucks are already available in Sudan, which has a strong private enterprise trucking industry. It is crucial that necessary spares are made available and, in the west of the country, the railway is the lifeline.

Mr. Robert Banks (Harrogate): I welcome my right hon. Friend's reply and recognise the grave seriousness of the situation in the Sudan, but does he agree that one of the problems of distribution stems from a shortage of fuel? Will he consider providing fuel so that distribution can be made rapidly?

Mr. Raison: The provision of fuel has been a constant worry, although I do not think that it has ever broken down in the way that was feared. We have contributed $272,000 for fuel for the distribution of our most recent consignment of food aid which arrived successfully in May before the rainy season began.

Mr. Stuart Holland (Vauxhall): The Minister must realise that this response is quite inadequate. It is far too little and far too late. Warnings were given by us in the House earlier this year that the fuel problem was critical and that Sudan needed at least 250,000 tonnes of fuel. We urged the Minister then to act directly rather than through the EEC and we called on the Government to release more vehicles, if necessary from Ministry of Defence stock. The Minister has not done that.

The right hon. Gentleman's comments about the resources now being given for renewal of the railway stock also are quite inadequate. Tenders were being offered by British firms in January, in the expectation that the renewal of the rolling stock would be done by June, so

that, when the rains came, the food aid could go through. As far as we can see, the project has only just been approved and the railway is inadequate to meet the food distribution needs, because only about one fifth of what is needed is getting through.

Mr. Raison: I have a feeling that whatever I announced from the Dispatch Box, the hon. Gentleman's automatic reaction would be that it was too little and too late. The railway, rather than fuel, is the crucial matter. The British Government have made the running throughout. We provided the consultant who prepared the plans earlier this year. I have repeatedly pushed as hard as I can in the European Community to get the project accelerated, because the understanding was always that the Community would implement it. I saw the Commissioner and told him the position a few weeks ago, and, at the Development Council on 23 May, I got it established that emergency procedures would be used. They are being used and the situation is improving, but I accept that there is still more to be done.

Mr. Holland: Six months too late.

Rolls-Royce, Derby

Mr. Speaker: I undertook yesterday to investigate a case of what appeared to be the premature disclosure by the Department of Trade and Industry of the text of a written reply to a parliamentary question put down for answer yesterday by the hon. Member for Southampton, Itchen (Mr. Chope). The matter was brought to my attention by the hon. Member for Derby, South (Mrs. Beckett).

I understand that a press release setting out the terms of the reply was intended to be issued by the Department for release at 4.30 pm but was, through an error, sent out at noon.

That constituted a breach of the rule under which answers to written questions may not be issued before 3.30 pm or before mid-day on Fridays. I hope that this rule will be maintained in the future.

Mrs. Margaret Beckett (Derby, South): While thanking you, Mr. Speaker, for that statement, I suggest that the House is owed at least a small apology by the Minister about the manner and timing of an announcement which had financial implications for the markets and strong implications for employment.

The Secretary of State for Trade and Industry (Mr. Norman Tebbit): I am grateful to you, Mr. Speaker, for making that statement. You are right to say that the press notice was issued in error, being wrongly sent among a number of other notices to the Central Office of Information at the time required for a noon distribution rather than at the time required for a 4.30 distribution, for which it was intended.

I should emphasise that the press notice did not carry an embargo. Therefore, no question of a breach of an embargo arises, so that on this occasion the press was innocent of any improper behaviour. I can only apologise to the House and to hon. Members who feel that they were inconvenienced for the breach of the rule which you have reiterated, Mr. Speaker.

Airports Policy

3.41 pm

The Secretary of State for Transport (Mr. Nicholas Ridley): With permission, Mr. Speaker, I should like to make a statement about the Government's policy for airports.

It is the responsibility of Government to ensure that sufficient capacity can be provided at United Kingdom airports, where it is required and in due time. Our policy of encouraging competition in the air requires that there should be enough capacity available, so far as is possible, to all airlines on equal terms.

We cannot direct flights to airports that they do not wish to use. Airports must use the opportunities open to them to attract as many flights as they can through providing a cheap and efficient service for the benefit of the passengers.

To make airport managements more responsive to their customers' and further to assist the growth of our most important and successful airline industry, the Government have decided to introduce legislation, first, to make every major airport into a limited company, and, secondly, to convert the British Airports Authority into a holding company and to privatise it with its seven airport companies.

I hope that local authorities will follow this lead and introduce private capital into their companies, too; but we do not intend to force them to do so. A system of regulation will be proposed to control the monopoly aspects of airports, including charges, to regulate traffic distribution when necessary, and to safeguard essential national interests.

Our air transport industry is the envy of the world and a great success story. It has a turnover of £4 billion and earns £500 million of foreign exchange each year. It is a growing industry, already employing 85,000 people.

It is essential to the continuation of this success, and to the provision of more jobs, that there is sufficient airport capacity. Equally important, this must be done with minimum damage to the environment and to the lives of people living near airports.

It is with solving this dilemma—adequate capacity with minimum environmental damage—that first the Inspector at the airports inquiries, and more latterly the Government, have had to grapple. I should like to pay tribute again to Mr. Graham Eyre, QC, for his thorough and comprehensive report. In announcing our decisions today, I want to stress that we have sought a solution which meets both objectives as far as is humanly possible.

The success of our regional airports depends on them handling more traffic, which in turn depends on a growth in demand and on more airlines deciding to operate services from them. The signs are good. Traffic grew by 12 per cent. last year and is expected to increase by one third more by 1990. 1985 has seen the introduction at regional airports of many new scheduled services to international destinations, and more are planned. The Government will do everything they can to increase flights to and from the regional airports, first and foremost by British airlines. As regards foreign airlines, we recently reached an agreement with the Government of Singapore which allows Singapore Airlines to operate to Manchester. We expect shortly to begin discussions with the United States Government about the basis on which scheduled traffic rights to Manchester for United States airlines may also be granted.

We will continue to study, with representatives of the regional airports, how to increase traffic still further. We will be ready to approve worthwhile investment in new facilities and the improvement of road and rail links where they are justified. We will ensure that competition between all airports, both BAA and local authority, will be on fair and equal terms. We recognise the importance of maintaining access for domestic flights into Heathrow and Gatwick.

Even after taking account of all these efforts to attract traffic to the regions and away from the south-east, the Government, after careful evaluation, have concluded that it is necessary to provide capacity in the south-east for between 72 million and 79 million passengers per annum by 1995. This is consistent with the inspector's planning figure of 75 million passengers per annum. We intend to achieve that figure as follows:

First, my right hon. Friend the Secretary of State for the Environment recently announced approval of the Stolport in London's docklands. This will provide 1 million passengers per annum.

Secondly, the Government have decided to invite Luton borough council to come forward with proposals, which would be subject to the necessary planning procedures to increase the capacity of Luton airport from its present throughput of 2 million passengers per annum to 5 million passengers per annum.

Thirdly, Gatwick airport is expected by that time to be capable on present plans of handling 21 million to 23 million passengers per annum. We have no plans for a second runway at Gatwick.

Fourthly, the capacity at Heathrow in 1995, when all four terminals will be in full operation, is expected to be between 38 million and 42 million passengers per annum. It is very possible that this will be adequate to handle as big a throughput of passengers as runway capacity will allow. The Government have decided to accept the inspector's recommendation that air transport movements at Heathrow should not be artificially constrained and to ask the House to accept the abandonment of the proposed limit of 275,000 air transport movements a year. Even with this, and with all foreseeable technological improvements to the full use of runways it seems likely that runway capacity, not terminal capacity, will be the limiting factor at Heathrow for some years ahead. Nevertheless, it seems prudent to ask the BAA to pursue with the Thames Water Authority the possibility of moving the Perry Oaks sludge works elsewhere. Only if and when this has been done, and in the light of traffic forecasts at that time, would it seem sensible to see whether extra terminal capacity should be provided, and if so how much. My right hon. Friend the Secretary of State for the Environment, on whose behalf the Minister for Housing and Construction has acted throughout, has turned down Uttlesford district council's application for planning permission for terminal 5, and no terminal can be built at Perry Oaks in the future without planning permission. We are setting up a study of improved surface access to Heathrow.

Fifthly, I come to Stansted. It will now be abundantly clear that the only way we can provide sufficient capacity to sustain the growth of our successful aviation industry is by terminal development at Stansted, thus bringing into

more effective use the spare runway capacity which is available there. My right hon. Friend the Secretary of State for the Environment and I have therefore decided to accept the inspector's recommendation to the extent of granting the BAA outline planning permission for development at Stansted. The application was for 15 mppa. The inspector recommended initial permission for this 15 mppa rising later to 25 mppa at Stansted. Although we have granted permission for the 15 mppa recommended by the inspector, we have decided to impose conditions requiring that the development be phased, and limited in the first phase of development to 7 to 8 mppa. The initial development will thus amount to less than one third of what the inspector recommended ultimately. Apart from the planning decision I propose to seek powers to limit air transport movements at airports. Subject to Parliament giving me the necessary powers, I intend to impose an initial limit on air transport movements at Stansted equivalent to 7 to 8 mppa. Any further increases in traffic at Stansted would be subject to control by Parliament, by means of an affirmative resolution. As a result, further growth of traffic at Stansted would only take place when it was seen to be necessary, with Parliament having the decisive role. This should provide reassurance to people living in the area. We have rejected the possibility of the construction of a second runway at Stansted.

In the past, we as a nation have shirked the decisions needed for the growth of air traffic and the jobs that go with it. We are in danger of stifling one of our most enterprising industries and losing out to our continental rivals: Schiphol, Paris and Frankfurt are building capacity well ahead of growth. They no doubt hope that we will shirk the decisions once again. The Government are determined not to.

The decision letters on the planning application and the White Paper, all of which are now available in the Vote Office, set out the arguments for these decisions at length and with clarity. When they have read them, I hope that right hon. and hon. Members will feel that our responsibilities to all the many important and often divergent interests concerned have been adequately discharged.

Mrs. Gwyneth Dunwoody (Crewe and Nantwich): The Secretary of State has made a major statement on future airports policy. The one thing that is certain is that it gives the green light and go-ahead in the south-east of the country. It represents a list of broken promises. For example, a solemn promise was given to those living around Heathrow airport that the controls on aircraft movements would be respected, but that has been abandoned. Undertakings were also given to Manchester that it would be given assistance in developing as a regional airport. It was also suggested that, by somehow privatising the aircraft industry, we could support regional airports in, for example, Scotland.

Why should we believe the Secretary of State when he says, on the one hand, that he intends to privatise extensively to improve the future of the aircraft industry and, on the other, that he intends to ask the House for greater controls both on air traffic movements and on future developments? Why should we believe, for example, that he will move the Perry Oaks sludge works but has no intention of building a fifth terminal? Why should we believe that the right hon. Gentleman is now going to assist the regional airports when, in effect, he has materially reversed his position since January 1985? In January, he said that he would give every possible support, particularly to regional airports. But the White Paper now makes it quite clear that in future any developments can go ahead only if the market has proven itself and the development is already there. That restriction is quite unacceptable.

What the right hon. Gentleman has done is to say that in future there will be added capacity at Stansted and Luton and increasing use of Heathrow. He is wholly uninterested both in the environmental aspects of the development of the major airports in the south-east and the very real industrial problems of the north. The statement is a slap in the face for regional airports and it should not be accepted by the House.

Mr. Ridley: I quite expected the hon. Lady to respond with predictable, old-fashioned reaction to the suggestion that the airport should be privatised, so I shall leave that typical reaction to one side.

On Manchester and the regional airports in the north:

"The Government rejects the suggestion that the air transport industry should be subject to the damaging restrictions on its operations which would be the outcome of the forced diversion of traffic to regional airports".

If the hon. Lady does not agree with that statement, she might like to know that I was quoting her Government's White Paper of 1978. What was good enough for that Government is good enough for me. [HON. MEMBERS: "Oh."] With the exception of that, there is nothing that the north-west and the other regions have requested in the development of their airports that is not contained in the White Paper. When the hon. Lady has time to read it, she will find that that is so. No restrictions are being imposed on any development.

The hon. Lady appeared to be a little muddled. She accused me of abandoning the limit on air transport movements at Heathrow — about which the House expressed some disquiet earlier in the Session — and suggested that it should be proceeded with. At the same time, she appeared to want to have terminal 5 built, which would have meant more traffic going through Heathrow.

Mrs. Dunwoody: No, I did not say that.

Mr. Ridley: The hon. Lady's position, as she set it out, was that she had no desire to see terminal 5 at Heathrow, so she cannot complain both ways.

Mr. Toby Jessel (Twickenham): Is my right hon. Friend aware that very many of the 1·75 million people living around Heathrow, who were dreading the intolerable traffic congestion and noise that would have resulted from a fifth terminal, will be immensely grateful and relieved at the decision not to build a fifth terminal and to turn down the current planning application? I speak also for my right hon. Friend the Member for Spelthorne (Sir H. Atkins), who is currently abroad on Select Committee duty.

Mr. Ridley: I am grateful to my hon. Friend, especially for mentioning our right hon. Friend the Member for Spelthorne (Sir H. Atkins), who has already told me how sorry he is that he cannot be here, because he would have wished to be present on this occasion. I am pleased to be able to honour, for both my hon. Friends, the Government's pledge that terminal 5 would not be constructed.

Mr. Michael Foot (Blaenau Gwent): Does the right hon. Gentleman recall that, after our last debate on airports policy there was an overwhelming vote against the development of Stansted? Why has he resolved to flout that vote? Why should anyone believe that the House of Commons will have any control over these matters if he is deriding and insulting the last vote of the House on this issue?

Mr. Ridley: The right hon. Gentleman may recognise two points: first, the vote was on whether the House should adjourn—[HON. MEMBERS: "Oh."] Secondly, the inspector at the airport inquiry recommended development at Stansted first to 15 million and then to 25 million passengers a year, whereas the Government are recommending that development should be limited to 7 million to 8 million passengers a year.

Mr. Julian Amery (Brighton, Pavilion): May I congratulate my right hon. Friend on having arrived at the same conclusion about Stansted as that at which I arrived 21 years ago? That was accepted by the Government of the day, despite the reservations of Mr. Rab Butler about the possible effect on his shooting.

I urge my right hon. Friend to go rather further than he has in recognising the enormous importance of the maximum development of Heathrow. It is not just the gateway to Britain; it is the Clapham Junction of air traffic between the American continent, the European continent and the far east. It is important that it should be endowed with all possible facilities to give it its maximum establishment. With the much less noisy aircraft and the shorter take-off now available, the environmental damage will be greatly reduced from what it would have been some years ago.

Mr. Ridley: I am grateful to my right hon. Friend. Perhaps it is auspicious that, 21 years after he considered the matter, the decision should come of age. I agree entirely about Heathrow. The Government's policy as set out in the White Paper will be to use the runways to the maximum capacity, and that is the limiting factor at Heathrow. That will be in the best interests of British aviation and Heathrow which, as my right hon. Friend said, is one of the most important airports in the world, and probably the most important interlining airport in the world.

Mr. James Molyneaux (Lagan Valley): The statement on United Kingdom airports makes clear its intentions to make the major airports into limited companies. Will such legislation apply to the Northern Ireland Airports Authority? In the light of the intention to develop regional airports, will the Secretary of State be evaluating the expansion of capacity and use at Aldergrove international airport?

Mr. Ridley: These matters are for my right hon. Friend the Secretary of State for Northern Ireland, but the offer to assist regional airports in attracting overseas flights will extend to Belfast.

Mr. Alan Haselhurst (Saffron Walden): Is this not a case of putting the most capacity in the wrong place to meet the prescription that my right hon. Friend has given —that it will be difficult for London to maintain its competitive position if people are invited to interline by taking a bus around the M25? On the procedural point, why is my right hon. Friend prepared to trust the voice of Parliament to defend Stansted growing beyond the 8 million passengers capacity when he is not prepared to give an opportunity for the House to judge the present position, which it could have done had he followed the precedent of the right hon. Member for Bethnal Green and Stepney (Mr. Shore) in the case of the Windscale inquiry?

Mr. Ridley: Airports will develop the traffic and the type of trade that suits them best under the freer regime that we are providing. I suspect that, more and more, Heathrow will develop into an interlining airport with a major input of domestic services, so the situation that my hon. Friend has suggested may not arise.

Secondly, my hon. Friend spoke about a special development order and I remember how the House, and he, welcomed the decision in 1980 that the Stansted proposal should be pursued through the normal planning process and should not be decided without a full and fair inquiry at which everybody could put their view. We adopted that proposal, and we cannot now be blamed for not changing our horses in midstream to the SDO proposal. The SDO method would have meant that we would be unable to secure the compulsory purchase orders, the listed building consents, the scheduled monuments consents, the trunk road orders, the side road orders and the stopping up and diversion of highways orders that will be necessary in the permission granted at Stansted.

Mr. Alfred Morris (Manchester, Wythenshawe): Is the Secretary of State aware that his acceptance in principle and ultimately in practice of the development of Stansted airport into one of 15 million passengers per annum will cause the gravest concern in the north of England?

Julian Haviland, who is rightly respected on both sides of the House, reported this morning in *The Times* the Minister's derisory comments about forcing Londoners onto Manchester-bound trains to fly to Paris. Is the Secretary of State aware that that is offensive not only to Mancunians, Geordies and people from Yorkshire and Scotland, but to people from all over the north? Is he aware that as many as 30 per cent. of the people who fly into and out of London airport are not from the south-east and do not want to fly there? Why should millions of northerners have to catch London-bound trains to fly abroad?

What does the statement do about licensing policy as it affects regional airports? What will the Secretary of State do urgently to stop the cross-subsidy of Stansted airport by the British Airports Authority? The right hon. Gentleman has missed an opportunity to unite this nation at a time when it is bitterly divided.

Mr. Ridley: I must differ from the right hon. Gentleman on his three main points, because he is not right. The development at Stansted is limited to 7 million to 8 million passengers per annum, and if the House does not want to go beyond that traffic figure, it lies within the power of the House to prevent it. Secondly, the right hon. Gentleman said that 30 per cent. of the passengers going through London airports are not from the south-east. However, the true figure is that 25 per cent. of the passengers going through London airports are not from the south-east, and of that 25 per cent., 5 per cent. comes from the north-west and the north-east, with the rest from other parts of the United Kingdom. More people come from the

south-west than from the north-west in passing through London's airports. The right hon. Gentleman's figures are not entirely right.

We have met the right hon. Gentleman's point that cross-subsidy to Stansted or any other airport will be stopped by making them separate limited companies. Any flow of funds will be transparent, and it will be made clear that those flows of funds must carry commercial interest rates. Therefore there will be no cross-subsidy.

Mr. Fred Silvester (Manchester, Withington): I congratulate my right hon. Friend on continuing to be the Minister who has done most for regional airports of any since the war. However, will he remember that the two crucial matters for the north about the expansion of Stansted are that there should be no subsidy in that area, so that competition is free, and that the supporting infrastructure will be of a limited nature? Can my right hon. Friend confirm that that will be the case in both instances?

Mr. Ridley: I am grateful to my hon. Friend and I can confirm that there will be no subsidy to Stansted. The only investment will be of commercially raised money paying commercial rates of interest. That will cause landing charges to rise at Stansted to levels commensurate with other airports.

Secondly, the figures that I can give my hon. Friend for the infrastructure needed at Stansted development are £2 million for local roads. As well as that, there may or may not be some investment on rail infrastructure which could be about £50 million. That will be only if the investment appraisal of any scheme considered and put forward by British Rail achieves a positive result.

Mr. John Cartwright (Woolwich): Does the right hon. Gentleman accept that his fine words about regional airports fall a long way short of the real commitment that is needed if they are able to compete fairly? How realistic are the limitations on development that the right hon. Gentleman is proposing for Stansted? Surely it will be attractive to airline operators only if it has the fast rail link that the inspector recommended. British Rail tells us that it cannot justify financial investment without far more passengers at Stansted than the Secretary of State is suggesting. Is he not opening the door to the full-blooded development of Stansted?

Mr. Ridley: As an earnest of our intentions to improve and expand flights from regional airports, I point out that there are now 33 international scheduled services from Manchester airport, 14 of which have been inaugurated this year alone. That is a measure of what the Government are doing to increase traffic at regional airports. As I said in the statement, we shall continue to explore ways of getting more flights into the regional airports.

Secondly, on British Rail, nobody has known until now about the development of 7 million to 8 million passengers per annum at Stansted that I have announced today. Until British Rail has had a chance to assess the possibilities, it will be impossible to know how much it will cost and whether it will be economic at all. Far from opening the floodgates to Stansted, the result of my announcement may be that it is not economic to provide a rail link, and that would be a brake upon the development of Stansted.

Mr. Graham Bright (Luton, South): I congratulate my right hon. Friend on guaranteeing the future of Luton airport and, indeed, offering the prospect of a considerable number of new jobs in the area. Will he confirm that 5 million passengers a year is a final figure and that it will not be allowed to increase? Will encouragement be given to scheduled air services to use that airport, rather than developing the charter traffic that we have had to date?

Mr. Ridley: I am grateful to my hon. Friend. Luton borough council will be invited to submit proposals, which might be subject to a planning inquiry. I gather that the limit on what can be accommodated at Luton is controlled by national air traffic considerations and is unlikely to exceed 5 million passengers. It will be for the borough council to make such proposals as it sees fit.

My hon. Friend also asked about scheduled flights from Luton. I believe that some are taking place already but there will be no inhibition on scheduled flights to any airport to which an airline applies for a route licence to operate.

Mr. Terry Dicks (Hayes and Harlington): Will my right hon. Friend accept that many of my constituents will be bitterly disappointed at the decision not to go ahead immediately with a fifth terminal at Heathrow? They will believe that he does not understand the needs of Heathrow and that, because he has not listened to them, he does not understand the operating needs of the airlines that are using Heathrow.

Mr. Ridley: There is no possibility of putting a fifth terminal in the middle of the Perry Oaks sludge works. I am sure that even my hon. Friend would agree that the sludge works would have to be moved first. Surely it would make sense to decide on the scope and size of the terminal which might be put there when we discover whether any terminal is necessary after the sludge works has been moved.

Mr. George Foulkes (Carrick, Cumnock and Doon Valley): Why does the Secretary of State not admit the truth—that the huge increase in capacity in the south-east of England will make every Scottish airport less viable and will make it less likely that there will be direct flights from Scottish airports to destinations overseas? Since he has recently announced the continuation of Prestwick as Scotland's transatlantic gateway, what assurances has he received from the British Airports Authority and what guarantees will there be that Prestwick will continue to be Scotland's transatlantic gateway and, indeed, will remain open? Is he aware that we find it very sinister that separate companies are to be set up and that the British Airports Authority will not be privatised as one company?

Mr. Ridley: In the last year there has been a 20 per cent. increase in flights from Edinburgh to London. If that rate of growth continues, I shall have to find still more capacity in the south-east to accommodate the flights that the hon. Gentleman wants to travel on. How he can want both more aviation out of Scotland and less landing space in England beats me. The airport at Prestwick was the subject of a recent announcement in response to a question, and I have nothing to add to what was said at that time.

Sir Peter Blaker (Blackpool, South): Is my right hon. Friend aware that the removal of artificial constraints on the number of landings at Heathrow will be helpful to many provincial airports? He is to be congratulated on stopping the subsidy to Stansted. Is it not bizarre that for

[Sir Peter Blaker]

years charges for aircraft at that airport have been subsidised by large sums out of the profits of the so-called duty-free shops at Heathrow, to the disadvantage of provincial airports? Will not the change be very important for airports such as Manchester?

Mr. Ridley: I agree entirely with the two points that my right hon. Friend has made. First, it is important to keep as much access to London, and particularly Heathrow, as we can for domestic flights from the rest of the country. Secondly, I confirm that Stansted has benefited financially from the profits of other BAA airports. This should not be the case in future under our proposals.

Mr. Bruce Millan (Glasgow, Govan): Is the Secretary of State aware that he missed the point about flights from Scotland to London? We do not want more flights to London; we want more flights from Scotland to destinations abroad without having to come through London. In the case of Prestwick, how does the Secretary of State expect a private limited company to operate Prestwick, given the bias towards the south-east in his statement today? Does his statement not make a farce of the review that was promised for Prestwick? Indeed, have we not heard from him today the pronouncement of a deferred death sentence on Prestwick?

Mr. Ridley: I said earlier that we would do all we could to increase flights from any regional airport. That does not exclude Scottish airports. They are in that category from the point of view of what I was saying. We shall do what we can to license flights out of airports in the rest of the United Kingdom.

Let me make it clear that my statement will not have the effect that the right hon. Gentleman suggested in regard to a public limited company at Prestwick. All that can happen is that it will show a loss in its accounts at the end of the year, and it does that anyway.

Mr. Bill Walker (Tayside, North): My right hon. Friend is to be congratulated because, for the first time for many years, we have a Minister who has grasped the nettle. Contrary to some of the comments that have been made about Scottish airports, I am confident that they will continue to prosper, as they were doing for a long time before the OPEC oil price increases; they are now recovering. Will my right hon. Friend confirm that the Scottish airports will be managed largely by Scots?

Mr. Ridley: I am grateful to my hon. Friend. I can confirm that the British Airports Authority, while still in public ownership, will be invited to continue to have a Scottish vice-chairman and to have a large degree of Scottish management. Of course, if it passes into the private sector those matters will be beyond Government control, but I am certain that it will be in the interests of the new company to make sure that the four Scottish companies are managed predominantly by Scots.

Mr. Eddie Loyden (Liverpool, Garston): Is the Secretary of State aware that his statement today will be greeted with disappointment and perhaps anger by the northern regions, which will see it as another example of the Government's disregard of their problems? What effect will the statement have on Liverpool airport in my constituency? Will he give an assurance that the sludge works will not be shifted to Liverpool?

Mr. Ridley: I must repudiate both those suggestions. I do not remember a more helpful and determined attempt to assist the north. It is not more runway capacity, terminal capacity or airport capacity that is needed in the north of England, but more flights. The more flights we can get into the north, the more that will help the northern airports to expand and in due course to need more capacity. That is what we seek. I can give the hon. Gentleman an absolutely categorical assurance that the sludge works will not be moved to Liverpool.

Sir Fergus Montgomery (Altrincham and Sale): Is my right hon. Friend aware that his statement will go a long way to meeting the requirements of Manchester airport?

Mrs. Dunwoody: No.

Sir Fergus Montgomery: I suggest that the hon. Lady reads the White Paper. Can my right hon. Friend give a firm commitment to the constructive development of an international hub at Manchester? Can he give an assurance that, if British carriers are unwilling or not prepared to apply for flights on viable international routes out of Manchester, the applications of foreign carriers will be approved speedily and will not be subject to the two-year delay that Singapore Airlines had to endure?

Mr. Ridley: I am grateful to my hon. Friend. I am sure that if hon. Members read the White Paper they will discover more than I have been able to explain in my short statement.

I confirm that we intend to try to help Manchester airport build itself up into a hub for the north of England. That is what I said when I offered help to try to bring more traffic to that airport. The Singapore Government applied in March for a flight to Manchester and agreement was reached within six weeks. That is almost a record time for coming to an agreement on such a major application.

I am sure that my hon. Friend will agree that, although we want to do everything that we can to maximise traffic into and out of Manchester and the other regional airports, we want to give our airlines a good opportunity in the countries with which we are dealing. The greatest contribution to jobs that a regional airport can make is by British airlines obtaining traffic rights to fly out of the regional airports to overseas capitals. It is not just a question of welcoming foreigners into our regional airports, but of making deals which will benefit Manchester, for instance, and create jobs in the north.

Mr. Tony Lloyd (Stretford): Is the Secretary of State aware that he is to be congratulated on one matter alone? He seems to have done enough to buy off his own Back Benchers from the north of England, but it is a policy for one region—the south-east—not a policy for the north.

When did Manchester ever ask for further runways or terminals? Manchester has always made one simple request—to be given the flights. It has always been denied that and the Minister has denied it again today. Manchester is not a regional airport. It wants to be a national gateway airport, as promised.

Mr. Ridley: Manchester is a gateway airport and will remain so. If the hon. Gentleman reads the White Paper he will discover that there are already route licences for 1,500 overseas routes out of the regional airports, of which

only 100 have so far been taken up. The problem is to persuade airlines to take up more overseas routes from regional airports. That is the real problem from which all regional airports suffer and that is why the Government have addressed themselves with enormous diligence to trying to help put it right.

Dr. Alan Glyn (Windsor and Maidenhead): May I congratulate my right hon. Friend on honouring his promise not to construct the fifth terminal? Is he aware that that will bring great relief—*[Interruption]*. It certainly will not be constructed in this Parliament or the foreseeable future.

Is my right hon. Friend aware that my constituents suffer more than others from the noise problems, but are not entitled to proper funds to pay for insulation grants? Is he further aware that I am disappointed that the pledges about the number of flights given on 22 February and 21 November 1984 are not to be honoured? We are told that access to Heathrow will be increased, but I do not see how it can be increased by road improvements into London and most people travel to Heathrow by road. Is my right hon. Friend aware that his decision about Perry Oaks will be heavily criticised generally, not only by the Berkshire county council?

Mr. Ridley: I understand my hon. Friend's point of view. He is right that the decision on terminal 5 will be of some comfort to his constituents. Aircraft are rapidly becoming quieter and will become even quieter as new types are phased in. That will make a great difference to the noise in his constituency.

The Government were in a difficulty when the inspector on terminal four suggested that an ATM limit should be imposed on Heathrow and the inspector at the inquiry on terminal five suggested that there should be no such limit. The Government had to make up their mind and put their decision to the House, which will in due course have to accept or reject that decision.

Underground and rail access to Heathrow will be studied as carefully as road access because we must try to improve traffic between London and Heathrow in any way we can. Matters relating to Perry Oaks are perilously close to being the responsibility of my hon. Friend the Minister for Housing and Construction.

Mr. Simon Hughes (Southwark and Bermondsey): What steps will the Secretary of State take to ensure that the environmental damage and difficulties from which people near all airports suffer will be dealt with in the proposed legislation? Can the right hon. Gentleman explain the apparent illogicality in saying that he intends to take powers to limit air traffic movements—to apply immediately at Stansted—and that he also intends to remove restrictions at Heathrow, and presumably elsewhere? Where is the logic in that, when he knows that restrictions on movements are wanted not for commercial reasons, but for environmental reasons?

Mr. Ridley: When the hon. Gentleman reads the White Paper he will see that further protection in terms of abatement measures and of insulation are proposed for those living near Stansted. We shall further develop our understanding of what helps most to ease the pressure on people from aircraft noise.

Perhaps the Liberals would neglect to worry about this, but I have to provide sufficient capacity for the air transport industry to grow and to provide jobs. The decisions are based on there being adequate capacity for planes to land in the south-east of England. That is why, reluctantly, I have to recommend to the House that we should not put an artificial limit on the number of flights that can be accepted at Heathrow. My hon. Friends who represent areas around Stansted have made it clear that they want some protection from too great an expansion of Stansted.

The hon. Member for Southwark and Bermondsey (Mr. Hughes) asked me how I intended to protect the environment of those who live near Stansted and other airports. The answer is that I intend to impose an ATM limit, which he seems to be against.

Mr. Robert McCrindle (Brentwood and Ongar): In an attempt to evaluate the environmental impact of the decision on Stansted, having been told the number of passengers per year anticipated, are we not also entitled to hear the Secretary of State's views on the type of traffic which he envisages? If he is prepared implicitly to apply a movements limit to the expanded Stansted, might he also be prepared to impose a night curfew on Stansted? If that is so, does it not imply that he should be looking for charter traffic rather than scheduled traffic?

Mr. Ridley: All these matters are dealt with at length in the White Paper. We did not think it right to accept the inspector's recommendation that there should be night bans at London airports, although the present restrictions will certainly remain and possibly be tightened to ensure that night flying does not increase. A ban would be going too far.

Mr. Kevin Barron (Rother Valley): When the Minister was drawing up the plans for an airports policy did he see the need for the development of new regional airports?

Mr. Ridley: The hon. Gentleman will know that we had either to accept or reject the recommendations in the inspector's report. It would not have been appropriate to suggest a totally different site, but I confirm that the Government do not believe that any new site, not mentioned today, would be preferable to the sites that we have been studying and about which we have made decisions.

Mr. Bowen Wells (Hertford and Stortford): Does my right hon. Friend accept that many of my constituents will greet his announcement with great anger and disappointment? They have fought the development of Stansted over 25 years and through two different public inquiries, only to face the decision that he has made today. My constituents are prepared to play their part in the national interest and accept that some development has to take place. I am grateful to him for the limitation to which he has agreed of 7 million to 8 million passenger movements per annum, although I believe that that is far too high a limit. I am also grateful for the fact that he has prevented cross-subsidisation of Stansted airport.

However, will my right hon. Friend accept that his proposals will result in great detriment to the environment of the area and that the people of Sawbridgeworth will have to suffer all the inconveniences of air traffic noise and pollution and a crowding of the very inadequate roads all around that airport, which he has apparently made no provision to improve? Will my right hon. Friend tell me

[Mr. Bowen Wells]

—perhaps his hon. Friend the Minister for Housing and Construction will advise him on this — whether he intends to break the green belt policy that surrounds that airport to the north and to the south, and whether he will prevent the tremendous competition for jobs in an already over-employed area and the inevitable expansion of urbanisation which will occur unless strong measures are taken by his hon. Friend the Minister to prevent it?

Mr. Ridley: My hon. Friend the Minister for Housing and Construction will have heard what my hon. Friend said about the planning aspects of the decision and its future consequences. I have total understanding of the disappointment of some of his constituents and the fears about their peace and the environment of that very pleasant part of the country. But I am sure that he will equally accept that, as a result of that sympathy, we have gone a very long way to limit the development to that which is essential in the national interest for the aviation industry. I think that the House would blame me, with particular justice, if in a few years traffic had to be turned away and perhaps had to go to the Continent and the transport of the country was interfered with. I hae tried through the subsidy assurance and the ATM limit which he mentioned to make this development happen only if it is necessary and economic, and I think the fact that the House will have a further decision to take if ever further expansion were proposed should be of considerable reassurance to his constituents.

Mr. David Young (Bolton, South-East): May I ask the Minister not to concentrate on the spin-off to Manchester from the south of the country? What does he intend to do to establish Manchester as a national airport and the economic and tourist gateway to the north-west? What does he intend to do to establish that airport not as a subsidiary airport but as a national airport in a region with one of the highest unemployment levels?

Mr. Ridley: The hon. Gentleman must acknowledge that the growth of Manchester has been phenomenal. There has been the large growth of up to 6 million passengers per annum hitherto, and we expect that to continue. Indeed, a 30 per cent. further growth to the end of the decade is predicted. That is about as rapid a growth as any airport has ever experienced. Secondly, it is no coincidence that it has taken place during the period of office of this Government. Therefore, I think that, if the hon. Gentleman is at all honest, he will go back to his constituents and tell them what a tremendous boost to Manchester this statement has been—as have been the policies of the Government in the past.

Mr. Anthony Steen (South Hams): I believe that this is the best news for the British air transport industry since sliced bread, and I should like to congratulate the Secretary of State on his radical, reforming and decisive statement today. I should like to ask him about the environment—this is not the prerogative of the Liberal party, but a matter with which the Conservative party is greatly concerned—and the lifting of the 275,000 limit at Heathrow. Can he say something reassuring to those people who live on the boundaries of that limit? As he knows, aeroplanes are getting quieter, and I think that people should be reassured that the lifting of the limit will not make life intolerable for them.

Mr. Ridley: I am grateful to my hon. Friend. As I said in the statement, it is extremely difficult to balance the needs of the industry—I think that we all accept that industry has to be allowed to grow—with the difficult environmental questions about which I share his concern. There is a great deal about this in the White Paper, which I hope he will find helpful. The decline in noise levels has been and will continue to be dramatic as aircraft are required to be quieter, and as we have taken measures to protect the houses of the people who are most closely concerned, so let him not doubt that the Government are keen to do everything that we can to protect the environment of those who live around Heathrow. But let it be said that many people who live around Heathrow do so for the sake of the jobs that they have in the area, and are prepared to accept the noise and the difficulty for the sake of the prosperity that the airport brings.

Mr. Andrew F. Bennett (Denton and Reddish): Will the Minister accept that most people in Greater Manchester will be disgusted by the statement and will bitterly resent the Government's claim that they have anything to do with the success of Manchester international airport? In fact, it is an example of a municipal airport which has succeeded in spite of the Government's hostility to municipal airports. If the Government want to win any friends in the Greater Manchester area, they should consider quickly providing the one to one and a half miles of railway that is necessary to link Manchester international airport to the national rail network and ensure that nearly one quarter of the population of the country are within an hour's journey time of Manchester airport.

Mr. Ridley: That staggering increase in flights, particularly international flights, which has taken place out of Manchester airport has occurred during the currency of this Government. The fact that, of the 33 international points currently served by scheduled services out of Manchester airport, 14 have begun to be served in this year alone is evidence, if the hon. Gentleman needs evidence, that the Government are not in any way prejudiced against it, but if anything are prejudiced in its favour.

Mr. Bennett: What about the railway?

Mr. Ridley: If the hon. Gentleman had listened to the statement, he would have heard that the Government have invited British Rail to examine the possibility of the rail link and to submit proposals for the investment if the necessary tests are passed.

Sir Walter Clegg (Wyre): Is my right hon. Friend aware that many Conservative Members representing northern constituencies disagree a great deal with what has been said by Opposition Members? In fact, the White Paper will be helpful to Manchester, especially as there will be no subsidy to put us at a disadvantage compared to Stansted?

Mr. Ridley: I am grateful to my hon. Friend for what he has said. I believe it to be true and I believe that the White Paper will give a new opportunity to the regional airports for further growth.

Mr. Peter Pike (Burnley): Will the Secretary of State not accept that his statement will be seen as a kick in the teeth to people in all regions of the country, and particularly in the north-west by people who want to use Manchester airport? Will he not admit that in fact he knows that it will not be possible to maintain the ceiling

of 7 million to 8 million movements at Stansted? He knows that, when privatisation takes place, to make it viable it will be necessary to go beyond that limit. That means that the fast rail link and the supporting infrastructure will have to be established, and the rest of the country once again will be paying for London to get the benefits.

Mr. Ridley: I do not see how Manchester can be such a successful, prosperous and thriving airport with a throughput of 6 milion passengers per annum, if the hon. Gentleman suggests that Stansted, with 7 million to 8 million, will be totally uneconomic because of inadequate throughput. It just does not make sense.

Mr. Jerry Hayes (Harlow): May I take this opportunity to congratulate my right hon. Friend on getting away with such a lot today—which I suspect is probably due to the total incompetence of the hon. Member for Crewe and Nantwich (Mrs. Dunwoody), who appeared to fail to grasp what he was talking about?

When the sighs of relief of my hon. Friends have subsided and they begin to read the small print, I am sure that they will realise that this is a package which will upset many and please few and will probably be precisely the sort of fudge about which the inspector warned.

Mr. Ridley: I do not think that it is ever necessary to blame the hon. Member for Crewe and Nantwich (Mrs. Dunwoody). She seldom seems to understand what we are talking about, and today is no exception.

It was not possible, given the situation that the Government faced, to make everyone feel that he had got exactly what he wanted. However, I believe that our decisions will both provide the necessary capacity and do the minimum damage to the environment of the various airports involved. If my hon. Friend reads the White Paper, I feel that he will find many statements in it to reassure him.

Mr. Robert C. Brown (Newcastle upon Tyne, North): Is the Secretary of State aware that the development of airports such as Newcastle reflects great credit on the local authorities which have had the foresight and will to develop first-class regional airports?

The right hon. Gentleman's statement is a second slap in the face for the north-east. Only last year he refused to allow the Newcastle authority to use its own money to build a parallel taxiway and so avoid delays in landings and take-offs. Now, when the airport is producing more than £1 million of profit for the ratepayers who have provided the capital for its development, he suggests that it should be privatised. Could it be that the right hon. Gentleman regards profits for the ratepayers of the area as grossly immoral, but profits going into private pockets as very good?

Mr. Ridley: The hon. Gentleman referred to Newcastle airport. He will know that the authority put in a bid for other priorities and then changed its mind about what it wanted. At any stage, if Newcastle airport wants to apply for investment approval for any project, we are always happy to look at it. However, the capacity at Newcastle airport is currently used only to the extent of 54 per cent. The airport needs not more bricks and mortar but more flights. That is why I have concentrated today on the importance of trying to get more flights into regional airports.

Mr. Robert Adley (Christchurch): Is my right hon. Friend aware that his juxtapositioning of the announcement of the privatisation of the British Airports Authority with the go-ahead for Stansted will inevitably lead some of us—I am one—to believe that, rather than today's announcement being made under the heading of airports policy, it might have been made by a Treasury Minister. To allay that fear, will my right hon. Friend at least assure the House that he will privatise the BAA before Stansted goes ahead?

Turning to airports policy——

Mr. Speaker: Briefly, though.

Mr. Adley: —will my right hon. Friend accept that trying to provide three London airports, none of which will be fully adequate, is a recipe for disaster? It will turn the M25, even without a channel tunnel, into a solid ring of parked vehicles on numerous days of the week. Will he assure the House much more than he has done so far that the investment in the rail infrastructure for Stansted and for Heathrow will be looked at overall not only in terms of the environment but as part of the environmental costs of airports policy?

Mr. Ridley: Some of us—I am one—will give my hon. Friend the assurance that he seeks that the rail infrastructure will be looked at in the way that I said, but with sympathy because of the environmental problems.

I cannot foretell how long it will be before it is possible to privatise the British Airports Authority. That will depend on the progress through the House of the necessary legislation. I fear that I must also say that planning consent has now been granted for the Stansted development, and I have no doubt that the authority will wish to start work as soon as the necessary plans are drawn up.

Several Hon. Members *rose*——

Mr. Speaker: Order. I shall allow questions on this statement to go on for a further 10 minutes. That means that Back Benchers will have had a full hour in which to put their questions to the Secretary of State. However, I ask for brief questions, in which case I hope to be able to call all those hon. Members who are seeking to catch my eye.

Mr. Tam Dalyell (Linlithgow): Will the Secretary of State say a little more about the study into improved surface access to London Heathrow? Does this mean trains that will not stop at all the Hounslows? Are we sure that the study is not a broody hen sitting on a china egg? What will it do?

Mr. Ridley: I am not sure to what the hon. Gentleman's last comment referred. There are three authorities concerned—London Regional Transport in respect of the underground, British Rail, and my own Department for roads. I shall bring them together and get them to study very quickly and carefully——

Mr. Dalyell: Study what?

Mr. Ridley: —how to provide extra capacity from the centre of London to Heathrow without causing damage to the environment again. That is exactly what we need to do.

Mr. Michael Forsyth (Stirling): I welcome my right hon. Friend's decision to privatise the British Airports Authority. When does he expect to introduce the necessary

[Mr. Michael Forsyth]

legislation? How will he ensure that the BAA does not exploit its monopoly and that we get fair competition between airports?

Mr. Ridley: I am grateful to my hon. Friend. The necessary legislation for privatisation will be introduced as soon as possible.

As for cross-subsidy and fair competition, putting each airport into a separate public limited company means that any transfer of funds will be transparent. As I said, we shall make sure that the transfer of funds takes place only at commercial rates of interest. That in itself will cut out cross-subsidy.

Mr. Ken Eastham (Manchester, Blackley): Does not today's statement about Stansted mean that once again millions of pounds are to be invested in the south of England? Is it not clear that in a few years this decision will be considered only as a toe in the door, and once again the Government will ask the House to vote millions of pounds, which again will be invested in the south? What consideration has the Minister given to industry and commerce in the north? The Government argue that there is a case for airport developments in the north not just for industry and commerce but also for tourism. How will the Stansted development help the traffic throughput in the northern airports?

Mr. Ridley: The approximate cost of the development of Stansted is thought to be about £270 million. I cannot give a firmer figure than that, because the British Airports Authority has not been able to give me a quotation, having only just heard of the decision.

Mr. Eastham: That is for now.

Mr. Ridley: I do not regard that as a large investment and, of course, it is all from air travellers' money—it is not from public money. The British Airports Authority earns a surplus, and it will be investing that at commercial rates of interest in the new development.

I am as keen as the hon. Member for Manchester, Blackley (Mr. Eastham) and as Manchester to see further traffic and activity in the north of England. That is why we have put our accent on trying to get more traffic going there. It is from that that the extra jobs will flow and not from building terminals, runways, aprons and taxiways which are not needed.

Sir John Biggs-Davison (Epping Forest): In view of my right hon. Friend's concern for the environment around airports, how does he think that the beautiful rural character of the environment of Stansted will survive his proposals?

Mr. Ridley: An increase in the terminal buildings at Stansted will not improve the landscape, but there is an airport there already, and there are terminal buildings. It is conceivably possible that any new buildings will be slightly more pleasant to look at than the old ones. I hope that they are. We have to find a way of marrying careful and good design with our landscape; otherwise we shall become a museum and unable to earn our living.

Mr. D. N. Campbell-Savours (Workington): Is the Secretary of State aware that the concern of Air Ecosse flying from Carlisle to Heathrow is landing charges? Will those charges rise or fall as a result of today's statement?

Mr. Ridley: The hon. Gentleman may not have heard it, but in my statement I said that the Civil Aviation Authority would be asked to supervise landing fees and charges at the various airports. I think that the result of that is more likely to bring down charges imposed by a monopoly than if we allow the monopoly to be free to charge what it likes.

Mr. Michael Colvin (Romsey and Waterside): Further to what my right hon. Friend said about privatisation, is he happy that individual airports which operate as independent plcs will be able to raise the capital required for their future expansion without any cross-subsidisation or Government guarantees? In relation to Heathrow, while uncertainty about terminal 5 persists, does he think that that company will be able to go to the market, especially as today he hinted clearly that, subject to planning, terminal 5 will be built one day?

Mr. Ridley: We shall put the seven BAA plc airports into a holding company, which will be able to make investments in any subsidiary that it wishes. The company which owns Heathrow will be one of the most prosperous companies in the country. The idea that it would not have credit to borrow to build a terminal, if one were necessary, seems unlikely.

Mr. Max Madden (Bradford, West): Does not the Secretary of State realise that he is widely regarded as the Secretary of State for Transport who has dealt a grievous blow to our railway network, who wants to destroy public bus transport throughout the country, and who, with today's statement, has delivered a hammer blow to our regional airports? Does he further realise that millions of people who live in the north can see no justification for resources, whether public or private, being channelled into the south-east, that large numbers of unemployed people in the north can see no good reason for the creation of large numbers of jobs in relatively prosperous areas and, most important, that people who are inconvenienced by the existing travel arrangements can see no good reason for maximising flights from London airports?

Mr. Ridley: I find that a little odd. I think of myself as the Secretary of State for Transport who has presided over the highest rate of investment in British Rail for many years. I should like to claim that I am the Secretary of State for Transport who has freed the bus services from restrictions so that they can be improved and expanded, and who has now put forward a policy for the further expansion of the airline industry, which will bring jobs to all areas.

Mr. Christopher Murphy (Welwyn Hatfield): Will my right hon. Friend consider my constituents, who are sandwiched between the development at Luton and that at Stansted? Does he recognise that they are extremely concerned on environmental grounds? Will he say what consolation I can offer them?

Mr. Ridley: My hon. Friend is in a slightly difficult position. There will have to be a public inquiry if Luton borough council makes proposals for expansion, and his constituents can put forward their views then. The developments at Stansted and Luton will result in a large number of extra jobs. My hon. Friend can draw some comfort from the fact that many people living in the area will benefit from those jobs, and that many, for that reason, are not wholly opposed to airport development.

Mr. Malcolm Bruce (Gordon): The Secretary of State will realise that hon. Members with BAA airports in our constituencies recognise the benefits that we have reaped from the managements, especially in Scotland. Is he aware of the anxiety caused by the fact that nowhere in his statement is there a suggestion that Scottish airports should be retained as a group? Indeed, he said that they would be sold off individually. Can he assure us about that? Regarding surface transport, does he recognise that the one way to help Prestwick airport to survive is to give the go-ahead to an effective rail link?

Mr. Ridley: The hon. Gentleman may have misheard me. I made it clear that the privatisation of BAA would be achieved by privatising the holding company, and that the separate companies would not be sold off independently. Therefore, the group will remain exactly the same as at present, and there will be little change in the relationship in that sense. The question of a rail link to Prestwick is one for British Rail, which can submit proposals, if it finds that a link is economic. That is also referred to in the White Paper.

Mr. Malcolm Thornton (Crosby): Although I agree with my right hon. Friend that it is impossible to please everyone on these occasions, I thank him for the courtesy that he showed to the representations made by the North-West Regional Consortium, and the weight given to them in making his decision today. In so far as it is his responsibility, when he looks at the infrastructure requirements for the expansion of an airport which has seen spectacular growth — his statement said that of Manchester airport—will he ensure that investment will not be denied in favour of speculative growth at Stansted?

Mr. Ridley: I am grateful to my hon. Friend for what he said. I assure him that the question of investment in the rail link to Manchester airport will be taken on its merits, with regard to both an estimate of the build-up of traffic that will occur at Manchester and the environmental desirability of it. It will certainly not be affected or disadvantaged by anything at Stansted.

Mr. Gerald Howarth (Cannock and Burntwood): I congratulate my right hon. Friend on having had the good grace to withdraw the artificial limits on Heathrow movements. Does he agree that that decision is inconsistent with the refusal to grant planning permission for terminal 5 now, which would present a great opportunity to redevelop Heathrow into the next century? Does he agree that Stansted would not be necessary if we had two runways at Gatwick, which the BAA has resisted and that it would be folly to build another international airport with one runway and repeat all these troubles in 30 years time?

Mr. Ridley: It is likely that some parts of the Civil Aviation Bill, to which my hon. Friend referred, will reappear in the later legislation. We regard air transport movement limitations both at Stansted and potentially at other airports as something which may eventually be necessary. That was the purpose of the original legislation. I doubt whether my hon. Friend would receive much support from people living in both Sussexes for his suggestion that there should be two runways at Gatwick. There is an agreement between BAA and the county council that that should not happen, and the Government have no plans to interrupt it. It would mean the demolition of a village and major environmental difficulties, and we prefer not to cause that.

Mr. Stuart Randall (Kingston upon Hull, West): I was pleased that the Secretary of State hoped that landing charges for a small airline at Heathrow would fall. I have a particular interest in Humberside airport. In the event of landing charges not falling, what special action will the Secretary of State take to help small airlines to be competitive and to overcome the problems of high landing charges?

Mr. Ridley: At present, the charges that airports levy are entirely within their control. I have no control over them, either at BAA or local authority airports. I propose that, as part of the new regulatory regime for airports generally, the CAA will have power to supervise landing fees and charges. However, legislation will have to come into effect before that can happen. I am sure that the CAA will want to interpret such a new power by stopping the exploitation of a monopoly and ensuring that the charging structure does not discriminate against any type of aircraft or airline.

Sir Anthony Grant (Cambridgeshire, South-West): Although I appreciate my right hon. Friend's attempt to phase the expansion at Stansted, is he aware that an expansion to 15 million passenger movements a year would be wholly unacceptable to the people of Cambridgeshire? In view of his faith in the parliamentary process, may we assume he will encourage his colleagues to allow a free vote if that matter comes before the House? Before any such expansion takes place, why does he not do what the world's airlines want and instead of talking about sludge pits make a firm commitment to a fifth terminal at Heathrow?

Mr. Ridley: I doubt whether a proposal to increase the air transport movement limit at Stansted will come before the House for many years, because we have not yet imposed it, which is the first step. I cannot anticipate the decisions of my right hon. Friends the Leader of the House and the Patronage Secretary about the nature of the whipping on an occasion many years ahead and, perhaps, in a different Parliament, under powers which Parliament has not yet granted — [AN HON. MEMBER: "And a different Minister."] Yes, I accept that amendment.

As to a fifth terminal at Heathrow, we believe that retaining a large amount of room at Heathrow for domestic flights, as many hon. Members have stressed, is important. The result is that the number of passengers is not as great as was expected when Mr. Eyre reported. If it is not terminal capacity, but runway capacity, that limits the use of Heathrow, it would be wrong to embark on building an enormously expensive terminal before there is a clear need for it.

Mr. Cecil Franks (Barrow and Furness): Does my right hon. Friend accept that many will interpret his statement not as one on a national airports policy but as one on an airport policy for the south-east? Many people will be appalled at the perfunctory reference in his statement to regional airports, especially airports in the north. Does he also accept that many people will infer from his statement unfair competition and subsidy by taxpayers for the development of Stansted? Will he explain why a Government who are committed to the

[Mr. Cecil Franks]

operation of market forces cannot allow those market forces to determine the natural growth of Stansted, Manchester or any other airport?

Mr. Ridley: I have not made a precise measurement, but I believe that about one third of my statement dealt with helping regional airports. I would hardly call that a perfunctory reference in what was a long statement. I have given every assurance this afternoon that there will be no opportunity for cross-subsidy to Stansted to the detriment of other competing airports. Market forces will prevail to the extent that it will be for the proprietors of airports, whether Stansted, Manchester or any other to decide whether investments are made at commercial rates of interests.

Several Hon. Members *rose*——

Mr. Speaker: As an act of chivalry — Mrs. Bottomley.

Mrs. Virginia Bottomley (Surrey, South-West): Thank you, Mr. Speaker.

Does my right hon. Friend agree that the only alternative to the loss of profitable air transport business to continental Europe is to have some expansion in the south-east? Although I understand why those in the affected areas, whether in the south-east or in the regions, are worried, we would all have much more reason to be worried if the Government's decisions resulted in the loss of British jobs and earnings.

Mr. Ridley: I agree with my hon. Friend. The first London airport is Heathrow with 29 million passengers. The second London airport is Gatwick with 14 million passengers. The third London airport is Charles de Gaulle with 13·6 million passengers. The fourth London airport is Schiphol with 10·9 million passengers. The fifth London airport is Manchester with 6 million passengers. Stansted does not even appear on the list.

Several Hon. Members *rose*——

Mr. Speaker: Order I am sorry that I have been unable to call all those hon. Members who wish to take part.

Mr. Anthony Nelson (Chichester): On a point of order, Mr. Speaker.

Mr. Speaker: No. All that I can say is that I shall give them preference when we have a debate on the subject. It is no good raising a point of order on this matter now.

Mr. Nelson: On a point of order, Mr. Speaker. It will have become apparent to you during these lengthy exchanges that, although there has been strong criticism of the decision, especially from hon. Members for northern constituencies, no Back-Bench Member has supported the Government's policy, especially as it affects Gatwick and the south. Could I trespass on your generosity, Mr. Speaker, and ask you to allow me——

Mr. Speaker: Order. Had the hon. Member who represents Gatwick airport been present, he would certainly have been called. I must protect the other business of the House. It is impossible to call every hon. Member every time. I have gone well over the time that I normally allow—more than an hour—for Back-Bench Members, and I called many Conservative Members. It is unfair to try to raise points of order to continue questions on the statement——

Mr. Harry Greenway (Ealing, North): On a point of order, Mr. Speaker.

Mr. Speaker: As I told the hon. Gentleman yesterday, he does extremely well.

Mr. Peter Bruinvels (Leicester, East): Further to that point of order, Mr. Speaker. There are more than 40 Members of Parliament for the east midlands, and the East Midlands international airport was one of the major concerns——

Mr. Speaker: Order. I will now take a point of order on a different matter.

Later——

Mr. Greenway: On a point of order, Mr. Speaker.

Mr. Speaker: Very well—Mr. Greenway.

Mr. Greenway: I do not think there is any need to be cross about it; that is what we are here for, is it not? May we have some guidance on the way in which you measure the time that you are prepared to allow on statements? This afternoon, almost a record number of hon. Members rose, but the statement was not allowed a record time.

Mr. Speaker: I cannot give the hon. Gentleman any guidance on that. It is a matter of discretion, and I must make a judgment on the basis of the subsequent business on the Order Paper. The hon. Gentleman would have been deeply offended had he wished to speak in the subsequent debate but had been kept out as a result of my allowing the statement to run over time. On this occasion, the statement began at 3.41 pm and continued until after 5 o'clock, which I believe was a more than generous period.

Mr. Tony Favell (Stockport): Further to that point of order, Mr. Speaker. With regard to the point of order raised by my hon. Friend the Member for Ealing, North (Mr. Greenway), will you bear it in mind in future that if there is not going to be a vote on such an extremely important matter, every right hon. and hon. Member who wishes should be given the opportunity to ask questions, especially if they represent constituencies such as mine, which will be adversely affected by the decision? This is probably the most important matter to come before the House this Parliament.

Mr. Speaker: There will be subsequent opportunities to debate the matter at Question Time, and there will be legislation in due course. I have already told the House —I keep my promises in this regard—that those who are unable to ask questions on statements are given preference when we come to debates. In fairness to other hon. Members, I cannot allow questions to continue for ever. If I did, we should never get our business finished.

Mr. Gregor MacKenzie (Glasgow, Rutherglen): Further to that point of order, Mr. Speaker. Many hon. Members will know that, for some years, the length of statements has grown considerably, and I believe that you were extremely generous in your handling of the matter today. It is not the privilege of every hon. Member to be called every time he rises. That has frustrated many of us for many years, but you should appreciate, Mr. Speaker, that some of us understand how generous you are. Secondly, on a purely parochial note, we Members from Scotland would like to get on with our business.

Mr. Speaker: I am grateful to the right hon. Member. In deference to those hon. Members who have raised the

matter, may I say that I fully understand their anxiety. I am conscious of the fact that they have constituency interests in this matter. There will be other opportunities to discuss it, and hope that they will use them.

Falkland Islands (Member's Statements)

5.4 pm

Mr. Bill Walker (Tayside, North): On a point of order, Mr. Speaker. You will recall that I raised a point of order on 15 May, when I drew your attention to early-day motion 686 on a statement that the hon. Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes) was alleged to have made during a visit to the Falkland Islands.

[That this House condemns the reported statement of the honourable Member for Carrick, Cumnock and Doon Valley that the Falkland Islanders lacked guts and calls upon him to withdraw the statement; and further calls upon him to give up his campaign of rewriting the history of the events before, during and after the conflict which is designed to justify his attitude towards the sending of the Task Force to restore freedom, the rule of law and democracy to the islands after the unprovoked invasion by the Argentinians.]

There is a letter in the *Daily Telegraph* today from the lady in question, Mrs. Pat Luxton. Bearing in mind the fact that the hon. Member for Carrick, Cumnock and Doon Valley was also reported as saying that he had evidence that sinking of the fishing boat Mhari L had been caused by a United States submarine, which has since been proved to be untrue, what procedure can be used to remove the uncertainty about the validity of those reports, since I have withdrawn my early-day motion?

Mr. Speaker: This matter was dealt with. Apologies were offered and accepted, and I cannot be concerned——

Mr. George Foulkes (Carrick, Cumnock and Doon Valley) *rose*——

Mr. Speaker: Order. I cannot be concerned with letters that appear in the press which may seek to reopen the matter. I shall allow the hon. Gentleman to comment, but then I must close the matter.

Mr. Foulkes: Further to that point of order, Mr. Speaker. I am worried by the fact that the hon. Member for Tayside, North (Mr. Walker) sought to link those two matters. I confirm that the account by Patrick Watts and Mrs. Luxton has been altered by them in three separate ways. First, they accept that there was no breaking of glass. Secondly, they accept that the Secretary of State for Defence was not involved. They have even now given a different version of what I am supposed to have said. Yet I have maintained consistently exactly what I said, which is supported by the hon. Member for Isle of Wight (Mr. Ross), who spoke to eye witnesses. I stand by what I said, notwithstanding what the lady said in her letter in the *Daily Telegraph* today.

As to the Mhari L, I made it clear that circumstantial evidence was given to me—[HON. MEMBERS: "Ah."] I made that quite clear. In the light of the inquiry, I am grateful for the opportunity of saying that the direct evidence shows that it was not a submarine. I fully accept that. I am surprised that the hon. Gentleman linked the two matters, and I am sure that he would wish to withdraw the implications of his doing so.

Mr. Speaker: Let us leave the matter there.

Local Authorities (Political Expenditure)

5.10 pm

Mr. Roy Galley (Halifax): I beg to move,

That leave be given to bring in a Bill to make provision relating to expenditure by local authorities for political purposes.

The object of the Bill is to ban the use of ratepayers' and taxpayers' money for politically motivated propaganda. Local authorities have a duty to inform the public about their services and to provide proper information services about their areas. Such activities have always been regarded as valid.

Before the reorganisation of local government in the early 1970s, considerable anxiety was expressed in a series of reports that the information activities of local authorities were too limited. Provision was then made in the Local Government Act 1972 to allow the development of a range of information services. There was a considerable development in publicity activities by local authorities after 1974. In recent years, however, those activities have grown enormously and extended beyond the scope of giving information to the dissemination of party-political propaganda.

Since 1980, we have seen a series of political campaigns by local government, many of them opposing Government policy on matters relevant to local government. They have included the abolition of the metropolitan county councils, rate limitation, the extent of council house sales, the Police and Criminal Evidence Act 1984 and many other topics. There have also been campaigns on matters unconnected with local government —nuclear disarmament, the miners' strike, the future of some industries, immigration controls, and so on.

In promoting such campaigns a wide variety of normal advertising techniques have been used, including leaflets, posters, stickers, advertising space on hoardings, the national and local press and, to a limited extent, radio and television. Such diversity makes it exceedingly difficult to identify all expenditure on political activities, but some figures are available.

As so often happens, the worst offender in regard to wasteful expenditure has been the GLC. Its current "awareness campaign" anticipates expenditure of £10 million over about three years. That sum is greater than the total expenditure of many district councils. West Yorkshire county council has spent approximately £600,000 campaigning against the abolition of metropolitan county councils, and the West Midlands county council has spent approximately £500,000. Large sums of money are now being spent on opposing the Transport Bill and on a plethora of other party political activities.

Justification for such activities is often based upon sections 111, 137 and 142 of the Local Government Act 1972. Those sections are widely drawn and do not include any control over party political propaganda of the type that we have seen recently.

There have been a number of court cases on those matters and so far none of them appears to have succeeded in curtailing the use of taxpayers' and ratepayers' money for those ends. Although expenditure under section 137 of the 1972 Act is limited, it is possible to justify considerable expenditure under section 142.

The lack of clarity in the relevant statutory provisions presents considerable difficulties to auditors in accounting for such local government expenditure. There is no adequate provision in law to distinguish between the dissemination of party political propaganda and the supply of unbiased information, which was clearly envisaged when the 1972 Act was passed. The Bill seeks to remedy that defect.

Apart from the supply of information, there are other matters of anxiety. Voluntary organisations outside the local authority structure are often used in campaigning by local authorities. Funds are often passed to them for campaigning. There is also a problem with the involvement of local authority staff in such campaigns as part of their day-to-day work. Staff can be pressured into participating in such activities when they wish to retain freedom of thought and action in party political matters. There are also instances of the establishment of trust funds controlled by political parties for party political ends.

A new height of outrage has been reached recently by the West Yorkshire county council with its biased approach. It has allocated ratepayers' money for highway maintenance in areas on the basis not of need or fair treatment but of the political representation of those areas. All those matters could be dealt with in a Bill banning the use of ratepayers' money for such political purposes.

There is clearly a requirement for local authorities to provide newsletters and newspapers to give information. If such publications were produced, the Bill would provide for equality of treatment between all political parties where political comment was seen to be proper.

There is plainly a major problem of definition in drawing the dividing line between what is information and what is politically motivated propaganda. There is a precedent, which the Bill could use, based upon the Independent Broadcasting Authority's code of standards and practices. That code expressly prohibits advertisements which are directed towards any political end, local or national, and which are not impartial on matters of political or industrial controversy or current public policy, local or national. That definition has worked well for the IBA, and it would form the basis of the definition in the Bill.

In our democratic society, reasonable people object to the use of public money for political purposes. There are sound reasons for their objections. The task of local government is to provide local services. In many instances, the publicity material produced has little to do with the provision of those services. Much of the recent publicity has flouted the long-held convention that public funds should not be used to gain party political advantage. Such expenditure involves the diversion of resources from the provision of services to the community. It is wrong to use scarce resources for party political propaganda when they should be used to provide services.

It is disgraceful that some councils claim that they have insufficient money to provide public services when they divert a great deal of money towards gaining political advantage. Such party political propaganda means that public debate is diverted from Parliament. Extra-parliamentary activity on that scale tends to undermine the role of Parliament.

What further offends ideas of fair play is that the information in so much of the publicity material is often

based upon unsubstantiated allegations and is rarely grounded in fact. It is designed to play upon the emotions and arouse unjustified fears.

The time has come to prevent the use of public money on party political objectives. The political debate must be encouraged, but when people wish to put forward party political views they should raise funds to do so. To steal money from the public to further political objectives is a national disgrace, and it must be ended as soon as possible. I commend the Bill to the House.

Question put and agreed to.

Bill ordered to be brought in by Mr. Roy Galley, Sir Paul Bryan, Mr. Marcus Fox, Mrs. Jill Knight, Mr. Gary Waller, Mrs. Elizabeth Peacock, Mr. John Butterfill, Mrs. Edwina Currie, Mr. Michael Brown, Mr. Geoff Lawler, Mr. Tony Favell and Mr. Derek Conway.

LOCAL AUTHORITIES (POLITICAL EXPENDITURE)

Mr. Roy Galley accordingly presented a Bill to make provision relating to expenditure by local authorities for political purposes: And the same was read the First time; and ordered to be read a Second time upon Friday 5 July and to be printed. [Bill 154.]

Orders of the Day

Rating (Revaluation Rebates) (Scotland) Bill

Considered in Committee

[SIR PAUL DEAN *in the Chair*]

Clause 1

RATES REBATES

5.20 pm

Mr. Donald Dewar (Glasgow, Garscadden): I beg to move amendment No. 1, in page 1, line 5, leave out 'may' and insert 'shall'.

The amendment has the virtue of being short and simple.

Mr. Albert McQuarrie (Banff and Buchan): Hear, hear.

Mr. Dewar: I knew that that would immediately appeal to the hon. Member for Banff and Buchan (Mr. McQuarrie). We constantly think of him, particularly when we are looking for some old-fashioned Tory independence, as we are in this debate.

The Bill says that the Secretary of State may provide for revaluation rebates. We suggest that the discretionary "may" should be made a mandatory duty on the Secretary of State and that he should operate a similar system in future years.

We are returning to a point with which the Committee is familiar. It is the problem of what is to happen in the remaining part of the quinquennium once the rescue package for 1985-86 is behind us. We say that there is considerable merit in trying to ensure that the Government are committed to continuing relief—I shall deal later with the objections that are likely to be made by the Minister—during the remainder of the quinquennium. It would be thoroughly unsatisfactory if there were help in 1985-86, but nothing in subsequent years. The Bill does not preclude the possibility of further help, but there is no guarantee that it will be forthcoming. It is common sense that Parliament should put that right. I note that the Under-Secretary of State is messenger boy for the Secretary of State again today—the right hon. Gentleman is not here; he is quite a stranger in Scottish debates these days. We regret that fact.

Mr. McQuarrie: The Secretary of State is doing a job in Scotland.

Mr. Dewar: I should be happy if the right hon. Gentleman were doing a job in Scotland, though if he were, he would, once again—because of his policies—be out of step with everyone else in Scotland.

If it is necessary to have the rescue package, which was not contemplated a few short months ago, in the current financial year, why is such a package not necessary for future financial years? Give or take one or two minor adjustments, we shall have the same valuation roll for the next five years. If we do not get a guarantee that the system

[Mr. Dewar]

will continue, there will be considerable help in the current financial year and the full force of the revaluation will suddenly fall on those who are getting some assistance, limited though it is, under the Bill.

The Under-Secretary might argue that rates could decrease if local authorities would cut their expenditure and reduce their services to the public. I might say that rates could be reduced if the Government would restore the rate support grant that they have filched over the years. A third party looking at the exchange might say that it was an arid argument—and I might have sympathy with that view.

Let us compromise by saying that it is almost self-evident that the possibility of a substantial decrease in rates in the next year or two is one on which, to say the least, we cannot count. We can apportion the blame for that on another occasion.

The Bill seeks to deal with what are seen as inequities arising out of the revaluation. However, is it fair that a householder should be faced with a threefold or fourfold increase in his rateable value while others face increases only twofold? Why should a business suddenly be faced with an enormous sevenfold or eightfold increase in its rateable value while its competitors are more lightly treated?

The Government have said that they will remove the peaks and even out the effects of the revaluation. They are aiming to alleviate the wide variations. However, if the Bill is aimed at dealing with the individual disasters and horror stories that have arisen from the vagaries of the revaluation process, the exercise should be repeated each year.

The Under-Secretary may say that our proposal is unfair and is far too rigid, because it would commit the Government to maintaining a system based on a multiplier of three times the pre-valuation rateable value. If that stops hon. Members supporting the amendment, they should turn their attention—their support would be welcome—to amendment No. 3, which would allow a variation of the multiplier in the Bill. Putting the multiplier in the Bill, rather than leaving it to the statutory instrument, itself creates inflexibility, but the Government have decided on that course and we have to live with it.

The other argument that may be used by the Minister is that these matters should be left to the discretion of the Secretary of State and that we can rely on his good judgment and his perception of what makes political, social or economic sense in Scotland. The sad truth is that this matter is not within the discretion of the Secretary of State. As I pointed out on Second Reading, that fact was brutally brought to our attention by the Chancellor of the Exchequer on his foray to Perth for that gathering of the faithful which the Tories dignify with the name of a conference. The Chancellor then made it clear that he was —I use his phrase—"bailing out" the Secretary of State. He said that there were no more moneys likely for Scotland next year and added:

"I do not think the Secretary of State will find me in the same compassionate, open-handed and generous mood next time."

5.30 pm

It is clear, therefore, that the Treasury will have a considerable say in what happens in future. I give Conservative Members credit for wanting to see this system continued for the rest of the quinquennium. The trouble is that the Treasury might mount a punitive expedition against the Scottish Office on this matter, and the Treasury often wins.

Mr. Michael Forsyth (Stirling): Is the hon. Gentleman aware that it is possible for the Secretary of State to meet the obligation as part of the rate support grant, without the Chancellor having to bail him out? The problem this year was that the rate support grant had already been determined.

Mr. Dewar: I accept that the hon. Member for Stirling (Mr. Forsyth) is producing a solution, but in doing so he is inviting the Secretary of State to find the money at the expense of local government services, and that is not acceptable to my hon. Friends and me. It would be going back to the so-called "first help from the Secretary of State" scheme, when the domestic element was raised to 5p in the pound.

I do not know how many Conservative Members have bothered to look up the details, but the hon. Member for Stirling will remember how the Secretary of State made a great virtue of the help that he was giving, when in reality £19 million came from the Secretary of State and £31 million came from the unfortunate local authorities. The remainder came from the proceeds of industrial derating from 50 to 40 per cent.

If it is said that we can make progress by cutting services in that way, the hon. Member for Stirling must realise that such a suggestion is totally unacceptable to Labour Members. The whole point about the £50 million —I wish to be fair to Ministers because they made a tremendous virtue of it at Perth and elsewhere—was the claim by the Government that it was new money and that it represented a victory at the expense of the Treasury. We can on occasions be generous, and that is why on this occasion Opposition Members are fighting to preserve the victory of the Secretary of State and want to help him beat off a counter-attack by his rapacious colleague, the Chancellor of the Exchequer.

Conservative Members would do well to consider the impact of a sudden withdrawal of the concession. Consider what would happen if the Treasury won the battle for the financial year 1986-87 and instead of £30 million—or whatever the figure may be that will be paid out of the £50 million; we shall debate that whole issue later — suddenly nothing was available.

In those circumstances, the electoral impact would be considerable. I trust that nobody will suggest that Conservative Back Benchers are above such political considerations; too many of them are looking nervously over their shoulders at their electoral prospects, and discouraging they are. I recommend them to consider the practical impact of allowing this help to be discontinued after the current financial year.

There is, therefore, political common sense in what I am arguing. However, it is also a matter of equity, particularly for commercial ratepayers, who are the main beneficiaries under the scheme. There is much to be said for people knowing that they will have this help for the remainder of the quinquennium, because uncertainty will leave them contemplating potential increases in rating bills of perhaps £10,000.

The Parliament Under-Secretary of State for Scotland (Mr. Michael Ancram): How does the hon. Gentleman think that the amendment would achieve the purpose that he has described?

Mr. Dewar: The amendment would place a duty on the Secretary of State——

Mr. Ancram: Answer my question.

Mr. Dewar: The Minister will have an opportunity shortly to put his case, and, as is often the case with Opposition amendments, he may have some clever points to make. He may try to defeat it on the grounds that his lawyers and back-room boys have come up with interesting points on how it would fail to achieve the purpose that I have described. I am led to believe that that will be the case as I see the Minister examining a carefully typed script.

There may be something wrong with the drafting of the amendment. If the Minister accepts it in principle and promises to introduce an amendment in another place to give effect to what we have in mind, I will willingly withdraw it. But if the Government will not give a guarantee that they are committed to the principle of maintaining this situation throughout the quinquennium, we shall mark our view on the matter. That is why we wish to place a statutory duty on the Secretary of State to continue the system for the remainder of the quinquennium.

As I said at the outset, we are discussing a simple issue. The amendment, which would be supported by the general body of ratepayers in Scotland, should be accepted by the Minister.

Mr. Gavin Strang (Edinburgh, East): I support the remarks of my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar). Many people in Edinburgh will benefit from the Government's concession. This is the first opportunity that I have had in the House to welcome the concession. I welcome the Government's action in providing for ratepayers at the extreme end of the spectrum in terms of revaluation. Unfortunately, however, the concession does not go far enough.

It is crucial for the people of Edinburgh to know that this protection, limited though it is, will be maintained for some years to come, because we must raise local authority expenditure in Edinburgh to levels more comparable with those of other authorities. Our services in Edinburgh—our recreational assets, housing and so on—have been screwed down intolerably and have been allowed to deteriorate in recent years to an extent which may be unique in Scotland. Indeed, that is the basis of the present confrontation with the Government, who are intent on imposing a Tory budget on the majority Labour council in Edinburgh.

Edinburgh's services and general standards will be raised sooner or later. I believe that that will happen sooner, even before Labour wins the general election in two or three years from now. As my hon. Friend the Member for Garscadden pointed out, we must consider the period between now and the end of the revaluation period. That is why it is important to know that this concession, which does not go anywhere near far enough—it is a blunt instrument and is no alternative to the real solution, which is reversing successive Government cuts in local government expenditure—will continue to the end of the quinquennium.

I do not expect the Minister to show sympathy or understanding for the plight of the people of Edinburgh, who have suffered under Tory rule in recent years. I hope, however, that he will at least respond on the narrow issue of the future protection which hard-hit ratepayers would obtain as a result of the amendment.

Mr. Bill Walker (Tayside, North): This is a tempting amendment. I listened with interest to what was said about it by the hon. Member for Edinburgh, East (Mr. Strang). My hon. Friend the Under-Secretary of State for Scotland will, I hope, confirm that neither the amendment nor the clause will affect my constituents, many of whom will be registering appeals against the new valuations. My hon. Friend will be aware, as he has received all the papers, that I have carried out a detailed study of the matter. The study shows clearly that many of my constituents will be successful in their appeals. The question is how long it will be before decisions on those appeals are reached.

The Bill will to some extent mitigate hardship this year, and we are grateful for that help, but appeal decisions may not be reached until next year. That is causing considerable concern, particularly in Angus. Expenditure in Angus has never been at a very high level, nor, for that matter, has it been very high in Perth and Kinross. The expenditure programmes of these authorities have been very carefully worked out. The changes that have taken place, particularly in Angus, are the direct result of the revaluation anomalies. Therefore the Opposition amendment is tantalising and I look forward to hearing what my hon. Friend has to say about it.

Mr. Malcolm Bruce (Gordon): May I follow up the point made by the hon. Member for Tayside, North (Mr. Walker). Some small businesses will look at this package and think that it will solve their problems, but eventually they will find that it has solved their problems only for this year. The very large rate increases that they fear will still apply next year, unless the Government enter into a commitment to continue the present arrangement. If small businesses do not realise this and do not lodge an appeal this year, they will find that next year it is too late. Either the Government must be prepared to continue this arrangement or, if they are unable to make that commitment, they must use their good offices to ensure that people appeal against the valuation if they believe that it is too high. We have heard of circumstances in which people might be persuaded not to appeal because they are to receive the full benefit of the adjustment this year—an almost exact adjustment in terms of their valuation. However, the consequence is that next year they will suffer.

Although we welcome this measure in principle, it could be just a way of execution. If the Government are not prepared to accept in principle the amendment of the hon. Member for Glasgow, Garscadden (Mr. Dewar) they should at least make it clear that they intend to continue the arrangement, if they possibly can, and that people should appeal, regardless of the present arrangement, in order not to forfeit their right to future adjustments.

5.45 pm

Mr. Michael Forsyth If my hon. Friend the Under-Secretary of State is not prepared to accept this amendment, I hope that, having embarked upon a scheme for providing relief for small business men, he at least

[Mr. Michael Forsyth]

recognises that it is essential for any small business to know what its position in future years will be and to be given at least some indication of its likely overheads. Just as the principle which guided his hand in introducing this Bill was the nature of the uncertainty and the nature of the impact on cash flows of a sudden and unexpected rates increase, so, equally, I ask my hon. Friend to recognise that businesses will be looking for certainty.

I hope that my hon. Friend will be able to say whether this scheme is expected to continue. My constituents would prefer to know now whether they will receive no relief next year rather than to be faced with a nasty surprise later. If my hon. Friend is not prepared to accept this amendment, which would be binding upon him, it is important that he should say what is to happen next year.

Mr. Hugh Brown (Glasgow, Provan): The Committee is indebted to my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar) for moving this amendment. I have to admit that even after 20 years as a Member of Parliament I do not know the difference between "shall" and "may", but I do not suppose that is a matter of fundamental importance in terms of the information that we are trying to obtain from the Minister. It is accepted generally that annual provision is now made for the relief of domestic ratepayers. As relief for commercial ratepayers is to be introduced, it ought to be possible to assume that annual relief will be provided for them, too.

The Government have been rushed into introducing this legislation. I do not know whether businesses which will go out of existence unless relief is provided for them this year will be able to continue in business if relief is not provided for them next year. I hope that the Minister can provide information about what prompted the Government to introduce this measure. Were they prompted to introduce it because of genuine hardship and because it was suspected that without relief certain businesses would go out of existence, or were other factors involved?

Mr. Bill Walker: The hon. Member for Glasgow, Provan (Mr. Brown) is making a very important point which must be discussed. The evidence I have submitted to my hon. Friend the Under-Secretary of State includes evidence which shows clearly that in the past five years the net profits realised by businesses were less than the increase in rates that they will be forced to pay. There is no way, therefore, in which those firms could remain in business and be viable.

Mr. Brown: As upholders of the capitalist private enterprise system, perhaps they should not be in business. I do not have access to the information held by the hon. Member for Tayside, North (Mr. Walker), but the Government should be in possession of this information by now. I am assuming that the Government have been given a great deal of evidence about businesses that have suffered rates increases that are so savage that they will have to go out of business because the increases are greater than their profits.

Mr. John Maxton (Glasgow, Cathcart): That is true not only in the commercial sector which the hon. Member for Tayside, North (Mr. Walker) is delighted to support. Those who are engaged in the teaching profession in my constituency will receive no relief under the Bill because their rates increases are not sufficiently large, but the increase in their rates will be higher than the increase in salary that this Government are prepared to concede.

Mr. Brown: I do not intend to follow up that point. It goes a little wide of the amendment. I should be grateful if the Under-Secretary of State would provide the information that I seek. I should be grateful for evidence upon which the change for this year is based so that we may judge whether such a change would be desirable next year and in subsequent years.

If the Minister cannot or will not say, can we assume that it is because there is some possibility of totally abolishing liability in the commercial sector? Is that part of the review now being undertaken, and is that why he cannot say what might or might not happen next year?

Mr. Gordon Wilson (Dundee, East): The hon. Member for Glasgow, Garscadden (Mr. Dewar) is to be congratulated on his gallant effort to attack the Government on their future intentions towards the scheme. But whether the amendment is effective is neither here nor there. After all, a principle is at issue. The Government have been bounced into producing this scheme for good reasons that are partly political but partly due to the howls of discontent that have come from the commercial sector.

If the Government propose to make use of the scheme only for this year, there will be substantial problems next year, and the Government will have succeeded only in buying time for a year. However, they will have left a time bomb ticking away, and that could have deleterious consequences for small business men. Indeed, the Government owe it to the Committee to come clean and to say whether they intend to continue the scheme. If so, that will come as some relief to those in the commercial sector. It would also help if the Government could say whether, if they intend to continue it, they will also want a tapering effect so that the scheme will disappear during the current quinquennium or when the Government have produced an alternative scheme for financing local government.

If the Government proceed with their local government fund-raising reforms, they may well apply them to the domestic sector while leaving the commercial and industrial sectors untouched. If so, that is all the more reason why the bad effects of this revaluation should be diluted by the Government over a period .

In practice, the Government will not get many thanks from the commercial sector next year when the rates bills come tumbling in. People's memories can be very fitful, and although the Government may get some thanks for the relief that they are giving this year, they will run into a tirade of anger and abuse, such as they have had this year, if they fail to follow through with a coherent and consistent system to give aid to the commercial sector. The Government should come clean this afternoon and tell us exactly what they have in mind. It may not be possible to specify figures, but it is important that they should give some information about their future intentions.

Mr. John Home Robertson (East Lothian) *rose*——

Mr. George Foulkes (Carrick, Cumnock and Doon Valley) *rose*——

The Second Deputy Chairman of Ways and Means (Sir Paul Dean): Mr. George Home Robertson.

Mr. Home Robertson: I think, Sir Paul, that you have just called a composite hon. Member, but on this occasion I shall, if I may, take precedence over my hon. Friend the Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes).

The amendment seems to be attracting quite widespread support, and I think that all those who have spoken have supported the spirit of it. Consequently, we all look forward to what the Minister will have to say about it. I feel that the amendment is right, because I do not want to give the present Secretary of State for Scotland any additional discretion. He is always only too willing to impose constraints of every kind on local authorities, yet when he wants to stick his nose in and to take direct action in the affairs of local authorities, he wants those powers to be purely discretionary.

There seems to be a manifest need for this relief not only this year but in succeeding years, and Parliament should therefore legislate accordingly. Incidentally, some of the constraints that the Secretary of State has imposed on local authorities in recent years have probably led him into this very morass. It is his actions in cutting rate support grant year after year that have put so many ratepayers in Scotland in such a parlous situation that the Government have been forced, through political pressure, to respond in this way. All hon. Members must recognise the dificulties that the Government have imposed on ratepayers and must be concerned about it. We must seek ways of alleviating the problems of ratepayers while at the same time preserving the quality of essential local authority services for those whom we represent.

Mr. Barry Henderson (Fife, North-East): The Bill will considerably help those whose valuations have increased threefold or more, but is it not true that for the great majority of ratepayers in Scotland, and particularly in Fife, the spending policies of local authorities have had more to do with increased rate bills than any revaluation?

Mr. Home Robertson: I do not have detailed figures at my fingertips, but I suspect that the hon. Gentleman's statement is inaccurate. If my part of the world is anything to go by, the rate increases imposed in recent years are related far more directly to cuts in the rate support grant than to anything that local authorities may have done. For example, in my constituency East Lothian district council has reduced the rate-borne element of its expediture in the current year, but as a result of the latest round of rate support grant cuts, the rates have nevertheless been forced up. The hon. Gentleman could not ask for a clearer example than that.

There is a case for this formula, flawed as it may be. But if it holds good for this year, it must also hold good for next year and the succeeding years. If there are anomalies and problems this year, those same problems will exist next year and the year after that. The Government may think that they have bought off Sir James Goold and all the others who have been making such a noise in recent months. Indeed, it may well be that this sum that the Chancellor of the Exchequer has been prepared to cough up as a one-off contribution can buy a little peace and quiet for Conservative Members this year. However, questions flow from that, to which we shall no doubt return. First, is that full £50 million actually going to be disbursed through this mechanism? Perhaps we should press the Government further on that.

However, the problem will be with us next year. Far be it from me to express too much concern about the future of Conservative Members, but yesterday I saw a prediction that was based on figures from recent opinion polls, which showed that only nine Conservative Members of Parliament for Scotland were likely to be elected at the next general election.

Mr. McQuarrie: On a point of order, Sir Paul. We are debating amendment No. 1, which was selected by Mr. Speaker. With the greatest respect I think that the hon. Gentleman has drifted away from it.

The Second Deputy Chairman: I have been listening carefully to the hon. Member for East Lothian (Mr. Home Robertson) and I hope that he was making no more than an incidental reference.

Mr. Home Robertson: I was trying to help the hon. Member for Banff and Buchan (Mr. McQuarrie), as he is not one of the nine Conservative Members who is likely to survive. However, if "shall" was substituted for "may", he might have a better chance——

Mr. McQuarrie: What about reselection?

Mr. Home Robertson: I have been reselected, but I do not know whether the hon. Gentleman has been. Indeed, it is interesting to note that the Secretary of State and the Minister could be casualties if they do not get the formula right. Even if they do not accept the obvious merits of the case for getting this business right now, perhaps they will accept them in the interests of self-preservation.

6 pm

Mr. Foulkes: It is a great pleasure to follow my honourable and patrician Friend the hon. Member for East Lothian (Mr. Home Robertson) on this matter.

I found the concern of the hon. Member for Stirling (Mr. Forsyth) for his constituents who have been affected very touching, especially as I have been reading reports — no doubt untrue — that because of the MORI poll findings he is looking for a seat in another part of the United Kingdom, unlike the hon. Member for Banff and Buchan (Mr. McQuarrie) who will fight to the bitter end in his area.

Mr. Michael Forsyth: I cannot imagine the source of those reports. I should be grateful to know where the hon. Gentleman read them.

The Second Deputy Chairman: Order. There is nothing to do with polls in the amendment. We must stick to the amendment.

Mr. Foulkes: It is interesting to note that the hon. Member for Stirling did not deny the reports. However, I shall change my tone because I am not a controversial person, as hon. Members know.

I thank the Minister for receiving a deputation earlier today, which I led, on behalf of the co-operative movement in Scotland. I declare my interest as a sponsored Co-operative Member. The Minister received the deputation with the greatest courtesy. He listened carefully to what was said and was diligent in answering our points.

The representatives argued strongly on a point that my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar) argued cogently when he moved the amendment

[Mr. Foulkes]

—that help should be continued in successive years. The representatives warned the Minister—I think that he took the point because they mentioned stores in his constituency—that societies such as Scotmid co-op are having seriously to consider closing stores. It will interest my hon. Friend the Member for Edinburgh, East (Mr. Strang) to know that one store that may be closed is a modern supermarket in Granton, which was opened only a few years ago when I was on the board of the St. Cuthbert's co-op.

The representatives argued strongly for the continuation of this help to try to alleviate—and it is only a small alleviation—the problem. I do not think that it is improper to quote the Minister because he made his remarks in public. He said that the question of continuation would be considered in the autumn when such matters were generally reviewed.

I want to put some questions to the Minister. If the answers are outside his prepared text, I hope that he will deviate from it and answer them. It would be even better if he did not have a prepared text. In the discussions in the autumn, what will be his view and that of his right hon. Friend the Secretary of State for Scotland? Will they fight for a continuation of help? The House would like to know, as would the commercial ratepayers of Scotland. What will the Scottish Office do?

My second question is the most important: what will be the basis of any decision? What will be the criteron for continuing the help in future years? Will it depend on whether the money is made available? Will it depend on whether that money can be prised out of the Chancellor? I used that phrase when I met the Minister earlier today. Will it be based on the current year's experience? If there is any shortfall this year, will it be carried over to next year?

My hon. Friends and I suspect that the decision will be based on whether the heat has gone off the Government—whether Sir James Goold has forgotten about it and is not jumping up and down. Indeed, by then he might be Lord Goold. That is the traditional way of buying off people. Will the Government wait to test the temperature at the run-up to the next party conference? We need to know the criteria for the decision. I hope that the Minister can answer those genuine, serious and, I hope, to some extent, intelligent questions.

Mr. Maxton: When I listened to my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar), I was slightly undecided whether to support the amendment. From a political point of view, the amendment is pure altruism on our part. We have discussed what will happen to Conservative Members if the money is not continued in successive years. If it is not continued next year, when the Conservative party faces the regional elections in 1986, it will find that the ratepayers of Scotland are yet again up in arms against it.

I am tempted to say that I welcome that prospect because, unlike most of my hon. Friends, I have two Conservative regional councillors in my constituency. Of course, we shall take both those seats at the next election, but it would be much easier if the ratepayers of Newlands were up in arms against the Conservative Government.

However, I shall prove my altruism by giving my support to the amendment. Although it may not be the most beneficial action for the Labour party in Scotland, it is certainly beneficial for Scottish ratepayers.

I want to take issue with the hon. Member for Stirling (Mr. Forsyth) about his intervention in the speech of my hon. Friend the Member for Garscadden. He sugggested that next year the problem might be solved through the rate support grant rather than by continuing the rebate system. We would object strongly to that because that could be achieved only by a cut in the services provided by local authorities. Conservative Members keep saying that local authorities are overspending. They should come to my constituency and see the deterioration in housing, in cleansing and in other services provided by the local authority. They could not then say that the increases are down to high-spending authorities. That is nonsense.

The intervention by the hon. Member for Stirling was surprising. I assume that he still thinks that local authorities that he believes are overspending—including his local authority, Stirling district council—should be hit and receive less rate support grant than those authorities that he believes to be good authorities. If the Government were to adopt his scheme, his constituents who are paying high increases in their rates will not benefit next year because, presumably, the rate support grant will be cut. However, the constituents of the hon. Member for Strathkelvin and Bearsden (Mr. Hirst) may benefit because they have a good local authority that does not overspend.

I do not know what the hon. Gentleman thinks may be the solution. The rebate scheme is for the benefit of all ratepayers, no matter which local authority serves them. Surely that is what the hon. Gentleman wants, rather than using the rate support grant.

Mr. Michael Forsyth: Those of my constituents who suffered an increase in rateable value of more than three times would still benefit because the money would be available. The point about a reduction in rate support grant is perfectly apparent, and I am glad to have the hon. Gentleman's confirmation of that. The cuts in the RSG in Stirling district and Central region came about because those authorities decided to spend hundreds of thousands of pounds on striking miners and other political causes. The cuts in rate support grant are a result of their spending decisions, which will no doubt be reflected in my constituency in the regional and district council elections.

Mr. Maxton: It is obvious that the hon. Gentleman does not listen. I am not supporting cuts in rate support grant for Stirling district council. It has spent money on families of miners in desperate need, not on miners themselves, and many other local authorities rightly spent money in that way. Stirling district council should not have a cut in its rate support grant, but the hon. Gentleman thinks that it should. He said to my hon. Friend the Member for Garscadden that his constituency would suffer because of his Government's policies.

This scheme is fair and should be continued for the full five years of the revaluation period so that there is not a sudden dramatic increase in the rates. So far, we have not heard whether the Government will concede that point. We heard nothing from the Secretary of State when he made his statement or on Second Reading when the point was pressed. Today, no guarantee has been given that the scheme will continue. It will be interesting to see whether the Minister will give one.

If no guarantee is given, we shall have to say that the money was given this year for purely political purposes, and not with any real regard for ratepayers in Scotland. I am waiting with interest to hear what the Minister has to say.

Mr. Ancram: I am sure that the hon. Member for Glasgow, Garscadden (Mr. Dewar) was greatly relieved to hear that the hon. Member for Glasgow, Cathcart (Mr. Maxton) is to support the amendment, because not only is the hon. Member for Cathcart the Scottish Whip, upon whom the hon. Member for Garscadden depends to ensure that his troops do as they are told, but the hon. Member for Cathcart's name is on the amendment. Therefore, the House has the right to presume that he believed in what the hon. Member for Garscadden was saying.

For a moment, I wondered whether the hon. Member for Garscadden was having the same trouble as I had of not quite understanding what the amendment is meant to do, but that might be a minor matter. I ask that question out of interest because I wished to understand the amendment. I am sorry that the hon. Gentleman took it the wrong way and did not give me any answer, but perhaps he will consider doing so.

We have had a fairly wide-ranging debate. I always listen with interest to the hon. Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes). He spoke about people moving round looking for constituencies, but I remember his travels round Scotland before he finally settled in Carrick, Cumnock and Doon Valley. Both he and the hon. Member for East Lothian (Mr. Home Robertson) referred to polls. Given your strictures, Sir Paul, I shall not mention them, except to say that we heard precisely the same speech in precisely the same terms in 1981, but in 1983 some of the predictions made by Labour Members lay rather heavily upon them.

Mr. Foulkes: I am sure that the Minister will confirm that, once I found a constituency where the people wanted and elected me, I stayed there, and I shall continue to stay there. The Minister will recall that he used to represent another part of the country, but, when it gave him leave of absence, he flew elsewhere. However, we should get on to the subject rather than dwell on these political points.

Mr. Ancram: I agree. I merely regret that the hon. Member for Carrick, Cumnock and Doon Valley is no longer a constituent of mine, living in the nice, splendid and expensive house in which he used to live in my constituency.

My hon. Friend the Member for Tayside, North (Mr. Walker) spoke about appeals. In this connection it is important to reiterate what my right hon. Friend the Secretary of State said on Monday—that the Bill does not alter or affect valuations. If there are unfair valuations, or valuations that the ratepayers believe to be unfair, they should take advantage of the appeals procedure, because it is only through that that we can alter revaluations.

6.15 pm

As to the effect of appeals, some may take longer than it takes to bring the scheme into effect. I suspect that that will happen in the majority of cases. The scheme will relate to the valuations as at this time. If there is a successful appeal and a valuation is reduced below the three times multiplier, that case will fall out of the scheme in the future, and, if any adjustments are required to be made, they will be made at that time.

Mr. William McElvey (Kilmarnock and Loudoun): Will any repayment to the Secretary of State for Scotland be required from someone who has benefited from the scheme?

Mr. Ancram: In particular circumstances adjustments may need to be made. That will depend on the time at which the appeal takes place and on the time that the valuation is changed.

Mr. Dewar: I am sure that I am on the same point as my hon. Friend the Member for Kilmarnock and Loudoun (Mr. McKelvey). If a ratepayer is paying in 10 monthly instalments, the first instalment of which is due in May, on the assumption that he has an appeal pending—unfortunately, valuation appeals take a long time to resolve—he may have had the benefit of the rebate on several instalments already paid. If at a later date he succeeds with his appeal, for unpaid instalments he would not have a rebate. However, would he have to pay back any money to the Secretary of State for a rebate to which he was not entitled earlier?

Mr. Ancram: The hon. Gentleman is talking about the same matter as I was in speaking of adjustments that might have to be made. This matter will be dealt with in the draft order. Adjustments will be made as a result of an appeal where the appeal has brought the valuation down below the three times multiplier. In effect, we would seek to ensure that no one unfairly benefits from the scheme. Therefore, where he has, in effect, been rebated, because of the success of his appeal he would have to make a payment back or an adjustment in some other way.

The various ways and timings under which this can arise do not allow for a simple answer. The important point, which I reiterate, is that ratepayers should not think that, just because they qualify for relief, they do not need to appeal if they have an unfair valuation.

Mr. Hugh Brown: The Minister seems to have confused me, if not the rest of the Committee. Is he saying that timing has something to do with when the decision on the appeal is made? I cannot understand the logic of this. If someone qualifies now under the Bill, and if there is a reduction in the rateable value on appeal, why should he not have his entitlement? Is the Minister trying to fudge that point, or does he not understand it?

Mr. Ancram: I understand the point, and I think that the hon. Gentleman will find, when the draft order is published, that it is covered. Where, after a rebate has been granted by the rating authority, any alteration is made in the rate value or in the pre-revaluation rateable value or in the revaluation rateable value itself—*[Interruption.]* The hon. Gentleman asked for a clear answer, and if he will let me finish my sentence, he may learn something—the grant of the rebate and the calculation of any such rebate would have to be determined anew, and the amount of any rebate already paid or allowed or of any rebate or balance thereof found to be due should be paid or allowed or repaid to the rating authority accordingly. There is no simple or clear way of dealing with this. The general effect that we are trying to achieve is that where someone has benefited, but because of an appeal does not require to have benefited and has actually made a surplus, a repayment would have to be made.

Mr. Jim Craigen (Glasgow, Maryhill): I understand what the Minister has said. Would he go as far as the

[Mr. Jim Craigen]

National Federation of Self-Employed and Small Businesses in saying that all applicants for relief must have lodged a formal appeal against the valuation?

Mr. Ancram: I would not go that far, and I am sure that on consideration neither would the hon. Member. What that suggests is that people who may well have a multiplier of more than 3, but who feel that the assessor's valuation is correct and who would therefore have no grounds for appeal, would be required at their own expense to make appeals to qualify for a rebate. I am sure that the hon. Member for Glasgow, Maryhill (Mr. Craigen) would not consider that sensible, in terms either of administering the scheme and trying to make sure that the appeal procedure is not bogged down or of the financial interests of those who were to undertake that course. I take it from the fact that the hon. Gentleman is nodding, however gently, that he appreciates that that would cause chaos and achieve no useful purpose.

Mr. Nicholas Fairbairn (Perth and Kinross): I am worried about this. Let us take three cases: a person who has a multiplier of more than 3 who does not apply for any rebate; a person with a multiplier of more than 3 who applies for a rebate, who appeals and whose appeal is granted some time; and a person with a multiplier of more than 3 who appeals unsuccessfully and gets a rebate. What is the system under which these rebates are to be granted? Will one person have to repay? If ever there was an idiocy of a system, those three indications give it.

Mr. Ancram: The first case would not arise. Those eligible will be identified by the rating authority. They will be notified, and rebates will be paid where they are due. Therefore, there will be no question of someone qualifying, but not applying. If the rating authority leaves out someone, it is our intention that that person should be entitled to point out to the rating authority that he has been left out. There would be an application only in that sense.

In regard to the other two cases, in any scheme where relief is granted — not necesssarily by a successful appeal—and the ratepayer benefits overly, adjustments and repayments may have to be made. That may be done not by repayment but by adjusting the amount required to be paid over the rest of the year. I go back to what I said earlier to the hon. Member for Garcadden. The precise way in which adjustments would be made would depend on the circumstances and timing of the appeal.

Mr. Dewar: Another slight complication could arise. If someone is appealing, there is a statutory disregard which is a certain percentage of the increase. Presumably that would become an adjustment and would be called into play in the final reckoning. I cannot remember what the percentage is. Perhaps the Minister would remind me and explain how that would fit into the complicated scenario that he is outlining.

Mr. Ancram: I do not think it is a complicated scenario. It may be complicated in how it has to be phrased within the order, but the principle behind it is very simple. The figure is 10 per cent. In balancing the effects of a successful appeal, that would have to be taken into consideration to reach a fair result. In the case of those who have benefited but who do not require to have benefited because they have appealed successfully, an adjustment may have to be made. I am sure that principle would be agreed by both sides of the Committee.

The hon. Member for Edinburgh, East (Mr. Strang) referred to expenditure in Edinburgh—a matter that we should probably not be debating in Committee. However, there is one relevant point to which I must reply. The spending decisions of Edinburgh district have increased the district rate by 80 per cent. In terms of the figures produced by the administration, that accounts for a considerable amount of the rate increases facing both domestic and commercial ratepayers in Edinburgh. In view of the concern displayed not only by the hon. Member for Garscadden but by the hon. Member for Edinburgh, East, I hope that the hon. Member for Edinburgh, East will support the Government in their attempts to persuade that district authority to reduce expenditure and to return money to the ratepayers.

Mr. Strang: I am grateful to the hon. Gentleman for the manner in which he made the point. I know that we cannot dwell on this at length, but if the Under-Secretary were to accompany me around my constituency he would see the dereliction and deprivation that exist because of the low level of provision by Edinburgh council over the years. He knows the position. There is no housing support grant; there is only a trivial contribution from the rates to the housing revenue account; and there is a very low level of expenditure on recreation compared with what is spent by some Tory authorities. We must be able to tackle the problems in Edinburgh. It is wrong for the Under-Secretary to suggest that I am not supporting the council in beginning to tackle them.

Mr. Ancram: We shall have other occasions in coming months to debate those matters. I do not wish to debate them in the context of this Bill. If the hon. Gentleman is concerned about the ratepayers and the effects of rates on businesses, I find it hard to appreciate that he is content to see an 80 per cent. increase in the district rate merely to meet the expenditure decisions of Edinburgh district council.

The main point raised by the hon. Member for Garscadden was dealt with in a sense on Second Reading on Monday when both my right hon. Friend and I attempted to make clear that decisions as to future years are taken properly in the autumn of the year preceding the year in which they are to be effective. Decisions on rate support grant and on the domestic relief element of the rate support grant are taken then. I do not think that the hon. Member for Garscadden or the Committee could expect me to pre-empt those decisions. Hon. Members should not attempt to draw me into giving commitments about figures or any other details.

It was made clear on Monday, and I reiterate today, that the Bill is drafted as an enabling measure. By use of an order or regulations, it can be applied in any year. As I said on Monday, we intend to introduce the order relating to the current year as soon as the Bill has Royal Assent. We are entitled so to do.

Going back to what my hon. Friend the Member for Tayside, North said, there is nothing in the Bill to prevent the Secretary of State, if he so decides when he takes these decisions in the autumn, from providing relief in future years. That is an important and fundamental part of the Bill. I hope that my hon. Friends will accept that the

Secretary of State has the power. He has had other powers to help ratepayers in the past and he has used them. We have shown our concern for Scottish ratepayers, but the Bill provides the proper way, and I hope that my hon. Friends will accept it.

6.30 pm

Mr. Foulkes: The Committee knows that the Bill gives the Secretary of State that power. Will the Minister answer my question: what criteria will be used and on what basis will the decision be made to continue the provision in future years?

Mr. Ancram: The decisions are taken in the autumn in the light of current circumstances. Relief to ratepayers is examined on an annual basis and decisions are announced in due course to Parliament. As my hon. Friend the Member for Stirling (Mr. Forsyth) said, businesses should have some idea of what is to happen. We shall let ratepayers know of our intentions in good time, as we do about other elements of the rate bill each year.

Mr. Craigen: The Minister says that he wants to let ratepayers know in good time. The closing date for appeals against valuation will be September. Is the Minister saying that he will announce his decision in October? If so, people who have put in an appeal will not have had the opportunity to examine his decision.

Mr. Ancram: The hon. Member for Maryhill is muddling two matters. The appeal will be to reduce a valuation. Those who feel that their valuations are unfair should appeal. The Bill does nothing to alter valuations, so the closing date for appeals has nothing to do with the argument.

I tell my hon. Friend the Member for Stirling that businesses will have some idea of the burdens that they are likely to face because we intend to make the decision as soon as possible, consistent with the timetable that I have outlined. They will have some warning of their position in future years.

Mr. Fairbairn: I should like to be clear about two matters. First, I assume that there will be no appeal against any assessment of abatement or non-abatement under the ordinary rating valuation procedures. Secondly, when the scheme is started, should I assume that, however unjust any part of the scheme is thought to be, we must vote for the whole or against the whole?

Mr. Ancram: My hon. and learned Friend will see from the face of the Bill that the regulations come under the affirmative procedure.

Mr. Fairbairn: So the answer is yes.

Mr. Ancram: The answer is yes. I understand that my hon. and learned Friend was referring to appeals by those who feel that they should have received relief but have not. The normal type of appeal applies to the Court of Session. The hon. Member for Garscadden laughs, but he got the answer right. He appears to find that humorous.

We want to maintain a degree of discretion and flexibility for future years by giving the Secretary of State the power, year to year, to make regulations which can provide relief under the Bill.

Opposition Members seem suddenly to have a tremendous desire to promote relief schemes for commercial ratepayers, particularly in the long term. I recall that in 1978, when the last revaluation took place, when the Labour party was in government and the commercial sector was disadvantaged, the differential between the average multiplier and the commercial multiplier was greater than it is today. There was no sign then of promoting schemes to help the commercial or domestic ratepayers who were most severely hit. The only reaction of the Labour Government to the plight of domestic and commercial ratepayers was to reduce domestic relief by about 75 per cent.

We are grateful to Opposition Members for supporting the scheme, but some of their enthusiasm owes more to the politics of the situation than to a deep concern for the ratepayers.

The Bill provides a system which will not only help ratepayers this year, but is capable of providing help in future years, if required. I ask my hon. Friends to reject the amendment which does not achieve what the hon. Member for Garscadden wishes it to achieve. In many ways it does not make sense. If the hon. Member for Garscadden wishes to press the amendment to a Division, I ask my hon. Friends to reject it.

Mr. Dewar: I confess that the look of pain upon the face of the hon. and learned Member for Perth and Kinross (Mr. Fairbairn) as the Minister smoothly referred to an appeal to the Court of Session as a normal appeal lightened my afternoon.

I intend to press the amendment to a Division and I hope that my right hon. and hon. Friends will support me. If we carry the day the other place might have to do some tidying up, but I imagine that that can be done with ease if the view of the Committee is clearly established. I wish to press the amendment because it has all-party support. We agree that certainty is a virtue and that equity demands that the Government make it clear that they intend to carry the aid throughout the remainder of the quinquennium.

It is not good enough for the Minister to stand at the Dispatch Box with no supporting argument, detail or explanation and to say that the Government will take a decision in the autumn. He did not try to answer my hon. Friend the Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes) about the criteria.

There is a good reason why we should expect the scheme to continue. I accept that the domestic element is different because that applies to all domestic ratepayers. In that sense we are talking about an omnibus provision. Whether the domestic element should apply might be a matter to be considered according to the circumstances in October. However, the proposed form of rebate is an attempt to equalise or at least to reduce the discrepancies within a particular category. Nothing that happens in October will change that picture. The valuation roll in October will be exactly the same as the present valuation roll. If it is offensive—we gather that the Government rightly think that it is offensive—and inequitable that certain people should suddenly see an enormous gap opening up between their rateable value and the rateable values of other people, that gap will still be there in October. No change of circumstance will affect that situation.

If that is the injustice with which the Bill is dealing, it is an injustice which by definition will continue throughout the quinquennium, and there can be no reason for refusing to give an undertaking that at least in principle this help will be continued. If there were some caveat about the

[Mr. Dewar]

level, we might be prepared to listen to that, but at least but there should be an undertaking that the discrepancies that will still exist will be dealt with as set out in the scheme.

Therefore, it seems to me clear, logical and entirely consistent that we should express our displeasure at the totally inadequate response of the Minister, and invite the Committee to divide.

Question put, That the amendment be made:—

Tellers for the Noes:
Mr. Ian Lang and
Mr. Tim Sainsbury.

Question accordingly negatived.

Mr. Bruce: I beg to move amendment No. 2, in page 1, line 13, leave out '3' and insert '2·5'.

The Second Deputy Chairman: With this it will be convenient to discuss the following amendments: No. 3, in page 1, line 13, after 'value', insert

'or such other figure as shall be set by statutory instrument which shall not have effect until approved by resolution of the Commons House of Parliament'.

No. 4, in page 2, line 11, at end insert—

'(3A) Where at any time it appears to the Secretary of State that the expenditure for rebate under this section will not reach the sum of £50 million for which provision is made, he may by order reduce the multiples set at 3 under subsection (2) hereof so as to ensure that the said sum is utilised.'.

Mr. Bruce: The purpose of the amendment is self-evident. It is to ensure that the relief gets to the people who need it most. That has been the intention behind all the amendments tabled by Liberal Members.

It has emerged from our debates so far that no one seems to have accurate figures. The Under-Secretary of State made some play of the fact that at the time that the Liberal party was campaigning for exactly this kind of relief package we were asking for only about £4 million. He knows that that criticism of us was as much a criticism of the Scottish Federation on Small Businesses and Self Employed which had assessment information available to it that that is what would be required—*[Interruption.]* It has emerged since that such organisations as the Liberal party and the federation, without the aid of computers, are no more inaccurate than the Government, who have the aid of computers—*[Interruption.]* The braying of the hon. Member for Banff and Buchan (Mr. McQuarrie) is a matter that I may come to later.

The Minister is aware that the figure of £50 million was not the first-aid relief of Mafeking, as was suggested at the Tory party conference, and a definitive figure produced by the Scottish Office on the basis of a detailed analysis. It appears now that it was at best a guess that it was hoped would cover the requirement, and that it was a generous guess. We are not ungrateful that the Scottish Office managed to squeeze a generous sum of money out of the Treasury. However, we want to ensure that the money is used for the purpose for which it was intended and that those who need the relief most will get it.

Regrettably, the Government's cut-off point of three times the increase in net annual value means that many people who need the relief will not get it. I have received a number of representations from people who face very considerable increases in their rates bills and will qualify for no relief.

I quote the example of someone living in Newmachar, just outside the city of Aberdeen, who faces a 288 per cent. increase in rateable value and an increase of 26·2 per cent. in the rates that he must pay. He asks me to make representations to the Government to give him relief from that. The Government are pushing through this Bill which will give him no relief. He will have to pay the full increase.

The hon. Member for Glasgow, Cathcart (Mr. Maxton) spoke earlier of a comparison with teachers. I can assure the Minister that it is not lost on teachers who are also ratepayers that they face rate increases of 25 per cent. or 30 per cent. in circumstances where at the moment they are getting no salary increase and what the Government are offering them will not cover their rates bills.

One of my constituents lives in Ellon in a house which may have been sold to him by the hon. Member for Banff and Buchan. He faces an increase in his rateable value from £457 to £1,247. That is 273 per cent. The increased cash payment that he must make is 30 per cent. He, too, will get no relief under the terms of the Bill, and nothing that I or the Minister can tell him will make him feel very well disposed to the circumstances in which he finds himself.

The third example that I quote is that of someone living in Bridge of Don who is asked to find an additional £250. My calculation is that that might be reduced to £220, and he points out that that is just £30 less than the rates bill that Balmoral castle will have to find, which suggests that living in a big house in the country may be cheaper than living in a small house in a town.

I hope that those examples demonstrate to the Committee that the cut-off point that the Government are applying means that many people who, understandably, are incensed by their increased rates bills and worried about how to find the means to pay them are to get no relief.

It could be argued that the 2·5 suggested in the amendment did not go far enough but not that it went too far. I accept that, because it was essentially a compromise based on my understanding of the kind of shortfall that might be available and the intention to concentrate the money available a little closer on the people who needed relief.

On more than one occasion the Minister has implied that I, as distinct from my colleagues, did not appreciate the Government's offer of help. He knows that my colleagues and I have campaigned hard for a first-aid package. At a press conference in Edinburgh on 9 May, before the Government's announcement, I said that I thought that the relief necessary would be of the order of tens of millions of pounds because it was apparent to me that the figures would be fairly substantial.

I welcome the Government's package, but I make two comments about it. The first is that the package is not concentrated hard enough where it is most needed. It is applied across the board, and many people will still have dramatic increases in their rate bills with no additional services, and relief for one year only. If we are talking about real politics, I can assure the Minister that those

[Mr. Bruce]

people will not be better disposed towards the Conservative party after the passage of the Bill than they were before. They will be looking for more help than they have had to date. The Government will have to restore some of the rate support grant to local authorities next year to enable them to cushion their ratepayers.

Mr. Henderson: If the hon. Gentleman thinks that the Government's introduction of the Bill demonstrates a warped sense of priorities, surely by this amendment he is seeking to warp the priorities even more. Is not that curious? Would it not be less necessary if Liberal councillors on Fife regional council had voted against expenditure policies exceeding the Government's guidelines put forward by the Conservative members of that council?

Mr. Bruce: I am sure that the hon. Gentleman's constituents are well aware of the value of having Liberals on the local council, which is probably why about the safest Conservative seat on the district council is now in Liberal hands. That suggests that when people have Liberal councillors they appreciate them and elect more of them, as no doubt they will in other parts of the country.

On the question of warped priorities, I freely admit that I might have chosen my words better in response to the statement. Let me therefore make my point clear. The Government managed to find £50 million of new money. It was not scientifically calculated, but a figure that they thought would be adequate.

Mr. Donald Stewart (Western Isles): It was not calculated at all.

7 pm

Mr. Bruce: I agree with the right hon. Gentleman on that.

Secondly, the Government rightly recognised that the money was necessary and managed to find it, having told us that there was no new money available for other priorities in the Scottish economy, such as investment in education. The Government are not going far enough. If they can find £50 million for ratepayers, they should be able to do so for teachers. I assure Conservative Members that my constituents recognise, as the Committee will recognise, that the Government's priorities are peculiar to them. They do not accord with what many people believe, that is, that we should be protected from these ridiculous rate increases, which have been brought about as much by cuts in Government rate support grant as by revaluation, and that the Government should invest in other priority services, such as education. It is valid to make the point that if the Government can find money for rates, they can find it for education.

I have attended meetings in my constituency, which were extremely well attended by ratepayers, who will now campaign consistently for a restoration of justice within local government finance to enable local authorities to operate effectively and to carry out what they should do with proper support from central Government, which they are not receiving at present. Those people recognise the true colour of the Government's priorities.

The Minister should acknowledge that the £50 million was not calculated scientifically, that its application is not getting it through to those who most need it, and that some people who face substantial rate increases will not be helped by the legislation.

The amendment would lower the threshold and give more people assistance. To quote the hon. Member for Cathcart, the political altruism of my party is that the amendment may help some of the Minister's disaffected supporters, who are outraged and no doubt wrote to him about the iniquities of the rating system, to feel that the Bill will benefit them, which it does not do as it stands. I would have thought, therefore, that Conservative Members would be anxious to ensure that the relief is spread as widely and among as many ratepayers as possible. To lower the threshold would achieve that end. It must be desirable both for general equity and, indeed, for Conservative Members in marginal constituencies.

Mr. Dewar: As three amendments are grouped together, it may be helpful if I speak to amendment No. 3 in my name and the names of my hon. Friends.

We are dealing with the same point as that raised by the hon. Member for Gordon (Mr. Bruce)—the mystery of the £50 million. The headlines told us that the Government had found £50 million, which was new money and would be used to help Scottish ratepayers. When the Prime Minister spoke at Perth about the commercial element in the package, she went out of her way to say that the scheme would cost "£40 million, at least." A great deal of political credit was claimed for having produced that £50 million. We are making the straightforward point that the goods should be as advertised. If the package was £50 million, it should be used for relieving the burden of the rating system at the point where that system creates most pressure.

When the hon. Member for Edinburgh, South (Mr. Ancram) replied to the debate on Monday, he said of the scheme:

> "It is not easy to calculate how much that will cost, as hon. Members have realised. I believe that we shall not know the full answer to that question until all those who are eligible have been paid."—[*Official Report*, 3 June 1985; Vol. 80, c. 112.]

That is a highly questionable statement.

I accept that there may be some play on the estimates and that we may have to come and go on the £29·5 million or £29·6 million which COSLA calculated. However, it is extraordinary that, during the preparation of the scheme, COSLA was not consulted. COSLA holds the computer records and has the capacity to identify those who will benefit and the amounts that will have to be paid to them. Its figures are likely to be accurate within a small tolerance. COSLA strongly suggests that the shortfall will be about £20 million.

In the debate the Secretary of State said:

> "While it looks as if the total cost should indeed be contained within the £50 million figure attached to the Bill and may be a bit less, it is not possible yet to be sure what it will amount to". —[*Official Report*, 3 June 1985; Vol. 80, c. 66.]

We must make provision against the possibility — indeed, the strong likelihood — that COSLA's figures will be correct, and the suggestion that the sum may be a little less than £50 million is a euphemism. There appears to be a genuine danger that £20 million of the £50 million rescue operation will not be given to Scottish ratepayers, but will disappear into the ever-hungry maw of the Treasury.

I like amendment No. 3 because it allows a sensible degree of flexibility. It is a genuine attempt to help. The

hon. Member for Gordon fairly suggested—in the sense that it was a genuine suggestion—that we should bring more people into the ambit of the scheme. He suggests reducing the multiplier from 3 to 2·5. I cannot support that because it is too arbitrary a figure and too inflexible in its effect. I cannot say what would happen with a multiplier of 2·5, but COSLA has informally suggested to me that it would include an enormous number of people and that the £50 million would have to be increased many times. In a sense that is desirable, and I understand the temptation to do that. However, I have tabled an amendment which I genuinely hope the Government will accept, and Conservative Back-Bench Members will support.

Amendment No. 3 is much more modest than amendment No. 2. We are not demanding an arbitrary reduction; we are seeking, in case our suspicions turn out to be right and £20 million is to return to the Treasury and not spent as intended, to introduce a provision to give the Secretary of State the machinery to do something about the shortfall. When he has calculated at leisure how best to proceed by varying the multiplier or whatever, he may say, "I am sorry chaps, but I cannot do anything about the shortfall. I would have liked to, but the primary legislation was drawn in a way that did not allow it." For a long time he sheltered behind that proposition regarding the scheme itself. I am anxious to help by providing him with such a means, if it becomes clear that that is right because of the enormous shortfall caused by the present multiplier.

The amendment allows the multiplier to be varied by statutory instrument in the same way as the other details of the scheme. We are not being unreasonable; we are merely giving the Secretary of State a power. The amendment is permissive. We are allowing the Government to cope with what would be a sad let-down if the figures fall far short of the promised support.

Conservative members have already commented on the extremely limited impact of the scheme in their constituencies. The hon. Member for Strathkelvin and Bearsden (Mr. Hirst) reported, sadly, on the disappointments for Bearsden. To some extent, I appear at the Dispatch Box as a penitent because in the early days of the scheme I suggested that the Eastwoods and Bearsdens would be the principal beneficiaries. That has not turned out to be true, and I concede that. The figures show a much wider scatter than I thought likely, although the level of help is marginal.

I discussed the figures with the hon. Member for Eastwood (Mr. Stewart), the Under-Secretary. They were supplied to me by the finance division of Strathclyde region. I give them to the Committee because they are interesting. In Glasgow, for example, 11·95 per cent. of all domestic ratepayers will get some benefit, although probably marginal, from the scheme. In Eastwood, only 197 householders will qualify for assistance, which represents less than 1 per cent. of the domestic ratepayers in that area. There is a great contrast between Glasgow at almost 12 per cent. and Eastwood at 0·98 per cent. The total of £59,000 that will be available in Eastwood shows how marginal the assistance is.

It is interesting to note that, in Glasgow, 23 per cent. of non-domestic ratepayers will obtain some assistance from the scheme, whereas in Eastwood only 1·06 per cent., or 21 properties, will benefit. When the *Eastwood Gazette*, or whatever the local newspaper is called, gets its hands on those figures, the Under-Secretary of State may have an uncomfortable time explaining why there has been such a minimal impact in his area. In Argyll and Bute, which is represented by another Under-Secretary of State for Scotland, 1·35 per cent. of domestic ratepayers will be helped, compared with an average in Strathclyde of more than 6 per cent. That suggests that the help for Argyll and Bute will not be received with massive enthusiasm.

I make those points because I believe that the record should be put straight, and because I wish to underline the fact that, if the scheme is extended, it will be extremely popular in areas that are important to Ministers, especially Eastwood and Argyll and Bute. I have obtained only the figures for Srathclyde, but perhaps if I obtained those for Angus, the portly frame of the Solicitor-General for Scotland might bounce a little more happily, given the electoral pressure from which he suffers, when the multiplier was lowered and the present scheme extended.

It will be frustrating and irritating for constituents to have to say to their representatives, "Not only are we getting only a marginal benefit from the scheme and being left with substantial rate increases, but we know that another £20 million is available, which will be handed back to the Chancellor and will not benefit Scottish ratepayers. Why can you not take up that extra £20 million by adjusting the scheme?" At that point, the Under-Secretary of State—the hon. Member for Eastwood—and other Ministers will be grateful for the fact that this amendment has been accepted, because they will have the machinery to vary the scheme and to use all the available money. They need not go again to the Treasury, because the money is there. It must be good sense to change the scheme so that the Scottish Office can use all the available money.

I hope that that simple, but persuasive and compelling, case will commend itself to Conservative Members. We know from Second Reading that the hon. and learned Member for Perth and Kinross (Mr. Fairbairn), the hon. Member for Renfrew West and Inverclyde (Mrs. McCurley) and others believe that the £50 million should be spent in the interests of Scottish ratepayers. Unless the Committee accepts the amendment, there will be no machinery to change the scheme, and real difficulties will occur.

I am not talking about natural rebels on the Conservative Benches. The fact that the hon. and learned Member for Perth and Kinross and, I suspect, the hon. Member for Banff and Buchan (Mr. McQuarrie) take a strongly independent line about getting the maximum help for the ratepayer from the sum allocated by the Treasury is significant. What is even more significant is that on Second Reading the hon. Member for Strathkelvin and Bearsden said:

> "I appreciate that eligibility should be set down in the Bill, but is the revaluation of three immutable? Could some other figure, which used up the money, be applied?" — [*Official Report*, 3 June 1985; Vol. 80, c. 80.]

He also said that he stood by his threat, if I can call it that, in the *Evening Times* that he will throw all his weight behind effords to ensure that the entire £50 million is applied to rating relief in Scotland.

It is significant when someone such as the hon. Member for Strathkelvin and Bearsden takes that line, not because I believe greatly in his political weight—I hasten to reassure the Committee on that—but because he is an identikit Tory. He is not one of the world's rebels; he is the loyalest of the loyal. He is the sort of young man that any hon. Member would like to chair his Young

[Mr. Dewar]

Conservatives branch. When the hon. Gentleman comes to the House and says that the £50 million must be used in the way that was trumpeted at the Scottish party conference, and which brought peace to that conference, the Minister should listen to such persuasive arguments. If the hon. Gentleman was here to listen to the arguments —he has not yet appeared for the debate—I like to think that he would vote with us tonight, because it is a sensible amendment that does not commit the Government to a specific figure. It gives them some flexibility instead of leaving them in the lurch, when they would be in the most uncomfortable position of saying: "We have the money, but we shall give it back to the Treasury."

That would be wrong in equity and would be bad for the morale of Scottish ratepayers and for the political system. The Government should keep their clear promise that £50 million will be available. However, there is a grave danger that that promise will be breached unless the Bill contains some flexibility along the lines set out in amendment No. 3.

7.15 pm

Mr. Donald Stewart: In speaking to amendment No. 4, which is in my name and that of my hon. Friend the Member for Dundee, East (Mr. Wilson), I shall draw attention to a small printing error on the amendment paper. The penultimate line uses the word "multiples" instead of "multipliers". I do not suppose that any of the intelligent members of the Committee were confused by that error, which probably arose from the haste with which the amendment was drafted on Monday night.

I should stress that it has become clear that, if only those whose revalued rateable values are greater than three times their pre-revaluation rateable values will benefit, it has been calculated that considerably less than the £50 million given by the Treasury will be used. The Scottish National party believes that all that money must come to Scotland for the purpose of rates relief. It is little enough compensation as it is, and the Government must not be allowed to get away with skimping on it.

I agree with the hon. Member for Glasgow, Garscadden (Mr. Dewar) that amendment No. 3 is flexible—indeed, any of the amendments in the group would meet my purpose—but amendment No. 4 states that if the full sum has not been used, the multiplier should be reduced to whatever figure is necessary to ensure the use of the full amount allocated by the Treasury.

The Chancellor of the Exchequer said that the plug will be pulled on this life support next year and that there will be no cash in successive years. It is essential that Scottish ratepayers, domestic and commercial, benefit to the full from the £50 million. Anything less will be regarded as a climbdown and a sell-out of the commitment given to Scottish ratepayers by the Secretary of State at the Perth conference. If he wants to save his political skin and that of other Conservative Members, he would be well advised to accept the amendment. If he does not, he will suffer a renewed backlash in Scotland.

Mr. McQuarrie: The Committee will welcome the presence this evening of the hon. Member for Gordon (Mr. Bruce) and his contribution to the debate, because he did not bother to appear for the Second Reading of the Bill or to contribute in any way on behalf of the ratepayers to whom he pays lip service when he believes that he can make a political point. He said that no one had done any work to arrive at the factor of 3, but it is worth asking him how he arrived at the figure of 2·5. He said that he had no computer.

The hon. Gentleman tried to hide behind the cloak of the Scottish Federation of Small Businesses and Self Employed when he said that it would have to take its £5 million from the figure of £40 million. Yet he had the audacity to say to the Secretary of State on 14 May that the money was

"a sign of the warped priorities of a Government threatened with extinction in Scotland."—[*Official Report*, 14 May 1985; Vol. 79, c. 178.]

It is strange that he described £40 million of relief as a warped priority when he asked for only £5 million. Would the alliance have allowed less?

Mr. Bruce *rose*——

Mr. McQuarrie: I shall not give way because the hon. Gentleman has had his say. I should like to get rid of amendment No. 2.

The hon. Member for Gordon asked that the load should be spread fairly. I agree with that. In Grampian region, the rateable value before revaluation was £30·72 million for the private domestic ratepayer. After revaluation that figure rose to £86·71 million. The figure was therefore increased 2·82 times, or by 182 per cent. That is well above the 2·5 factor called for by the hon. Member for Gordon. For the local authority domestic ratepayer the figure before revaluation was £13·5 million. After revaluation it became £36·45 million. In that case the figure was increased 2·7 times or by 170 per cent. That is still not down to the factor of 2·5.

The most important element of the £50 million relates to the commercial ratepayer. Before revaluation, the rateable value was £38·51 million and after revaluation it rose to £86·71 million—an increase of 2·82 times or by 182 per cent. We still have not dropped to the denominator of 2·5 which exists in the warped mind of the hon. Member for Gordon. Those are the average figures given by the local authority. There are plainly other increases between 2·7 and 3.

In Grampian region—the hon. Member for Gordon plainly does not know this — it is estimated that approximately 25,000 people and businesses will benefit from the Bill to a total of £2·8 million. Broken down, the figures mean that 21,128 domestic ratepayers and 4,416 commercial ratepayers will benefit.

I support the view that the whole of the £50 million should be used. I prefer amendment No. 4 to amendment No. 3 because I believe that amendment No. 4 covers the point more widely. The two amendments, however, are comparable because they want to achieve the same result —that the £50 million is used.

I hope that when my hon. Friend replies he will give a firm undertaking that the £50 million will be used. We are all aware that the Scottish Office and the local authorities did not know how much would be required to pay on a factor of 3. Computers have to do their work, and they have not yet been able to complete it. We may therefore find that there will be some £20 million in the kitty. I give my right hon. Friend the Secretary of State great credit for having obtained the money from the Treasury. I take no notice of the rubbish about its being to gain an electoral advantage. It was a first-class job done

by an honourable and first-class Secretary of State. *[Interruption.]* There will never be a Liberal Secretary of State, that is for sure.

Will my hon. Friend guarantee that that £50 million will be spent? To take the arbitrary figure that the hon. Member for Gordon and his two colleagues, the hon. Members for Roxburgh and Berwickshire (Mr. Kirkwood) and for Orkney and Shetland (Mr. Wallace) have suggested is not the best way to achieve that. Neither of those two colleagues of the hon. Member for Gordon are present; nor are any of the other Liberal Members. There is not even a member of the Social Democratic party present.

Mr. Bruce: Where is the Secretary of State?

Mr. McQuarrie: As I said before, he is in Scotland. He has not tabled an amendment. The hon. Members for Roxburgh and Berwickshire and for Orkney and Shetland have.

If there is to be £20 million in the kitty, the best thing to do is to reduce the factor from 3 to 2·9. If we still find that the £20 million has not been used, the factor can be reduced to 2·8. That is a fair and reasonable way to work. I am sure that the hon. Member for Glasgow, Garscadden (Mr. Dewar) will admit that, if we accept the figure of 2·5, there is no guarantee that the total will amount to £50 million. With that factor we might need more than £50 million. We must be grateful for having £50 million of new money, and we must take advantage of it. I hope that my hon. Friend will take note of that, because I do not agree that we should hand the balance of the money back to the Treasury.

Mr. Dewar: The hon. Gentleman is making a series of reasonable points which he would expect me to support. There is virtue in amendment No. 3, which provides machinery for achieving what we want. Amendment No. 4 merely provides that the Secretary of State would have the power to alter the factor. Amendment No. 3 provides that the figure can be altered by statutory instrument, as is provided in other parts of the Bill. We can then have a debate in the House and watch what is happening. If we do not receive assurances, I hope that the hon. Gentleman will join us in the Lobby on that point.

Mr. McQuarrie: I am grateful to the hon. Gentleman, because he has brought the point home to me. I must confess that I had slightly overlooked it. Amendment No. 4 had appeared to me to be more suitable. I accept that amendment No. 3 is probably more in the interests of the Committee, because we do not know the correct factor at the moment.

I regret that I cannot support my hon. Friend if he is not prepared to give an undertaking to the House that the £50 million will be allocated to Scotland in some form or other.

Mr. Bruce Millan (Glasgow, Govan): The logic of the speech of the hon. Member for Banff and Buchan (Mr. McQuarrie) is that he should vote for amendment No. 3. An assurance from the Minister will not mean anything unless a facility for doing something about it is written into the Bill. There is no flexibility with the way that the Bill is presently drafted. Amendment No. 3 has the advantage of giving flexibility. The factor could then be adjusted to whatever figure is considered appropriate to produce the sum of £50 million.

With the Bill as presently drafted, the relief granted will not amount to £50 million. We have figures from COSLA. The hon. Gentleman gave us some figures from Grampian region. I have figures for other regions of Scotland. They total slightly less than £30 million. There is a little over £4 million on the domestic side and something over £25 million on the commercial side. We were promised that the domestic relief would amount to £10 million. The available figures show that the relief is less than half for domestic ratepayers. On the commercial side there is a considerable shortfall from the £40 million that we were originally promised. I do not think that there is any dispute about the figures. If there is, no doubt the Under-Secretary will let us know.

7.30 pm

The Government rushed into the legislation without doing any calculations. The announcement was made in the House on 14 May, the consultation meeting with COSLA was not held until 29 May and now that the figures based on the Government's proposals are coming forward, we see that there is a considerable shortfall.

Even now, the Government seem to be making no effort to get additional information. I tabled four questions for answer on Monday, with the idea of getting replies in time for the Second Reading debate on that day, so that hon. Members would have a sensible basis on which to conduct that debate.

I had considerable difficulty getting the answers on Monday at the normal time. I do not want to make too much of it, but the answers arrived considerably later than they should have done on Monday — literally a few minutes before the debate started. The answers were extremely illuminating. One said:

"This information is not available."

It had taken the Government nearly a fortnight to tell me that they could not answer my question. The other answers were equally uninformative.

I asked the Secretary of State

"if he will give the total number of domestic and commercial ratepayers, respectively, for each rating authority in Scotland and for Scotland as a whole and his estimate of the number and percentage . . . who are likely to benefit".

The Secretary of State replied:

"Complete information in the detail requested is not yet available."

I was not even told the number of ratepayers in Scotland. I also asked what the cost would be if the factor were 2·5 or 2·75. I am sure that with a factor of 2·5 the cost would be considerably more than £50 million. The Scottish Office and rating authorities have computers that have been used to make calculations, but the Secretary of State told me:

"I do not have the information on which to base a reliable estimate, and to ask the rating authorities to do the calculations specially does not seem to me a worthwhile use of resources." —[*Official Report*, 3 June 1985; Vol. 80, c. *81-2*.]

The administrative costs of the Bill will be £1 million, but the Government will not even ask local authorities to use their computers to calculate what would happen if different factors were applied. It is a ludicrous position.

The Government do not deserve to get their Bill in the time proposed, because they have not taken the trouble to do essential research to find out what the Bill will cost and what other methods would cost.

Applying a single factor of 3 to every rating authority in Scotland is bound to produce anomalies. Without being specific, the hon. Member for Banff and Buchan drew attention to the problem. The impact of the factor of 3 will vary from authority to authority, depending on the

[Mr. Bruce Millan]

revaluation increase for each category of ratepayer. The hon. Member for Banff and Buchan said that the percentage increase on the commercial side in Grampian was 182. The increase in Shetland was only 50 per cent., in Orkney it was 70 per cent. and in Lothian and Strathclyde it was 110 per cent. Different increases will lead to different results when the factor of 3 is applied to every local authority.

It would have been possible to have a more sophisticated system providing for different factors and allowing greater equity between ratepayers in various rating authorities. It would take account of the different results of revaluation, not, of course, of the different rate increases that are taking place in 1985-86 anyway. However, the Government rushed in with a crude calculation and did not take the trouble to do other calculations to find out whether a more sophisticated and fairer system could be devised.

Even within regions, there are considerable differences in the minimum rates increases above which ratepayers will qualify for relief. For example, domestic ratepayers in Eastwood will have to pay at least a 43·9 per cent. increase in 1985-86 before getting any relief. Commercial ratepayers in Eastwood will have to pay 62·9 per cent. more before getting relief under the Bill. That is an extraordinarily high threshold and that is only one example.

In Glasgow, relief will be given to domestic ratepayers only after they have paid a 39 per cent. rates increase, and commercial ratepayers will have to pay 52·9 per cent. more before relief is payable. There are a variety of figures in Strathclyde and other regions. I do not have the figures for districts in other regions, but no doubt COSLA and the individual regional authorities will have produced them.

All the information is available, but it has not been given to us. When I ask comparatively simple questions, I am told that the information is not available and that the Government will not even bother to find it. I suppose that they do not want us to know, because such information would enable us to raise intelligent questions in debates such as this.

Unless the Under-Secretary introduces some flexibility into the Bill, there will be a considerable volume of complaints from people who thought that they would get relief, but will have to pay massive rate increases and will get no help. They will also find that other ratepayers paying smaller increases will get help because of the way in which the Bill has been drafted.

There is no reason why, even at this late stage, we should not introduce some flexibility. It is impossible to do that in a thorough and sophisticated way, because none of us has enough information to allow us to draft amendments to change the Bill and be confident that we shall achieve a satisfactory result. However, amendment No. 3 would at least write in the minimum amount of flexibility.

The £50 million was trumpeted as a great victory for the Secretary of State. If the Government were serious about helping ratepayers, we could adjust the factor and ensure that all the £50 million was used. That is all that we are arguing for in the amendments.

I understand why the 2·5 factor has been suggested, but, depending on the revaluation in some areas, that could be extravagantly expensive. However, we are entitled to have answers and it seems that we are not to be given the figures.

Mr. McQuarrie: It is nonsensical.

Mr. Millan: It is never nonsensical to ask for information. Amendments Nos. 3 and 4 are sensible, but I prefer the drafting of No. 3. I hope that the Minister will either accept one of them or give us the necessary assurances. If he does not, I hope that Conservative Members will support us in the Division. Otherwise, there will be a breach of faith over the original announcement, because it is clear that the £50 million will not be reached. In view of all the trouble and argument about revaluation in recent months it would be intolerable if concessions were apparently made and then not used to the full.

Mr. Bill Walker: The right hon. Member for Glasgow, Govan (Mr. Millan) clearly showed that if one attempts to provide rough justice by using just one figure, there are bound to be areas of injustice.

I believe that I am the first hon. Member to declare a personal interest in the Bill. The cash increase for my domestic dwelling in Blairgowrie is a horrendous 64 per cent., so I shall benefit from the Government's proposals and I welcome that benefit. When I made my plea for action by the Government I proposed that no one should have to pay more than 50 per cent. above the previous year's cash value, and I made that special plea largely for the commercial ratepayers of Angus. With a multiplier of 3, the increase in cash value will be about 52 per cent. for those people, so the Government have come very close to meeting my request in that context and I am grateful for that.

In making that request, I added the qualification that this should apply until those people's appeals had been heard and had been successful, because on the figures given to me by the Government, I judged that many of the shopkeepers and others substantially affected by the revaluation would succeed in their appeals. I based that judgment not just on the previous rateable values but on the rents actually paid by those shopkeepers who paid rent for premises on main streets in Angus. As valuation is supposed to be based on the rent that could be obtained, it seemed clear from those figures that many of the appeals would succeed.

Amendment No. 2 is about as wise and sensible as the nonsensical comments and figures bandied about by alliance Members before the Government's proposals were made, When asked by members of the Press Gallery how much money I believed would be required, I suggested that it would be between £90 million and £120 million if my survey in Angus was representative of the whole of Scotland. I could not say whether it was representative because I could not carry out a survey of the whole of Scotland. In my view, amendment No. 2 is the usual exercise in kite-flying designed to obtain publicity rather than to solve difficult and complex problems.

Ratepayers in Scotland are facing savage increases. We may differ politically about the reasons for those increases, but we must agree that the increases are so savage that they cannot be allowed to remain. The Government have accepted that and have moved very quickly, but I shall be interested to hear their response to amendment No. 3, which seems to provide the kind of flexibility that could not be achieved within the time scale in which the

Government brought their proposals forward. I make no criticism of the remarkable speed with which the Government acted—indeed, I am eternally grateful for it because the situation in Angus was even more appalling than that in Perth and Kinross.

7.45 pm

I appreciate the reasoning behind amendment No. 4 and I do not argue with it because I believe that it is probably right in principle, but the wording is not all that it should be and I believe that amendment No. 3 achieves the same objectives. I hope that my hon. Friend the Under-Secretary of State will tell us why the Government cannot accept the flexibility proposed in amendment No. 3. Ratepayers in my area would certainly like to believe that the speech made by my right hon. Friend the Secretary of State in Perth means that ratepayers will receive the full value of the £50 million. I am not especially concerned about how that result is achieved but if that sum is available we need to assure ratepayers in Scotland that it will be used in full to mitigate the difficult circumstances in which they find themselves. I believe that many of my constituents will succeed in their appeals against the increases. If that is the case and they do not require the assistance generously proposed by the Government, I shall be delighted.

Mr. Foulkes: I do not know whether the hon. Member for Tayside, North (Mr. Walker) was present earlier in the debate to hear his hon. Friend the Member for Banff and Buchan (Mr. McQuarrie) laying into the hon. Member for Gordon (Mr. Bruce) with vilification and personal abuse. We in the new, emerging Labour party do not intend to become involved in such dogfights between the old Whig and Tory parties. We intend to concentrate on the merits of the argument and to put a few questions to the Minister.

No explanation has been given publicly or to the House as to how the factor of 3 was arrived at. According to *The Scotsman*, the Under-Secretary of State for Scotland said:

"when the scheme was drawn up a decision had been made on the level of revaluation increase that would create an unacceptable burden"

and:

"We decided that level was three times the existing rateable values".

On what basis was that decided? Why should there be such integer worship in this age of computers? If a factor of, say, 2·9 were more appropriate, the calculation could be made just as easily. The Minister has a duty to explain why he decided on a multiplier of 3. *[Interruption.]* I see that the other half of the alliance has arrived, in the shape of the hon. Member for Ross, Cromarty and Skye (Mr. Kennedy)—better late than never, I suppose.

The Prime Minister has promised at least £50 million. What will happen if COSLA is right and only £30 million is spent under the Bill? Will the remainder go back to the Treasury? Will it go into other areas of over-expenditure such as the bottomless pit of fortress Falklands? We need to know. That is why, among many other reasons, I support amendment No. 3 proposed by my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar), because it provides the flexibility needed to make adjustments in the light of experience when we see the proposals in operation.

The Minister said that the purpose of the exercise was to assist hard-pressed ratepayers, not to undo the changes that had taken place as a result of revaluation. That makes sense. Presumably the purpose of revaluation was to move the burden from certain ratepayers in the commercial sector to others. If so, who in the commercial sector is gaining? The Under-Secretary referred to a hotel in Dumfries and Galloway. Apart from that one example, who are the gainers?

It has been said that a 14 per cent. additional burden is falling on the commercial sector as a whole and that the vast majority of people in that sector are suffering. On the other hand, when we discuss reducing the figure—for example, under the Liberal amendment to 2·5, the Minister says that over half the domestic ratepayers would get relief if there were a 2·5 multiplier. Does that not show that the revaluation has resulted in over half of domestic ratepayers having an increase of more than 2·5 times?

Mr. Ancram: That is what "average" means.

Mr. Foulkes: Of course, but why 2·5? I would not have expected that to be the average. A retired school teacher, now masquerading as an Under-Secretary, may correct me, but may we be told why, at 2·5, half should be above and half below?

Why are there so many regional variations? There seems to be a total difference between Strathclyde on the one hand and, say, Tayside, Lothian and Grampian on the other. There seems to have been no co-ordination or collaboration between the assessors. Nor can I understand how the assessors made their comparisons. I understood that the exercise was supposed to be based on rentals that might be achieved for the premises. One gathers, however, that a whole range of matters come into the calculation, including — dare I mention it? — private houses in Ayr such as the one in which I live, the posh type of house that the Minister described earlier. But there are no houses such as that being rented in the area with which we are concerned. In other words, I do not understand how the bases of comparison were worked out.

It has been said that, because revaluation has taken place north, rather than south, of the border, shops which are branches of United Kingdom multiples can obsorb the increases much better than Scottish-based firms, so that the former can rejoice in the fact that in most of their shops south of the border they do not have the same burden. That is not the case for the Co-ops in Scotland or for all other Scottish-based companies.

I hope that the Minister will take the Labour amendment seriously. Power would remain in the hands of the Minister and at the end of the day, in the light of experience, the Secretary of State would be free to decide what, if any, action to take. If, as COSLA has predicted, £20 million will not be taken up, the amendment will be necessary, and the hon. Member for Eastwood (Mr. Stewart), if no one else, should support it.

Mr. Ancram: We have had another interesting debate on this important topic. The remarks of the hon. Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes) underlined some of the confusions that have arisen in the public mind as a result of the revaluation. Indeed, they underlined also the reason why we are keen to look again at the system of financing local government so as to find a better way of doing that. We are delighted to note that at least he among Opposition Members is with us on that, and we look forward to hearing further from the occupants of the Opposition Front Bench about their views on the subject.

[Mr. Ancram]

There has been some misunderstanding over this issue recently as was clear from the Second Reading debate on Monday. The scheme arose initially from an appreciation by the Government — and by the hon. Member for Glasgow, Garscadden (Mr. Dewar), as he made clear at Scottish Question Time recently — that ratepayers had been hard hit by revaluation.

I do not want to rub it in, but the hon. Member for Garscadden has in the past welcomed revaluation. He appreciates, however, that a number of ratepayers have been severely affected at the margins of revaluation. He offered the Government co-operation in introducing a mechanism to help the hardest hit. If he did not use those exact words, he used words to that effect. The scheme sets out to do that. It aims—this is what the Bill puts into practice—to remove the worst cases due to the sudden revaluation changes that have occurred.

The threshold multiplier of 3, which the Government have selected, is not designed—and it would have been wrong had it been designed—to nullify or neutralise the effects of revaluation. It is designed to deal with the harsh and difficult cases on the margins but not, as it were, to re-write the revaluation. Indeed, we should not do that, because if we were merely to re-write it in favour of those who were losers as a result of revaluation, without doing anything for the gainers, we should create a very strange and distorted pattern indeed. We all accept that there are good reasons for changes in valuations, and if those reasons do not apply in the cases of any valuations, the assessors must defend those valuations in the court.

Thus, we looked at the range between 2·33, which is the average revaluation multiplier for all property in Scotland—that is the level in general or average terms, so that if one is below that level one gains from revaluation and if one is above it, one loses—and ranges beyond that, through 3 to 4, as suggested by the Federation of Small Businesses and the Self-Employed, and at some of the other ranges of revaluation affecting properties in Scotland.

The difference between 2·33 and the 3 times multiplier leaves a range which allows revaluation still to be effective in the terms that it is supposed to be effective, yet at the same time allows us to protect the hardest hit. Above a multiplier of 3—given that there are variations; the right hon. Member for Glasgow, Govan (Mr. Millan) was right to point to regional variations — the results of the revaluation in terms of the rate effect would have been unacceptable.

For that reason, we chose a multiplier of 3, and on to that we have built a scheme which is simple and straightforward and, most important, which enables people to understand whether they do or do not qualify. We hope that, as a result, we are meeting the target that we sought to cover in the first place.

Mr. Dewar: I wish to be clear about the implications of the Minister's remarks. Is he saying that the Government are satisfied that in working the scheme based on a uniform multiplier of 3, they have done enough? Should the scheme cost only £25 million, leaving the other £25 million unallocated, would the Government then not want to use that other £25 million? In other words, is not the impression that £50 million was being found to help Scottish ratepayers a mistaken impression? Are the Government saying that the scheme is complete and that, no matter how big the shortfall, they will not make it up?

Mr. Ancram: I shall be dealing with that. If we reduced the multiplier trigger in the scheme down towards the average multiplier, we should in effect be removing the effects of revaluation. If the hon. Gentleman believes that revaluations should take place—he pressed us to carry out this revaluation—he will accept that we must set a trigger point which will leave an effective revaluation while at the same time protecting the hardest hit. The scheme is demand led. Once the eligible category has been defined, the amount that the scheme will cost will depend upon how many people fit into that category. There will not be an allocation of fixed money.

8 pm

On a decision to focus on a level of valuation above which rebate is to be given reflects the judgment that approximately three times this year's revaluation is about the right level at which to intervene and reduce the effects of revaluation. The amount of money that it will cost has been the subject of a number of conjectures, both high and low, during the last two months. As I said during the Second Reading debate on Monday, I do not believe that we shall know the total amount of money that will be expended on the scheme until the last eligible ratepayer has been paid.

Mr. Millan: Will the Under-Secretary of State give way?

Mr. Ancram: I shall give way to the right hon. Gentleman in a minute.

At that time we shall know precisely what the outturn figure is. As the analyses of the revaluation take place those figures will become more accurate, but I do not believe that we shall know the exact figures until the last ratepayer has been paid.

Mr. Millan: I do not suppose that we shall know the exact figure down to the nearest pound, but we know that it will not be £50 million. It will be nearer £30 million, and perhaps even less than that.

Mr. Ancram: The right hon. Gentleman presided over the last revaluation and we saw its effect upon commercial ratepayers. At that stage the right hon. Gentleman never suggested that any scheme of relief should be provided. He is now complaining about what, on any view, is a very generous scheme in terms of both money and eligibility. The people of Scotland have looked carefully at the Government's proposals. They accept that both the financial commitment and the scheme underline the concern felt by the Government for those who have been hardest hit by revaluation.

Mr. Millan: The Under-Secretary of State is surely not disputing the COSLA figures, which amount to less than £30 million. We know that there will be a shortfall of £20 million.

Mr. Ancram: As I said on Monday, my understanding is that those figures are not yet complete. We cannot begin to give figures until we know which ratepayers are eligible under the scheme.

Mr. Gordon Brown (Dunfermline, East): Can the Under-Secretary of State explain why he chose the figure of 3 instead of 2·9 or 2·8? Can he also explain why the

figure of £50 million was announced? Were the Scottish Office figures based only upon a random look at the Strathclyde valuation roll? Was there no consideration of the situation facing Fife, Central, Lothian, the Highlands, the Grampians and the Borders?

Mr. Ancram: The hon. Gentleman has not attended the greater part of our debate today. His question has already been answered. I have already made it clear that, if one reduces too far towards the average multiplier, one effectively writes off revaluation. An element of judgment is involved. The difference is between an average multiplier of 2·3 and a multiplier of 3. Within that area we believe that revaluation will have its full effect. The increase that will be paid by those who are above the multiplying factor of 3 will be rebated to them under the scheme. The people of Scotland appreciate, by and large, that it is those who are over the multiplier of 3 who are the hardest hit. Multipliers of 4, 5 and even 6 have been given to me. Those people are very hard hit and they appreciate what the Government are doing for them. The Opposition are doing themselves no good by cavilling over figures when we are talking about sums of money which are so much bigger than anything that they suggested when they said that there ought to be a scheme of this kind.

Mr. Maxton: Will the Under-Secretary of State give way?

Mr. Ancram: No, I have already given way to many hon. Members during both this debate and the last debate.

The Government's proposals are reasonable and simple. That is important if the scheme is to operate effectively and quickly. The amendments would take rebates beyond the level that we think is reasonable and would complicate the operation of the scheme. The amendment moved by the hon. Member for Garscadden would create vast areas of uncertainty. One of the benefits of the Bill is that those who are eligible will know that they are eligible. That eligibility will continue. According to the amendment moved by the hon. Member for Garscadden, the multiplier could, on occasion, be increased as well as reduced from year to year. Those who are eligible would not know whether they would continue to be eligible under any future scheme. That is not the right way to proceed.

Mr. Dewar: The Minister has said something which I believe is quite important. Is he saying that, as it is drawn, the scheme can be continued if he exercises his discretion next October and that it would have to be continued in the same way and at exactly the same level?

Mr. Ancram: It would not necessarily be continued in the same way, because the manner of the scheme is contained within the order. Those who are eligible are defined in the Bill in terms of both their category and of the multiplier that is required to trigger their eligibility. The simplicity of the Bill, which is important to its implementation, is helped by dealing with it in this way. Therefore, I ask the Committee to reject the amendments and to support the Government.

Mr. Craigen: Having heard what the Under-Secretary of State has had to say, I am now more than ever convinced of the virtue of amendment No. 3. Irrespective of whether it is the Liberal party's 2·5, or the Scottish National party's £50 million, or our amendment No. 3, which proposes a variable but with a full take-up of the £50 million, we want the package that was announced in Perth to be spent for the benefit of Scottish ratepayers. It is clear that the revaluation relief package that was announced was both a platform confidence trick by the Secretary of State for Scotland and an exercise in back-stage bungling. The more time that has elapsed the more evident it has become that the Scottish Office computer is not working. As my right hon. Friend the Member for Glasgow, Govan (Mr. Millan) pointed out, all the rating authority computers are busily churning out the kind of information that was quoted earlier by my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar).

I hope that the hon. Member for Gordon (Mr. Bruce) will withdraw his amendment. It was not scientificallycalculated. He admitted as much earlier. I do not blame him for that. The Government are even more guilty. They have been unable to provide precise figures. I hope that the right hon. Member for Western Isles (Mr. Stewart) will also withdraw his amendment, because we are at one with him. We want the £50 million to be spent in Scotland. Amendment No. 3 provides the mechanism which would make it possible to achieve the lower factor.

Several hon. Members have asked the Under-Secretary of State how the magic figure of 3 emerged. I know that the hon. Member for Stirling (Mr. Forsyth) thinks in threes. Several hon. Members served on a Standing Committee in which he always spoke of three, or 30 or 300. I wonder, therefore, whether the Stirling factor had something to do with this. When the Secretary of State made his statement to the House on 14 May I asked him how many people would come within the 2·7 and the 3 factor on the domestic side and the 2·2 and the 3 factor on the commercial side. He did not tell. It is now quite obvious that he did not know. Furthermore, he could not even give the number of people on the commercial and domestic side who would benefit from the factor of 3.

On 16 May I wrote to the Secretary of State about the Government's revaluation relief scheme. I was trying to be as practical and constructive as possible, and I wrote:

"If, by the end of June, the take-up by domestic and commercial ratepayers is nowhere near the £50 million allocated, will you consider reducing the threshold from three times the rateable value to 2·7 times in respect of domestic ratepayers and 2·2 times in respect of the commercial sector? As I understand your aim, it is to neutralise the effect of the 1985 revaluation increases and you did indicate that 2·7 and 2·2 respectively represented neutral average increases arising from the revaluation."

On 23 May, the Minister replied, and in his long letter, which did not tell me much, he said:

"we now think there might be up to a quarter of a million properties which could stand to benefit, including both domestic and non-domestic."

When the Secretary of State for Scotland announced this scheme in all the paraphernalia after the Perth conference on 14 May, we were led to believe that about 300,000 would benefit from the scheme: 250,000 domestic ratepayers and 50,000 businesses. But the more time goes by, the more the beneficiaries seem to disappear. The Minister still cannot tell us how many beneficiaries there are under the scheme. Indeed, it is quite evident that when the statement was broadcast at Perth, the Secretary of State just did not know. It was all political camouflage.

The delegates at Perth had to be told something. The Secretary of State had to assure them that the Scottish Tory Members at Westminster were not an extinct breed. Consequently, he came up with the £50 million figure. To

[Mr. Craigen]

compound everything, the Chancellor of the Exchequer was then telling the Scottish press that the Secretary of State would not get his £50 million next year. *[Interruption.]* As has been pointed out, we shall not even get the money this year. Indeed, the figures from the local authorities and the business sector show that the figure is more likely to be about £30 million.

The Government have put a lot of effort into their revaluation rebate scheme, but it must be seen against the background of Monday's social security review. The same Government who have kidded all their Back Benchers about there being a reform of the rating process propose to get 750,000 Scots on housing benefit to pay rates. The Government say that in order to ensure that those people know what rating is all about, they will have to pay at least 20 per cent. of their rates. On the one hand the Treasury says that it will give £50 million this year to help over the revaluation, but on the other hand the DHSS says that it will begin to bring 750,000 people into the rating network. In the euphemistic terms of the Civil Service, I believe that that is called departmental log-rolling. I refer to the idea that if one Department gives, another has to take away. At the end of the day there are sufferers from all those administrative changes.

I hope that the hon. Member for Gordon and the right hon. Member for Western Isles will ultimately agree to support amendment No. 3. More importantly, I hope that all those Tory Back Benchers who make speeches to ratepayers want to see that £50 million spent, and will be in the Lobby with us. I hope that they will not sit on the fence and abstain, but will support amendment No. 3.

8.15 pm

Mr. Bruce: Having been at the receiving end of an unprovoked and unexpected attack from my neighbour, the hon. Member for Banff and Buchan (Mr. McQuarrie), I was interested to note that the Minister did not say why 2·5 was unacceptable, or what it would cost. Presumably, he was unable to do so. I accept that it would bring many more people into benefit, which was the point of lowering the threshold. Indeed, that was the point of the amendment. If the Minister was anxious to suggest that the figure is unacceptable, I should have thought that he would have some arguments to support him. However, he was unable to produce them. He could not say whether the £50 million would be underspent and if so, by how much, and by how much my proposal would put the figure over £50 million.

The hon. Member for Banff and Buchan seems to think that the Government's proposals will be greeted with rapture by ratepayers. If he goes to areas in my constituency, including parts that he used to represent, he will find the reception less than enthusiastic. If Banff and Buchan is compared with Gordon, hon. Members may understand why the hon. Gentleman can afford to be slightly more complacent. The average increase in domestic valuations in Banff and Buchan is 260 per cent. compared with 280 per cent. in Gordon and 290 per cent. in the city of Aberdeen. In cash terms, the average increase in the domestic rate element for Banff and Buchan is 6·7 per cent., but in Gordon it is 15 per cent. and in Aberdeen 14·1 per cent. When the commercial factor is considered, the figures are even more interesting. The increase is 230 per cent. in Banff and Buchan, 260 per cent. in Gordon and 280 per cent. in Aberdeen. In cash terms, that is 9·1 per cent. in Banff and Buchan, 27·5 per cent. in Gordon and 27·1 per cent. in Aberdeen. I am sure that the hon. Gentleman must recognise that people facing such rate increases are looking for much more relief than the Government are offering.

It is a cause for concern that the Government have now implied that if the Bill is enacted unamended there will be no opportunity to adjust, in the way that the hon. Member for Banff and Buchan implied would be acceptable, if the full allocation is not taken up. Clearly, the best way of allocating any extra cash is to lower the threshold to ensure that more people benefit. But that possibility will not be open to the Government if they do not accept any of the amendments.

In the interest of ensuring that we unite behind one amendment that gives the flexibility that the Bill needs, and that the Government will need, I am willing to withdraw my amendment and to urge my colleagues to vote for amendment No. 3. However, if the Government resist it, they will find that the outrage of this year will be as nothing compared with next year, because the people will realise that they have been conned and bought off for a year. Those Conservative Members who have said that they are keen to ensure that there is a full take-up should vote with us and demonstrate that they are not prepared just to use weasel words for the benefit of their constituents but are also prepared to stand up and fight. Accordingly, I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Amendment proposed: No. 3 in page 1, line 13, after 'value', insert

'or such other figure as shall be set by statutory instrument which shall not have effect until approved by resolution of the Commons House of Parliament'.—*[Mr. Dewar.]*

Question put, That the amendment be made:—

The Committee divided: Ayes 108, Noes 181.

Question accordingly negatived.

8.30 pm

Mr. Paddy Ashdown (Yeovil): On a point of order, Mr. Walker. I apologise for interrupting the flow of this important debate, but I have a matter that needs to be drawn to the attention of the House and which touches on the safety of those who work in the House and of those who visit us. The facts are as follows. Midway through yesterday afternoon, the secretary of a colleague of mine was taken seriously ill in Norman Shaw South and immediately moved to Westminster hospital where she was put into the intensive care unit. I understand that word filtered back that part of the reason for her condition was, to use the word received, the "poisoning" of the water supply system at Norman Shaw South. Early this morning, before staff had arrived, an announcement was made on the public Tannoy system in Norman Shaw South saying that the water supply should not be used for drinking, but no further steps were taken and none of the staff who arrived later than 9 o'clock was so informed, although in due course notices were put on the taps.

About midday, my secretary, who was involved in the incident yesterday, informed me that there was considerable concern among hon. Members' secretaries in Norman Shaw South; they were unclear about what had happened and of the danger in which they stood. I asked the Serjeant at Arms to provide information as to what had happened and to assure me that appropiate steps had been taken to ensure that our staff were being adequately informed so that they could protect their health.

I was informed that investigations into the water supply were going on, but that they would not achieve any results

[Mr. Paddy Ashdown]

until later. Meanwhile, I received assurances that staff would be informed. The Chief Whip of my party, my hon. Friend the Member for Berwick-upon-Tweed (Mr. Beith), received similar assurances that it was not known what had gone wrong with the water supply but that investigations were underway.

It has now come to my notice that the press has been told that what happened was that at 11.30 yesterday morning, some 22 gallons of anti-corrosion liquid intended for the central heating system in Norman Shaw South, were poured into the water supply system by accident, and that that liquid contained certain unpleasant chemicals. I am also told that the press was informed, although hon. Members—in particular my hon. Friend for Berwick-upon-Tweed and I—were not, that these facts were known at 8.50 last night. The facts will be published tomorrow morning.

It is important that we should know why this has happened, why such hopelessly inadequate steps were taken to inform our staff this morning, why the situation was not explained to us, and why were we not told the facts. Further than that, why were we positively misled? Some of our staff and some who visit the House may have been endangered by the appalling accident that occurred yesterday, but some of them may also have been endangered by the fact that such inadequate steps have been taken. I have no doubt that if the facts that I now have are true and if we were formal employers, we would be liable to action under the Health and Safety at Work Etc. Act.

We must now have a clear statement on the current position and clear instructions that will provide for the safety of our staff and others who visit the House. We need assurances that there will be a full investigation of the matter. I hope that you, Mr. Walker, agree that it will be appropriate for the responsible Minister to come to the House to give some assurances.

The Chairman of Ways and Means (Mr. Harold Walker): There is one difficulty—we are in Committee at the moment and, strictly speaking, we should not be discussing such a matter. However, in view of the seriousness of what the hon. Gentleman has told the Committee, I felt that it was proper to allow the hon. Gentleman to go on. I see that the Leader of the House is present and wishes to speak.

The Lord Privy Seal and Leader of the House of Commons (Mr. John Biffen): I should like to respond to the points that have been raised, which I realise have caused great anxiety. I am sure that hon. Members in all parties will be anxious for Mrs. Jacqueline Winter, hope that she will make a speedy recovery, and feel concern about the incident. The hon. Member for Yeovil (Mr. Ashdown) has made a number of accusations and raised a number of points that are clearly of substance. I shall arrange for a statement to be made at the earliest possible moment.

The Chairman: I think that it will be sensible for us to leave the matter at that now and return to the debate.

Clause 1 ordered to stand part of the Bill.

Clause 2

FINANCE

Question proposed, That the clause stand part of the Bill.

Mr. Craigen: I should like the Minister to tell us something about the working of the clause. It relates to the reimbursement to rating authorities of the payments that they make under the scheme. We tabled an amendment about administrative costs, but it has not been selected. However, perhaps the Minister will reply to some of the points that I and other hon. Members made on Second Reading, but to which he did not have the time or opportunity to reply in detail.

For example, I note that the Secretary of State will be determining the conditions as to records, certificates, audits and other things over which the payments will be made. Will the audit be at the end of the financial year? Will local authorities be involved in outlays earlier in the current financial year, for which they will not be reimbursed until the end of the financial year?

On Second Reading, we raised a number of points about interest charges to local authorities. Clearly, although the Government are proposing to reimburse local authorities for the payments that they make under the scheme, the payments themselves may involve local authorities in extra costs. I think that the Secretary of State referred to the payments not involving local authorities in any breach of guidelines. However, in his winding-up speech on Second Reading, the Minister did not answer my question as to whether the costs that rating authorities would incur in administering this scheme would bring them into difficulty in complying with the Government's guidelines over rate support grant and expenditure.

Will the Minister take the opportunity today to answer a point that has been left in the air? Nobody knows precisely what the position will be. Therefore, I should be grateful if the Minister will dispel some of the lingering doubts and anxieties.

Mr. Ancram: I am always keen to dispel the doubts, lingering or otherwise, of the hon. Member for Glasgow, Maryhill (Mr. Craigen). The hon. Gentleman will find that on Monday I answered one of his specific questions about the difficulties that might be faced by local authorities which might have to wait for reimbursement. I said that we would consider whether there was some way in which we might help them by making advance reimbursement before final certification was completed.

In regard to administrative costs, I listened carefully on Monday to my hon. Friend the Member for Stirling (Mr. Forsyth) and to other hon. Members. Having given the matter consideration, my right hon. Friend proposes, in exercising powers already available to him, to disregard for guideline purposes certain local authority expenditure on the administration of the rebate scheme in 1985-86. My Department will be discussing with the Convention of Scottish Local Authorities the exact terms of the disregard.

The hon. Member for Maryhill was rightly concerned that in some circumstances authorities might find themselves penalised for the cost of the administration of the scheme. I hope that I have clarified that point to the satisfaction of the hon. Gentleman. In view of what my hon. Friend the Member for Stirling said on Monday, I hope that he will feel that we have responded to the valid points that were made.

Mr. Craigen: I am grateful to the Minister for reassuring me about the disregard in respect of payments incurred. This is not really the time to raise the matter, but I still think the Government are being unfair in burdening rating authorities with the cost of administering the scheme. Although the Bill refers to £1 million, that is only an estimate. In view of the earlier discussion about the take-up of £20 million, I wonder whether the calculation will be a little more realistic.

Mr. Ancram: If the hon. Member is right in his first estimate, compared to the estimate that we made, he will find that the cost of administration will go down commensurately.

Mr. Craigen: I wonder. I was about to say to the Minister that in view of the fact that there will be reclaims of rebates already made, where a person has succeeded in his valuation appeal it seems that the rating authority will be involved in a second set of expenditure. The Government have rightly left it to the rating authorities to identify those ratepayers who will be eligible under the scheme. As rating authorities are being given this direct responsibility, it would make more sense for the Government to acknowledge that they should have direct responsibility for the administration of the scheme.

Question put and agreed to.

Clause 2 ordered to stand part of the Bill.

Clause 3

CITATION, COMMENCEMENT AND EXTENT

Mr. Dewar: I beg to move amendment No. 7, in page 2, line 38, leave out 'which'.

The Chairman: With this amendment it will be convenient to discuss amendment No. 9, in page 2, line 39, leave out from '1985' to the end of line 40.

Mr. Dewar: We are now galloping towards the close. There has been a slightly ungracious welcome for the amount of co-operation that we have given to the Bill. We are allowing it through in a remarkably expeditious fashion. As an instance of that, in the normal Committee stage I could have been happily entertained for many hours discussing the amendments now under consideration. I say that unashamedly. I shall now dispose of them in about 90 seconds, to my considerable regret. It is an exercise in self-discipline that surprises me.

This matter arose on Second Reading. The Committee will remember that clause 3 says:

"This Act . . . shall come into force on the expiry of 2 months beginning with the day on which it is passed."

I want an assurance about whether that means that the Bill does not come into force until two months after it has completed its passage through the House of Lords. While I accept that their Lordships will not delay the Bill, that means that the two months will start in some weeks' time.

8.45 pm

The order is an essential part of the apparatus without which we cannot have positive action to disburse money. If it cannot be laid until the Act is in force, I suspect that, because of the parliamentary timetable, we could not have it until the autumn. That will delay the whole business of calculation and disbursement so far into the financial year as to raise substantial difficulties for local authorities and for the Scottish Office.

Can we have an assurance from the Minister that if he insists on keeping the time lag of two months in the Bill it will be possible to lay and debate the statutory instrument within that two-month period without having to wait until the Bill comes into force? If the answer is yes, it will remove my fear to some extent.

The Minister might take a minute to explain the matter. I am not sure why we need the provision that the Bill shall not come into force until two months after it completes its passage through Parliament. There does not seem to be any rationale in that. Obviously there must be, and perhaps the Minister will explain it.

The real problem is that it seems illogical if the statutory instrument depends upon the Bill. If the Bill does not come into force for two months, can we start the statutory instrument on its way before the expiry of that two months? If we cannot, there will be considerable problems. I am sure the Minister has followed the point and I shall be grateful for his answer.

Mr. Ancram: As I said in reply to the Second Reading debate, the Bill is in accordance with normal practice in coming into force after two months. Much requires to be done before effect can be given to the Bill. We have to give local authorities and ratepayers a period of two months to make the necessary arrangements. The order setting out the details of the scheme must be brought before the House after the Bill has been enacted. To answer the point the hon. Member was making, this can be done after Royal Assent has been given to the Bill and does not have to wait until the Bill comes into operation in two months' time.

We are working towards a period of two months during which certain administrative arrangements will have to be made. The order will have to be laid and approved by both Houses of Parliament. Thereafter, at the end of two months the scheme will be capable of being operated. We wish to see the scheme in operation if possible before we get to the stage when rate bills have to be paid in September. The timetable in the Bill will allow that to happen.

If the amendments were to be accepted they would not in practice make any difference to the timetable because the work will have to be done in any event. The timetable does not delay the operation of the Bill in the sense of making sure that it achieves what it set out to achieve within the time scale that both the hon. Gentleman and I want. On that basis, I hope the hon. Gentleman will be prepared to withdraw the amendment.

Mr. Dewar: I will be prepared to withdraw the amendment on that assurance. Like the Minister, I am anxious to see the machinery in operation as quickly as possible. Many people will already be paying their rates on the 10-month instalment basis. The first instalment will have been paid in May so adjustments will have to be made, presumably in the subsequent instalments towards the end of the financial year. A new book will be issued showing a lower rate of contribution for those who are getting something out of the rebate scheme.

If the Minister is satisfied that he does not need to delay the statutory instrument and that the period of two months is really of no importance, I am prepared to take that assurance. Therefore, I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 3 ordered to stand part of the Bill.

New Clause 2

LIMITATION OF RELIEF

'The total rebate payable will be restricted to a maximum of 10 premises and a total maximum of £50,000 for any one corporate body.'—*[Mr. Bruce.]*

Brought up, and read the First time.

Mr. Bruce: I beg to move, That the clause be read a Second time.

The new clause is an attempt to provide a further targeting element in the Bill. I was taken aback by a phone call two or three weeks ago from a shopkeeper who thinks that the Bill does not prevent large companies with chain stores from receiving substantial benefit. I believe that the measure should concentrate on small businesses and small shop units. I do not want to repeat my argument about the threshold being too low, but the Bill should not enable large amounts to be refunded to relatively large companies.

It is difficult to be specific, but some companies have many branches consisting of small shops such as newsagents and supermarkets which might be able to claim rebate on each of their premises. That could mean that tens of thousands of pounds could go to one enterprise. That would be regrettable if the money was then not available to assist small businesses with only one or two outlets. The measure is designed to try to save businesses which might cease to trade as a direct result of rate increases.

The shopkeeper told me that she operated two shops —one in Aberdeen and the other in York. The shop in York, which is six times larger than the shop in Aberdeen, pays rates of £850 and the much smaller Aberdeen shop, under the new revaluation, will pay rates totalling £1,400. The Bill will give that shopkeeper rate relief, but she will still have to pay substantially more for her shop in Aberdeen than for her larger shop in York.

I appreciate that the Bill is confined to Scotland and that therefore the comparison is not valid, but the point will not be lost on the Minister. Many of the larger groups which trade throughout the United Kingdom might be able to claim substantial rebates.

As the hon. and learned Member for Perth and Kinross (Mr. Fairbairn) said, a major store moving into a town centre is an asset and we must consider that. However, that is a wider problem and might be resolved by the abolition of the rating system. Businesses should not have to pay more rates in Scotland than they pay in England and Wales. That possibility is causing concern and might affect future investment and development in Scotland.

The new clause ensures that no chain store operator receives a substantial rebate. The money saved could be redirected to ensure that the benefit goes to those who need it most. If nothing else, it could be used by the Government to assist small businesses in other ways by reducing the costs of their overheads.

Most hon. Members will have received representations from the National Federation of Small Businesses and Self-Employed which is looking for a £10,000 limit. That is probably too narrow a boundary. It restricts assistance to a maximum of 10 premises and a maximum figure of £50,000. That would ensure that all medium-sized businesses would receive full benefit but that the large businesses which are best able to carry the burden would be restricted to a £50,000 rebate. The Minister says that he does not want to neutralise the effect of revaluation, but that is a different argument.

Mr. McQuarrie: I oppose the new clause because the hon. Member for Gordon (Mr. Bruce) is wrong again. He spoke about chains, but he has forgotten that the chains operate individual shops in different towns. An example is C and J Clark, the retail shoe operator, which has over 100 retail shoe outlets throughout Scotland in the names of Peter Lord, Ravel and K shoes. They are individual businesses employing managers and staff. If they cannot enjoy the benefits that can arise from revaluation they will be penalised. The firm estimates that the increased rate burden for all its Scottish shops will amount to an additional £300,000 this year. It estimates that £75,000 will be returned as a result of my right hon. Friend's scheme announced on 14 May. Without that the firm will have to pay an additional rate poundage throughout Scotland of £225,000 this year. That would be unfair because we are talking about small businesses.

I totally support small businesses. There are two such shoe shops in Aberdeen and three in my consituency and I am sure that there are more in the hon. Gentleman's constituency. If they are forced out of business it will be because they have not enjoyed the advantages of the Government's scheme. I urge hon. Members to reject the new clause. We are talking about small businesses in 100 places in Scotland.

Mr. Foulkes: I shall be brief because for once I agree with the hon. Member for Banff and Buchan (Mr. McQuarrie). I doubt whether the hon. Member for Gordon (Mr. Bruce) has thought about co-operative societies. I am sure that if the hon. Member for Roxburgh and Berwickshire (Mr. Kirkwood) were here he would not support his hon. Friend because he is a good and active co-operative supporter, and always has been. The new clause could be devastating for some co-operative societies. It is certainly not welcomed by the co-operative movement. The hon. Gentleman should withdraw the motion.

Mr. Dewar: I shall be brief because I recognise that other issues are battering at the door. I have sympathy with the motives behind the new clause. We want help to go to the right people in the right degree, but the hon. Gentleman's case in based upon a fallacy. The hon. Member for Gordon (Mr. Bruce) argued that, if money were saved, it could be given to others.

The Minister has made it painfully clear that that is not an option open to us and that there will be a substantial underspend, and I think that we can now be confident on the scheme.

Considering the real situation in Scotland and some of the figures with which the Retail Consortium has been supplying us, the case is perhaps not as clear-cut as the hon. Member for Gordon may have thought when tabling the amendment. I could think of a large number of complications about firms which have premises in different regions and different districts and the problems that would arise therefrom.

Therefore, although I have sympathy with this, my advice to my hon. Friends is not to support the amendment.

9 pm

Mr. Ancram: The hon. Member for Glasgow, Garscadden (Mr. Dewar) has made one of the basic points

which I intended to make about the amendment—that it would clearly severely complicate the Bill as well as be unfair. In particular, where there are, for instance, different stores belonging to the same company or chain but within different valuation areas, it would create difficulties to ascertain where they were and what their relationship was. I am sure that the hon. Member for Gordon would not wish unnecessarily to complicate the scheme.

The spirit of the amendment has been met, in that we have already announced that we are putting a £10,000 limit on the amount of rebate that can be obtained by any one rateable subject. I believe that that is a necessary safeguard. It was in response to a number of representations that one would find certain subjects qualifying for a lot more than that. We believed that it was necessary to put a safeguard on this. That will be included in the order. On that basis, I hope that the hon. Gentleman will withdraw the amendment.

Mr. Bruce: I have listened with interest to the points made. The hon. Member for Banff and Buchan (Mr. McQuarrie) highlighted my concern—that, given our present lack of information, some chain store operators could still take up a substantial amount of the money available. If that were the case and there were an overspend, I think that most hon. Members would appreciate the need to provide some limit.

As to the co-operatives, I accept the point made by the hon. Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes), although I could also argue that many of the co-operatives are organised in groups which would probably leave them outside the limit.

Allowing for that point and reaffirming my concern that £10,000 per premises could add up to a substantial amount for any one company, but because there is a desire to terminate the Committee and because the point has been made and registered, I can only hope that I am not proved wrong and that there are no circumstances in which it will be found that a substantial amount of money has been taken up by rebates to individual companies. Given all our assumptions on the basis of our lack of information that we are discussing amounts of £30 million or £40 million but under £50 million, and in view of the comments that have been made. I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Bill reported, without amendment; considered.

Motion made, and Question, That the Bill be now read the Third time, *put and agreed to.*

Bill accordingly read the Third time, and passed.

Appropriation (Northern Ireland)

9.2 pm

The Minister of State, Northern Ireland Office (Dr. Rhodes Boyson): I beg to move,

That the draft Appropriation (No. 2) (Northern Ireland) Order 1985, which was laid before this House on 8th May, be approved.

The order is being made under paragraph 1 of schedule 1 to the Northern Ireland Act 1974. The order provides the balance of the money necessary in 1985-86 for the services provided by Northern Ireland Departments and certain other public bodies. On 7 March the House approved a total of £1,323 million as "a sum on account". Today I seek the balance of £1,733 million, making up a total estimate for 1985-86 of £3,056 million. This is the figure which appears on the front of the Estimates volume which is available from the Vote Office. It is this Estimates volume which gives full details of projected expenditure.

The draft order also appropriates an additional £4 million to cover excess expenditure in the 1983-84 financial year in class VII, vote 1, which covers protective services such as the fire service, and class X, vote 2, which covers non-contributory social security benefits. These two "excess votes", as they are termed, have been examined by the Select Committee on Public Accounts which has raised no objection to them being voted. Details of the excess expenditure are set out in the "Statement of Excesses" pamphlet which has also been placed in the Vote Office.

Before dealing with the detail of the Estimates, I think it is appropriate to reflect upon the broad economic prospects. The United Kingdom as a whole is about to enter the fifth year of continuous economic growth. Recent economic indicators show that Northern Ireland continues to share in this revival. The trend for total industrial production has been upward since mid-1983 with output in 1984 3 per cent. above the level for 1983. Manufacturing production also rose by 3 per cent. in 1984 following a similar rise in 1983. As I have said before, the recovery in manufacturing has been fairly broadly based with most sectors showing some improvement. The most recent employment figures for the Province are also encouraging. Although the trend is still downwards, the rate of decline has fallen significantly. In the second half of 1984, total employment actually rose by over 4,000. However, last year as a whole there was a net decline of 660. This compares with declines of around 3,100 in the year ended December 1983 and 14,500 in the previous year.

Unemployment at around 21 per cent. remains the major economic problem in the Province. As the population of working age continues to rise, the trend in unemployment remains upward. Nevertheless, there was an overall decrease of 1,370 in the unemployment figures published on 31 May compared with the previous month, plus a decrease of 500 in the seasonally adjusted unemployed.

Recent surveys of the Province are in general agreement that investment and future employment prospects present a more cheerful picture than we have seen for many years.

Turning now to the Estimates, class I covers agriculture, fisheries and forestry and provides for expenditure of £73 million in the current financial year.

[Dr. Rhodes Boyson]

The basic aims of this expenditure are, within overall United Kingdom priorities, to help create in Northern Ireland the conditions for efficient production, processing and marketing of the products of this very important industry and to maximise the sector's contributions to the development of the regional economy. The major constituents of the ongoing agriculture programme are £15 million for education, research and development. Some £12 million is for direct agricultural support; £27 million for administration and miscellaneous services, including support to the industry by way of advisory and veterinary services; £18 million for drainage and forestry; and £5·5 million for continuation of the milk consumer subsidy which enables a higher wholesale price to be charged by the Milk Marketing Board for milk for the liquid market while ensuring that Northern Ireland consumers pay about the same retail price for milk as their Great Britain counterparts.

While on the subject of milk, I again emphasise that I recognise the serious concern in the farming industry in the Province. The right hon. Member for Lagan Valley (Mr. Molyneaux) and other right hon. and hon. Members have been pressing the case of the particular difficulties facing certain categories of Northern Ireland producers. I want to assure the House that my right hon. Friend the Minister of Agriculture, Fisheries and Food and the Secretaries of State for Scotland, Wales and Northern Ireland are still in consultation on this question. I can say no more at the moment.

I should perhaps add, for the information of the hon. Member for Antrim, North (Rev. Ian Paisley), that it is from vote 3 of this class that we will provide a grant for the new dredger for Kilkeel harbour. I know that our decision to approve this project was welcomed by the fishing industry, and hon. Members will be interested to know that the contract has now been let at a figure of almost £400,000 over the next two years.

While on the subject of fisheries, the right hon. Member for South Down (Mr. Powell) has drawn my attention to the concern being expressed by Mourne fishermen about the scallop beds close to the Northern Ireland coast which they fear may be overfished when the beds elsewhere in the North Irish sea are closed. We are fully aware of this concern and, as promised to those who made representations last year, the scallop fishery is being closely monitored with a view to having scallop beds closed if stocks are endangered. I recognise that the right hon. Member may have other points to raise on this subject, and I will listen with interest to his remarks.

Class II, votes 1 and 2, provide for the activities of the Industrial Development Board. More than half of the £22·7 million sought in vote 1 will be directed at infrastructural developments such as factory building, site and estate developments, and £3·6 million has also been earmarked to underpin the IDB's efforts in promoting Northern Ireland as a location for inward investment. In vote 2, some £62 million is being sought for selective assistance to industry. Hon. Members will be aware that the creation and support of viable employment in Northern Ireland is a major element in the Government's economic strategy for the Province, and that we are committed to the provision of adequate resources to maintain securely based industrial projects in Northern Ireland.

Under class II, vote 3, some £93 million is being sought to provide support mainly for the Local Enterprise Development Unit, the small firms agency, the aircraft and shipbuilding industries of Shorts and of Harland and Wolff, and for assistance under the standard capital grants scheme. Of that amount, £16·7 million has been provided for LEDU, £32·6 million for Harland and Wolff, and £6·6 million has been allocated to Shorts. Right hon. and hon. Members will be aware that Shorts has been successful in winning three highly competitive contracts since the beginning of the year. They will keep Shorts in the forefront of the aerospace industry and increase its share of defence work on the aircraft aerostructures side of its business. All those contracts should provide a secure base for employment at Shorts.

We have had the disappointing news about Lear Fan. The decision by the company to cease trading was taken in the light of further setbacks to the aircraft's certification programme and the recent steep decline in the market for executive turbo-prop aircraft. When the company ceased trading the Government's remaining commitment was $4·79 million and, obviously, that amount will not now be paid. Both the Government and the major private sector consortium involved in the project were released from their remaining funding commitments. The Department of Economic Development appointed a receiver on 28 May 1985 to secure the company's assets in Northern Ireland, and to represent the Government's interest in the assets and technology in the United States of America.

The total amount invested by the Government in the project has been some £56 million over five years. Private sector investment has been almost $100 million. I must emphasise that the failure of the project cannot in any way be blamed on the Northern Ireland work force and, indeed, their loyalty and contribution to the project is to be praised. If the project had succeeded, it would have brought very welcome high technology and employment opportunities to Northern Ireland.

Finally on the industrial sector, I should like to pay tribute to the progress made by the Province's two job promotion agencies, the Industrial Development Board and LEDU. In the year to 31 March 1985 both exceeded their targets for new job promotions. The IDB achieved 5,267, of which 4,719 were within home industry and 548 from new inward investment. Of the total of 5,267 new jobs, almost 3,400 were in companies with headquarters outside Northern Ireland.

I put that on record because, with the failures of De Lorean and Lear Fan, it is important to recognise that two thirds of the new jobs in Northern Ireland promoted by the IDB this year have been jobs in which the base owning companies are outside Northern Ireland. We want more gilt-edged companies of that type in the Province — those which are established in various countries, and whose efforts in Northern Ireland are part of a chain, not an experiment taking place in Northern Ireland and no other country. That is part of our policy and my determination at present.

LEDU achieved its best ever performance, with 4,009 jobs in the financial year 1984-85. That is an increase of 550 over the previous year.

Class II, vote 4, also makes provision for the development of tourism. The sum of £5·5 million is allocated to it. My hon. Friend the Member for Epping Forest (Sir J. Biggs-Davison) is extremely interested in that, and let me know of his interest before the debate.

Indeed, at Question Time the right hon. Member for South Down and I paid tribute to tourism as an important factor in the earning of wealth and the provision of jobs. Some 10,000 full-time jobs are provided by tourism at present in the Province.

Class III, vote 1, totals £24·2 million. That includes £12 million for 1984-85 deficit support for the gas industry, £6·3 million for conversion scheme assistance and £5·8 million for other costs, of which the main element is redundancy payments. The £6·3 million for conversion grants assumes that substantial progress can be made this year in implementing the rundown programmes of the smaller gas undertakings. As already announced, the Government will pay the full cost of conversion to the cheapest alternative method of domestic energy.

I can also tell the House that industrial and commercial consumers will receive grant of 30 per cent. of the least-cost conversion or replacement. In setting the rate at 30 per cent., consideration was given to the fact that many industrial and commercial consumers would be able to claim tax relief in relation to capital expenditure, thus effectively reducing the net cost to the consumer. In addition, some industrial and commercial consumers may be able to apply for energy conservation grants. They will be advised on this by fuel technologists from the Department of Economic Development's industrial science division.

I should also say, because the matter has been raised from time to time by right hon. and hon. Members, that churches, which as charitable organisations do not pay rates, will be treated as domestic consumers. Therefore, the Government will cover their full costs of converting to the cheapest alternative appliances for central heating.

The £5·8 million for redundancy payments is a broad estimate of what might be required in 1985-86 if reasonable progress is made. The payments to individual workers will show considerable variations depending on the age, length of service and wages of employees. The Government will underwrite redundancy terms to the level of those paid by the British Gas Corporation — a significant enhancement over statutory redundancy terms. Employees aged over 50 can also participate in the local government superannuation scheme for early retirement benefits in addition to their redundancy lump sums.

I have previously spelt out the reasons why the Government could not support the rescue plan prepared on behalf of the gas industry joint working group. I very much regret that this had to be the decision, but, facing facts frankly, I had no alternative. I had to ask myself whether the proposal, as put to me, would lead to a viable gas industry; or whether heavy and ever-increasing demands on Northern Ireland's limited public expenditure resources would continue to be made in support of gas. This £12 million per annum subsidy covering only 2 per cent. of the energy produced in the Province has risen from £2 million a year in 1974 to 1980, to £10 million a year from 1980 to 1984, to £12 million a year now.

The plan would be viable only if gas consumption in Northern Ireland increased 10 times over, and this at a fuel cost one third to one half higher than that of solid fuel. Domestic central heating by gas in the Province would have to increase from the present 3 per cent. to 50 per cent. We also considered that costs of more than £70 million were underestimated. It is as well to remember that all the gas pipes in Northern Ireland are such that one fifth of the gas put in on production does not come out on completion —four times the leakage rate of Great Britain. They would need replacement if the gas industry were to continue.

Gas has had a question mark over it since 1977 at least, and a decision had to be made not to close the gas industry, but to say that the ever-rising subsidies would end and that we would pay for the rundown. Interestingly, one private gas company at Portadown, believing that it can continue to run at a profit or at least not at a loss, is continuing.

Turning to electricity, £95·6 million is being sought in the Estimates for payments to the Northern Ireland electricity service to compensate for the Government's present policy of pegging Northern Ireland electricity tariffs to the level of the highest in England and Wales. This necessitates a large subsidy from within the Northern Ireland public expenditure block. The burden is considerable and one which the Government view with increasing concern. There is a need to reduce NIES costs — in particular, fuel costs. Hence the recently announced plan to convert Kilroot power station fom oil to coal firing. The conversion is a major capital expenditure programme, involving some £94 million, which will take the station out of service in the years 1986 to 1988. After the station is recommissioned in 1989, we anticipate reductions in fuel costs of £25 million to £30 million per year. It will pay for itself within three to four years and represents significant public expenditure savings. It will be one of the most versatile generating stations on earth. It was originally oil-fired. It has switched to coal but remains capable of returning to oil and can switch to lignite in the future. It can be a tourist attraction as one of the most versatile electricity generating stations in discovered space. We are always looking for ways to increase morale in the Province.

We are also conscious of the contribution which local lignite might make to reducing generating costs elsewhere in the Province, and we are seeking detailed information on the planning, design and costings of a minemouth power station which will enable decisions to be made. The prospects for involving private sector investment in the development of lignite-fired electricity are also being examined.

Some other items will be dealt with by the Under-Secretary, my hon. Friend the Member for Bath (Mr. Patten), when he replies. They are his responsibility and he knows much more about them.

Roads and transport are covered in class IV of the Estimates. Northern Ireland has an excellent road system which is an important factor in the development of the Province's economy. There are about one third the number of cars per mile in the Province compared with the rest of Great Britain. That is an attraction to people moving around the Province as well as an advantage to industry and commerce. Some £22 million has been provided for new construction and £56 million for operation and maintenance, within an overall budget of £98 million.

In his statement of 12 December, my right hon. Friend the Secretary of State reaffirmed housing as the highest priority among Northern Ireland's social and environmental programmes. Since the strategic approach to housing was agreed in 1981, total gross expenditure on housing services in Northern Ireland has grown from £325 million in 1980-81 to £545 million in 1985-86. Allowing for inflation this is a real increase of 22 per cent. A further review of the housing strategy undertaken in 1984 confirmed the validity of the switch in emphasis made in

[Dr. Rhodes Boyson]

1983 towards improvement and maintenance and concluded that for the future the main issues to be addressed concern housing conditions rather than overall supply. That is reflected in the provision which has been made for housing services in 1985-86. The Housing Executive's capital and revenue budgets for 1985-86, totalling over £500 million, make provision for expenditure of £78 million on the rehabilitation and improvement of the executive's existing housing stock. Only—I am sorry; I mean over—£52 million is for maintenance.

Mr. Ken Maginnis (Fermanagh and South Tyrone): Only. The Minister was right the first time.

Dr. Boyson: Knowing how carefully my words are noted, I shall be careful when I start a sentence with a four-letter word. What we spend on one thing we cannot spend on another. A Government who have increased the amount by 22 per cent. have nothing to apologise for.

In gross terms some £42 million has been made available to housing associations for 1985-86, of which £26 million has been allocated to general housing association work to fund the completion of work already on the ground and a programme of 1,250 new starts.

In class VI, vote 1, over £78·6 million is sought for water and sewerage services throughout the Province. Of that amount, approximately £25 million is required for capital works. A major problem identified by a recent review of the future needs of the water service was the wastage of water with the percentage of water unaccounted for at some 30 per cent. of the total supply. An intensified programme of waste detection is expected to be fully under way by the end of 1985. We need to do that or to build another reservoir. The water leakage is almost as acute as the gas leakage, but I am told that it is easier to deal with. The gas leakage will not interest us in the future.

Class VIII of the Estimates seeks a total provision of over £614 million for education, libraries and arts. Some 37 per cent. of this provision relates to the payment of school teachers' salaries.

The cost of nursery education is provided for in class VIII—a total of over £3·5 million this year. I know that the right hon. Member for Lagan Valley is concerned about this matter and intends to speak about it tonight. I shall listen with interest to what he has to say, and my hon. Friend will, of course, reply.

In class VIII, vote 2, where total provision of £106·5 million is sought for higher and further education, I am particularly pleased that provision has been made to start the development of the Magee campus of the university of Ulster. The capital cost of the project will be in the region of £6·5 million at today's prices. The full plan, which is to be implemented in three distinct phases, will provide approximately 750 additional places for higher education in Londonderry and will bring the total capacity of the Magee campus to 1,000.

Class IX provides for health and personal social services. A net total of £642 million is sought to maintain the services already provided, and to allow for their further development. The largest single element in vote 1 is the revenue expenditure of the health and social services boards, estimated at £521 million.

Finally, in class XI, a net total of £18·3 million of the £23·1 million is required to service Department of Finance and Personnel's central management functions such as resources control. The balance is to provide for the running costs of the Exchequer and Audit Department and the Northern Ireland Assembly.

I thought it right to go into some detail on Lear Fan and the gas industry, but generally I have tried to outline briefly the main features of the draft order, and to expand upon some of the main policy issues underlying the provision sought. I know that, as usual on these occasions, right hon. and hon. Members will wish to express their views on these and a great many other matters. I shall listen with great interest to the points raised by hon. Members, and my hon. Friend will reply.

9.27 pm

Mr. James Nicholson (Newry and Armagh): I wish to examine class V, which deals with housing, and to raise some matters that have affected my constituency for a considerable time.

The availability of renovation grants is causing concern. Many people find it difficult to qualify at one of the so-called entry points and that suggests to me that the conditions are too rigid, lack imagination and require a rethink.

I shall outline some of the difficulties that I have faced in dealing with constituents' problems. We seem to be getting different interpretations from the Housing Executive in different areas. More important, we are getting different interpretations from different grant officers in the same areas.

It is not acceptable to be informed by the Housing Executive grants department and its officer that they have learned a lot in recent years. One would expect that, but constituents are having to wait 12 months or even 24 months for approval for a renovation grant for a house that badly needs renovating. That causes serious concern.

Many houses which do not meet the so-called entry requirements badly need improvement. The owners cannot afford to carry out the work but unless they are in receipt of supplementary benefit or other state benefits they do not qualify for assistance at the higher rate. I have never understood how or why we have developed a system whereby people have to be in receipt of state benefits to be able to renovate houses, as I should have thought that people on such benefits would be in no position to consider renovating their dwellings.

I should make it clear that this is a personal view, but I have long believed that the system lacks proper balance. Many people who do not qualify for grant aid are encouraged to improve their houses, when, if they had the choice, they would opt to build new ones instead. I ask the Minister seriously to consider adopting a more balanced approach to renovation and new building so that those in a position to choose can set the cost of renovation against that of building a new house, including whatever size of grant is available. The difference between the two amounts would then be less than it is now, thus allowing people more realistic alternatives than they have at present.

The problems of Orlit houses, of which there are many in my constituency, were being discussed in the House long before I joined its ranks, but we are still nowhere near solving the problem and alleviating the plight of the tenants, many of whom have had to accept continual increases in rent. I ask that every effort be made to ensure that progress is more rapid than it has been so far. I believe —I have argued this with local officials of the Housing

Executive and I do not think that many disagree—that where possible the Housing Executive should sell the houses to the tenants at a price which reflects the condition of the houses. I believe that that would be more attractive both for the potential purchasers and for the Housing Executive. Many tenants of Orlit cottages in my area have told me that they do not want their houses to be pulled down and they do not wish to move elsewhere. They are content to stay in their present homes. I do not believe that sufficient consideration is given to that fact.

There is also growing dissatisfaction not just in my constituency but throughout Northern Ireland among Housing Executive tenants who keep their homes in an excellent state of repair but are awarded no consideration for that. That can no longer be acceptable to the vast majority of responsible citizens. Many estates in my area were built a very long time ago and require modernisation and rehabilitation, including rewiring and better heating systems. The tenants rightly insist that they should be given consideration, and I agree.

Tenants on some estates in Armagh city such as the Folly in Dobbins Grove and the Orangefield estate are angered when they see tenants who wreck the kitchens and bathrooms in their accommodation being transferred by the Housing Executive to new houses in other areas. When I am asked by tenants who have looked after their homes how the Housing Executive can justify neglecting them, yet helps tenants who have wrecked their houses, I find it impossible to justify.

Houses on an estate at Sinton Park in Tandragee are supposed to be equipped with a so-called kitchen-dinette. In fact, it is nothing of the sort, being too small to be of any use to the tenants. That estate requires modernising and improving.

I protest strongly on behalf of tenants living in houses on the Greenpark estate in Markethill. Their doors and windows are rotten and people have to stuff up holes, in the windows and elsewhere, with polythene. A rehabilitation scheme for that estate has been postponed for another 12 months. That is totally unacceptable to the people who live there, and I find it intolerable.

In Killylea there is an estate of old people's dwellings, and other houses in the main street, and Eskes Park which to this day have not had their roofs or walls insulated. Nor do they have proper heating systems. That, too, is an unacceptable state of affairs. The walkways to the houses are dangerous, yet we expect old people to walk on them. I cannot understand how contractors have been paid for some of the tarring that they are supposed to have done there. It is difficult to see what supervision the Housing Executive exercised before payment was made for that work.

We require a change of emphasis in the Housing Executive's policy, particularly to the rural areas. Northern Ireland does not end at the suburbs of Belfast. Other areas outside the main conurbations need improving. People who have been paying their rents as honourable and honest citizens are now demanding what they should have received years ago. "We want our homes brought up to an acceptable level. Why should others have had their houses improved, while ours have remained in this condition?" they are rightly asking.

Houses on the Mourneview estate at Tandragee have caused me to have much correspondence with the Under-Secretary of State for Health and Social Security in recent months. That estate was built many years ago, before the motor car became popular, when most of the tenants used bicycles or walked. Tandragee council—long before the Housing Executive came into existence—constructed a green area in front of the houses so that people would have a pleasant aspect. That was all very well then, but today every household on that estate has a car. Some have two and I know of one that has three.

That area of what was green grass has been trampled on to such an extent that in the winter it has to be seen to be believed. The children from neighbouring estates find it an excellent track for their BMX bicycles. They tear through the mud and the residents have difficulty getting to their homes. The footpaths have been allowed in recent years to get into an atrocious state, with the flagstones so unbalanced as to be dangerous.

The Department of the Environment roads service informs me that it does not propose to spend money on the estate because such expenditure would result in no traffic benefit to the area. Meanwhile, the Housing Executive is willing to pay 50 per cent. of the cost of making improvements. The Department says that such improvements would not benefit through traffic, but the roads service cannot wash its hands of its responsibilities unless they are clearly defined as a Housing Executive responsibility. I should be quite happy for such improvements to be made the responsibility of the Housing Executive because it might be prepared to solve the problem. It is unacceptable that people should be asked to live in out-of-date accommodation.

Although I have said a few harsh words about it, at this stage I should like to say a few words in praise of the Housing Executive. It has tried to respond to the requests that have been made for housing repairs. Its response could have been better, but there has been an improvement.

Rates offices have been centralised throughout Northern Ireland. The rates office in Armagh city was closed and removed to Lurgan. Most of the people in the area would have gone to Armagh to pay their rates bills. Either they decided to pay them within the allotted time and to accept the discount that was offered or they decided to pay their bills outside the time limit and by waiting long enough, hoped that it would amount to more than the value of the discount.

Lurgan is not very far away but it is far enough away not to tempt anybody in the Armagh district to jump in his car and go to Lurgan to pay his rates bill. So they now pay their rates bills by post. One of my constituents paid his rates bill by post three days before he would have lost his discount, but the Post Office decided not to deliver his letter for four days. Therefore, he lost his discount. It ought to be possible for the postmark to be taken as a verification of payment having been made before the expiry of the discount period. May I ask the Minister of State seriously to consider that point?

The Minister of State referred eloquently to the excellent roads system in Northern Ireland. The Armagh county council left as an inheritance to the people of the county of Armagh a roads system that was second to none. But that cannot be said today. The main roads have deteriorated seriously. The byroads have gone beyond the stage of deteriorating; some of them are beginning to break up.

There are all sorts of problems. I do not propose to deal with them at any length, because that would take up so much time that I might deprive another hon. Member of the opportunity to speak. However, I am seriously

[Mr. James Nicholson]

concerned about road conditions in Northern Ireland as a whole, and particularly in my constituency. I am also concerned about minor roads and voiced my concerns about them before I became a Member of Parliament.

One road in Armagh was first known as the road to nowhere. Now it services a housing estate, but it has never been finished. It was designed as a link road between the Markethill road and the Portadown road, and was supposed to cross the Hamiltonsbawn road. That road was never completed to a point at which it could at least provide some assistance. Thus, I hope that the Minister will seriously consider the fact that the road needs to be finished.

We have a good industrial estate on the Hamiltonsbawn road. It needs to be serviced and needs further work to be done so that more jobs can be brought to the Armagh city area. If there are no roads to such estates, we cannot expect industrialists to give them serious consideration. The Minister must give that point top priority in future.

The Under-Secretary of State, the hon. Member for Bath (Mr. Patten), need not look so worried, as I shall now deal with class I. I know how proficient he is on agriculture, as I have heard him reply in the past in the House. Farm capital grants are important to our farmers. Indeed, it would be fair to say that in Northern Ireland we have in the past used the grants available to improve and modernise our farm buildings. But even more importantly, improvements to our grasslands by re-seeding, shoring and cleaning out drains have benefited the whole agriculture industry. When the grants were drastically cut last December, there was some alarm. Of the £40 million saved from those cuts in the United Kingdom, £14 million will come out of money that would have gone to Northern Ireland. That shows the importance that Northern Ireland attaches to the grant system and the use to which it can be put.

Some counties require an on-going drainage policy. County Fermanagh is an excellent example of where such a policy has improved the land and subsequently the livelihood of farmers in that area.

I am very concerned that areas that have been substantially improved in previous years will now deteriorate. The view now appears to have entered Government thinking that the removal of hedges has been in some way uniform throughout the United Kingdom, but that is not so. Anyone who has been to Northern Ireland will know that conservation has always been of paramount importance to Northern Ireland farmers. We have not been guilty of damaging conservation, and could not be accused of that. The Minister's colleagues may not be as aware as he is of the different circumstances prevailing in Northern Ireland. We need an on-going policy of improvements to grasslands in Northern Ireland.

If agriculture is to develop, research and development must continue to receive the necessary support. There must be no diminuition in the current standards. We would be opposed to the reduction of any of the current services offered by our experimental stations, veterinary research laboratories, plant breeding stations and many of the other services. Major companies presently take part in some of the work carried out by Government Departments, and while such a policy should be encouraged where feasible, it should never be considered to be capable of taking over from what currently exists.

Production of beef in Northern Ireland provides great support not only for the farmer but for ancillary industries, mainly in the boning of beef. Agriculture in Northern Ireland must look towards preparation and marketing to give the housewives what they wish to buy. That aspect has been sadly lacking over the years. However, that requirement now seems to be recognised. If we are to survive in the comparative market of the large multiples buying the highest quality at comparative prices, there is much to be done on marketing. We still have a great deal to learn if we are to compete effectively with the continent. To that end, I urge the Government to maximise their efforts in helping our firms to initiate new ideas, evolve new markets and adopt new ideas to the benefit of the industry.

One requirement has been sadly neglected for some time—cold storage and blast freezing facilities. Due to the large supply of cattle available in the autumn, intervention is required to stabilise the market, but intervention is of little consequence if there is no storage space. I understand that the stores are now almost full. If that is true—I have no reason to suppose otherwise—that does not hold out much hope for the coming season. We experienced problems last autumn but, thankfully, we coped. We may not be so successful this year.

I ask the Minister to give serious consideration to providing alternative facilities. I fall short of saying what we said 12 months ago, when we requested that freezer ships should be made available. But that is something that the Minister must seriously consider, because that facility may be required this year in view of the additional cow beef that has filled our cold stores. The Minister should not hope for the best—he should prepare for the worst.

Since I came to the House two years ago, I have repeatedly said that some way must be found to bring to Northern Ireland at a realistic price the grain that is currently housed in costly intervention storage in Europe. It should not be beyond the scope of our Ministers and officials to negotiate within the CAP a way in which grain could be shipped to Northern Ireland, stored and sold to Northern Ireland farmers at a price no more or less than that in any other part of the United Kingdom. Such an initiative would immediately stabilise the intensive sector and would be of great help in creating further employment in the ancillary and support industries that supply it. I urge the Minister to take the necessary initiative to ensure that the problem is seriously considered.

I apologise to the Minister for not having been in the Chamber to hear his opening remarks on milk quotas. Like many other hon. Members, I was taken by surprise by the speed with which the previous debate ended. The issue of milk quotas has caused those of us who present the Northern Ireland agriculture case a great deal of concern, and we have spent much time trying to find a solution to the problem.

The problem was created by the Minister of Agriculture, Fisheries and Food. When quotas were first introduced 14 months ago, Northern Ireland should have been awarded 65,000 tonnes in recognition of its dependence upon the milk industry. That would have placed Northern Ireland farmers in an interim position between the Republic of Ireland and the remainder of the United Kingdom.

That is the background to the position. However, now the dairy farmers of Northern Ireland are at a serious disadvantage compared to their counterparts in the rest of

the United Kingdom. Not only did they not receive the 65,000 tonnes that we were awarded, but we were manipulated out of the commitment by a jumbling of figures to suit the *requirements of the Ministry of* Agriculture, Fisheries and Food.

The Minister introduced throughout the whole of the United Kingdom a milk cessation scheme whereby farmers could, if they wished, sell their quota back to the Ministry and go out of production. That extra quota could then be redistributed. In England and Scotland the scheme received a favourable response, but not in Wales, where in many ways the position of the farmers is similar to that of those in Northern Ireland. The target set for milk quotas has almost been reached on the mainland, but not in Northern Ireland, because the scheme there was a flop.

When the Minister of Agriculture made his announcement offering the scheme as a solution to the difficulties in Northern Ireland, he did not heed the warnings given by myself and other hon. Members that the scheme would not work. It never had a chance to work, because in Northern Ireland the farmers have no alternative. They cannot turn to cereals as farmers in other parts of the United Kingdom can. It has been suggested that other choices are available—we could grow rape, flax, peas and, unbelievably, caravans.

In Northern Ireland, we depend mainly on the grass-based sections of milk, beef and, to a lesser extent, sheep, those involved cannot sell their quota and go out of production. Our dependence on this sector is now more pronounced than ever. The dairy produce panels set up with the approval of the House to help farmers in the United Kingdom as a whole and to investigate their appeals is now working to the detriment of one part of the United Kingdom.

The same legislation and criteria should be used throughout the United Kingdom. Recently, the Minister announced that dairy farmers in England, Scotland and Wales are to receive 100 per cent. of their exceptional hardship awards, but in Northern Ireland they are to receive only 36 per cent. In England, Wales and Scotland, the small producer of 200,000 litres is to receive an extra 11 per cent. over the next 12 months, but in Northern Ireland, he is to receive nothing.

Such treatment is unacceptable to Northern Ireland. It is wrong that a farmer living in England, Scotland or Wales should be 11 per cent. better off than his counterpart in Northern Ireland, who is in the same circumstances but who, because he farms in the Province, will not receive equal treatment. Northern Ireland farmers have been told to cut milk production by 1 per cent. from 1 April, but small farmers in the rest of the United Kingdom are 11 per cent. better off.

It was fair 14 months ago to equalise the hardship, and the Government have a duty now to ensure that all citizens receive the same benefit. There is no difference in being an exceptional hardship case in the county of Armagh, part of which I have the honour to represent, and being an exceptional hardship case in the county of Devon. Hardship is the same wherever one happens to live. No justice or fair treatment has been accorded to Northern Ireland farmers on this issue. Tonight I am asking for that —nothing more or less than equality will suffice.

9.59 pm

Rev. Ian Paisley (Antrim, North): I want to refer to a matter that has just been dealt with by the hon. Member for Newry and Armagh (Mr. Nicholson) in regard to the Department of Agriculture. Lord Lyell, who is responsible for agriculture, advised us that expander cases in Northern Ireland would receive 49 per cent. of tribunal awards. In Scotland they will receive 57·5 per cent. and in England and Wales 65 per cent. If the outgoers quota is used exclusively for exceptional hardship cases and additional quota is not transferred from Great Britain awards of 36 per cent. will be granted.

The Secretary of State for Agriculture announced on 7 May that exceptional hardship cases in England and Wales would receive 100 per cent. of the tribunal award. Small producers in England and Wales will be restored to their mean level of production in 1983 but again, unless quota is transferred from Great Britain, small producers in Northern Ireland will receive absolutely nothing.

It is all very well for the Minister of State to come to the Dispatch Box tonight and tell us that he cannot make further comment. What are the dairy farmers of Northern Ireland to do? Lord Lyell told the Ulster Farmers Union on 2 May:

"I would wish to register my most sincere sympathy with all those who still do not know how they stand for 1985-86. I can only assure you that I am doing everything I can to get a fair settlement as quickly as possible."

The dairy farmers of Northern Ireland deserve not sympathy but action, and action needs to be taken immediately. We are in an intolerable position when we discover that the Minister who will be answering tonight can make no statement about further progress on the matter while the rest of the United Kingdom gets full information. There is no equality between the rest of the United Kingdom and Northern Ireland. The hon. Member for Bath (Mr. Patten) should be well briefed so that he can give some satisfaction to the people of Northern Ireland.

I wish to protest at the limitation on the time available for the debate. Why can we not have proper time to discuss matters that range from Dan to Beersheba? It makes me thank God doubly for an Assembly, where we have time to discuss some of the matters that should have been dealt with in the House tonight. We have a deplorable state of affairs.

When I arrived at the House today I had a telephone call from a lady in County Antrim who told me that she could not get any satisfaction from the Department of Agriculture in Northern Ireland or from the Department here. Therefore, she sent to Mr. Andriessen, the Commissioner for Agriculture in Brussels, a long telex which cost her £60. This is a serious matter because the dairy farmers do not know where to turn. They may have 100 or 120 cows and they are being told that they will have to cut back. They do not know how they will make ends meet. Mr. Andriessen replied to this lady. She got no reply from the Prime Minister or from the Secretary of State for Agriculture, both of whom she had written to. She was ignored by them but the Common Market Commissioner replied. He said that he had instructed

"my services to get in touch with the United Kingdom so that further details and a proper explanation be obtained of the way that hardship quotas and other special case quotas are now being determined in Northern Ireland differing from the rest of the United Kingdom".

The alarm bells are sounding in Europe because of the way in which the Secretary of State dealt with the 65,000 extra tonnes that we should have received last year.

What is happening is deplorable. It is so bad that it would be impossible to believe if Lord Lyell had not

[Rev. Ian Paisley]

appeared before the Northern Ireland Agriculture Committee to confirm in person what I am saying tonight. He said that the only answer lay in the permanent transfer of quota from Great Britain, but that there was very strong opposition to this from producers in England, Scotland and Wales. In other words, those producers are not prepared to stand for equalisation and Northern Ireland has to be put out on a limb.

Northern Ireland's prime agriculture industry has to suffer because the Minister of Agriculture, Fisheries and Food has ceased to be the Minister responsible for the whole of the United Kingdom. He has become responsible only for England and Wales. He is doing something for his own farmers but nothing for farmers in Northern Ireland.

It was obvious to the Agriculture Committee that that would be so. Indeed, we put it to Lord Lyell that a political decision would have to be taken to transfer quotas from producers across the water.

I am sure that the leader of the Official Unionist party will not mind me saying that he has received correspondence from the Prime Minister on the same subject. I have also written to the Prime Minister about the problem. Lord Lyell told us that the Secretary of State had been negotiating at Cabinet level and that we would have to leave it to him to fight the political battle.

Representatives of the Ulster Farmers Union came away from a meeting with the Minister of Agriculture, Fisheries and Food and immediately passed a vote of no confidence in him because he offered no change and no hope.

I appeal to Ministers to convey to Lord Lyell and to the Secretary of State that time is running out. In the past two weeks we have heard that producers in the Republic of Ireland have received an additional 58,000 tonnes. In England and Wales there has been a restoration of the 1983 levels of production and claims by essential hardship cases will be met in full.

It is time for Northern Ireland's position to be resolved. We must receive the full benefit of the European Economic Community award of 65,000 tonnes. It must be seen that we receive that award. Surely Ministers have learnt their lessons by now. There must be a permanent transfer of quota within the United Kingdom to protect the jobs of those for whom alternative employment is not available. There are no alternative jobs for farmers. We have a grass, land-based industry.

Mr. Nicholson: Does the hon. Gentleman agree that we can thank membership of the EC for our present position, and for having ruined our intensive sectors, thus making us so dependent on the grass-based sectors?

Rev. Ian Paisley: The hon. Gentleman knows my views about Europe. I warned the Ulster Farmers Union, but they went against me and said that Europe would be the greatest thing that ever happened. The leaders of the farming community in Northern Ireland campaigned to go into Europe. The farming community was warned about what would happen. What annoys me is that Europe has given us extra and we are not getting it. It is hard for the farmers of Northern Ireland to accept that producers in the Republic will be so much better off than we are. But how much worse it is now for those in agriculture in Northern Ireland to find that matters cannot be resolved on an equitable basis within the United Kingdom, that we are not getting our place as farmers within the United Kingdom, that we are being discriminated against. There must be a realisation of the inequities between producers in the United Kingdom.

Justice surely demands that quota purchased from outgoers should be used equitably throughout the country. The Government cannot say that the money is not available, because the money is available. They were to purchase 66 million litres, and they have been able to purchase only 12 million litres. They have £7 million in hand to pay for this. That money must be used to get extra milk quota for Northern Ireland. The money is available. A simple calculation shows that a total of £7 million is unspent. The Government must make that money available for milk quota.

I leave it to the Minister to reply on milk quotas when he sums up, and to give some hope to the farmers of Northern Ireland. I do not want him to say that he is sorry, he can do nothing and he has nothing to say to me, because that will inflict more misery and take away any hope that there may be in the hearts of the farmers of Northern Ireland.

There are many other agricultural matters on which I would like to comment, but many other hon. Members wish to take part in the debate and some have been waiting since 7 o'clock. I will, therefore, curtail my remarks.

I welcome the statement of the Minister of State that there is absolutely no criticism of the workmanship of the people of Northern Ireland in the De Lorean case or in the Lear Fan affair. These companies coming in and making a botch has caused a reflection to be cast across the world suggesting that there is something wrong with Ulster workmanship. There is nothing wrong with Ulster workmanship. I welcome this statement by the Minister, and he needs to go on repeating it, because no reflection can be cast on Ulster workmanship.

I welcome the progress that has been made in Shorts and in the Shipyard, and I welcome the jobs that are coming to Northern Ireland. There is a lot of work to be done, and the IDB and those responsible need to get their skates on and get at this job with all their might.

I wish to ask some questions on class IV, the Department of the Environment. Can the Minister give the House a recent updating in regard to Ballintoy harbour? I thank the Minister for what he told me about the Kilkeal dredger. I want to say that I was not going into the constituency of any hon. Member. The hon. Member for Newry and Armagh (Mr. Nicholson) and I at a meeting in Stormont were asked to bring this matter to the House. As chairman, I was asked to do this, and that is why I did it. When hon. Members came into my constituency at the time of the discussion of the barracks at Ballymena, I did not protest. If hon. Members come in and help my constituency to get better and more jobs, more power to them. It is the same if they come into Shorts in the constituency of my hon. Friend the Member for Belfast, East (Mr. Robinson). Nobody will hinder me. When representations are made to me as chairman of the committee in Stormont to raise matters in the House, I will raise them.

I welcome the fact that the Minister gave us the report, but we had already had it from the chairman of the fisheries board in Northern Ireland who came and told us what had happened. Nevertheless, we welcome the announcement today.

I want the Minister to tell us about the updating of Ballintoy harbour. Extensive works have been done there, but the project has developed into a fiasco resulting almost in the closing of the harbour because of the way that the work has been carried out. Will he also say what progress has been made on Rathlin island harbour and on the Ballycastle harbour project as these are very important to my constituency?

Class V deals with housing. I want to ask the Minister to start an investigation into why houses of the same age and of the same construction and size in one area in Northern Ireland get more done to them when they are being rehabilitated than the same type of houses in other areas.

I refer to Cookstown and to Ballymoney. There, two estates are made up of exactly the same type of house, but the political connotations are different. One is Republican and the other Unionist. One is Roman Catholic and the other Protestant. A tenant goes to the estate office and is told, "We are sorry, but you are not getting a new window here and a new door there and you will not have this or that fixed. At the end of the day, people in Ballymoney found that inferior jobs were being done on their houses and less money was spent on them although their houses were in a worse condition than those in Cookstown.

I have had the Housing Executive on this job, because the only way to deal with the Housing Executive is to take its representatives to an estate and allow the tenants to get at them. That is my policy. I allow them to say what they have to say to the Housing Executive in the presence of their Member of Parliament. I got promises galore that all would be well. However, I was summoned back and the tenants told me that they were getting nothing and that the Housing Executive representatives had gone back on their agreement. I say to the Minister that what is fair must be done in Northern Ireland.

I resent the fact that in my constituency Republican housing estates get preference over Unionist estates. They should all be dealt with in the same way. Instead, Republicans destroy their properties, they refuse to pay rent, they go on rent strikes and, when renovations are to be done, the Housing Executive says that their houses are in worse condition and that work on them must be done first.

Good tenants in Housing Executive property must be given some incentives. I understand that the Government believe in incentives, as I do. A good tenant who keeps his house well, does the odd repair without fuss and keeps it in good repair should be given some incentive. I am disgusted by the way that some of these rehabilitation jobs are done. Tenants are put out for a few weeks, but they are brought back before the jobs are finished. Other tenants are kept in their houses and have to endure all the inconvenience. I went into a house the other day where the occupants were going to bed after performing a balancing act over the rafters of the floor. That was a rehabilitation job. That is not fair to anyone, and the Minister should see that it does not happen.

Class VI deals with historic monuments, and I have two questions for the Minister. The first concerns the Walker monument in the city of Londonderry. Incidentally, I congratulate the Minister on calling it "the city of Londonderry". Because we have murdering thugs as members on the council, is the planning for that monument to stop, with the project being called to a halt?

I want also to ask the hon. Gentleman about the monument to the Rev. Hugh Hanna that used to stand at Carlisle circus. What has happened to it? Why has the monument not been restored to its rightful place now that the roads in the area have been sorted out?

Mr. Peter Robinson (Belfast, East): While my hon. Friend talks about monuments, will he give the Minister the opportunity to tell us what is delaying the cleaning of the Carson monument which is on the route to my hon. Friend's offices and which he must see and deplore every day, as it is turning green and corroded?

Rev. Ian Paisley: I thought that my hon. Friend would speak in the debate and I knew that he, as chairman of the committee in Stormont, had made representations about that matter, which is why I did not mention it. We could not get a better trio than Walker, Hanna and Carson and, therefore, I trust that those three names will stick in the mind of the hon. Gentleman the Member for Bath and that he will remember that that monument of Carson needs a bath. Perhaps he will look after that for us.

Regarding class VIII, I register my strongest protest against the decision that Northern Ireland will have something less than the rest of the United Kingdom in that we are not to have a Provincial library or copyright privilege for our central library. It was proposed that we should have a Provincewide reference library and a copyright privilege. Only one library in Ireland has that copyright privilege—the university library in Dublin. Why should a library outside the United Kingdom have that privilege when it is denied to the people of Northern Ireland? Wales, Scotland and England all have their own national library. Why should Northern Ireland not have one to serve the entire Province? I regret that it has been refused to us. Will the Minister tell us why?

I wonder whether the Minister will tell us what is happening about hospitals at Downpatrick. All hon. Members have deputations with them about that. I hope that the Minister will update us on that.

Class XI vote 4 deals with the expenditure of the office of the Northern Ireland Parliamentary Commissioner for Administration. Will the Minister take on board the fact that a small leaflet is needed to state clearly how many cases have been brought since the two offices came into existence? How many cases have been sifted through, tried and a verdict given? What was the religious discrimination and what were the numbers? Those numbers are vital to show that the vast claims of discrimination simply do not stand up. It is time that the facts were published so that everyone knows what is happening.

One of the classes refers to the contributions to local revenues. I think that I can deal with this matter in class IV vote 6. The Minister knows what has happened as a result of the Northern Ireland local government elections. I do not want the Government to think that the problem will go away. Sinn Fein is wholly unacceptable to the people of Northern Ireland. To have to sit on a council and have councillors shouting, "Up the IRA", and calling our security forces murderers, and to know that Sinn Fein has killed our kith and kin is something that we shall never accept. The Government need to get that into their mind. If they think that in two or three months, or a year, the position will settle down, everyone will shake hands and work together, they are wrong. If the Minister thinks that

[Rev. Ian Paisley]

he can push Sinn Fein down our teeth, he has another think coming. The Government need to get that into their mind and heart. What they have seen so far is only a Sunday school picnic. Our people are enraged at what has happened. The Minister and the Government will not sit with Sinn Fein, discuss business with them, or have them on deputations, yet they would force the elected representatives of Northern Ireland to sit with them. It cannot be done. I hope that when the Minister replies, he will clarify the statement that he is reported to have made, on which there has been great comment, that he would have to recognise the chairman of a council even if he was a member of Sinn Fein. What is the Government's thinking on that? If a council such as that in Omagh sends him a deputation led by a Sinn Fein chairman, will he receive it? If he goes to Omagh, will he be received by a Sinn Fein chairman?

Those are urgent matters, and the House had better understand the feeling of the people of Northern Ireland. I cannot express it strongly enough. I have already expressed it to the Minister in person. This cannot be swept under the carpet, and it will be opposed by the people of Northern Ireland. In Enniskillin—I regret that the hon. Member for Foyle (Mr. Hume) is not here tonight — the official Unionists were prepared to vote into office an SDLP man to keep Sinn Fein out of the chair, but the SDLP said, "We will not even run for office. We will let Sinn Fein have the chair." We know what the end of the story will be. I am not a prophet or the son of a prophet, but at the next general election, we shall see the real pact between the SDLP and Sinn Fein. I believe that the right hon. Member for Lagan Valley (Mr. Molyneaux) said in the House that we are seeing the forging of another all-Republican pact. The House must be warned about it and about the feelings of Ulster people.

10.26 pm

Mr. J. Enoch Powell (South Down): It may seem a poor response to the witty and informative speech with which the Minister of State introduced the order if he is obliged once again to listen to a litany to which he has already on three separate occasions made some reply. All of us hope — that hope is reinforced by the absurdly limited time for this debate — that this will be the last occasion when we must reap the absurd fruits in procedural terms of the old determination to maintain a separate financial organisation and Consolidated Fund for Northern Ireland.

It would be unreasonable to expect Ministers to anticipate what we believe the Government will say if, later this month or at the beginning of July, they must once again excuse the renewal of direct rule. Equally, I am sure that Ministers will understand that right hon. and hon. Members on this Bench, who were returned to the House to bring about the end of that colonial status of direct rule under which the Province labours, would be falling if they did not mark their purpose again by formally voting against the order.

As a result of a communication between us, the Minister of State anticipated one point that I shall raise this evening. I am grateful to him for recognising that the Northern Ireland Office and the fisheries division of the Department of Agriculture are alive to the risks to the scallop fishermen on the Down and Antrim coasts. Something went wrong somewhere.

In the early months of 1984, it was proposed that the entire northern part of the Irish sea should reasonably, for conservation reasons, be closed to scallop fishing for four months from June to October. That was accepted by the Northern Ireland fishermen and their representatives. However, when the order was made, it excluded from the ban the coastal scallop beds of the counties of Antrim and Down. That is an extremely serious matter, for there are fishermen in the smaller ports of those two counties who are dependent for a considerable part of their livelihood upon the special scallop fishery to which their fishing methods are adapted off their own home ports. If, during this close season, which does not apply off Mourne and Antrim, part of the fishing effort of the remainder of the Irish sea proves to be concentrated, as is feared, upon those beds, there may be disastrous consequences from which those resources may take years to recover.

I hope that when the Minister replies, he will be able to reiterate more precisely the pledge which was given by the Minister of State that the Government will stand ready, if there is any evidence of incursion into those fisheries, to extend the ban which exists in the remainder of the northern Irish sea. I believe that I caught an affirmative indication. I shall look forward to hearing it verbally when the Minister replies.

The other matter that I wish to raise concerns the Minister's responsibilities for the Department of the Environment. One of the few functions—I hope that it will soon be widely extended — of the existing local authorities in Northern Ireland is the disposal of refuse. I am not for one moment suggesting that that function should be taken away from them. We should be looking for functions that can be given to, not taken away from, district councils. I am not the only Member representing Northern Ireland who has been disturbed by the evidence of the sporadic efforts of the different district councils to solve their problems of tipping and rubbish disposal in apparent isolation from what other councils may be doing and without any connected plan or forethought as to what the demand in future years will be.

There is a function here for the Department of the Environment. It is a function that the Department would have even if we in Northern Ireland possessed, as we hope to possess, a full system of local government—that is, of co-ordination and stimulus. The district councils ought, each in their respective areas, not merely to be encouraged but to be required to provide the Minister with a forecast of the expected disposal requirements of coming years and their intentions for coping with their problems. There should be a survey of the manner in which the total requirements of the Province in coming years can be met without any breach of planning requirements or damage to amenities.

At present, the district council picks upon a site, causing widespread alarm and dismay in the area, and puts in a planning application for its use as a tipping site. After many months, a decision is rightly taken that it is not a suitable site and the same blight lands in another place.

It is absurd that that should be going on simultaneously in one district area after another, and it is only the Minister and officials in his Department, with their oversight of local government and environmental functions, who can deal with that problem.

I know that it has been brought to the Minister's attention, but I hope that he will tonight say that he will not allow district councils to prevaricate, but will insist by a given date on having an intelligent and intelligible plan for the next 10 years of refuse disposal throughout the Province. The matter needs to be looked at Province-wide and on that scale.

As the Minister with responsibility for the Department of the Environment is to reply and as housing has been mentioned more than once, I cannot resist returning to one point which was touched upon by the Minister of State when he referred to the change in emphasis which had taken place in the activities of the Housing Executive. The emphasis has changed from new building and addition to the total stock to improvement, maintenance and the improvement of the distribution of existing stock.

Year after year, we have called for — and then welcomed—that change of emphasis. I know that it has the full support of the Under-Secretary and it is, therefore, a cause of dismay to find in one's own constituency that the Housing Executive is apparently still contemplating vesting large areas to create new and, in some cases, massive estates. Will the Under-Secretary put in hand an inquiry to see what sites for new building are being acquired by the Housing Executive outside Belfast and how those acquisitions are related to the policy of the executive, as it has been expounded to the House in successive debates? Some of us suspect that the Housing Executive, or certainly some of its departments, may be failing to respond to the general policy of shifting the emphasis from the creation of new housing estates to the maintenance and improvement of existing houses and the facilitation of transfers so that families match the accommodation much better than they do at present.

I know that I am appealing for something which is close to the Under-Secretary's heart, and I hope that he will emphasise that when he replies.

10.36 pm

Sir John Biggs-Davison (Epping Forest): The right hon. Member for South Down (Mr. Powell) has announced that the House will again be divided. I regret that, if only because it separates him and his right hon. and hon. Friends from Conservative Members who wish them well.

Northern Ireland is fortunate in the devotion and energy of the Secretary of State and his ministerial team. If I pay a particular compliment to the Minister of State, my hon. Friend the Member for Brent, North (Dr. Boyson), it is because I wish to speak about tourism, which falls within the purview of the Department of Economic Development and is a subject in which my hon. Friend takes a keen personal interest.

Expenditure on the development of tourism in the last financial year is recorded in class II, vote 4. The fact that a surplus of over £213,000 is to be returned is indicative of prudent administration. The Minister of State said that in the present financial year there will be expenditure of £5·5 million. The question is whether we are getting value for that money.

In 1967, about 1·8 million tourists visited Northern Ireland. Then came the troubles. A low point was recorded in 1981, with only 588,000 tourist visitors. By last year, there had been a remarkable change for the better—to 908,000 tourists, an increase of 6 per cent. on 1983 figures and 27 per cent. up on the 1982 level. There was also last year the highest occupancy rate of hotel bedrooms—40 per cent.—since 1973. I saw that the Minister of State was quoted as predicting that the 1 million tourists mark will be passed this year, although, as that will not take us back to the pre-troubles level, we cannot rest content.

Northern Ireland is fortunate in Sir John Swinson, who was reappointed chairman of the tourist board in 1983. He and his officials have been busy promoting Northern Ireland in London, Birmingham, Scotland and West Germany—the earnest anglers from Germany love the Fermanagh lakes.

Northern Ireland has been receiving about 52,000 tourists a year from North America, many of whom come because of their roots in Northern Ireland. It is estimated that 20 million North Americans, 850,000 Australians and no fewer than 200,000 New Zealanders consider themselves, as I do, to have ancestral origins in the Province. It was wise of the Northern Ireland tourist board to carry out a promotional tour of Australiasia last October. It is also gratifying that more Members of this House are visiting Northern Ireland.

Many new visitors to the Province express surprise at the tranquillity of the matchless countryside and at the normality of Ulster life. Terrorism is there, but terrorism is almost worldwide in what Churchill described as this terrible 20th century. The British are insular and inclined to think that they are the only people who have troubles, whether it be unemployment or terrorism. Other countries much favoured by holidaymakers — France, including Corsica, as well as Italy and Spain — are also and perhaps worse plagued by the men of the bomb and the bullet. Statistical comparison shows that Northern Ireland is much safer than New York and we should do all that we can to encourage further growth of the tourist industry by bringing out the true position of Northern Ireland. Due regard must at the same time be paid to natural amenity, historic monuments and archaeological sites such as the one in the constituency of the hon. Member for Newry and Armagh (Mr. Nicholson) which I understand is to be the subject of a public inquiry.

I repeat that we cannot rest on our oars. I suppose that the fact that only 300,000 visitors come from Great Britain results from the concentration of our media on the killing and the violence. That figure compares with 350,000 from the Irish Republic. Tourism figures in the cross-border studies and co-operation with Bord Failte makes sense. I conclude by quoting Mr. De Valera, no less, who described Ulster as the province that every Irishman loves most next to his own.

Several Hon. Members *rose*——

Mr. Deputy Speaker (Mr. Ernest Armstrong): Order. I am grateful for the co-operation of Members on both sides of the House. It may help the House if I say that the Minister is anxious to catch my eye at 11.15 pm, so I appeal for even more brevity.

10.42 pm

Mr. Stuart Bell (Middlesbrough): I shall seek to follow your grave consign, Mr. Deputy Speaker. I shall limit my comments to one aspect of the Minister's opening remarks and not seek to equal the interesting, in-depth speeches of hon. Members who have gone before me.

I wish to deal briefly with the scrapping of the Lear Fan jet project, which the Minister described as disappointing

[Mr. Stuart Bell]

news. The Minister told the House that the 4·79 million dollars outstanding would not now have to be paid. Great effort has been made to distance this matter from the De Lorean affair, which was the subject of a previous debate, but it is right and proper that the House should also discuss the Lear Fan affair in some depth, and I shall seek to do so, albeit briefly.

The Lear Fan jet was to be made almost entirely of a lightweight carbon fibre, powered by two turbo-prop engines coupled to a single rear propellor and designed to fly at speeds of up to 400 mph using less fuel than some cars; but the project has now been scrapped. It is significant that the announcement of the decision came not from the Industrial Development Board but from Lear Fan Ltd. in Los Angeles. In a written answer to the hon. Member for Hazel Grove (Mr. Arnold) about the Lear Fan company's decision to cease trading, the Minister said:

"I understand the directors took this decision because of continuing delays encountered in obtaining certification of the Lear Fan 2100 aircraft and the steep decline in the market for executive turbo-prop aircraft which had resulted in a serious deterioration of the long-term prospects of the company." —[*Official Report*, 3 June 1985; Vol. 80, c. *86*.]

However, I suggest that the Lear Fan project collapsed because of the inability of Lear Fan to get an airworthiness certificate. Thus, the second reason given by the company is as redundant as those workers who are still at the plant in Carnmoney in Northern Ireland.

The Minister is to be congratulated on being forthright with the House in saying that £56·28 million had been lost to the Exchequer. Lord Lyell—whom the hon. Member for Antrim, North (Rev. Ian Paisley) described as being the Minister responsible for agriculture—referred to the losses in a statement that he made in the other place on 19 December 1984. He thought that the Government exposure was $24 million. That was obviously wishful thinking, because the proper figure given tonight by the Minister is £56·28 million.

As with the De Lorean affair, the Lear Fan issue raises a number of questions. Most of my questions relate to the administration of the former Minister of State, the present Minister of State for Defence Procurement, to whom I have given notice that I should be raising matters within his jurisdiction.

Why, in the first place, were the contracts for Lear Fan entered into in dollars, which meant that, with a strengthening dollar, the transaction across the exchanges cost us more than was necessary? Is it right that the Government should have used taxpayers' money in dollars rather than in pounds? What chances are there of recovering as much as possible of the nearly £57 million that has been poured into the venture? Is it a fact, as stated in the press, that the Industrial Development Board's directors nominated to advise the Government recommended the Government to pull out of the Lear Fan project a year ago and to salvage what money could be recouped? If so, why was that advice not heeded?

Is it true that there is a legal possibility on the other side of the Atlantic that the Lear Fan company might be able somehow to close down the present operations, lose for the British Exchequer £57 million and open up again with other backers? In short, is it still thought that the Lear Fan jet is a marketable commodity?

I read that Mr. De Lorean is seeking to resurrect his car project in the United States and therefore, in a sense, begin where he left off in Northern Ireland. I doubt whether that is so; and if I do not believe in miracles, I can believe in the gullibility of some people elsewhere in the world.

Why did the Government take a 5 per cent. equity stake in Fan Holdings Incorporated, which in turn owned Lear Fan Ltd.? What was the value of such a parsimonious holding? Why were the original interim loans waived in favour of royalty payments of up to $33·75 million?

We see here the shades of the De Lorean affair: a plan for a jet aircraft that had no prospect of obtaining an airworthiness certificate, yet the British Government bartered away taxpayers' money for royalty payments on an aeroplane that was destined never to fly.

Why was the original loan, which might have been recovered by the receiver in different circumstances, turned into a per capita employment grant to be secured against the achievement of the original Northern Ireland employment target of 1,250? By means of this debate I draw the attention of the receiver to the novelty of a situation in which a loan was to be converted into a grant on the achievement of an employment target of 1,250. That employment figure was never achieved, so £9·07 million could be recovered by the Exchequer.

Why did Her Majesty's Government waive their right to recover the original grant, and upon what financial criteria was this decision based? If additional assistance was to be linked to an increase in the number of employees above 1,250, why was that assistance given when there was no — I repeat no — increase in the number of employees above that figure? In fact, the number of workers employed on the Lear Fan project never rose above 560. If the Government had decided that no financial assistance should be provided unless it was linked to jobs, why did they agree to extend a bank guarantee totalling $15 million to 31 December 1986 and to provide additional public funds up to a maximum of $30 million in what they described as

"a predetermined ratio with private sector money"?

It was a question not of throwing good money after bad but of throwing good taxpayers' money after private investment capital and relying upon the judgment of the private investor to get it right. That is a matter that the Government and the Industrial Development Board ought to take on board. It is not sufficient simply to say that private money should be added to any particular project, because that, too, might not be backed up by expertise. Where was the expertise on carbon fibre, on aviation fuel consumption or on private jet market research? The British public are entitled to be told the criteria for such an investment.

I was as much surprised in this case as I was in the case of De Lorean to see who were the people who influenced the Government of the day. The greatest enthusiast for the scheme was the wife of the inventor. She had no financial, commercial or aircraft expertise that was worthy of the attention of the British taxpayer. Even Mrs. Lear had to confess in 1981 that the company was over its budget and behind schedule. What was the Government's response? They appointed a new chairman who was an independent oil operator and a banker from Denver, Colorado. Where was his aircraft expertise?

The Government announced that any new funding of the Lear Fan project was to be by way of a secured loan, the security being the premises in Northern Ireland which, in a sense, belonged to the taxpayer and which were meaningless in terms of collateral. Even then the

Government hinted that such a loan would be set off against further grants. These are all matters for the Public Accounts Committee, which looked very carefully into the De Lorean affair and threw light on a number of corners that required light to be shed upon them. It must be the same here. Any analysis of this project shows clearly that there has been a waste of taxpayers' money, a waste that has been brought about by Government incompetence, ignorance and mismanagement. The only good thing to be said is that it cannot be laid at the door of the present Minister, who was not in post at the time. But it can be laid at the door of the Government of whom he is a member.

If the Minister cannot be held responsible for the financial arrangements made by his predecessor in 1982, he does hold some responsibility for the wayward fashion in which announcements have been made concerning the cessation of trading of Lear Fan. The Opposition sometimes offer the Government a fair wind —to borrow a phrase from my right hon. Friend the Member for Islwyn (Mr. Kinnock)—if not an entirely bipartisan policy when we deal with Northern Ireland matters. But we categorically condemn the Government for the cavalier, inopportune and, quite frankly, callous way in which important announcements concerning employment are made out of this House, out of the reach of the probing questions of Members of Parliament, out of the reach of those who are seeking to do their duty by their constituents, by whom I mean those who live not only in Northern Ireland but in the United Kingdom as a whole.

The Minister touched briefly upon the closure of the gas industry in Northern Ireland. Perhaps, through the usual channels, there may be an opportunity to discuss that matter. But the announcement was made on a "Long Good Friday"—to borrow the title of a recent film—and we have not yet had the opportunity of a full debate on the whys and the wherefores.

The announcement of the collapse of the Lear Fan project was leaked in a Sunday newspaper over Whitsun, and followed by a response to a written question from the hon. Member for Hazel Grove. To his credit, the Minister sought to inject a new reality into the project with his statement on the Floor of the House on 19 December 1984, when he declared that with new money available from private sources he hoped that the original agreements would be implemented quickly so that the work in Northern Ireland factories could be restarted as soon as possible. The fact remains that £57 million of taxpayers' money was poured into a project that was to yield not an aircraft manufacturing plant in Northern Ireland, but a plant to manufacture component parts. The real essence of the whole investment was that the manufacturing was to be done in Reno, Nevada.

I associate myself with the Minister's statement tonight — which he also made in response to the written question — and the statement of the hon. Member for Antrim, North that there is no reflection on the work force in Northern Ireland. There is nothing wrong with that work force. Like their counterparts on the mainland, they have lost their jobs, in one sense through clumsiness and incompetence, while those on the mainland have lost their jobs through the ideological bludgeoning of the Government. They have been exemplary in their standards of work and in their loyalty to their project. But loyalty, like patriotism, is not enough.

While conceding that it was a high-risk venture, little comfort can be garnered from the Minister's words that, had it succeeded, it would have contributed greatly to employment in and the economy of Northern Ireland. We all wish such projects well, but we must be alert to the dangers. It is that alertness that no doubt prompted my predecessor, my hon. Friend the Member for Hammersmith (Mr. Soley), to ask the former Minister to

"give a clear assurance that the Government are fully satisfied that they are getting all the information they need, especially of a technical and financial nature, to enable them to judge the future prospects of the company as well as the aircraft?"

The Minister responded:

"Yes. The financial and technical monitoring exercises that have been carried out are satisfactory. We are getting all the information that we need."—[*Official Report*, 23 February 1984; Vol. 54, c. 968.]

I doubt whether that information was available, and whether the Ministers and officials whose salaries we shall be voting tonight knew the difference between anhedral and dihedral wings.

Who checked out whether the Federal Aviation Administration would even give an air worthiness certificate because of the new technology involved? Who analysed the priorities of the Lear Fan company from a commercial standpoint and perceived that they were wrong, first, to get the certification, secondly, to produce the jet, and, thirdly, to market it? The potential market for an eight-seater private jet should have been tested and known and the prospects of getting an air worthiness certificate should have been thoroughly assessed before the taxpayer put even his financial little toe into the water.

The high risk lay in the fact that the aircraft was unlikely to receive, and has not received, an air worthiness certificate. One has to draw the parallel with De Lorean in that the same receiver is being used as in that case. His first duty is to secure the fixed and floating charge on the company's assets in Northern Ireland, and his second is to represent the Government's interests in the assets and technology of the Lear Fan company in the United States.

As we debate this order, we call into question not the Government's good faith, but their competence. They were singularly incompetent in the handling of the Lear Fan proposal, and they have done the taxpayer a disservice in the way that they have approached a technical problem, which should have been examined in much more depth.

"Though the mills of God grind slowly, yet they grind
exceeding small;
Though with patience He stands waiting, with
exactness grinds He all."

In the cases of De Lorean and of Lear Fan, He has ground exceedingly small and revealed the great difficulties and weaknesses in Northern Ireland for those who were looking for high investment and technology with little success.

I have taken on board the Minister's remark that two thirds of the work that had come to Northern Ireland had come from firms outside the Province, but that is no excuse for the incompetence with which this matter has been handled. It should be noted by the House, and no doubt it will be noted by the country.

Appropriation (Northern Ireland)

11.2 pm

Rev. William McCrea (Mid-Ulster): If there is a Division, we shall be voting for money coming to Northern Ireland. We believe that money is needed for agriculture, housing, jobs, roads and education. We also do not like direct rule. We want a fully devolved Government and Parliament in Northern Ireland, and the full democratic process honoured. That is shown by the fact that in the short time that we have tonight, we have to deal with such a wide range of matters that seriously affect the lives of the peoples of Northern Ireland.

Mr. Peter Robinson: Does my hon. Friend accept that we want one other thing in Northern Ireland — decent local government? Recently, however, we have seen the introduction into local government in Northern Ireland of the mouthpieces for murder and mayhem in our society. Will my hon. Friend ask the Minister what his response will be to the introduction of Sinn Fein chairmen?

Rev. William McCrea: I thank my hon. Friend for his intervention. Over the past few hours even the Minister may have realised that there are members of councils in Northern Ireland who will not welcome Sinn Fein, who will not let this pass easily and who will not allow it to be a one-night or a one-afternoon wonder. The hon. Member for Bath (Mr. Patten) will find that there are still in Northern Ireland Unionists worthy of that name and of the heritage that they thank God for.

My hon. Friend the Member for Antrim, North (Rev. Ian Paisley) has already mentioned councils. Unionists will not socialise with Sinn Fein, nor will they be used in any way to keep going a system which allows not only the representatives of murderers but murderers themselves to be councillors. If the Government think that we will sit down and look across at Sinn Fein councillors while they measure us up for coffins, they have another think coming. I have no intention of sitting there to be measured up for a coffin by any gunman of the IRA. Ulster needs good local government. Decent local government was destroyed when Sinn Fein councillors were allowed through the doors of the council chambers.

I come from a large agricultural constituency. I hope that for a change the Minister will give us some good news tonight for that industry. Lord Lyell told us that he had sympathy for our farmers. When the bank manager wags his finger to call a farmer into the bank, Lord Lyell's sympathy does not go far. We want more than sympathy. My hon. Friend the Member for Antrim, North mentioned the £7 million that is there to help them out. The Minister should tell us how that money will be given to Northern Ireland farming and agriculture.

The Minister of State has recognised the upward trend of unemployment in Northern Ireland; I think he genuinely appreciates the seriousness of the problem. I come from a constituency that has, the highest unemployment rate in the whole of the United Kingdom. What hope can the Minister give to my constituents in Mid-Ulster? What message can I take back to them concerning future employment? I want viable employment and genuine jobs. I do not want fly-by-nights. I do not want those who come in like De Lorean to use the British taxpayer and the United Kingdom and then disappear. Has the Minister any announcements to make about jobs for my Mid-Ulster constituents? I hope to get an answer to that question concerning the future well-being of my constituents.

Class III, vote 2, deals with expenditure by the Department of Economic Development on subsidies to electricity tariffs. May I draw the attention of the Minister once again to the unbearable burden on Northern Ireland industry, which is disadvantaged because the electricity tariff is pegged to the highest in England. There is a need for a fairer pegging of electricity tariffs to assist industry in the creation of jobs.

Class V deals with roads. I accept that Northern Ireland had some of the best road systems in the United Kingdom, but the roads are now in a deplorable state. What is to be done?

The Castledawson bypass issue may be a hardy annual, but the sooner the Minister moves the sooner the problem will disappear. I should be more than delighted to be able to forget about it and move on to the next town.

What about the Moneymore-Magherafelt road? The Minister promised to see whether works could be completed to make the road safer.

I have written to the Minister about Orlit housing. When will the legislation come into operation? When will the Housing Executive be able to buy back those houses and give the people their money?

The Watson park bungalows are also causing worry because they are still defective after money has been spent on them. I wrote to the Minister asking him to put in writing that his chief officers in the Northern Ireland Housing Executive are sure the money already spent is well spent. I fear that the money will be poured down the drain, as it was with De Lorean and Lear Fan. That will not solve the problem and the people will be left in an intolerable position after they have been moved out of their houses three or four times.

When shall I be able to close the file on the case of Mr. Crozier from Cookstown? I shall be happy to give the Minister my file on the case so that he can sift through it. I have written to the Prime Minister, to the Secretary of State, to Lord Hailsham and to the Under-Secretary of State for Northern Ireland. Mr. Crozier is to be given a pension for health reasons, but no one will provide the health reasons. All he wants is to be told why he is being pensioned off on health grounds; then he will take the pension. I do not want another letter saying, "We have nothing more to add", or, "I am sorry, the case has been looked at before, we have nothing more to say." I want an answer.

Fundamental changes are proposed in health and social service benefits. The Prime Minister has failed to tell the Leader of the Opposition what figures can be applied to the suggested benefits. Perhaps the Minister will disclose them to his hon. Friends from Northern Ireland who can pass them on to the Leader of the Opposition and our constituents.

11.14 pm

Mr. Ken Maginnis (Fermanagh and South Tyrone): I intervene, I must admit, as a protest at the length of time available for debate tonight. I do not intend to hold back the hon. Member for Bath (Mr. Patten) from replying to the debate. I am frustrated because this is the third time in succession that I have sat through debates. Two debates ago, I got about three minutes, I was not called on the last

occasion, and I assure the House that at one minute before quarter past eleven there is not adequate time for me to deal with the problems of my constituents in Fermanagh and South Tyrone and the difficulties that hon. Members representing Northern Ireland face under direct rule in trying to serve our constituents.

11.15 pm

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Chris Patten): It is a pleasure once again to wind up an appropriation order debate which, as is customary, travelled far and wide, albeit, as the hon. Member for Fermanagh and South Tyrone (Mr. Maginnis) indicated, for a rather shorter period than has sometimes been our good fortune.

I wish to try with the minimum of fuss to answer the main points raised in the debate. Any issues that I am not able to cover in the course of these necessarily abbreviated remarks I or my hon. Friends will follow up in correspondence with the hon. Gentlemen who raised them.

The hon. Member for Newry and Armagh (Mr. Nicholson) raised two substantive issues about housing. He spoke first—and this point was touched on by other hon. Gentlemen — about renovation grants, and in particular about the delays experienced by his constituents in receiving them. I am conscious that there has been criticism of the Housing Executive administration of the renovation grant scheme, but I know that the executive is keen to improve its performance as much as it can. It is important to note that in the year ended 31 December 1983 almost 27,000 improvement, conversion, intermediate and repairs grants were approved, and grant was paid in just over 24,000 cases. These figures increased to almost 32,000 and 27,000 respectively in 1984, illustrating the scale of the grants operation. While there was a backlog of grants applications which reached 8,400 in March 1984, this has now fallen back to just under 3,000. This situation arose from the substantial increase in demand for grant aid resulting from the 1983 housing order, which widened the scope of the renovation grant scheme in a number of respects. While I am satisfied with the steps taken to reduce delays in the processing of grant applications, I shall continue to keep the executive's performance in this area under review.

Mr. Maginnis: I am grateful to the hon. Gentleman for giving way, because this is one topic on which I wanted to spend some time tonight.

I hope that the Minister recalls the letter that he sent me on 24 February 1984 after I wrote to him about the possibility of ensuring that grants were paid to those people who were most in need, stating that this perennial difficulty of excessive demolition was preventing the most needy people from getting grants for houses. He told me that the 1979 house condition survey was out of date and that there would be a new house condition survey shortly. That was over a year ago. That house condition survey I have not seen, but I have heard that the contents prove that the single unfits, as they are known, are as numerous as they have ever been, and we have not even begun to scrape the surface. Would the hon. Gentleman comment on that?

Mr. Patten: I am glad to have the opportunity to do so. The house condition survey will be published shortly. The hon. Gentleman is correct to say that one of the matters that it has shown clearly is that, while we have made considerable progress in reducing unfitness, we have an increasing problem of disrepair. That has led me to feel even more strongly than I did when I replied to the hon. Gentleman last year that we have to look at the whole of our renovation grant aid to make sure that it is directed towards those people who are in greatest need and to properties that most need assistance. Therefore, I have set up a small committee composed of officials of my Department and of the Housing Executive which is looking at how we can target grant aid more effectively within the existing legislative framework. I hope very much that we shall have proposals to discuss with hon. Members before too long. The point made by the hon. Member for Fermanagh and South Tyrone is extremely important, and I hope that we shall be able to demonstrate that we are responding to it in good faith as soon as may be.

The hon. Member for Newry and Armagh also referred to Orlit dwellings and asked for greater speed in dealing with the Housing Executive stock of Orlits. The hon. Gentleman may be aware that the Housing Executive is already considering the options for individual estates following its technical investigations. Announcements will be made by the executive on an estate-by-estate basis as soon as possible after consultation with the tenants. I know that the executive is fully seized of the need to take action as quickly as possible.

The hon. Gentleman asked me to consider the sale of Orlit dwellings to tenants at a cost reflecting their condition. I shall look at that proposal, but I wonder whether the hon. Gentleman would see very much advantage for the tenant in becoming the owner of a dwelling which in some cases could have a life span of only five to 10 years without expensive remedial action.

The hon. Member for Mid-Ulster (Rev. William McCrea) asked about legislation to bring the position in Northern Ireland into line with that in Great Britain. We had slightly more difficulty than we anticipated in drafting the legislation. However, I hope that we shall be able to lay an order before the House very soon. In the meantime, as I have made clear time and again, any special hardship cases will be dealt with, as two have already, on an administrative basis. If the hon. Gentleman has other similar cases, I should be more than happy to consider them.

The hon. Member for Newry and Armagh asked about a number of agricultural matters, beginning with the shortage of cold storage facilities for intervention beef. He knows about my status as a tyro in these matters, but I can say that we are aware of the potential difficulties arising from limitations on freezing and storage capacity for intervention beef, and we have arranged for a study to be undertaken on the facilities available, the current incentives, the employment prospects, the future needs and how they might be met.

The hon. Member for Antrim, North (Rev. Ian Paisley), the hon. Member for Newry and Armagh, the hon. Member for Mid-Ulster and others mentioned, quite understandably, their concern about milk quotas. They spoke of the special difficulties facing the Northern Ireland dairy industry. I can assure the House that we are doing all we can to achieve the maximum possible relief for the Province's milk farmers. We accept that without additional quota for Northern Ireland, individual producers may find themselves in difficulties. The very low uptake under the outgoers scheme was most

[Mr. Patten]

unfortunate and, as my hon. Friend the Member for Brent, North (Dr. Boyson) said, we are continuing to seek a solution to the problem. As the hon. Member for Antrim, North asked, I shall convey the concern expressed by hon. Members to my noble Friend who is responsible for these matters in Northern Ireland and also to the Secretary of State.

The hon. Member for Antrim, North referred in the context of Lear Fan to Ulster workmanship. He was entirely right to say that it is second to none, as the success of Harland and Wolff, Shorts and many other companies has made clear.

The hon. Gentleman also asked about the future of Ballintoy harbour, which I enjoyed visiting with him on one memorable occasion when the sun shone, as it always does on the righteous. I shall look into the latest state of of play on Ballintoy and write to the hon. Gentleman about it.

The hon. Member for Antrim, North referred to the arguments for a regional library, and protested about the recent decision that the Belfast central library should not become a regional reference facility independent of the Belfast Education and Library Board. There is not the necessary support from the boards for such a change to the existing arrangements. They are apparently largely content with the provision under existing legislation enabling all boards to take advantage of the services provided by the Belfast central library.

The hon. Gentleman referred to the extent to which Carson's monument is turning green. My hon. Friend the Member for Belfast, East (Mr. Robinson) understandably raised that point. I have nothing to add to what I have already said to my hon. Friend, but I note the importance that the hon. Gentleman properly attaches to the cleaning of that statue.

The hon. Gentleman and the hon. Member for Mid-Ulster referred to the position in local government following the elections. I should like to make it clear again, as I did in a series of radio, television and newspaper interviews yesterday, that there has been and will be no change in the Government's policy towards Sinn Fein. No reasonable construction of my remarks yesterday could conceivably suggest that there would be. Finally, as the right hon. Member for Strangford (Mr. Taylor) said in a series of letters to newspapers, I hope that hon. Members will keep the electoral failures and successes of Sinn Fein in perspective. It did worse in the local elections than in the European elections or the general election, and considerably worse in the local government elections than three out of the four main constitutional parties.

The right hon. Member for South Down (Mr. Powell) asked me to give him an undertaking about scallop beds. He referred to the fisheries close to the coast of Northern Ireland. I reiterate the assurances given by my hon. Friend the Member for Brent, North in his opening speech, that the fisheries are closely monitored. If there is any evidence of their stocks being endangered, steps will be taken to have the beds closed. I hope that the right hon. Gentleman finds that assurance satisfactory.

The right hon. Gentleman asked about waste disposal and the relative responsibilities of district councils and my Department. As he knows, district councils have the statutory responsibility for the development of a waste disposal strategy for their areas. The identification and preparation of suitable sites is not a matter in which I can intervene. However, my Department is actively involved with district councils about waste management. We shall assist where possible. The right hon. Gentleman made some valuable suggestions about the extent to which we should take a greater lead in co-ordinating the various tasks of district councils in this respect, and I shall certainly come back to him on that point as positively as possible.

My hon. Friend the Member for Epping Forest (Sir J. Biggs-Davison), whom we always welcome to our debates, referred to the welcome increase in recent years in the number of extremely wise and perceptive holidaymakers, who come to Northern Ireland, and to the increased number of hon. Members who visit the Province, which is also to be welcomed. My hon. Friend will be pleased to know that my hon. Friend the Minister of State will shortly be chairing a conference on tourism to see how we can attract even more tourists to our shores.

The hon. Member for Middlesbrough (Mr. Bell), in a thoughtful speech, asked many detailed and serious questions about Lear Fan, which he will not expect me to answer during the next 60 seconds. However, they will be answered in due course in as full and open a way as possible—in other words in the fashion for which my hon. Friend the Minister of State is well known and respected.

I believe that I have answered most of the main points raised in the debate. I repeat that any detailed points will be answered in subsequent correspondence. This appropriation order shows once again that the Government are attempting to grapple with the extremely difficult problems of Northern Ireland in a reasonable and imaginative way, with a fair and reasonable allocation of public expenditure to support our policies and objectives. I trust that that will also be the view of the House.

Question put:—

The House divided: Ayes 133, Noes 5.

Division No. 229] **[11.30 pm**

Question accordingly agreed to.

Resolved,

That the draft Appropriation (No. 2) (Northern Ireland) Order 1985, which was laid before this House on 8th May, be approved.

Manchester Steel Ltd. (Closure)

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Major.]*

11.40 pm

Mr. Robert Litherland (Manchester, Central): I have chosen this subject for the Adjournment debate to give some of the facts about the context within which the Manchester Steel closure decision should be seen. Why is the closure of Manchester Steel Ltd. so exceptional? It is not just another isolated set of redundancies, because we have had such closures and redundancies in the past. The gradual decline in manufacturing goes back over a long period to the mid-1960s. In recent years the position has deteriorated rapidly, to such an extent that east Manchester has been ravaged by closures and redundancies.

How dramatically the situation has changed. East Manchester, once the workshop of the world with its expanding and prosperous light and heavy engineering industry, coal mining, chemical firms and textiles businesses, is barely recognisable now, with its deserted factories bearing witness to the changed fortunes of that part of Manchester.

In 1978, manufacturing employment accounted for some 63 per cent. of jobs in the area. Since then, job losses in manufacturing in east Manchester have become far more dramatic. Between 1979 and 1983, 12 firms employing more than 100 people have closed. They include Laurence Scott with 650 employees; Richard Johnson and Nephew with 610 employees; Easicut tools with 350 employees; Walkden and Makin with 270 and more recently GEC Switchgear has announced that it will be shedding about 270 jobs from its Openshaw factory.

Between 1971 and 1985, 20,000 jobs have been lost in east Manchester and the redundancies between 1981 and 1984 account for about 4,500 jobs. With such job losses the social impact has been catastrophic. Until 1980, unemployment in that part of the city compared with the national average. The effect of the closures and redundancies in east Manchester has resulted in the unemployment rate almost doubling between 1980 and 1981.

The environmental consequences of those changes can be seen in the vacant, under-used land and buildings and the unattractive image that that gives the area. Nearly one quarter of the industrial land in east Manchester is now vacant. Manchester city council, through its east Manchester initiative, has taken steps to try to remedy the situation and to date some £8 million has been spent on acquiring land and buildings to carry out demolition, but more funding will be required by the city council. It has pressed the case for funds to be made available on a more regularly programmed basis, arguing that £10 million is needed over the next three years to reclaim derelict land and buildings.

Every closure adds to the enormity of the problem, and now we have Manchester Steel. It is part of the process of losing manufacturing in east Manchester. It is another nail in the coffin of this once vibrant working area and another attack on workers who have the skill and the will to work, but who are having their pride torn from them by a notice of closure which says that they are expendable and are no longer required. To add insult to injury, the decision to close Manchester Steel was taken in secret, behind closed doors in a foreign country. The company was owned by

[Mr. Robert Litherland]

Elkem of Norway and discussions had been taking place for nine months and the news broke through a leak of information.

In 1982, the unions and the management, assisted by the city council, had combined to save the firm. The workers were left in the dark about what was taking place. Their thanks was no consultation but merely a statement of the cold hard facts that Manchester Steel in my constituency and the Bidston plants on Merseyside were to close. Elkem acted in a dishonourable and underhand way.

What about the Government's attitude? Hiding behind the smokescreen of commercial confidentiality and not being prepared to intervene in a free market commercial transaction, they did nothing. In doing nothing, the Government acquiesced to the takeover by Allied Steel and Wire, which is owned by British Steel and GKN.

We have the ridiculous situation of workers paying their taxes, and money from those taxes being allocated to Allied Steel which uses it to allow foreign firms to sell their steel involvement in the United Kingdom, and the plants are shut. How nice and convenient for the Government and their rationalisation programme.

When a deputation from Manchester Steel met the Under-Secretary of State for Trade and Industry, he professed not to know that negotiations for the takeover were under way. Yet the takeover was being considered by the Commission of the European Community. A press release of 20 May said:

"The Commission has authorised Allied Steel and Wire Holdings Ltd . . . to acquire the entire share capital of Manchester Steel Ltd . . . under article 66 of the ECSC Treaty."

In a conversation with Mr. Keith Donoghue, who made the decision on Manchester Steel, the local MEP, Mr. Eddy Newman, was told that those consulted included the Department of Trade and Industry, which not only gave its authorisation, but pointed out to the ECSC that the takeover would suit the development of the steel industry. Who is running this country? Are diktats coming from the European Community?

To the workers, terminology such as "rationalisation" means extinction. They can see the effects on the lives of their families, on the suppliers to Manchester Steel, on services dependent on the purchasing power of the money earned by Manchester Steel workers, on the local shops, pubs and clubs and on home service suppliers. They recognise that the closure creates fears for job security elsewhere.

More families will go on to supplementary and housing benefit, and there will be more mental strain from unemployment. I was told that there were four suicides after the closure of Richard Johnson and Nephew, which had been in existence for 200 years before it was bought by a South African consortium and closed within 18 months. The locks were on the gates when the workers returned to the plant.

There will be family breakdowns and more referrals to health and welfare services. Because of what is happening to the workers and their families and to the area where they live, they will fight the closure to the bitter end. I know these workers and I represent the area. They have my fullest support and they are supported by their union and the community, which is sick and tired of the relentless attack on its living standards. The workers have the support of all Labour Members in the Manchester area. I received a letter today from my right hon. Friend the Member for Ashton-under-Lyne (Mr. Sheldon) expressing his support. In addition, my hon. Friend the Member for Birkenhead (Mr. Field) will be speaking in the debate.

I have spoken of the local interest, but what about the national interest? In their submission to the Office of Fair Trading the solicitors acting for the Amalgamated Association of Wiredrawers and Kindred Workers state:

"There are a number of reasons why our clients believe that this transaction would be against the national interest. In effect it would concentrate the production of 5·5 to 13·5 mm rod in the hands of one company alone in the United Kingdom. It should be noted also that Manchester Steel is the sole manufacturer, in the country, of 100 to 110 mm concast billet for re-rolling, in the main. These observations touch the surface only of a potentially serious situation and it is our clients' wish, through us, to forumulate a detailed complaint supported by evidence."

The evidence is that Manchester Steel is the only independent manufacturer of 100 mm billet selling its products on the market, as British Steel at Scunthorpe ceased production of 100 mm billet about two months ago. There is an increasing demand for this product but also a shortage. If manufacture was in the hands of Allied Steel alone, the re-rollers would have to purchase from that company or import the product, so Allied Steel would be in a position to control both the supply and the price. We believe that the matter should be referred to the Monopolies and Mergers Commission, because if Manchester Steel ceased production Allied Steel would become the major source of supply.

Many independent wiredrawers obtain their rod requirements from Manchester Steel. Closure would mean that they would have to purchase their requirements from Allied Steel and would have to pay "the price". The alternative for both wiredrawers and reinforcement engineers would be imports.

The Manchester and Bidston rolling mills are flexible and produce small quantities with relatively short lead times, an essential service to many of the small independent wiredrawers. That facility to the market would be lost if Manchester Steel was closed. Allied Steel is not geared to that degree of flexibility. Furthermore, its own downstream interests are in direct competition with the small independent companies to which I have referred.

The Manchester Steel plants are modern. A great deal of finance was put into refurbishing the plant in my constituency. The company has flexible working practices. Closure would leave less flexible plant to meet the market requirements.

The United Kingdom generates about 8 million tonnes of scrap per year, of which 4 million tonnes are exported, mainly to Spain. The scrap, converted to steel, is then exported to other countries, including the United Kingdom. If Manchester Steel closes, it is likely that much of the 500,000 tonnes of scrap used by that company would be exported and that some would return to this country as the finished product.

I believe that the observations made by the unions should receive consideration by the Monopolies and Mergers Commission. We insist upon that. The Government's replies to my questions are just not good enough. When I talk about the future of Manchester Steel I receive the bland reply that it is up to the new lords and

masters of the company to make the decisions. What part do the Government play? The diktats seem to come from Europe or from high finance somewhere while the Government just stand back and wash their hands of the problem as though they had no moral obligations in the matter.

The Government have a moral obligation to be helpful should any interest be shown by an organisation wishing to acquire Manchester Steel. It is understood that members of senior management of the company were instructed not to look for a bid in the open market. It would be in the interest of the nation in general and of east Manchester in particular if Manchester Steel survived. We want the Government to act before the situation becomes irretrievable.

When we talk about closures and so on, we are talking not simply about statistics and percentages: we are talking about people, human beings, whose only crime is a desire to work. The workers believe that Elkem has sold them out and that the Government have betrayed them. They are left wondering to whom to turn and what hope there is for them and their families. Most of them are youngsters with mortgages and other commitments. They see ahead a path of hopelessness. We want the Government now to say exactly where they stand on this issue and whether they have become allied to the takeover and closure of Manchester Steel.

11.56 pm

Mr. Frank Field (Birkenhead): I thank my hon. Friend the Member for Manchester, Central (Mr. Litherland) for initiating this debate and for permitting me to intervene. I do so because, as he explained, Manchester Steel also owned a plant in Birkenhead.

I wish to underline many of the points that my hon. Friend made, particularly the fact that Manchester and Birkenhead already suffer from massively high unemployment. In Bidston, in my constituency, the unemployment rate is in excess of 40 per cent. The mill in Birkenhead, like the one in Manchester, has turned the corner financially.

We are talking also about a takeover in both areas by a company, the main aim of which is to destroy rather than to promote jobs. We are speaking of a takeover bid of a company which, with full union support, has seen a major programme of modernisation and reform.

While I do not wish to deflect thought from the main thrust of my hon. Friend's main comments—particularly when he asked what the Government proposed to do in the present situation—I must comment on the role that Elkem has played in these proceedings. My hon. Friend noted that the negotiations to sell the company and to destroy so many jobs had been going on in secret for nine months.

This Norwegian company not only prides itself on having good industrial relations but it usually talks of worker involvement. However, when we consider Elkem's involvement in this matter, we see that it is not just a question of what is left to be desired but that practically everything is left to be desired about its behaviour. Elkem has behaved badly. It now has a moral responsibility to use its influence to ensure that as many jobs as possible, in Manchester and Birkenhead, are saved.

This is in some respects an unusual Adjournment debate. A number of Back-Bench Members are present, as are two Ministers. I am sure that the Parliamentary Under-Secretary of State for Energy, who has taken a close interest in the future of the steel mill at Bidston, will be interested in what his hon. Friend the Parliamentary Under-Secretary of State for Trade and Industry has to say in replying to the debate.

12 midnight

The Parliamentary Under-Secretary of State for Trade and Industry (Mr. John Butcher): First, I thank the hon. Member for Manchester, Central (Mr. Litherland) raising this question. He has every right to do so, bearing in mind the dramatic impact that this closure is having upon his constituency and the unhappy history of unemployment in this sector of Manchester, to which he so vividly referred.

The hon. Member for Birkenhead (Mr. Field) drew attention to the fact that this is an unusual Adjournment debate because an unusually large number of hon. Members are present. I acknowledge also the interest of my hon. Friend the Member for Bury, North (Mr. Burt) as the secretary of the north-west group of Conservative Members of Parliament. He has pursued his inquiries in correspondence with my hon. Friend the Minister of State. I hope to be able to answer all of the questions that have been asked.

As a matter of general principle, the Government recognise that the manufacturing sector in the United Kingdom produces a far higher proportion of internationally tradable goods than does the service sector. For that reason, I join the hon. Member for Manchester, Central in stating that we believe that this country's manufacturing sector is our prime generator of wealth and that this will always be the case. Therefore, we share he hon. Gentleman's concern that skills in the manufacturing sector should be used to the fullest possible extent. However, we are faced with some excruciating dilemmas in the steel industry, not only on a United Kingdom but on a European basis. I should therefore like to deal with that area of influence, because it is possible that the hon. Gentleman has confused one or two matters in that area.

I was able recently to gauge the depth of feeling of the hon. Gentleman and his constituents when I met a delegation of representatives of the work force from Manchester Steel. It was led by the hon. Members for Manchester, Central and for Birkenhead, whose constituency includes Manchester Steel's other plant at Bidston.

I propose to respond to the points that have been made under two broad headings: first, to make clear the Government's position on the proposed closure of Manchester Steel and to set it in the wider context of the problems faced by the steel industry, outlined by the hon. Member for Manchester, Central, and, secondly, to draw attention to the steps which the Government are taking to encourage job opportunities in Manchester.

I fully recognise the disappointment and frustration which must have been caused by the closure announcement, because the company had survived an earlier threat of closure in 1982. Manchester Steel remained in business at that time largely because the work force agreed to a cost reduction programme. That made their pain, in the light of the recent announcement, that much more difficult to bear.

[Mr. John Butcher]

Considerable improvements were made, but regrettably they have not been sufficient to persuade Elkem to retain the production facilities at Manchester and Bidston in the face of stagnant markets.

Many of the problems of the industry which existed in 1982 still remain. Depressed demand for steel products continues and substantial overcapacity exists, with consequential effects on efficiency and profitability. Other parts of the steel industry face the same difficulties, both here and throughout Europe.

Painful measures have had to be taken throughout the EC to stabilise the market, to restructure the industry, and to remove excess capacity. Behind those terms lie the social and human difficulties about which we have heard. This process has been difficult and has resulted in large-scale redundancies both here and on the continent. That point has been raised by my hon. Friend the Member for Wirral, West (Mr. Hunt) who is here this evening. But only by this means can an efficient and profitable industry be re-established, with reasonable hopes of longer-term job security for those remaining in the industry, although that is of no consolation to those who are the casualties of this process. In this context, it is estimated that in Manchester Steel's product area, capacity utilisation is between only 65 and 70 per cent. Much higher levels are needed for sustained profitability and viability.

The Government's position on further restructuring in the steel industry is quite clear. Where private sector firms, such as Allied Steel and Wire and Manchester Steel, are concerned, it is for the firms themselves to decide what rationalisation is necessary and what form it should take. The firms in the industry are best placed to know what measures are needed, and to take decisions based on their commercial judgment. It would be wrong for the Government to second-guess or seek to influence their plans.

The Government were therefore not involved in the commercial negotiations which led up to ASW buying Manchester Steel from Elkem. We were, however, kept in touch with developments on the usual commercially confidential basis by ASW.

There have been some suggestions that ASW is not a genuine private sector company because of the British Steel Corporation's major — now 48 per cent. — shareholding. Let me make it clear tht since ASW was set up as a joint venture between BSC and GKN in 1981, the Government have always regarded it very clearly as a private sector firm. It therefore makes its own commercial decisions without any need for Government approval, just like any other private sector business.

It has been suggested that even if the rolling operations were to close down steelmaking, the steelmaking aspect of Manchester Steel should be kept open because closure could cause problems in the supply of billets to British customers. I understand that ASW has deferred a decision about the future of the Openshaw billet furnace. No doubt it will take into account the market prospects before finalising its decision. But I would emphasise yet again that it is for the company to judge whether the retention of the facilities is viable.

Equally, if other steelmakers or steel buyers of those products wished to make proposals to ASW about supplies of billet, or the possible purchase of either of the steelmaking plants, they are free to do so. This is not a matter for the Government, as the earlier negotiations were not, and it is for ASW to consider any proposals on their commercial merits. I understand that that is its precise attitude.

I turn now to the wider effects of the planned closure of Manchester Steel on the Manchester area, and north-east Manchester in particular. The Government recognise that this area has suffered considerably from the effects of industrial decline in recent years. Government policies as a whole, both in the steel industry and more widely, are designed to re-establish efficient and internationally competitive businesses. But success will not necessarily result in increased job opportunities in the same sectors as those where job losses have occurred in the past.

Against that background, the Government have ensured that considerable resources are directed to the Manchester area to alleviate the worst effects of industrial decline. As the hon. Gentleman will know, the Government made part of Manchester, including the north-east of the city, an assisted area last November. That means that the area now benefits from a number of schemes of support for industry which would not otherwise be available. These include regional selective assistance. Since assisted status was granted, the north-west regional office has received 18 firm inquiries about regional selective assistance from firms in north-east Manchester, of which one is currently at an advanced stage of appraisal. I very much hope that the number of good projects submitted for appraisal will increase.

North-east Manchester is also eligible for derelict land clearance grant, designed to assist the economic recovery of rundown areas by providing resources for clearing derelict sites. The sum of £600,000 was provided in 1984-85 for north-east Manchester to clear sites for industrial or residential development, or to improve housing conditions and community facilities. If the Openshaw plant were to close, it is possible that assistance under that scheme could be provided towards the clearance of the site.

North-east Manchester receives considerable help from the Department of the Environment's inner city policy. Three industrial improvement areas have been designated and the inner urban area of Manchester benefits from partnership area status — the highest designation under the urban programme. Since 1982, that has made available some £4 million of aid for 198 industrial and environmental improvement projects in Manchester.

Manchester is also the focus of one of five city action teams we launched in April. The teams' task will be to look at ways of helping east Manchester, through the combined schemes offered by my Department, the Department of the Environment and the Manpower Services Commission.

Through all these measures, the Government are doing a great deal to help the industrial base of north-east Manchester, and the job prospects of those who live there.

Tonight's debate has raised a number of very broad as well as understandably specific issues. I say to hon. Members on both sides of the House that the Government do not underestimate the social cost of these closures. Neither are we unsympathetic.

We are unanimous in condemning the unwelcome pressures that come from an increase in unemployment in any local community. But I am bound to say that, faced with that, we must look also at those other broader

industrial implications. We believe that there is a suite of policies available that will help us to address each side of this particularly difficult equation.

Question put and agreed to.

Adjourned accordingly at ten minutes past Twelve o'clock.

House of Commons

Thursday 6 June 1985

The House met at half-past Two O'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

PRIVATE BUSINESS

C-POULTRY COMPANY LIMITED BILL
Read the Third time, and passed.

ROYAL BANK OF SCOTLAND BILL *(By Order)*
Lords amendments agreed to.

BATH CITY COUNCIL BILL *[Lords] (By Order)*
Read the Third time, and passed, with an amendment.

PLYMOUTH MARINE EVENTS BASE BILL *(By Order)*
Read the Third time, and passed.

YORKSHIRE WATER AUTHORITY BILL *(By Order)*
Order for Second Reading read.
To be read a Second time upon Thursday 13 June.

Oral Answers to Questions

HOME DEPARTMENT

Temporary Admissions

1. **Mrs. Clwyd** asked the Secretary of State for the Home Department how many passengers granted temporary admission to the United Kingdom absconded in 1984; and what percentage this is of those so admitted.

The Minister of State, Home Office (Mr. David Waddington): In 1984 a total of 8,527 passengers were given temporary admission either pending further examination or after refusal of leave to enter. Of these, 187 or just over 2 per cent absconded.

Mrs. Clwyd: Does the hon. and learned Gentleman agree that Tamils fleeing persecution would make as good citizens of this country as the children of the Lithuanians who fled from their country a generation ago?

Mr. Waddington: The matter raised by the hon. Lady is of great importance, but it goes very wide of this question. A short time ago we announced what we think is a fair policy towards Tamils. First, we shall acknowledge and honour our obligations under the United Nations convention on refugees. Secondly, we have said that we shall not send back any Tamil who would suffer severe hardship if returned.

Ms. Clare Short: In view of those figures, does the Minister agree that his officials are refusing to let many genuine visitors into this country and putting them in the humiliating position of being detained at airports and having to seek out a Member of Parliament in order to get permission to see their relatives? Does the hon. and learned Gentleman also agree that we should——

Mr. Speaker: Order. The question is about absconding. Is not this matter a little wide of the question?

Ms. Short: No, Mr. Speaker.

Mr. Speaker: The hon. Lady may proceed.

Ms. Short: It is absolutely in order.

Mr. Speaker: With respect, I decide that.

Mr. Waddington: I am always willing to oblige, Mr. Speaker. Some might say that the low level of absconding confirms the judgment of immigration officers in granting temporary admission. It is somewhat illogical to argue that, because people have not absconded, they must have qualified for entry as visitors and therefore were wrongly refused entry.

Mr. Dubs: Will the hon. and learned Gentleman confirm that last Tuesday evening, for the first time, a Tamil who had sought asylum in this country was returned direct to Sri Lanka and that that occurred because of an administrative muddle by Home Office officials? Will the hon. and learned Gentleman now say categorically——

Mr. Speaker: Order. The same rules apply to the Front Bench as to the Back Bench. That question would more correctly be asked on question No. 8.

Mr. Dubs: The issue concerns a person who, I believe, was held in custody to prevent him absconding.

Mr. Speaker: The point is that he did not abscond.

Police Forces (Strength)

2. **Mr. Hunter** asked the Secretary of State for the Home Department if he is satisfied with the present manning levels of police forces.

The Secretary of State for the Home Department (Mr. Leon Brittan): There were 120,364 police officers and 39,299 civilian staff in England and Wales on 30 April. This was a total increase of 12,919 since May 1979; it was also an increase of 461 since March of this year.

Mr. Hunter: I applaud the professionalism and dedication of the police and welcome the measures that the Government have taken to increase manpower, but the fact remains that the burden of responsibility and duty that the police must now shoulder has increased significantly since 1979. In some parts of the country there appears to be little more than a minimum level of effective policing. Will the Government give urgent consideration to a further increase in police manpower?

Mr. Brittan: I agree that the burdens on the police since 1979 have increased, and it is for exactly that reason that the numbers of police have been increased.

With regard to the position in particular parts of the country, obviously I consider applications for increases in police establishment on their merits.

Mr. Dobson: If there are sufficient police, why have the numbers of crimes increased from 2·5 million in 1979 to 3·5 million in 1984?

Mr. Brittan: I think that the hon. Gentleman knows enough about the causes of crime to realise that they relate

as much to what criminals do as to the presence of policemen. Were it not for the strengthening of the forces of law and order, I have no doubt whatever that, with the increase in crime that is occurring all over the Western world, crime would be far worse in this country.

Mrs. Ann Winterton: Is my right hon. and learned Friend aware that, in cases recently brought to my attention, there has been a delay of over 15 minutes in response to an emergency call before even one police officer has arrived on the scene? Obviously, further action, such as an arrest, is precluded until reinforcements arrive. Does my right hon. and learned Friend agree that that is a reflection of inadequate manning levels and that the public should be assured that they will have a prompt and efficient response to any emergency call?

Mr. Brittan: I agree that it is important that emergency calls should be dealt with on an emergency basis. My hon. Friend obviously has a particular case in mind. If she would like to get in touch with me, I shall look into it and see what went wrong.

Mr. Soley: Given that the Home Secretary thinks that he has done so much for the police in manning and other areas, why does he think that he received such a hostile reception at the police conference?

Mr. Brittan: The hon. Gentleman might like to compare that response with the one that his right hon. Friend received.

Mr. Hayes: I appreciate that my right hon. and learned Friend is committed to doing everything he can to ensure that we have an efficient and effective police force, but is he aware that there is widespread concern among officers in the metropolis that the present restrictions on overtime may be hampering inquiries? Will he investigate those allegations?

Mr. Brittan: It is important that the police should operate efficiently. I think that the measures that the commissioner has introduced to regulate overtime are an important part of the process of ensuring that the police do operate efficiently.

Coal Industry Dispute

3. **Mr. Skinner** asked the Secretary of State for the Home Department how many miners arrested during the miners' strike are still in prison; and if he will make a statement.

The Parliamentary Under-Secretary of State for the Home Department (Mr. David Mellor): The occupation of prisoners is not recorded centrally.

Mr. Skinner: Is the Minister aware that during the miners' strike most Ministers talked of the strike as being a political strike? If that is the case, those miners who are still in prison are political prisoners. If it is in order for Ministers to trot over to east European countries and claim that there are political prisoners there who should be brought out, surely it is right for Labour Members to call for an amnesty for those miners who are in prison. Would the Minister not be better disposed rounding up the crooks at Johnson Matthey who have been giving out backhanders in order to get £75 million in rescue deals?

Mr. Mellor: The logical powers of the hon. Gentleman make those of Lewis Carroll and Edward Lear appear positively prosaic by comparison.

Shoplifting

4. **Mr. Janner** asked the Secretary of State for the Home Department how many people tried on indictment for shoplifting in 1983, 1984, and 1985, respectively, were acquitted.

Mr. Mellor: In England and Wales in 1983, 1,133 persons were acquitted in the Crown court of theft from shops, and 3,362 were found guilty. Corresponding information for 1984 and 1985 is not yet available.

Mr. Janner: As I am sure the Minister will agree, the situation in this area of law and practice is totally unsatisfactory. Will he confirm that when the new independent prosecution service comes into operation the prosecution of accused shoplifters will no longer be left to shopkeepers, and that meanwhile he will give instructions to the police to follow the same sort of procedures when deciding whom to prosecute—where they do—as are now followed successfully and well in areas such as Essex and Leicester?

Mr. Mellor: I appreciate the hon. and learned Gentleman's interest, which I share, in this matter. I am happy to confirm that one of the many beneficial consequences of the new independent prosecution system will be that in the one area of the country where prosecutions for these offences are habitually undertaken by the stores—that is, in Greater London—prosecutions will be taken over for the most part by the independent prosecution service. The hon. and learned Gentleman will welcome the fact that in the circular sent out by the Home Office in February about cautioning, particular attention was drawn to the importance of cautioning in relation to vulnerable elderly offenders. He will also be interested to know that of the number of offenders over 60 cautioned and found guilty, the proportion cautioned increased from 48 per cent. in 1980 to 61 per cent. in 1983. The circular will probably lead to an increase in those figures.

Mr. Adley: Is my hon. Friend aware that as long ago as 1972 I had my first Adjournment debate on this subject, when my right hon. and learned Friend the Member for Warrington, South (Mr. Carlisle) accepted that there was a direct link between the increasing number of self-service stores and the increase in shoplifting? Does the Home Office accept that where trading methods cause crime, that cause and effect should not be ignored by society?

Mr. Mellor: The issue of prevention is crucial and we continue to have well in mind the point that my hon. Friend makes.

Primary Purpose Rule

5. **Mr. Pike** asked the Secretary of State for the Home Department if he will publish the instructions to entry certificate officers regarding the primary purpose rule.

6. **Mr. Simon Hughes** asked the Secretary of State for the Home Department whether he will now introduce legislation to abolish the primary purpose rule for fiancés and husbands wishing to join partners in the United Kingdom.

Mr. Waddington: I will, with permission, answer this question and question No. 6 together.

Mr. Hughes: On a point of order, Mr. Speaker. Can these two questions be answered by the Home Secretary rather than by an Under-Secretary?

Hon. Members: Sit down.

Mr. Speaker: Order. The hon. Member knows that that is not a point of order for me. Who answers questions is a matter for the Department concerned.

Mr. Waddington: Instructions to immigration staff are being reviewed, in the course of which the extent to which they can be published will be considered. The issue of guidance to entry clearance officers is a matter for my right hon. and learned Friend the Foreign and Commonwealth Secretary. The Government do not intend to abolish the primary purpose test.

Mr. Pike: Is the hon. and learned Gentleman aware that this rule causes more difficulties than most other aspects of immigration policy? In view of the recent decision of the European Court of Human Rights, may we have an assurance that, when changes are made, men coming into the country will be treated on the same basis as women coming here? Is the Minister further aware that that does not mean any change being made adversely? We want change in the right direction, so that the position as it now applies to women is extended to men.

Mr. Waddington: It would be absurd if, having tightened up the work permit system to prevent young men coming here and going on to the labour market, we were to allow those same young men to come here by using marriage as a device. The judgment to which the hon. Gentleman refers does not directly concern the primary purpose rule, but obviously we are now considering the whole position in the light of the judgment and will announce our conclusions in due course.

Mr. Hughes: Perhaps one day the Home Secretary will take some responsibility for these matters. In the meantime, will the Government respond — as the Government, whom they assert they are, of law and order —by obeying the 12th finding against this country by the European Court of Human Rights? As the Government, as they assert they are, of the family, will they allow husbands and fiancés to come to this country with their families? As the Government, as they assert they are, of equal opportunity, will they ensure that we have a new set of immigration laws before the House rises for the summer? May we also be assured that nobody who is at present in breach of the rules which have been found to be contrary to human rights is penalised, and that that will apply from the date of the Strasbourg ruling?

Mr. Waddington: It seems to have escaped the hon. Gentleman's notice that we first accepted the right of individual petition to the court back in 1966. Only in 1981 did France accept that right. In those circumstances, and as many other countries still do not accept the right of individual petition to the court, it is not surprising that more judgments have been made against the British Government than against other Governments.

The country would be immensely surprised if, having willed a firm and fair immigration control, we now took the view that anybody who enters into a marriage, irrespective of whether that marriage is entered into for immigration purposes, should be able to come here.

Mr. Stanbrook: On the question of the judgment by the European Court of Human Rights, are the Government content that a group of unelected foreigners should legislate for this country on matters of political and social importance?

Mr. Waddington: We adhere to the convention and we shall abide by it. We shall make rule changes, but my hon. Friend will have to be patient, because we shall have to study the judgment carefully.

Mr. Watts: Does my hon. Friend agree that the primary purpose rule is an essential safeguard for many brides, such as those in my constituency, about whom I have written to my hon. Friend, who were abandoned by their husbands when the two-year period necessary for their husbands to have an unlimited right to remain here expired?

Mr. Waddington: The justification for the primary purpose rule is that it is a necessary part of our immigration control, but we should be stupid not to recognise that social problems are involved. My hon. Friend is absolutely right to hint at them today. We all know of cases where the primary purpose rule has been a safeguard for young women here.

Mr. Dubs: Is the Minister aware that he made an astonishing blunder in answering an earlier question this afternoon? Is he further aware——

Mr. Speaker: Order. The hon. Gentleman cannot ask that. We have passed that question.

Mr. Dubs: Is the Minister aware that he made an astonishing blunder in answering a question just a moment ago? Is he further aware that he said that he was considering what to do about the European Court decision, yet earlier he said that the Government did not intend to abolish the primary purpose test? As the primary purpose test was the subject of the condemnation of our immigration practices by the European Court, because it is a key element in sex discrimination, how can the Minister say that he is open-minded and considering the result? He has already said that he has made up his mind.

Mr. Waddington: The judgment does not directly concern the primary purpose rule. I repeat that we shall study the judgment with care and do that which is necessary.

Several Hon. Members *rose*——

Mr. Speaker: Order. I apologise to the hon. Member for Battersea (Mr. Dubs), but I got the meaning of his question wrong.

Sports Facilities (Safety)

7. **Mr. Alton** asked the Secretary of State for the Home Department whether he will make a statement on the implications for safety and security at other sports facilities in the light of the disaster at Bradford City association football club.

Mr. Brittan: While those will in the longer term be matters upon which the Government will look to Mr. Justice Popplewell's inquiry for advice, I have taken the following immediate steps as a result of my statement on 13 May. First, chief fire officers were asked on 16 May as a matter of urgency to visit all uncertificated sports stadia within the definition of the 1975 Act and to advise management on any necessary safety measures.

Secondly, on 23 May, consultation letters were sent to the football authorities and other interested parties on the timetable for designation of the third and fourth division Football League grounds, which I had promised would be put in hand immediately.

Thirdly, on the same day, I announced to the Rugby League my intention also to extend designation, although not necessarily on the same time scale, to the grounds of clubs in divisions 1 and 2 of the Rugby League.

Mr. Alton: I am grateful to the Home Secretary for that reply. How long will he give the clubs before they are expected to implement the Prime Minister's recommendations on personal security cards, the security of grounds and segregation? Will he be entering into talks, even if informal, with the organisers of sports in other grounds? What response——

Mr. Heffer: On a point of order, Mr. Speaker. The hon. Gentleman is not in order.

Mr. Speaker: Order. The hon. Member for Liverpool, Mossley Hill (Mr. Alton) must keep in order.

Mr. Alton: I am in order, Mr. Speaker. A supplementary question is in order.

What response will the Home Secretary give to those clubs which have asked for funds to carry out much needed improvements to their grounds?

Mr. Brittan: I think that the question of cards and other such matters go beyond the question, but those matters are being actively discussed with the football authorities. On the question of funds, the hon. Gentleman will recall what my right hon. Friend the Prime Minister said on Tuesday.

Mr. Waller: While it appears certain that association football clubs can do something to make their grounds safer through funds available from the Football Grounds Improvement Trust, will my right hon. and learned Friend consult his right hon. and hon. Friends about the particular problems of Rugby League clubs, many of which have old wooden stands, but, unfortunately, no similar recourse to funds?

Mr. Brittan: My hon. Friend the Minister with responsibility for sport will be considering with the Rugby League the implications of the proposed extension of designation to the grounds of clubs in divisions 1 and 2 of the Rugby League. My hon. Friend will recall my reference to the difference in the time scales for football and rugby.

I stress that clubs have a responsibility to ensure the safety of the public, in the same way as the operators of any place of entertainment have that responsibility.

Mr. Heffer: Will the Home Secretary explain to the hon. Member for Liverpool, Mossley Hill (Mr. Alton) that there is a great difference between someone unfortunately dropping a matchstick and setting a stand on fire in Bradford, and football hooliganism? Will he also explain to him that it is about time he stopped using the House of Commons for his abusive activities, as he does in relation to all subjects, rather than dealing with the issue?

Mr. Brittan: I do not think that I should use the opportunity of such a serious question to intervene in an intra-Liverpool dispute. Although broadly I agree with what the hon. Gentleman said, there is a relationship between security and safety. It is for exactly that reason that I asked Mr. Justice Popplewell to look at both aspects of the matter. It does not take long for the House to consider the locking of exits, for example, to realise the connection.

Mr. Eldon Griffiths: While very much welcoming what my right hon. and learned Friend has said—that it is the responsibility of football clubs to ensure the safety and security of those who go to their grounds—may I ask him to pay particular regard to the implications for police manpower of any of the changes that may be proposed? Will he also offer to the House his view on the point that football clubs might spend a little less money on the transfer of players and a little more on safety at their grounds?

Mr. Brittan: I shall draw my hon. Friend's second point to the attention of my hon. Friend the Minister with responsibility for sport. I agree with my hon. Friend's first point. I hope that any changes that are introduced following the examination of these tragic matters will take full account of police manpower and will ease rather than add to the burdens on the police.

Mr. Torney: Will the Home Secretary further consider the suggestion that I made in my speech immediately after the Bradford city football ground fire, that sprinkler systems should be installed in all football grounds and in all other places of a similar nature and that orders should be given that doors must not be locked while large numbers of people are inside? Does he agree that if sprinklers had been in place inside Bradford city football ground the death toll and the number of injuries would have been much lower?

Mr. Brittan: I ought not to speculate upon the hon. Gentleman's last point. However, I agree that both of the points to which he has referred will need to be considered in the light of the findings of Mr. Justice Popplewell in his interim report.

Mr. Tony Banks: While the designation of third and fourth division football grounds is to be welcomed, can the Home Secretary tell the House whether his colleagues are discussing the possibility of making loans available to league clubs to carry out the necessary safety improvements? If not, designation will result in the closing of a number of third and fourth division grounds.

Mr. Brittan: I have already explained that the financing of such safety measures as have been taken or are to be taken to improve spectator safety is being considered by the working group under the chairmanship of my hon. Friend the Minister with responsibility for sport. The surveyors of the Football Grounds Improvement Trust are assessing the likely cost. Until that process has been completed it would not be sensible to make any judgments.

Immigration Act 1971

8. **Dr. Mawhinney** asked the Secretary of State for the Home Department if he has any plans to repeal the Immigration Act 1971.

Mr. Brittan: No, Sir.

Dr. Mawhinney: I am grateful to my right hon. and learned Friend for his succinct answer. Does he agree that to repeal the Immigration Act 1971 would be disastrous both in terms of employment and community relations, not least for the members of the immigrant community? Is it not completely irresponsible of the Labour party to make such a proposal?

Mr. Brittan: I agree with every single word of my hon. Friend. The continuation of firm but fair immigration control is crucial for race relations, as for many other aspects of our national life.

Mr. Corbyn: Is the Home Secretary aware that serious abuses of the Immigration Act 1971 are taking place and that the procedures he has announced during the last two weeks concerning the treatment of Tamil refugees seeking asylum in this country have met with enormous opposition from Members of Parliament and from all of the immigration advisory agencies and refugee agencies? Is he further aware that the 24-hour rule for Members of Parliament, concerning the time in which they can make representations, is completely inadequate, and that until Tuesday of this week the immigration officers at Gatwick airport were unaware that they had to inform the United Kingdom immigrants advisory service of any refugee-seekers arriving in this country? Furthermore, is the Home Secretary aware that on Tuesday of this week a Tamil asylum seeker was removed extra-judicially from this country to Colombo, that his whereabouts are unknown and that it is incumbent upon the Home Secretary to tell the House what has happened to that man, why he was removed and what steps are being taken to ensure that he is returned safely to this country? An inquiry ought to be mounted into the whole affair.

Mr. Brittan: The only point that has not been widely canvassed in the statement that I made last Monday to the House is the hon. Gentleman's last point. The particular case to which he referred was considered in great detail. We concluded that it did not meet the requirements of the United Nations' convention and that the test of severe hardship had not been met.

Mr. Corbyn: Where is he?

Mr. Brittan: In accordance with the administrative practice whereby the United Kingdom immigrants advisory service has been informed of cases where asylum is refused——

Mr. Corbyn: Is he still alive?

Mr. Brittan: —it was given the opportunity to interview the person in question and it did so, but before the results of that interview and any representations were received he was removed to Colombo. This action was the result of a serious failure in communication. I have ordered an urgent and thorough investigation both into the organisational failure and into the actions of the individual members of staff involved.

The high commission in Colombo has been asked to contact the person in question, whose brother lives in Colombo. However, it is important to stress that I have no reason to doubt at present that the decision arrived at in his case was correct and in accordance with the policy that I announced. Nevertheless, the representations from UKIAS will be fully considered. If the judgment made in the light of that consideration is that the person in question meets the severe hardship test, contrary to the judgment that was previously formed, he will be granted a visa and returned to this country at public expense.

Mr. Heathcoat-Amory: Does my right hon. and learned Friend agree that it is a basic right of every country to define who its citizens are and then to enforce the appropriate immigration rules? Is he aware that many of the countries which criticise Britain have much more restrictive citizenship and immigration rules?

Mr. Brittan: My hon. Friend is absolutely right on both points.

Mr. Kaufman: With regard to the extraordinary admission that the Home Secretary has just made in response to a question from my hon. Friend the Member for Islington, North (Mr. Corbyn), can the right hon. and learned Gentleman now tell the House what action is being taken to ensure that such a thing does not happen again? *[Interruption.]* It happened once, although the Government said that there was no danger of it happening, because the Home Secretary does not care about these matters. He does not care that people may be sent back to imprisonment, torture and death, after which it is too late to put things right. That is why we want an assurance that the Government will ensure that nothing like this will happen again, and that a further statement will be made to the House about it. That is what we seek.

Mr. Brittan: The hon. Member for Islington, North (Mr. Corbyn) raised a serious point about a particular case. He has been in no way assisted by the right hon. Gentleman's note of hysteria. I attempted to deal with that question in a serious way. The position is exactly as I said it was last Monday, and I assure the right hon. Gentleman and the House that the administrative practice followed since 1983, whereby UKIAS is informed of cases where asylum is refused, and is given the opportunity to make representations before anyone is returned, will be followed. I have taken the strongest steps to ensure that it will be followed in all cases. I should have thought that the right hon. Gentleman might at least have the grace to accept that I gave a very frank and full statement to the House about what happened.

Metropolitan Police

10. **Mr. Norman Atkinson** asked the Secretary of State for the Home Department if he will consider the setting up of a study commission for the purpose of assessing the possibility of transferring control of the Metropolitan police to an elected body.

Mr. Brittan: No, Sir.

Mr. Atkinson: Why does the Home Secretary so tenaciously resist the demands of Londoners to democratise the accountability of the Metropolitan police? He has authorised the expenditure of about £760 million. He is now setting up consultative committees which, he says, have no right to intervene in the non-operative affairs of the London police or to interfere in policy matters, so they can say nothing about that expenditure—justified or not—of £760 million.

Mr. Brittan: I do not agree with the hon. Gentleman's suggestion, because nothing could be more dangerous to the liberties of this country than to hand over the police of London to political control.

Sir John Biggs-Davison: Will my right hon. and learned Friend continue to uphold the constitutional independence of chief officers of police, not only in London but throughout the country?

Mr. Brittan: Certainly. The principle applies throughout the country.

Mr. Simon Hughes: If the Home Secretary is not willing to consider handing the police in London over to an elected authority, will he consider handing them over to at least a partly elected authority, in line with the discussions going on about other powers in the context of the GLC abolition Bill being considered in the other place between Ministers and Conservative peers?

Mr. Brittan: I am not quite sure what the hon. Gentleman is alluding to, but I do not propose any changes in the arrangements for the policing of London.

America (Ministerial Visit)

11. **Mr. Sackville** asked the Secretary of State for the Home Department if he will make a statement on the visit by the Parliamentary Under-Secretary of State to the United States of America to study techniques for the prevention of drug abuse.

Mr. Mellor: I visited the United States from 7 to 14 April. I had very useful discussions with, among others, representatives of several Federal Departments and agencies. These ranged over many issues, including the forefeiture of drug traffickers' assets, American experience of the cocaine problem and international aspects.

Mr. Sackville: Did my hon. Friend's visit convince him that the drugs problem, particularly with cocaine, can become considerably worse here, and shows signs of doing so, and that the various radical actions that he proposes should be taken now and not delayed until it is too late?

Mr. Mellor: Since returning from the United States, I have tried to play a full part in alerting the public to the problem of the glut of cocaine available in South America and likely to be diverted from the American to the British market. Already, a considerable response has been evident, notably in the formation of two customs teams specifically to deal with cocaine. Cocaine seizures this year are much higher than they were last year. That is a measure of success, but we intend to be diligent on this vital topic.

Mr. Pavitt: Did the Minister examine what is happening in Florida with the treatment of misusers of drugs—cocaine in particular—who need rehabilitation? Will he discuss with the Secretary of State for Social Services the present cut in the provision of clinics for the treatment of those who, unfortunately, become addicts?

Mr. Mellor: Far from there being a cut, there has been an increase in such facilities, brought about by the allocation of £11·5 million from the DHSS and the encouragement that my right hon. Friend has been giving to regional and district health authorities to develop these facilities. He is requiring them to send details of their proposals to the Department, and their responses will be published shortly so that the public can judge the adequacy of the response of each individual health district to this important problem.

Miss Fookes: I urge on my hon. Friend the importance of hitting drug traffickers where it hurts—in the pocket. To that end, can we have the hope of early legislation for forfeiture of assets and for dealing with money laundering?

Mr. Mellor: These are matters of first importance, not just to my hon. Friend, but to the Government. I assure her that we are actively considering, and reaching final conclusions on, legislation to do what she requires.

Mr. Kilroy-Silk: How does the Minister explain the more than 400 per cent. increase in drug addiction since the Government came into office?

Mr. Mellor: By the fact that more people are taking drugs. The problem is well known throughout the Western world. As usual, the hon. Gentleman is trying to reduce the quality of what is otherwise a non-partisan debate to make spurious political points. The increase in drug-taking straddled two Governments and will not be resolved by the petty points that the hon. Gentleman delights in making.

Detention Centres

13. **Mr. Bermingham** asked the Secretary of State for the Home Department if he will establish an independent inquiry into the operation of detention centres.

Mr. Waddington: We have no plans to do so.

Mr. Bermingham: Do not the growing number of complaints from parents, probation officers, teachers, solicitors and other people who have any connection with the inmates of detention centres, and the growing numbers of allegations of bullying and brutal treatment within those centres, mean that it is time the Government took such complaints seriously and established an inquiry to ascertain whether the short, sharp shock treatment is nothing more than a prescription for public bullying?

Mr. Waddington: All allegations of ill-treatment are fully and properly investigated. If the allegation is of a criminal offence, it is referred to the police for investigation, and there is no need for a more wide-ranging inquiry. I gather that the hon. Gentleman made an allegation to a newspaper about Usk, but no complaints have been received there from any inmates. Therefore, it is up to the hon. Gentleman, if he has evidence——

Mr. Bermingham: I have.

Mr. Waddington: —of improper conduct to bring it forward.

PRIME MINISTER

Engagements

Q1. **Mr. Forth** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister (Mrs. Margaret Thatcher): This morning I presided at a meeting of the Cabinet and had meetings with ministerial colleagues and others. In addition to my duties in this House I shall be having further meetings later today. This evening I will be attending a dinner given by Premier Zhao Ziyang of the People's Republic of China.

Mr. Forth: When my right hon. Friend goes to Milan on 28-29 June for the European Council meeting, she will find that the agenda includes the Dooge report, which recommends a conference of representatives of member states to negotiate a European union treaty. Since the Dooge report says that such a conference in itself would be the initial stage of such a treaty, will my right hon.

Friend decline to send a representative, on the ground that there is no support in this House or in the country for further European union?

The Prime Minister: I have often spoken about European union. The phrase is understood in this country in a totally different context from that in Europe. I wish that people would not use it. In this country it raises fear of federation. It is not used in that way in Europe. I would be absolutely against a federal Europe. I agree with my hon. Friend about a special intergovernmental conference. I think that it would be superfluous. I know that some of my colleagues in Europe would like to have it, but if we consider the European Council itself, it is an intergovernmental conference and we do not need an extra one.

Mr. Kinnock: On Tuesday the Prime Minister told us that she wanted to be factual about the implications of the social security review. Will she now act upon that and tell us how many million householders will lose as a consequence of the changes proposed in housing benefit and, of those, how many are likely to be people with small occupational pensions who are to be penalised for a lifetime of thrift?

The Prime Minister: The right hon. Gentleman is aware of the reply that I gave. When my right hon. Friend the Secretary of State for Social Services pointed out that the cost of housing benefit had gone up from £1·2 billion in 1979-80 to £4·2 billion this year, he indicated that we were hoping to save some £500 million from housing benefit. We cannot be more specific until the many rates are set much later.

Mr. Kinnock: Why will the Prime Minister not answer the question? We know that she has the information. We know that the DHSS and the Cabinet have the information. The housing benefit review team said in its own paper that it was satisfied that despite all the complexities it had

"a reliable indication of the major effects"

of the changes being proposed. That is what we have asked for—a reliable indication. That is what the millions of people who will be affected want. Why will the Prime Minister not come clean?

The Prime Minister: I have indicated to the right hon. Gentleman that savings of £500 million are hoped for. That is only one sixth of the increase that has occurred in housing benefit between 1979 and 1984. That seems to me eminently reasonable. The precise effect on the many people will be known when the specific rates are set, and particularly when the decisions with regard to rates are made.

Mr. Kinnock: Does the Prime Minister know whether the number affected will be 6 million, 6·5 million, 7 million or more? Can the Prime Minister give us a figure even to the nearest half million?

The Prime Minister: No, Mr. Speaker. I have indicated—perhaps I should reiterate it to the right hon. Gentleman — that taxpayers' expenditure — *[Interruption.]* The right hon. Gentleman always forgets that all the money he would give away comes from the pockets of his constituents. Taxpayers' expenditure on housing benefit has risen from £1·2 billion in 1979 to £4·2 billion—*[Interruption.]*

Mr. Speaker: Order. The Prime Minister is answering a very serious question.

Hon. Members: No, she is not.

Mr. Speaker: I take it that it is a serious question.

The Prime Minister: Taxpayers' expenditure on housing benefit has risen from £1·2 billion in 1979 to £4·2 billion this year. That is an enormous increase. We hope to save something like £500 million, which is only one sixth of the increase that has occurred in our time. I say to the right hon. Gentleman that the taxpayers of this country could not afford his programmes.

Mr. John Carlisle: Will my right hon. Friend confirm that, whatever decision is made by the United States Congress on disinvestment with South Africa, this Government will continue to encourage investment and trade with that country, not only for the 150,000 or so jobs that it generates over here, but for the sake of the underprivileged blacks in South Africa itself, for whom disinvestment would cause great harm and distress?

The Prime Minister: I am aware of the moves in Congress. Several different Bills are under consideration. We cannot speculate on the outcome. It remains our view that sanctions and disinvestment will not bring about the changes that we all wish to see in South Africa.

Mr. Nelson: Will my right hon. Friend comment on the decision today by FIFA to ban all English clubs from all international football matches? Does she agree that that is a wholly justified decision, which gives us a proper opportunity to put our own house in order?

The Prime Minister: That is the decision that FIFA has made. I think that we fully understand why it has made it. I hope that we shall be able to take steps that will restore our good name both at home and in international football.

Mr. J. Enoch Powell: Will the Prime Minister spare a moment this afternoon—I am sure that she will—to convey to her Chief Whip an expression of the delight which today's news has caused in all parts of the House?

Hon. Members: Hear, hear.

The Prime Minister: I thank the right hon. Gentleman most warmly, and I am grateful for the response that his question has evoked from all parts of the House.

Q2. **Mr. Terry Davis** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Davis: Was the Prime Minister consulted about the disgraceful decision to announce the Government's decision on nurses' pay by means of a written answer? Does she really think that a written answer is more appropriate than a statement in the House on a matter of such interest to hon. Members on both sides of the House?

The Prime Minister: Since 1979 the decisions on review body reports have normally been announced by written answer. Under Labour, it was the normal practice for decisions to be announced by written answer.

Mr. Baldry: Does not the scale of starvation in Sudan and sub-Saharan Africa demonstrate the need for a continuing, co-ordinated international response to solving the problem of starvation in Africa? As both the United States and Russia have been somewhat partisan in wanting to establish spheres of influence in north Africa, does not

that give Britain a marvellous opportunity to take a positive lead in the United Nations to try to ensure that we can eliminate starvation from the world by the year 2000?

The Prime Minister: As my hon. Friend is aware, we have announced that we are sending an extra Hercules to the Sudan. We have provided some money for a light aircraft. We are also taking part in European action to try to get more of the food well distributed in the Sudan. I take my hon. Friend's point about taking the lead in the United Nations. The United States has also been generous in the food that it is planning to send to the Sudan.

Q3. **Mr. Tony Banks** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Banks: Will the Prime Minister take time today to read the report by the independent firm of City accountants, Coopers and Lybrand, which shows that the transitional cost for the abolition of the Greater London council ranges between £122 million and £167 million? In view of that enormous cost and the defeats that her Government's Bill is now experiencing in the House of Lords, will she take this opportunity to drop her personal and vindictive campaign against the GLC, sack her Secretary of State for the Environment at the next reshuffle and accompany me across Westminster bridge to make her peace with Ken Livingstone and the GLC?

The Prime Minister: I understand that the report estimates the transitional costs of change that arise from redundancy payments, which would occur in any event if the GLC chose to run its affairs efficiently. The report to which the hon. Gentleman has kindly drawn attention also shows that annual savings will flow from the abolition of the GLC and that the GLC is grossly overmanned at present.

Q4. **Mr. Eggar** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Eggar: As the hon. Member for Newham, North-West (Mr. Banks) is so concerned about the cost of the GLC, why does he not offer to abandon his chauffeur-driven limousine?

Mr. Tony Banks: Because it is too comfortable.

The Prime Minister: I am not responsible for the hon. Member for Newham, North-West (Mr. Banks).

Mr. Willie W. Hamilton: Will the Prime Minister be in the House to vote against the outrageous motion that will be before the House tomorrow? If not, would she care to tell the House whether she supports her right hon. Friend and colleague the Leader of the House in that matter?

The Prime Minister: Of course I support my right hon. Friend the Leader of the House. I shall be around, but whether I shall be around when the vote occurs I cannot tell, because I have two or three overseas visitors to see.

Q5. **Mr. Yeo** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Yeo: Is my right hon. Friend aware that anyone who knows anything about the social security system—a category of people which unfortunately does not include the Leader of the Opposition or the hon. Member for Oldham, West (Mr. Meacher) — knows that the overwhelming requirement is for a system which is simpler and more understandable to those who use it and which directs more of the expenditure to those in real need? Is she aware that, accordingly, the proposals announced by the Government on Monday have been very warmly welcomed?

The Prime Minister: I agree with my hon. Friend that the proposals have been warmly welcomed. They are also very realistic. I agree that we should have benefits which we are satisfied a future Government can deliver, and not the empty promises that we get from the Opposition.

Q6. **Mr. Alton** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Alton: Is the Prime Minister aware that Sir John Hermon, the Chief Constable of the Royal Ulster Constabulary, has not met his opposite number, Laurence Wren, Chief of the Garda, in the past two years? Does she agree that public recriminations between the two men does not assist the fight against terrorism?

The Prime Minister: Consultations between the Garda and the RUC do not necessarily have to be conducted at the top level. The consultations are conducted very well and co-operation is close, for which we are very grateful.

Q7. **Mr. Michael Brown** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Brown: Will my right hon. Friend take this opportunity to deny press reports suggesting that the Government may be going cool on the introduction of legislation relating to the Green Paper on compulsory tendering for local authorities?

The Prime Minister: The Government are very anxious that more competition should be introduced into local authority contracts. That is our policy and it will continue to be so.

Mr. James Callaghan: If the Prime Minister is in the House tomorrow, will she be able, as I hope, to vote with me against the proposed abuse of procedures?

The Prime Minister: Many invitations have been thrust upon me from all parts of the House. I hope that I shall be around to respond to one of them.

Q8. **Mr. Andrew MacKay** asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. MacKay: In the light of the tragic events in Brussels last week, does my right hon. Friend agree that, with the notable exception of the Cambridge case, the punishments meted out by the courts have been woefully inadequate and no deterrent whatever to football hooliganism?

The Prime Minister: I believe that the Cambridge case heralded a new era. I should also point out that the Court of Appeal had previously made it abundantly clear that, in serious cases of violence at football grounds, the right sentence should be a prison sentence. I hope that that will be observed in all other courts.

Business of the House

3.30 pm

Mr. Neil Kinnock (Islwyn): Will the Leader of the House state the business for next week?

The Lord Privy Seal and Leader of the House of Commons (Mr. John Biffen): Yes, Sir. The business for next week will be as follows:

MONDAY 10 JUNE—Opposition Day (8th Allotted day, second part). A debate on the 15th anniversary of the Royal Assent to the Chronically Sick and Disabled Persons Bill on a motion for the Adjournment of the House.

Remaining stages of the Food and Environment Protection Bill *[Lords]*.

TUESDAY 11 JUNE—Opposition Day (14th Allotted Day). A debate titled "The need for urgent new measures to deal with famine and remedy the debt crisis in developing countries", followed by a debate titled "Government responsibility for the desperate plight of young people". Both debates will arise on Opposition motions.

Remaining stages of the Enduring Powers of Attorney Bill *[Lords]*.

Motion on Historic Churches (Northern Ireland) Order.

WEDNESDAY 12 JUNE AND THURSDAY 13 JUNE — Debate on a motion to approve the Statement on the Defence Estimates 1985, Cmnd. 9430.

FRIDAY 14 JUNE—A debate on the Government's policy for science which will arise on a motion for the Adjournment of the House.

MONDAY 17 JUNE—A debate on a Government motion to approve the White Paper on airports policy, Cmnd. 9542.

Mr. Kinnock: The right hon. Gentleman will have heard the dissatisfaction with the fact that the nurses' pay award was announced in a written answer. Will he ensure that we have a statement at the earliest opportunity so that the Secretary of State for Social Services can be properly questioned on a matter that is important to hon. Members on both sides of the House and to the general public?

Secondly, has a date been fixed for a two-day debate in Government time on the so-called Fowler review? The right hon. Gentleman will have seen the reports in *The Times* and elsewhere that Whitehall sources have made it clear that it is part of the Government's tactics to keep the Opposition, the public and, presumably, Conservative Back-Bench Members in the dark about the impact of the changes. May we have his co-operation in initiating a debate so that we can lighten the darkness?

Thirdly, when may we have a statement on last week's decision of the European Court of Human Rights, which ruled that the Government have been unlawfully discriminating against husbands and male fiancés who wish to come to Britain? As he will recall, the Home Secretary dodged making a statement this week. Will he ensure that we get a statement next week so that the 3,350 men involved may have some idea of their future?

Fourthly, the Leader of the House will recall that we have been asking repeatedly for a debate in Government time on the proposed closure of 29 skillcentres. This week, we heard the announcement that all but two of those skillcentres will close — the two being in relatively marginal Conservative-held seats. Does the right hon. Gentleman accept that the issue is now even more urgent and will he ensure that hon. Members on both sides of the House are given an early opportunity to debate the matter?

Fifthly, may I draw the right hon. Gentleman's attention to the reports today of the Foreign Secretary's warning to the United States Government not to breach the 1979 strategic arms limitation treaty and so undermine the Geneva arms talks? Will the right hon. Gentleman ensure an early statement to the House on this subject, and will he remember that the Opposition have asked several times for a debate on the straegic defence initiative which is clearly of interest to the House and to the country?

Finally, will he convey, through the usual channels, of course, my best wishes and those of my right hon. and hon. Friends to the Government Chief Whip and his fiancée for their future happiness?

Mr. Biffen: I wholeheartedly reverse the order of the right hon. Gentleman's questions—I shall of course pass on those good wishes to my right hon. Friend the Chief Whip. I know, as does the right hon. Member for Islwyn (Mr. Kinnock) that, in doing that, I shall have the endorsement of the entire House.

As for the strategic arms limitation treaty, I shall of course draw the attention of my right hon. and learned Friend the Foreign Secretary to the right hon. Gentleman's points. It raises all of the issues that are central to a discussion of the defence Estimates.

I suggest that we might consider the request for a debate about skillcentres through the usual channels. I shall refer my right hon. and learned Friend the Home Secretary to the right hon. Gentleman's request for a statement on the recent ruling of the European Court of Human Rights as it affects the access to Britain of certain classes of immigrant.

I note the right hon. Gentleman's request for a two-day debate on the social security review. Perhaps the timing and length of that debate can be considered further through the usual channels. I was a little distressed to find that the right hon. Gentleman had to pray in aid evidence from *The Times* to sustain his case, but as he then asked for enlightenment I understood why he needed such remedy. Questions about nurses' pay can be examined through the usual channels, but I must observe that what has been done today is precisely what happened under the preceding Labour Government.

Mr. David Crouch (Canterbury): If the worse comes to the worst tomorrow and we find ourselves sitting through the weekend, how can I then return in happy plight that am debarred the benefit of rest? When life's—day's —oppression is not eased by night, and day by day—day by night—and night by day oppressed?

Mr. Biffen: If my hon. Friend rerehearses a little more that speech which he intends to give tomorrow, he may find by then that it is so effective that he need have no fear.

Dr. Jeremy Bray (Motherwell, South): Will the Leader of the House find time for the Secretary of State for Trade and Industry to make a statement on the encouragement which I hope he is giving the Office of Fair Trading to block the takeover of Eurolex, the computer database of English, Scottish and European law, by Butterworths, which has closed it down and dismissed all the staff to create a world monopoly for the United States-owned Lexis service for which Butterworths acts merely

as the British agent? Is that not an outrageous demonstration of the Government's lack of any serious information technology policy?

Mr. Biffen: I cannot accept the strictures implicit in the hon. Gentleman's question, but I shall refer his request to my right hon. Friend the Secretary of State for Trade and Industry.

Mr. Jeremy Hanley (Richmond and Barnes): Will my right hon. Friend bear in mind the heavy demand of right hon. and hon. Members to speak in last January's debate on airports policy and therefore consider extending the debate on Monday week at least until midnight so that many more of us can congratulate the Government on yesterday's excellent statement?

Mr. Biffen: My hon. Friend advances a persuasive argument for the innovation that he seeks. The timing will be considered.

Mr. A. J. Beith (Berwick-upon-Tweed): Does the right hon. Gentleman agree that the change in immigration rules which requires visas from citizens of Sri Lanka who have come to Britain as refugees raises an important principle which is quite distinct from that raised by the other immigration matter that has been raised? Will the right hon. Gentleman therefore find time for the prayer relating to the change that I have described which has been tabled by my right hon. and hon. Friends?

Mr. Biffen: I acknowledge the hon. Gentleman's point. Perhaps the matter could be considered through the usual channels.

Mr. Michael Latham (Rutland and Melton): For the third week running, may I ask my right hon. Friend to make my right hon. and learned Friend the Minister of Health an offer that we hope he cannot refuse—to make a statement to the House on an appeal system regarding the limited list of drugs? The matter is now getting very urgent.

Mr. Biffen: My hon. Friend has made his point courteously and persistently, and I shall most certainly take it up again.

Mr. J. D. Concannon (Mansfield): Will the Leader of the House impress upon the Prime Minister the need for a statement next week, after her meeting with King Hussein of Jordan and the Foreign Secretary of Israel, on their views on peace in the middle east and the role that the PLO will play as the representative of the Palestinians?

Mr. Biffen: I shall certainly pass on that request to my right hon. Friend.

Mr. Robert Adley (Christchurch): Will my right hon. Friend take the opportunity to tell my hon. Friend the Member for Richmond and Barnes (Mr. Hanley), in case he has not noticed, that the idea behind moving the sludge works at Perry Oaks is not to plant daisies? Will my right hon. Friend confirm that, if the motion on Monday week is lost, progress at Stansted could not be made? Will my right hon. Friend make that clear?

Mr. Biffen: My hon. Friend's point obviously has a great deal of force. I should have thought that it would be much better deployed in the context of the debate rather than in trying to persuade me to put a shadow over the debate by giving an answer.

Mr. Robert Kilroy-Silk (Knowsley, North): Given that those of us who have recently been in Sri Lanka have first hand and substantial evidence of brutality and the atrocities committed against the Tamil community and that many thousands of that minority community live in deep and serious fear of their physical safety and lives, may we have an early debate on the Government's inhumane and callous policy of refusing admission to refugees from that country, with all the horrendous consequences for their personal safety that flow from that policy?

Mr. Biffen: I realise that this subject gives rise to deep and sincere feelings. I shall report them to my right hon. and learned Friend the Home Secretary, but I cannot be optimistic and suggest that there will be an early debate.

Mr. John Stokes (Halesowen and Stourbridge): Does my right hon. Friend agree that the lack of religious and moral teaching, discipline and, above all, parental responsibility are the main causes of so much of the violence in our society? Cannot we discuss these important and vital matters?

Mr. Biffen: I totally agree with my hon. Friend, but Government time will not be available for such a debate —certainly not in the near future. Hon. Members have other opportunities, and I suggest that they pursue them.

Mr. James Molyneaux (Lagan Valley): Will the right hon. Gentleman give sympathetic consideration to our request for a one-hour extension of the debate on Tuesday on the Northern Ireland order?

Mr. Biffen: Most certainly. Perhaps that matter could be considered through the usual channels.

Mr. David Harris (St. Ives): The House gave an overwhelming Second Reading to the Bill introduced by the right hon. Member for South Down (Mr. Powell), but, despite that, many of us who voted in support of the Bill have distinct reservations about the tactics that will, apparently, be employed tomorrow. Will my right hon. Friend reconsider his previous position on this matter and, even at this late hour, give an undertaking that Government time will be made available so that this important measure is given the proper consideration that it deserves?

Mr. Biffen: I am grateful to my hon. Friend for that question, which certainly was not planted. I want to make it quite clear—I want there to be no ambiguity about this — that there is no prospect of Government time being made available.

Mr. Willie W. Hamilton (Fife, Central): What contingency plans has the right hon. Gentleman made for the House sitting on Saturday and Sunday? If this happens, will the right hon. Gentleman make arrangements to ensure that those responsible will be surcharged?

Mr. Biffen: In order to give the most appropriate answer to that question, I would need more time for reflection than is available to me at the Dispatch Box.

Mr. Patrick Cormack (Staffordshire, South): As my right hon. Friend is a master not only of repartee but of parliamentary procedure, will he make it plain that what is contemplated and proposed by some of our colleagues for tomorrow is entirely proper and is not an abuse of the procedures of the House?

Mr. Biffen: It is far better if these arguments are adduced within the more relaxed circumstances of the

[Mr. Biffen]

debate than in question and answer at this time. I can confirm that there seems to be clear evidence that the proposed action has been ruled to be in order.

Mr. Nicholas Brown (Newcastle upon Tyne, East): In view of the announcement at about lunch time today by Imperial Tobacco plc that it intends to close its factory in east Newcastle with a loss of 600 jobs and that, in addition it intends to sack 1,100 people during the next two years, will the right hon. Gentleman find time for a discussion on the employment problems faced by constituencies that rely upon the tobacco industry for employment?

Mr. Biffen: I shall, of course, draw the matter to the attention of my right hon. Friend the Secretary of State for Employment, but the hon. Gentleman may recall that employment questions will be dealt with next Tuesday.

Mr. Robert McCrindle (Brentwood and Ongar): Reverting to the debate on airports policy on Monday week, may we know the basis upon which it is to take place? If it is simply to take note of the White Paper and the House refuses so to do, will that mean that the Secretary of State for Transport will have to re-think the policy that he announced in the House yesterday?

Mr. Biffen: I have already indicated that the motion on Monday 17 June will be a Government motion to approve the White Paper.

Mr. James Lamond (Oldham, Central and Royton): Has the Leader of the House noticed that on several occasions recently the Secretary of State for the appropriate Department has not appeared at the Dispatch Box at Question Time? The latest example was on Tuesday of this week, when the Secretary of State for Defence was unable to be present because apparently he was on an official visit to Denmark.

Bearing in mind that Secretaries of State are required to be here for questions on only one day in a month, is it not possible for them to arrange their official visits so that they are not prevented from being here to answer questions?

Mr. Biffen: Obviously I would be the first to acquiesce in the proposition that it is important that Secretaries of State should, whenever possible, be here at the Dispatch Box to take their questions. I believe that that view is shared throughout the Administration. But there are occasions when it is not possible, and I think we have to understand that.

Mr. Ivor Stanbrook (Orpington): Does my right hon. Friend intend to speak tomorrow in the capacity that he recently described as "the boss's nark", or does he agree that Back Benchers are just as much entitled to use rules of order and procedure, without accusations of abuse, as are the Government who they are supposed to control?

Mr. Biffen: I shall speak as Leader of the House, and I shall try to tread as delicately as I can.

Mr. Dafydd Wigley (Caernarfon): If tomorrow's business ran through not only Saturday and Sunday but into Monday, will the Leader of the House confirm that, under the Standing Orders of the House, business could be adjourned after Monday till the following Monday? In those circumstances, does he intend to table a motion to avoid that eventuality?

Mr. Biffen: I do not think that we have quite got to the point where I have to take that decision.

Mr. Bowen Wells (Hertford and Stortford): Will my right hon. Friend take pity on Mr. Speaker and help him in relation to the debate on airports policy? There has not been adequate time, at any Question Time when the matter could be raised, for all of us to be heard. In particular, those who represent the area most affected by the decision, east Hertfordshire and Essex, have not had adequate time because, quite rightly, Mr. Speaker, has had to give time to hon. Members from other parts of the country with an interest in the matter.

My constituents are feeling very aggrieved that we have not had adequate time to point out to the House and to the country the very serious difficulties in which the decision places us. Therefore, will my right hon. Friend at least consider extending the debate by two hours?

Mr. Biffen: The request for an extension has already been made to me, and it will be sympathetically considered.

Mr. Tam Dalyell (Linlithgow): In answering my hon. Friend the Member for Motherwell, South (Dr. Bray), the Leader of the House was his usual model of courtesy, but has he really understood the enormity of what has happened in relation to Butterworths and Eurolex? The computer data are going to the United States. Should not he, directly or through the Department of Trade, contact the Office of Fair Trading? Although only 53 jobs are involved at present, there is a huge potential job loss. Incidentally, Parliament is a major customer, and it looks as though Parliament's expenses in regard to Eurolex will be greatly increased by what has happened.

May I offer the Leader of the House a constructive suggestion? May I suggest that he should get the Minister for Trade to make a statement at 11 am tomorrow on the vital matter that my hon. Friend has raised?

Mr. Biffen: There is just a suspicion that having such a statement at 11 am tomorrow would be seen as trivialising the matter. There would be a possibility of its being misinterpreted. I shall, of course, convey to my right hon. Friend the anxieties of the hon. Members for Motherwell, South (Dr. Bray) and Linlithgow (Mr. Dalyell).

Mr. Gary Waller (Keighley): Has my right hon. Friend taken note of early-day motion 714 concerning a *Yorkshire Post* investigation into drug abuse?

[That this House is concerned at the new evidence in Yorkshire of illegal drug trafficking and the involvement of young people in hard drug abuse; congratulates the Yorkshire Post on its detailed investigation into this urgent and serious problem; notes that the Select Committees on Home Affairs and on Social Services are undertaking enquiries into drug abuse; and calls for an early Parliamentary debate on their proposals further to inhibit supply and to rehabilitate addicts.]

In view of the serious facts revealed by that investigation and the fact that this is one of the most significant issues of our time, will he arrange an early and full-length debate on the interim report of the Home Office Select Committee on the subject?

Mr. Biffen: I join my hon. Friend in acknowledging the importance of the topic. He will note, however, that no Government time has been made available for a debate

on the issue in the business that has been announced, and I do not see there being time available in the near future now that we are in that part of the parliamentary year just ahead of the summer recess. However, my hon. Friend will be aware that he can pursue these matters through private Members' time.

Mr. Tom Clarke (Monklands, West): In view of the decision by the House of Representatives in the United States in relation to South Africa and the exchanges today during Prime Minister's Question Time, does the Leader of the House agree that we should have an early opportunity to debate this issue?

Mr. Biffen: I have no doubt that it would be a good debate, but there is no Government time available in the near future.

Mr. Peter Bruinvels (Leicester, East): Has my right hon. Friend seen early-day motion 708, which stands in my name and the names of 20 other hon. Members, giving all-party support for the establishment of a missing child unit within the Home Office?

[That this House welcomes the designation of Saturday 25th May as International Day of the Missing Child; and calls on Her Majesty's Government to establish a missing child unit within the Home Office with a central computer detailing all missing children throughout the United Kingdom, and not just within the Metropolitan Police area.]

Is he aware that great concern is felt about the fact that last year more than 20,000 children went missing, yet inadequate, if any, statistics are kept about these cases? On the subject of children, I hope that my right hon. Friend will not take it personally when tomorrow more than 100 hon. Members in all parts of the House express their concern for the unborn child and do not support his objection to our motion. May I respectfully remind him that most hon. Members feel that tomorrow is a private Members' day and regret that any form of Government interference, even if indirectly, should occur?

Mr. Biffen: I note my hon. Friend's remarks in relation to tomorrow's debate. I also appreciate the significance of the first part of his question and hope that he will use his well known skill and initiative as a private Member in getting the issue debated. There simply is not Government time to cover all these issues.

Mr. Dave Nellist (Coventry, South): Has the Leader of the House seen the statistics released by the Department of Employment to me this week showing that for this year's 517,000 school leavers there exist only 12,355 vacancies at careers offices? Is he aware that 56 per cent. of careers offices in Britain have 10 or fewer vacancies; that in Scotland the figure is 94 per cent.; that in Wales, only two careers offices have more than 10 vacancies; and that 95 per cent. of careers offices have fewer than 10 vacancies? When in Government time will there be a debate on the bleak and dismal future that the Tory Government are offering this year's school leavers?

Mr. Biffen: I hope that the hon. Gentleman does not regard Opposition time as second best, because on Tuesday there will be a debate on the subject of young people and I hope that he will be able to make a speech on that occasion.

Mr. Andrew Faulds (Warley, East): Has the right hon. Gentleman been made aware during his especially busy day today that the Arts Council held an emergency press conference this morning at which it announced that there would be a £30 million shortfall in the moneys needed to support the arts following the Government's messing about with the GLC and metropolitan counties? What do the Government intend to do to provide that necessary funding of £30 million?

Mr. Biffen: I do not think that there will be a statement on that subject next week, but I shall draw to the attention of the Parliamentary Under-Secretary of State for the Environment, who anwers for the arts in the House, the situation described by the hon. Gentleman.

Mr. Laurie Pavitt (Brent, South): You, Mr. Speaker, and the Leader of the House will be aware of the great interest that I have expressed over the years, both in the House and in Committee upstairs, in the National Health Service. Is the right hon. Gentleman aware of the need for a statement to be made next week on the question of nurses' pay? We shall not have time to table questions before the Minister for Health next answers questions in the House on Tuesday. After that, there will be only one further occasion when health questions will be answered before the summer recess.

The issue affects half a million nurses and midwives and yet the announcement is to be made in a written answer which I shall not be able to see until tomorrow morning. Will the right hon. Gentleman please do something for Back-Bench Members on this important matter?

Mr. Biffen: The Leader of the Opposition made a request about the way in which the matter should be handled and I said that it could be considered through the usual channels. I cannot go beyond that. However, the procedure this year is precisely the same as it has been for many years.

Mr. D. N. Campbell-Savours (Workington): Why do the Government persist in refusing to make a statement at the Dispatch Box on the loss of the Lear Fan company in Ulster? Why do they persist in replying only in written answers? What are they trying to hide? As a vast amount of public money is involved, should not the Minister be made accountable to the House by making a statement on which we can question him?

Mr. Biffen: I shall refer those remarks to my right hon. Friend the Secretary of State for Northern Ireland. Questions about Northern Ireland are first on the Order Paper next Thursday.

Mr. Greville Janner (Leicester, West): In view of the persistent and regrettable failure of courts, and especially of tribunals, to take properly into account the statutory codes set by the Commission for Racial Equality and the Equal Opportunities Commission, and of the exclusion from the protection of the law of single people, including widows and widowers, when can we have a debate in Government time on equal opportunities? Is the Leader of the House aware that inequality in many respects is growing in Britain?

Mr. Biffen: I see little prospect in the near future of such a debate in Government time because Government time is a rare and valued commodity at this time of year. The hon. and learned Gentleman has other opportunities to raise such matters in the House.

Norman Shaw South (Water Supply)

3.58 pm

The Parliamentary Under-Secretary of State for the Environment (Sir George Young): With permission, Mr. Speaker, I would like to make a statement about contamination of tap water in the Norman Shaw South building.

At 11.30 am on Tuesday 4 June, 22 gallons of anti-corrosive fluid—ENTEC 338—intended for the central heating tank were poured into a neighbouring tank serving the hand washbasins and wcs in the building. This was an inexcusable error by the Property Services Agency, for which I accept full responsibility.

The fluid concerned was a proprietary aqueous solution containing:

Sodium Nitrite	30·00 per cent.
Borax	2·00 per cent.
Caustic Soda	0·10 per cent.
Mercapto-benzo-thi-azole	0·05 per cent.

The House will wish to know how this error occurred, what steps were taken to warn all concerned and to remove the contamination, and what is being done to prevent any recurrence. I have ordered a full investigation into these matters and I shall publish the report. In the meantime, the House will wish to know what information is available to me.

First, I would say that I was deeply concerned to learn yesterday that Mrs. Jacqueline Winter, the secretary to the hon. Member for Liverpool, Mossley Hill (Mr. Alton), had been taken seriously ill in her office in the Norman Shaw South building on Tuesday afternoon. It has since become clear that this was connected with her having drunk water from a tap at a washbasin there. I am happy to be able to tell the House that she has now been released from hospital and is recovering at home. I am sure that I speak for the whole House in wishing Mrs. Winter a full and speedy recovery.

At 2.50 pm on 4 June the Parliamentary Works Office received a complaint that the water coming from the washbasin taps in the wc adjacent to the office where Mrs. Winter works had a foul taste. A technical officer was sent at 3.30 pm to investigate by the Parliamentary Works Office. He was unable to find any obvious cause of the trouble and decided to seek specialist advice. Neither he nor the Parliamentary Works Office was aware at that time that Mrs. Winter had been taken ill.

No connection was made between Mrs. Winter's illness and the water supply until 6.45 pm, when a request for a water sample was received from the Westminster hospital. The Parliamentary Works Officer gave his permission immediately on being made aware of that request. At the same time he ordered a detailed check to be made by his staff, who discovered the chemical contamination at 8.50 pm.

The water system was fully flushed five times during Tuesday night. The Government chemist was called in first thing on Wednesday morning to test the water. It was found to be suitable for washing, but chemicals were still found in concentrations which made it unsuitable for drinking.

During Tuesday night, warning notices had been put over a number of washbasin taps, and that process was completed on Wednesday morning. In addition, the House authorities made a warning announcement over the public address system in the building on Wednesday morning.

The water system was again flushed twice last night. Tests by the Government chemist this morning have shown a further marked reduction in the contamination, though not to a level which would be acceptable for drinking. Further cleansing action is being taken, and the Government chemist will continue with his checks for as long as necessary.

There are taps in the building marked "drinking water", and these are not fed from the tank supplying the washbasins. Tests have confirmed that water from these taps has not been affected.

I must also tell the House that it is likely that a similar mistake was made in early May, and the investigation will cover that aspect and the response to the complaints made at that time.

I have no doubt that the urgent investigation which I have set in hand will suggest improvements both in working practice and in communications between all concerned with the health and safety of those who work in these buildings. I can assure the House that the lessons learnt from this unfortunate incident will be vigorously applied, and I apologise to the House and its staff for what has occurred.

Mr. Jack Straw (Blackburn): We are grateful to the Minister for the terms in which he made his statement and his ready acceptance of responsibility for what happened. I am sure that I speak on behalf of my right hon. and hon. Friends in associating us with the Minister's expressions of sympathy for Mrs. Winter and his wish for her speedy recovery.

A grossly unsatisfactory position has been disclosed by the incident. I am advised by my hon. Friend the Member for Copeland (Dr. Cunningham), who has great scientific expertise in this area, that in some strength the substance is a deadly combination of corrosive and toxic chemicals. It is fortunate that more people are not suffering seriously as a result of the mistake.

In his statement, the Minister said that it was likely that a similar mistake was made in early May. I can tell the House that—not least because I have a direct interest in the water supply in Norman Shaw South because my secretary works in that building—at lunchtime I asked to see the complaints book for that building. It disclosed that complaints about the state of the water were made on 7 May, and again on 16 May. I have been assured that in both cases the attendants passed the complaints on to those responsible for securing the safety of the water supply. I am also told by staff who work there that at that stage they complained of the water tasting of caustic soda—the same substance as that mentioned in the statement.

I should be glad to hear the Minister's comments on that because it appears that little effective action to ensure that a mistake of that sort would not be made again was taken between the first reporting of the mistake on 7 May and the day before the poisoning of Mrs. Winter.

Will the inquiry cover the security aspects of the incident? Plainly, what could be done by mistake could also be done deliberately by men with evil intent. I think that the House is aware that neither the Health and Safety Executive nor environmental health officers have any formal authority within the Palace of Westminster. Does that lack of authority also extend to the outbuildings of the Palace that house the offices, such as the Norman Shaw buildings? In any event, is it not time that the legislation and the full powers of the HSE and the environmental

health officers—having been given by this House and the other place—were applied to the Palace? Will they be invited in?

The delay in dealing speedily and effectively with these complaints when they were first made is, in our judgment, symptomatic of an "Upstairs Downstairs" attitude all too prevalent in the Palace of Westminster. While working conditions for most Members of the House are poor, those for staff employed by Members are wholly unacceptable. Many work in garrets and basements that are little more than corridors, without natural light or ventilation, in near Dickensian conditions. It is a sorry tale, all too typical of the consequences of the ramshackle and penny-pinching attitude displayed towards facilities for Members of this House and their staff in what is supposed to be the Mother of Parliaments.

Sir George Young: On the hon. Gentleman's last point, I hoped that I had made it clear that the cause of this particular incident was an employee putting chemicals in the wrong tank. It would be wrong to attribute the incident to the more general problems that the hon. Gentleman mentioned.

On the question of toxicity, I have looked at the container from which the chemicals were poured, and it states, "Harmful if swallowed". Clearly, it is not to be consumed.

Like the hon. Gentleman, I have inspected the log books kept by the attendants at the entrance to the building, and I saw the entries to which he referred. One matter at which the investigation will most certainly look is what action was taken to follow up the complaints registered in that book.

Given that the solution was likely to be diluted after a few days, it is probable that if an analysis of the water was carried out later in the month, the presence of the chemical would not have been detected.

Some of the other matters to which the hon. Gentleman referred relate to responsibilities of other Departments or other parts of the building. The question of security is a matter for a Committee of this House. I have no doubt that it will take note of what the hon. Gentleman said. Likewise, I shall draw the attention of my right hon. Friend the Secretary of State for Employment to what the hon. Gentleman said about the Health and Safety Executive.

Mrs. Anna McCurley (Renfrew, West and Inverclyde): I thank my hon. Friend for the unequivocal apology that he has given us this afternoon. I wish to echo his sentiments that we all hope that Mrs. Winter recovers speedily. Wherever any water supply is being interfered with there should be not only a consistent but a constant effort to inform all members of staff—those employed in Norman Shaw South or any other part of the Palace —of the activities of those involved.

The dates of 7 and 16 May have been mentioned. My secretary also works in Norman Shaw South, and she confirms that on those days no one was informed of any work on the water supplies. They were turned off, and when they were reinstated the problems began.

There is a Tannoy system, so is it not possible that regular messages—which, after all, are broadcast over the Tannoy system about such matters as fire hazards—could be broadcast to inform staff of what is happening?

Sir George Young: I understand that the recent bulletin on Mrs. Winter said that there was no reason why a complete recovery should not be made, and I was delighted to hear that.

On the important point about communications, I can tell my hon. Friend that it is a matter that I wish to consider. Responsibility for broadcasting over the Tannoy system rests with the Serjeant at Arms' Department, and I shall be studying the liaison between my Department and that Department to ensure that when information such as that available on Tuesday is made known hon. Members are informed quickly. As staff arrive at the Norman Shaw buildings throughout the morning, I shall take up the point about regular broadcasts, rather than—as I understand it —the one broadcast that was made.

Mr. David Alton (Liverpool, Mossley Hill): I thank the Minister for the swift action that he took this morning and also for wishing my secretary a speedy return to good health. I thank the hon. Member for Blackburn (Mr. Straw) for associating himself with the Minister's remarks. I can tell the House that I spoke to my secretary not long ago, and she is beginning to recover. She has returned home to her husband. She wishes to thank people for all the good wishes that they have sent her.

Is the Minister aware that telephone complaints were made to the Serjeant at Arms' office by researchers and secretaries during the course of the last four weeks—quite apart from those logged in the complaints book? Can he tell me why, when my secretary's husband yesterday requested a sample of water on behalf of the hospital, he was initially denied that sample for the hospital authorities?

Does the Minister agree that the PSA is guilty of the most wilful negligence in not having acted sooner, having known since the beginning of May of the seriousness of the position? Will he also accept that this case highlights yet again the deplorable lack of facilities for many members of our staff in this building and the urgent need to extend the shops, offices and factories legislation to cover the Palace of Westminster?

Sir George Young: When the hon. Gentleman told me this morning on the telephone of the request for a sample, which he said had been denied, I made inquiries. I understand that my staff agreed to the request and would not have obstructed anybody who wanted to analyse the water. I shall make further inquiries, through the investigation, to find out who refused the sample.

As for negligence by the PSA, the problem is that in early May we had not discovered the incident. Had we done so, I hope that we should have taken effective action. I shall look into the information that was made available to the Serjeant at Arms during the preceding four weeks to see what follow-up action was taken after those numerous complaints. I hope that the report I have initiated can be published quickly.

Mr. Jim Spicer (Dorset, West): Does my hon. Friend agree that the water supply installation in Norman Shaw South is almost prehistoric? The staff of the House deserve great credit for keeping it working. I have worked in Norman Shaw South for the past eight years. Is it not clear that we should not drink water other than from taps that are clearly marked "drinking water"? The notices saying "drinking water only" should be reinforced and everybody who works in Norman Shaw South should receive a

[Mr. Jim Spicer]

personal letter saying that any other water is unfit for human consumption. A major tragedy on this occasion has been avoided, but we must make certain that we do not have a near-shave again.

Sir George Young: I understand that hon. Members and staff have been reminded that they should drink water only from taps that are so marked. I endorse the advice that my hon. Friend has given.

As for his remarks about the equipment, it is historic rather than prehistoric. I saw the two tanks this morning. They are next to each other. One is a feed and expansion tank. The other is a cold water down-service tank. The mistake was to put the chemicals in the wrong tank. It would be wrong to attribute this error to the quality of the building or to any other broader conditions. It was an inexcusable human error.

Mr. John Home Robertson (East Lothian): It was my secretary, Mrs. Gray, who raised the alarm about the incident on Tuesday. Will the Under-Secretary of State accept that it took far too long to give a warning about the danger of water contamination in Norman Shaw South? As the water may have been contaminated for as long as a month, will he make arrangements for appropriate medical advice to be given to the people who work in Norman Shaw South? Finally, will he say a little more about liability for injury to the secretaries of hon. Members in similar circumstances? The Under-Secretary of State said that he accepts responsibility. Do the Government accept liability for injuries sustained in such circumstances?

Sir George Young: The hon. Gentleman's last point would best be pursued with the legal advisers of my Department rather than across the Floor of the House.

We shall have to await the outcome of the investigation that I have set in hand before we know what was the timescale of the series of events on Tuesday and Wednesday morning of this week and can decide whether more could be done to alert people more quickly when something goes wrong. It would make sense for anybody in Norman Shaw North or Norman Shaw South who feels ill to consult quickly his medical adviser or doctor. Such advice has already been given.

Mr. Patrick Cormack (Staffordshire, South): Is my hon. Friend aware that some years ago those who had offices in Norman Shaw South were asked not to drink water from taps other than those marked "drinking water"? That notice disappeared and we were given to understand that all the water in Norman Shaw South was safe.

Is my hon. Friend further aware that when the notices went up yesterday they gave no indication of the seriousness of this problem? Nor was the one announcement that was broadcast over the Tannoy system at all informative. Some people had to telephone the attendants because the announcement was fairly inaudible and ask precisely what had been said. Will these matters, including the former alleged lead poisoning that led to the advice not to drink water, be considered by the inquiry? Will my hon. Friend also bear in mind that if Norman Shaw South had been finished to the same standard as Norman Shaw North this unfortunate statement would not have had to be made today?

Sir George Young: The answer to the first half of my hon. Friend's question is yes: those matters will be considered. I note my hon. Friend's other remarks.

Mr. Walter Harrison (Wakefield): I compliment the Under-Secretary of State on having tried to clear up this matter expeditiously, but, as usual, communications are not as good as they should be. We believe that we can communicate with each other quickly in Parliament, but we have never taken decisive measures about communications because we are frightened of abusing the privileges of Parliament. When there is an emergency everybody in the building—all 9,500 of them—should be alerted. I am pleased to hear that Mrs. Winter is recovering.

I have been a Member of Parliament for 21 years and have never drunk a drop of water out of a tap. I have always mixed it, and the stuff I mix it with usually counteracts anything that may be in the water. When I heard that Mrs. Winter was not too well because of the water she had drunk I checked the water I had been drinking and found that it went back to before 30 September 1983. I have always been suspicious of London water. I read an article that said that it was retreaded about 25 times. Therefore, I decided to drink not London water but bottled water.

My "Highland Spring" water, which carries an advertisement about BUPA, also refers to a fitness competition, the closing date for which was 30 September 1983. So I was in a bit of a panic. I had no trouble with my tummy, but I said to the Manager of the Catering Department, "How long have we had this water? I have just checked the label and it says September 1983." He said, "I'll you tell what I'll do".

Mr. Speaker: Order. But was it consumed in Norman Shaw South?

Mr. Harrison: "Highland Spring" water is consumed in all parts of the Palace of Westminster. People ought to be cautious about drinking London water. I say to the Catering Department—and I have put down a question about this—that "Highland Spring" water should be withdrawn, although I do not know what would replace it. Water is essential, and it must be clean. Although the Under-Secretary of State is trying to do his best, the emergency signal must be sent out, "Do not drink London water, irrespective of whether it is identified". We will export Yorkshire water. Will the hon. Gentleman do something about this?

Sir George Young: I think that I would be in some difficulty if I attempted to wind up the debate that the right hon. Gentleman has initiated. As a London Member of Parliament, there is no way that I can advise constituents not to drink London water. But, on the more serious point, the right hon. Gentleman has responsibility for security in the Palace. No doubt we can interpret his responsibilities for security sufficiently broadly to encompass the many remarks that he made in his intervention, and concentrate on those that are relevant, particularly with regard to communications.

Several Hon. Members *rose*——

Mr. Speaker: Order. After that interesting exchange, we should move on.

Mr. Andrew Faulds (Warley, East): On a point of order, Mr. Speaker. Those of us who work very closely with the Serjeant at Arms on the Services Committee

always find his staff and him more than responsive to representations from hon. Members. We find it unacceptable that the Minister should try to pass the buck when these responsibilities lie entirely within his Department and the PSA.

Several Hon. Members *rose*——

Mr. Speaker: Order. I do not want to take further points of order on this matter——

Mr. A. J. Beith (Berwick-upon-Tweed): On a point of order, Mr. Speaker.

Mr. Speaker: I will, of course, take a point of order from the Liberal Chief Whip, but I am trying to protect his party's Opposition day.

Mr. Beith: I know full well that I have an interest in getting on with the debate that is to follow, but I should point out that it was my hon. Friend the Member for Yeovil (Mr. Ashdown) who asked yesterday for a statement. In response to my hon. Friend, the Leader of the House said that a statement would be made. In the circumstances, I think it only reasonable to ask you to give my hon. Friend the opportunity to question the Minister on his statement.

Mr. Speaker: I thought that it was the hon. Member for Liverpool, Mossley Hill (Mr. Alton) who was concerned about this matter. Any further questions on the statement will only take time out of the Liberal party's Opposition day. However, if it is true that the hon. Member for Yeovil (Mr. Ashdown) requested the statement—I was not aware of that—I shall allow him to put a question to the Minister. However, such latitude is very exceptional and should not be taken as a precedent.

Mr. Paddy Ashdown (Yeovil): I am grateful to you, Mr. Speaker. I thank the Minister for his assurances and, in particular, for the frank way in which he has accepted responsibility for this matter. I also associate myself with the comments made by the hon. Member for Blackburn (Mr. Straw) and by my hon. Friend the Member for Liverpool, Mossley Hill (Mr. Alton) concerning the disgraceful conditions in which some of our staff have to work.

I am particularly grateful to the Minister for agreeing to look at the question of communications. Is it not true that the Serjeant at Arms and his staff were not informed at 8.50 pm on Tuesday of the nature of this potentially horrific accident and that they did not get to know about the accident until hon. Members found out, because it was leaked—or at least given to the press—in information from the PSA late yesterday evening? Was there not a disgraceful lack of communication? Why is it that that information was not afforded to the Serjeant at Arms' staff or to hon. Members, but was leaked instead, nearly 24 hours afterwards, to the press?

Sir George Young: There are two points there. The Serjeant at Arms' staff broadcast the information over the Tannoy on Wednesday morning, so they must have known the information at that time. But I accept that there appears to have been some breakdown in communication between the PSA and the Department of the Serjeant at Arms. That is something that I shall want to consider in order to put right any deficiencies.

I learnt of the incident at about 3 pm yesterday and by 5 pm I had issued a press statement in response to inquiries from the press. Thus the moment that I was aware that there was a demand for information, I prepared a press statement and put it out.

Mr. Eric S. Heffer (Liverpool, Walton): On a point of order, Mr. Speaker. Have telephone communications broken down in the House? If not, is it not possible for any hon. Member to telephone the Serjeant at Arms' office, just as I have done many times?

Mr. Speaker: I do not know whether there was any breakdown.

Administration of Justice Bill

Mr. Austin Mitchell (Great Grimsby): On a point of order, Mr. Speaker. Has it come to your attention that, of the 18 members of the Standing Committee on the Administration of Justice Bill, 12 are solicitors or barristers? In the governing party, which must be assumed to constitute a majority on that Committee, nine out of the 11 Conservative Members are barristers or solicitors. Although we obviously need expertise, there is a division between the public interest, broadly interpreted, and the vested interests of lawyers as a group.

If the Lord Chancellor feels, as he appears to do, that solicitors working for building societies will be exposed to an intolerable conflict of interest if they do conveyancing, are not the Government exposing their Back Benchers to an even more intolerable conflict of interest by asking them to judge between their public and professional interests? Will you, Mr. Speaker, ask the Committee of Selection to reconsider the Standing Committee's composition in order to make it more representative?

Mrs. Elaine Kellett-Bowman (Lancaster): Further to that point of order, Mr. Speaker. If I, as a barrister, have been put on that Committee, I shall be delighted to give up my place to a non-barrister.

Mr. Speaker: The hon. Member for Great Grimsby (Mr. Mitchell) should take up the matter with the Chairman of the Committee of Selection. It is not for me to draw it to the Chairman's attention. But if what the hon. Gentleman says is correct, the remedy lies in his hands.

The Arts (Funding)

4.26 pm

Mr. Norman Buchan (Paisley, South): I beg to ask leave to move the Adjournment of the House, under Standing Order No. 10, for the purpose of discussing a specific and important matter that should have urgent consideration, namely,

"the emergency statement issued by the Arts Council today in relation to the critical shortfall in funding for the arts."

The matter is important because it relates to Government legislation and to this morning's statement. When the Government introduced their Bill to abolish the metropolitan authorities and the GLC, it was recognised that it would create a serious situation for the arts. The Minister for the Arts therefore announced an additional £34 million to replace the moneys that would be lost following the abolition of the GLC and the metropolitan authorities. It was to be made up of £18 million for galleries, museums and films, and £16 million which was to go directly to the Arts Council to replace the money lost to the performing arts.

Today, the Arts Council has announced that the real figure of loss is not £16 million but £46 million, which is £30 million short of the amount allocated by the Government. The Secretary-General of the Arts Council says that it cannot

"run the South Bank at its present level and cover the replacement of Mets grant even to the major companies."

Sir William Rees-Mogg has said that he is "seriously concerned". From him, that means that we are facing a catastrophe. He said:

"We are asking the Government to consider allocating sufficient funds to secure the future of these organisations and to enable the Council to fulfil its role on the South Bank."

There is a basic shorfall of £30 million. To give hon. Members some measure of its importance to the arts, I should point out that that £30 million would exactly cover the funds needed to finance our four basic national institutions: Covent Garden, the National Theatre, the Royal Shakespeare Company and the English National Opera. It is equal to 2·5 times the amount of money that is given to the entire arts through the Scottish Arts Council, and it is three times the amount of money given to all the regional arts associations in England. It is, therefore, a massive amount of money. It means that the Arts Council cannot carry out the duties imposed on it.

But the matter is urgent in another way too. During the passage of the Bill in this House attempts were made to insert amendments that would have dealt with the problem. Next week the Bill will reach its Report stage in the other place. That gives us our last opportunity to have amendments accepted there and then brought to this House. It is important that hon. Members should be given an opportunity to debate the issue so that the other place can judge our attitude towards it. The information was not known when the House passed the Bill at an earlier stage.

It is impossible to exaggerate the crisis. The Arts Council says that it cannot fulfil its duties. The issue is urgent, because it can be debated and rectified to some extent next week in the other place. The Government could legislate next week if this House made its will known through a debate. Above all, we could give notice of our commitment to replace the total sum of £46 million. I cannot argue the case now but the crisis has been brought

about by a mixture of pique and political malice that has been compounded by stupidity in the Government's failure to do their sums. They must now make good the damage.

Mr. Speaker: The hon. Member for Paisley, South (Mr. Buchan) asks leave to move the Adjournment of the House for the purpose of discussing a specific and important matter that he thinks should have urgent consideration, namely,

"the emergency statement issued by the Arts Council today in relation to the critical shortfall in funding for the arts."

The hon. Gentleman knows that the decision that I have to take in this matter is whether to give it precedence over the business set down for today or Monday. I have listened with great care to what the hon. Gentleman has said, but I do not consider that the matter that he raises is appropriate for discussion under Standing Order No. 10 and, therefore, I cannot submit his application to the House.

BILL PRESENTED

MEMBERS OF PARLIAMENT (MINIMUM AGE)

Mr. David Amess supported by Mr. Richard Ottaway, Mr. Harry Greenway, Mr. Eric Forth, and Mr. Jeremy Hanley, presented a Bill to reduce from 21 years to 18 years the minimum age for election as a Member of the House of Commons: And the same was read the First time; and ordered to be read a Second time tomorrow and to be printed. [Bill 155].

Opposition Day

[13TH ALLOTTED DAY]—*considered*

Elderly Persons

4.32 pm

Mr. David Steel (Tweeddale, Ettrick and Lauderdale): I beg to move,

That this House, while recognising the need for a review of the social security system, rejects those parts of the Green Paper which are designed to cut costs and will therefore add greatly to the problems of many elderly people on low incomes by reducing their entitlement to help with the high cost of rent and rates, will eventually remove the state earnings-related pension scheme without substantially increasing the basic pension, and will replace a parsimonious death grant scheme with one likely to cause maximum distress at the time of bereavement.

Mr. Speaker: I have selected the amendment in the name of the Prime Minister.

Mr. Steel: As this is the first occasion on which the amended Standing Order No. 6 has been brought into use, and the minority parties have a chance to introduce a debate out of slightly more generous time than in the past, it would be churlish to let this opportunity go by without thanking the Leader of the House for enabling this reform to be made. Needless to say, we are not satisfied that we are being given a fair deal, but this is a notable step forward, with the existence of something other than the official Opposition at last being recognised in the Standing Orders.

I am pleased that my colleagues and I took the decision that our first use of this opportunity should be to have a debate on the problems of the elderly. We took that decision before the Whitsun recess knowing that the Green Paper on social security reform would be published before the debate. Although the debate is not to be confined to that Green Paper, it provides the House with an early opportunity to probe the Government further on their intentions in that review.

Beveridge once observed that if one scratched a Tory one would find a pessimist, and if one scratched a Liberal one would find an optimist. If one scratched the Green Paper one would find acute pessimism. Where it is not pessimistic, it is mean-minded. The pessimism is contained in the assumptions set out in paragraph 5.6 of volume 1, which looks at the costs of our pension provisions over the next 20 years. It does so on assumptions of 6·5 to 10 per cent. continuing unemployment, so that the greatest extent of the Government's optimism for the next 20 years is an unemployment level of 6·5 per cent. That is a great contrast with Beveridge's original concept of working out a social security scheme, based on assumptions of reasonably full employment.

The Government's basic assumption is dumbfounding. Week in, week out, we hear of how economic recovery is about to arrive next week, next month or next year, and that the economic miracle has been achieved. Such phrases trip off the tongues of Ministers at weekend speeches, but, when it comes down to the hard facts, the basic assumption throughout the review is of an intolerable level of unemployment in the years to come.

[Mr. Steel]

We are entitled to ask on what growth assumptions in the economy the review is based. Again, pessimism seems to be the order of the day. The only figures that one can find in the review are the page and paragraph numbers.

The first question that I put to the Minister for Social Security is: what is it that you have to hide? Without the figures, as the *Financial Times* commented, it is rather like having an annual report without a profit and loss account. The figures should be given to the House soon, for three reasons. First, no Government or Parliament can contemplate recommending a series of changes to our basic welfare provisions without a pretty good idea of how they will affect those who rely on the welfare state. On Tuesday, the Prime Minister, in answer to questions, said that her refusal to give figures was because of her belief in sound finance. That must be an exotic statement, even by her standards.

The second reason why there have to be figures is that the Secretary of State said, back in April 1984, that the review was to be revenue neutral. How can we tell if that is so without costing? How can we tell if the reforms will save the £1 billion that the Chancellor wants to save without costings?

The third reason why the Government should give the House some figures is that in the housing benefit review section of the report, paragraph 3.19 refers to the illustrative costings for that section. However, they have not been given. They have been leaked in various places, but not here.

While we all welcome the review, the Government have been less than candid, and their failure to publish figures has spread unnecessary fear among claimants, especially pensioners, and this has been done because of media management. However, on the basis of what the report says, we can already identify three sectors in which pensioners will be hard hit—housing benefit, SERPS and the death grant.

Mr. Eric S. Heffer (Liverpool, Walton): I endorse what the right hon. Gentleman says, but he spoke of unnecessary fears. Surely these are necessary fears.

Mr. Steel: That is a play on words, but I accept the hon. Gentleman's point. It is a fear that I fear will turn out to be necessary. However, if we are right in some of the calculations that I shall give, it would be better for the Government to give the figures now so that the population can thoroughly debate the Green Paper.

It has been calculated outside the House that on housing benefit over 6 million people will lose more than £1·40 per week. Is that calculation correct? The Government are in a position to tell us. Before we look at what is proposed on housing benefit, we should do well to remind ourselves of what has already happened to housing benefit in the lifetime of the Government.

In the 1983 Budget, housing benefit was introduced to unify the two existing schemes, but, because the reform was supposedly conducted without costs, many people lost out during the original introduction of the housing benefit scheme. It has had two further cuts, in April and November 1984. Thus we are arriving at the review against a background of at least three previous occasions in the lifetime of this Government when housing financial support for certain people has been cut. The total cut may be about £500 million. Again, the Government are the only people who can tell us whether that figure is right.

I move on to the detail of what is proposed on housing. First, there is the question, on which we were quizzing the Prime Minister on Tuesday, of the 20 per cent. rate demand as a minimum payment from everybody in the future. I asked the Government about that, because it is not clear whether it is intended that people receiving the new income support help with these payments will be subject to the 20 per cent. or not. That is not clear from my reading of the report.

In principle, it is a good idea to cut the number of individual tapers and the rates at which benefit is withdrawn against them, but the Government's proposal for a single taper for rent and rates will hit pensioners particularly hard. I can give a specific case as an example. It concerns a pensioner couple who have paid off their mortgage and have an income of £75 a week, which is hardly living in the lap of luxury. On realistic assumptions, they will lose out substantially, if my calculations are correct. Let us assume a weekly rates bill of £9—a not excessive figure for London. At present, the couple will receive £4·71 housing benefit. Assuming an income support level of £61, which is the current supplementary benefit level, plus a few additions to which pensioners are entitled, their entitlement under the new, combined 70 per cent. taper will be negatived—minus 80p. They will lose all benefit entitlement, and there will be the imposition of the 20 per cent. rates provision. The basic point is that those who pay no rent, who are mainly pensioner owner-occupiers, will be very severely hit by the new proposals in the Green Paper. I should like the Minister to confirm that.

At present, people on supplementary benefit receive help to pay their water rates, but under these proposals, as I understand it, they will receive only about £1 per week. That will prove inadequate, especially against the background of the Government telling water authorities to push up their charges. The Green Paper proposal will hit pensioners severely. Many elderly pople will see their basic weekly standard of living drop substantially as a result of the review.

In regard to the state earnings-related pension scheme, we on these Benches will not be able to support its abolition without a correspondingly large increase in the basic pension. All the pensioner organisations that I have met in recent months — Age Concern, Pensioners' Voice, and so on—say that, while they welcome the individual provisions made for pensioners, they would really like a substantial increase in their basic standard of living. We have always supported that. During the passage of the legislation my noble Friend Lord Banks in another place and my hon. Friend the Member for Truro (Mr. Penhaligon), who was our spokesman in this House at the time, made it clear that we reckoned that SERPS would turn out to be too expensive. We said we would rather put the money on the basic rate and encourage the growth of occupational pension schemes. The Government have never been generous to pensioners in the basic rate.

We must examine the Green Paper against the background of what has happened in recent years. The breaking of the link between earnings and pensions in 1979 has cost a couple £4·85 and a single pensioner £3 per week. It is also a way of saying that pensioners should not share

automatically in any general growth in the nation's prosperity which, as I shall show in a moment, runs counter to some phrases in the Green Paper.

The effect that the proposals will have on the value of the basic pension is not clear. Paragraph 9.4 of volume 1 suggests that there is to be a reallocation of support towards families with children. The Minister also said that in his statement. It follows that, if the review is to be neutral overall, the people who will lose out will be not families with children, but again mainly pensioners.

Paragraph 7.19 of volume 1 refers to the abolition of SERPS enabling the Government,

"if economic growth permits, to give all the pensioners of the time a share of increasing prosperity through the basic pension."

If we were to put that in jargon terms, it means that the Governmnent's policy is possible jam for the day after tomorrow. That is the only interpretation to put on it. In other words, pensioners will have to wait for a general uplift in the economy, which the Government's own assumption through the 20-year forecast denies will happen, before they can achieve a higher standard of living.

In volume 2, paragraph 1.69 says that the earnings rule, which the Government have been promising to end since 1979, will be ended

"at the earliest opportunity when resources permit".

That is the same message of possible jam the day after tomorrow. What is the Government's long-term intention about the basic pension? We should know before further debate on the Green Paper.

Of all the proposals in the copious volumes of the review, the proposal in regard to the death grant is the meanest. We would face the same problem if we were in government. I well understand that a flat rate grant of £30 that is long out of date cannot be increased suddenly to bring it in today's terms to the level at which it was introduced, because the public expenditure commitment would be enormous.

The Government's proposal is doubly vicious. The individual seeking help for a funeral will have to go to the DHSS to ask for a discretionary payment at a time of maximum grief and bereavement. Moreover, the decision will have to be made quickly, by definition, because of the funeral that is being booked to take place within a dew days. Those are the worst possible conditions in which to have a general discussion of a means-tested benefit.

On top of that I understand that help for funerals is to come out of the new social fund, on which there will be a limit. What will happen towards the end of a financial year if after the money has run out someone asks for help to pay for a funeral? There has been no explanation of how the social fund will operate in general on a fixed sum. In particular, how will it operate if people are inconvenient enough to die towards the end of a financial year? The Government should come clean on that.

I have a positive suggestion. The only reasonable course is to uprate the death grant to a substantial amount — probably £250 — and to say that it is available automatically for those who wish to claim it, but that the Government may claw it back from the estate in due course, after the funeral is over and the bereavement has passed. That would ensure that the money would not go to those who do not need it. I do not know why the Government have not come up with such a scheme.

I have said enough about the Green Paper. There are three other matters that I wish to raise under the heading of the elderly. Many hon. Members are concerned about the tax provisions that we make for those who devote their lives to caring for the elderly. This is surely one of the developing areas of support for the elderly. The network of informal community care throughout the country is massive, but it is often ignored and not greatly encouraged by public authorities.

It was estimated from the 1981 census that about 800,000 people are involved in caring for the handicapped elderly. If we add to that other categories of elderly, who need extensive care but receive it through the informal sector—families, neighbours, and so on—the reasonable figure for informal carers would be able about 1 million. If the work of these people has been done by the state and if, on a modest asssumption, we take three and a half hours a day at £2·90 per hour, the average cost of home helps in the financial year 1982-83 would have been a massive £3·5 billion. Therefore, as a community, we should recognise that these informal carers are extremely important because they do a good job at very low cost. Instead of taking them for granted, we need to formulate policies to support them and recognise the selfless contribution that they make.

The first thing to be done is to extend the improperly named invalid care allowance to married women. At the moment it is discriminatory in that it is paid only to men and women who are not dependent on a breadwinner. I understand that there is before the European Court a case that the Government are likely to lose. It would be more useful and sensible for the Government to give in gracefully and agree that the allowance should be extended to married women. Help should also be provided to enable the carers to have one or two weeks' holiday by bringing someone else in to look after the elderly relative. That would give these people a break from the work they have to do.

One consequence of the Government's cutback on spending by local authorities has been the reduction in the personal social services. The people who have suffered most have been the elderly, through the meals-on-wheels and home help schemes. Those are the things which directors of social services find relatively easy to cut from their budgets when they are hard pressed. I am told that between 1979 and 1984 two thirds of local authorities had increased spending by less than the Association of Directors of Social Services regarded as necessary to maintain, not to improve, these basic services. Rate-capping will make the problem even worse. Too often the Government have tried to shift the blame for the reduction in personal social services on to the local authorities. We should make it clear in the House that we regard the Government as directly responsible for these cutbacks.

The elderly who live in rural areas—although I am not speaking exclusively about rural areas — are dependent on the transport provisions that we make for access to post offices, and so on. I believe that the Transport Bill, which is at present going through another place, will damage the interests of elderly people by making it more difficult for local authorities to provide the schemes necessary for effective support of transport for elderly people. For example, I believe that the cross-subsidy will be down from about £60 million to £20 million a year, and in any case it is designed to be phased out within five years.

Mrs. Elaine Kellett-Bowman (Lancaster): Does the right hon. Gentleman accept that in my part of the country the elderly, and particularly the disabled, will be substantially helped by the Bill? Although many of them receive concessionary fares, they cannot make use of them either because there are no buses or because they are too disabled to board them. Under the new Bill, they will be able to use their coupons for taxis, and that will help enormously.

Mr. Steel: The hon. Lady is half right; but to say that because there are no buses in some areas we should introduce legislation that will mean even fewer buses in the future is to express a most extraordinary view. I think that the hon. Lady will join common cause with me in this view. I find that the various concessionary fare schemes suffer through lack of a national scheme of support which would enable elderly people to travel across boundaries between rail and buses. Old-age pensioners in my constituency, which is hard hit by that, have complained to me that in other parts of the country, notably in the London Transport area, pensioners have benefited greatly in past years from imaginative local schemes that have no cross-geographical reference. We know from the experience of British Rail, which found it convenient to introduce off-peak travel schemes for old people, that it is possible for a national scheme to be introduced.

I referred earlier to post offices. In rural areas people have to travel further because of the cutbacks and closures that are taking place. The combined effect of post office closures and the lack of transport facilities will adversely affect elderly people in rural communities.

In conclusion, it is important that we turn our attention, in the wake of the publication of the Green Paper, to the plight of the elderly in our communities. We should insist that during the debate in the weeks ahead the Government are more forthcoming about what is actually going to happen, so that at least, in the words of the hon. Member for Liverpool, Walton (Mr. Heffer), people know the worst and are not left with the vague, unfigured, unstructured debate into which they have been plunged by the publication of the Green Paper.

4.52 pm

The Minister for Social Security (Mr. Tony Newton): I beg to move, to leave out from "House" to the end of the Question and to add instead thereof:

"recognises the Government's achievement in increasing the value of the retirement pension and welcomes the Government's continued commitment to protect its value; congratulates the Government on carrying out a thorough review of the social security system; and endorses the aim of ensuring a coherent and soundly based benefit structure to meet the needs of pensioners and others.".

We welcome very much the opportunity for this debate, at an early stage, on the needs of elderly people and their relationship with the proposals that we have put forward in the social security review Green Paper. As a Government, we have shown by our actions that meeting the needs of elderly people is a major objective of our policies, whether in social security, social services, health, or the many other aspects of policy that affect people in retirement.

The Government's amendment begins by referring to what has been achieved. Especially against the background of what I took to be the rather grudging remarks of the right hon. Member for Tweeddale, Ettrick and Lauderdale (Mr. Steel), I want simply to remind the House of what has been achieved in the past five or six years. First and foremost, we have firmly and clearly not only fulfilled but more than fulfilled our pledge to protect the value of retirement pensions. They have risen by very nearly 84 per cent. in a period in which prices have risen by 77 per cent.—a clear real increase. What is more, that has been achieved at a time when the number of retirement pensioners has increased by some 700,000, so that we have protected the position not only of those pensioners whom, as it were, we inherited, but of the significantly larger number of pensioners arising from demographic factors in the past few years. Contrary to what many Opposition Members profess to believe, it is our achievement in providing for that additional number of pensioners and increasing the real value of benefits that accounts for the major part of the real increase in social security expenditure of over £8 billion that has taken place in the past five or six years.

At the same time, we have changed the method of uprating pensions so that pensioners have the assurance of increases based on the actual measured increase in prices instead of the vagaries and uncertainties of the forecast method that we inherited from the Labour Government. Not least, for pensioners generally, we have written the Christmas bonus into the law and prevented the recurrence of what happened twice under our predecessors when the Christmas bonus was not paid at all. But if those are our achievements on the broad front——

Mrs. Margaret Beckett (Derby, South): As the Minister is talking about how good the Government's record is on the Christmas bonus, would he like to refer to the commitment that I seem to recall the Conservatives making before 1979 to double the Christmas bonus? Will the Government actually do that?

Mr. Newton: I am unaware of any commitment that we made to double the Christmas bonus. Such challenges come oddly from an hon. Lady who was, as I recall, a member of the Administration at the time when, two years running, no Christmas bonus at all was paid. My answer to the hon. Lady, if I may lapse into the vernacular, is simply: what a nerve.

Let me turn from what I said about the generality of our achievements for pensioners to some of the more limited measures that we have taken, which I think have been recognised by some Opposition Members, not least the hon. Member for Birkenhead (Mr. Field). They have not been recognised as widely as they should be. Although they are not necessarily of benefit to pensioners generally, they have brought significant additional help to important groups of pensioners with particular needs.

For example, I remind the House that since May 1983 men over 60 who are sick, disabled or unemployed can qualify immediately for the higher long-term rate of supplementary benefit. Men over 60 who are not working no longer need to sign on as unemployed to be awarded national insurance credits. Let me remind the House also that the capital limit for supplementary benefit was raised to £3,000 in November 1983, and changes have also been made in the smaller capital limit for single payments—a significant additional help to those many pensioners who have modest savings and previously found themselves denied benefit.

Let me remind the House further that since November 1984 people who return to this country after the age of 70

have been able to qualify for the non-contributory over-80s retirement pension. Before that change was made they had to fulfil a 10-year residence test before their 80th birthday. At the moment before the other place is a Bill that provides for abolishing the married women's half test, with effect from December 1984, so that married women who were over 60 in April 1979 will be able to get any retirement pension earned by their own contributions even if they did not pay national insurance contributions for half their married life. That was a discriminatory measure, and we have been happy to propose that the House should remove it. In recent proposals brought by the Government to the House, we have made it clear that we intend to abolish the lower married women's rate of the over-80s pension, and pay everyone the full rate from November 1985.

Those are not proposals that affect every pensioner, but they are targeted on groups with particular needs, for which I think we are entitled to claim credit from the House and, indeed, from the country.

Perhaps most important of all is a point which the right hon. Member for Tweeddale, Ettrick and Lauderdale did not touch upon and which I do not expect to hear mentioned by the Opposition Front Bench. I refer to the Government's most important single achievement in relation to retirement pensions, which has nothing to do with the pension itself. Our achievement in dramatically reducing the rate of inflation has ensured that pensioners' benefits and savings reasonably maintain their value and purchasing power.

The air of scorn of some Members on the Opposition Front Bench does them very little credit. They should go out into the country and ask pensioners how they feel about the Government's achievements in reducing inflation and how much easier that makes their lives than they were when prices were rising at more than 20 per cent. per annum. The Opposition should talk to the grass roots.

Mr. Frank Field (Birkenhead): I do not wish to cramp the Minister's style, but will he spend some time not just reviewing what he alleges to be the Government's achievements but telling the House what the Government intend to do? As a result of the "new Beveridge" that the Secretary of State has brought forward, how many pensioners will be better off and how many millions will be worse off?

Mr. Newton: I was about to come to the figures and the Green Paper, but lest the hon. Gentleman think that I am trying to fend him off I should say that the Government are proposing an important series of structural reforms.

The hon. Gentleman is one of the few people in the House who may already have appreciated the significance of adopting for income-related benefits a common base of income assessment and a co-ordinated set of rules, and its importance for rational social security planning and the use of resources throughout the country. The Government feel that it is right to concentrate first on those structural reforms because whatever resources are available in the social security system it will be impossible to ensure that they are effectively used if we do not have a structure capable of using them effectively. When the House has had an opportunity to come forward with proposals concerning this structure and the Government have produced final proposals, then will be the time to consider in detail how the resources should be applied within that structure. That is what will determine the figures which so interest the hon. Gentleman.

Within any structure, decisions have to be made from time to time about the level of resources. It would not be sensible to give the kind of figures requested by the hon. Gentleman in advance of the structure being settled. Only the figures for the actual benefit rates from April 1987 will properly allow the hon. Gentleman to make such calculations. It is sensible to get the structure right and then to decide what the resources are to be and how they are to be deployed within the structure.

Mr. Field: Did the Government follow that procedure when they discussed the reforms in private? Is the Minister saying that the proposals were approved by the Department, the Cabinet Committee and the Cabinet itself without the Secretary of State putting any figures to them at all? Was the Cabinet happy to see at some later stage how individual groups would be affected? If the Cabinet was not satisfied with a discussion on that basis, why should the House be satisfied now?

Mr. Newton: In the course of the social security review the Government have, of course, satisfied themselves that the structure proposed can be sustained at a cost that the country can afford.

Mr. Field *rose*——

Mr. Newton: I shall give way again in a moment. The hon. Gentleman might at least let me finish my answer to his general point.

The point that the hon. Gentleman has failed so far to take—and I should like to carry him with me on this—is that whether we have the proposed structure, the present structure or any other structure that people come up with, decisions have to be taken year by year about the resources to be applied within the social security system. That cannot escape any Government, and the Labour Government many times found themselves taking what they no doubt regarded as very difficult decisions for just those reasons.

Given that within any structure Governments have to take decisions about resources, and as it would plainly be absurd at this stage to try to settle benefit rates for April 1987, the important issue for the Government to put before the House and for the House and the country to consider is whether we are proposing a sensible structure within which the resources, whatever their level, can be sensibly deployed.

Mr. Field: Most of my constituents would be far happier with a scheme that is complicated and difficult to understand but which pays more money than with a Rolls-Royce scheme which pays only half the benefits, and I shall be happy to take that debate to the country. Is the Minister really saying that the Prime Minister approved the scheme without knowing how many millions of pensioners would be better or worse off?

Mr. Newton: I have already given my answer to the general question that the hon. Gentleman raised. As one or two of my hon. Friends have pointed out from a sedentary position, although I have the highest regard for the moderation with which the hon. Gentleman put his views in the House and for his knowledge of the social security system—which is greater than that of most of us — the views that he attributes to his constituents, whether accurately or not, are not views that I would expect him to endorse. If the hon. Gentleman, as one of the leading experts in the House on the social security

[Mr. Newton]

system, is saying that he is interested only in additional resources regardless of whether the system is capable of directing them effectively to people in need, frankly he does nothing but damage to his own credibility.

Mrs. Beckett *rose*——

Mr. Newton: I will give way this time, but much as I am enjoying the debate I shall have to resist the temptation to give way any more because many other Members wish to take part.

Mrs. Beckett: The Minister has said some very kind words about my hon. Friend the Member for Birkenhead (Mr. Field), but he does his own reputation no good by trying to sustain the argument that the amount of money that people receive matters less than the way in which the money is delivered. If he really believes that, his understanding of the social security system and those who draw on it is infinitely less than we had previously imagined. Is what the Minister has just said a statement of what the Government are offering — a streamlined system with less money? If so, that merely confirms our worst fears.

Mr. Newton: I had intended to respond with almost as many kind remarks about the hon. Lady as about her hon. Friend, but in the past 30 seconds or so she has forfeited the right to those kind words.

Mr. Field: Just answer the question.

Mr. Newton: Not only did I in no way suggest that the structure was more important to claimants or anyone else than the level of benefits, but I made it quite clear—I hope that I carry both hon. Members with me on this—that a social security system which is not capable of using any given quantity of resources to the best effect, targeted effectively on those in greatest need and with the greatest claim to support from the rest of the community, is not a satisfactory system. What is more, such a system would end up wasting some of whatever money was put into it.

Mrs. Kellett-Bowman: Will the Minister accept that the elderly have a strongly developed sense of fair play? If they can see exactly how they and others benefit from the social security structure, they will be very much happier than they are with the present complicated system.

Mr. Newton: I entirely accept that helpful intervention from my hon. Friend.

I should like to move from the Government's record, as indeed I was being urged to do by the hon. Member for Birkenhead, to the way in which the concern shown in that record is carried through into the objectives and proposals in the review.

It is significant that the inquiry into provision for retirement was the first of the reviews to be established. Our aim is to ensure a sound basis of social security on which pensioners can safely rely. Briefly, I shall set out the main review proposals.

First, the basic state pension remains the foundation of state provision. To use the phrase in the Green Paper, it is one of the twin pillars of our approach to social security and a vital part of the improved partnership between the state and the individual that were are creating. The Green Paper states:

"The Government remain entirely committed to this"—

the basic retirement pension—

"and will continue to ensure that it retains its value".

Pensioners, with other social security beneficiaries, will have two upratings in the 16 months from November 1985 to April 1987. This will be carried out on the historic basis, taking the latest practicable measure, so that each uprating will be on time.

On top of the assurance given on the basic retirement pension, we have made it clear that the rights of existing pensioners or anyone retiring before the end of the century will not be changed by the proposals on the state earnings-related pension scheme. All existing rights at the time of the change will be honoured in full. For men aged 40 or over, or women aged 35 or over, their SERPS rights will be enhanced as a firm additional basis for the individual, personal or occupational pensions that they be able to build up under the proposals.

Mr. Heffer: I am sure that the hon. Gentleman agrees with me that if people were living purely on the basic pension they could not manage to survive. They survive because they receive supplementary benefit, yet it is that benefit and the various benefits that go with it, such as the heating allowance, that the Government intend to affect. Can the Minister assure us that those people living on benefits will receive more, or is it the intention of the Government, as it appears to us, to muck about with benefits so that people living at that level will be far worse off?

Mr. Newton: I hope that the hon. Gentleman will forgive me if I come in a moment to the incomes support scheme—our proposed restructuring of supplementary benefit—to which I believe he was referring, and to the wider issue that he raised. I wish to complete my remarks about our proposals for additional pensions over and above the basic state retirement pension.

With the continuation of the state earnings-related pension scheme for men aged over 50 and women aged over 45 at the time of changeover, and the proposal for enhanced rights for men aged between 40 and 50 and women aged between 35 and 45, and for the protection of SERPS rights at the time of changeover for others, we have provided a firm basis on which people can build additional entitlement through the new arrangements that we propose to introduce for occupational pensions, whether in a firm or on an industrywide basis, or for personal pensions. It means that, for the first time, almost everyone in work will be able to build their own entitlements to their own pensions and will have a specific right to contributions from their employers towards that.

During the years in which those rights are building, they will represent a major social advance—removing the present "two nations" in pensions—and will be a major foundation for even greater independence and the possession of personal ownership rights in a way that has already been reflected in the powerful desire of people to own their homes. In some ways, this is a parallel development to home ownership, and I believe that it will come to be seen as a major social reform.

Mr. Frank Field: Since the Government have made it clear that the aim of the review is primarily to tackle poverty, could the Minister address his mind to the problems of poverty in old age? With regard to the proposal that people should not be in SERPS but should build private provision, does he expect fewer or more people to be poorer at the end of their working lives?

Mr. Newton: Our purpose is to achieve precisely what has been happening as a result of the growth in occupational pension schemes during the 1950s and 1960s, which almost came to a halt after the introduction of SERPS: it is to build a position in which everyone retiring shall not need to fall back on additional income-related provision. It would be a rash man who would forecast whether, under the existing structure or in the future, that aim will be achieved, but it is a major objective of our policy to ensure that everyone going into retirement does so with an income adequate — if possible, more than adequate—to sustain himself.

Mr. Field: If that is the aim, why are the Government setting the minimum provision at 4 per cent., when the private sector says that about three times that level will be needed to guarantee a pension that would achieve the Government's objective?

Mr. Newton: We thought it right to set the figure in the Green Paper at a level which balances two different considerations. The first is the one which the hon. Gentleman and I have just been discussing, and the general aim to ensure adequate incomes for pensioners in retirement. The other is that we must keep an eye on the effects on employers' costs and people's take-home pay. Therefore, it is a balance between the predictions that can be made about any given contribution level, and the impact today. Liberal Members did not deal with this point in their comments on the basic state retirement pension and their desire to increase it. We must balance those considerations against the bills that must be paid, whether by those providing employment or by those in employment. The 4 per cent. figure is very much a minimum, and it is entirely open to people to add to that provision on their own account, to negotiate with their employers for a larger employer's contribution, or to come to whatever arrangements they wish, provided that those minimum requirements are met. The minimum requirements were set because we also considered the employment and other factors that arise in the present world.

Mr. Charles Kennedy (Ross, Cromarty, and Skye): Does the Minister believe that the minimum requirements are sufficient on their own?

Mr. Newton: Yes. We shall, of course, consult those concerned with providing pensions and annuities, and we shall listen to points made on this or any other issue arising from our proposals. The Green Paper is a consultative document. We have already started the process of consultation with those concerned, and we shall take note of what they tell us. But the hon. Gentleman should recognise that under our proposals the only group of people who will be entirely dependent on the 4 per cent. minimum contribution for their additional pensions will be those who, by most standards, although not perhaps by the hon. Gentleman's standards, are very young, that is to say, men under 40 or women under 35, who have a good while to go before retirement and, therefore, have a considerable time to build up their contributions.

All the groups above that age will either have their protected or enhanced SERPS rights as well or, in the case of men over 50 and women over 45, they will have their full SERPS pension. One reason we have cast our proposals as we have is that if this was all that was to be provided for people in those older age groups, it would not be possible to build up sufficient provision by the time of retirement. For that reason we have come forward with this proposed structure.

In conducting the review and putting forward our proposals in the Green Paper, we have borne in mind the needs of pensioners not only in relation to SERPS or the basic state retirement pension. Pensioners and many other people are at present partly dependent on supplementary benefit for their incomes, and they have faced great problems with the immense, sometimes mind-boggling, complexity of the existing supplementary benefits system.

Some of the figures are familiar to the House — the 16,000 paragraphs of instructions and the 40-page index. Indeed, there is now a third volume of the S manual. Within all those complicated instructions there is a multiplicity of different types of payment, which means that people are often uncertain about what their entitlement should be. There will be tremendous advantage, not least for pensioners, in our proposed move to a simpler, clearer income support structure within which it is easy to work out entitlement and understand it.

As the House knows, we are proposing a set of basic benefit rates incorporating premium rates for particular groups, including all pensioners over 60, lone parents and the long-term sick and disabled. A significant further move which I hope will help set at rest the mind of the hon. Member for Liverpool, Walton (Mr. Heffer), is that within the pensioner group we are proposing an additional premium rate for the over-80s. They are most likely to have additional needs arising from growing old age and additional frailty. As a result of the premium payment for all pensioners together with the additional premium payment for the over-80s, and given an additional premium for those between 60 and 80 for whom there is an indicator of additional need — for example, as measured by receipt of disablement benefits — in line with the premium for the sick and disabled, we have created a structure which is far simpler and far more likely to meet the general needs of pensioners than the one at present.

Mr. Archy Kirkwood (Roxburgh and Berwickshire): Is it reasonable to try to assess the amount of money to be allocated to these premiums by establishing what is now spent on heating additions, for example, under the existing supplementary benefits scheme so that they could be spread over all the premiums, or is that a completely cockeyed way of looking at it?

Mr. Newton: I am not quite sure what the hon. Gentleman is asking, but I think I can answer him by saying that we have made it clear that we are not looking for savings from our proposals for the main structure of supplementary benefit. Broadly, our intention is to put back into the simplified structure of rates, including the premia to which I have just referred, the money that is currently spent on various additional requirements. Principally they are heating additions, but also include diet additions, baths additions, laundry additions and a variety of other additional payments which are part of the complexity of the present system. However, in setting the premium rates we shall have regard to the existing distribution of additional requirements and expenditure of the kind to which the hon. Gentleman referred. I hope that

[Mr. Newton]

that answer follows the general lines of the one he wanted and that it is an indication of the way in which our minds have worked in coming forward with the proposals.

There are two other important points about the replacement proposals for the supplementary benefits scheme. First, with regard to the income support proposals, we are proposing a further, very important change in the capital rule which I believe will be widely welcomed by many pensioners. That is the introduction of a tapered rule running from £3,000 to £6,000 in place of the present £3,000 capital cut-off—[HON. MEMBERS: "Hear, hear."] I am glad to hear that endorsement from the Conservative Benches and also to acknowledge the nods from the right hon. Member for Tweeddale, Ettrick and Lauderdale and his hon. Friends. It is clear that they also welcome that move, just as it will be welcomed by many pensioners.

Secondly, the other half of the supplementary benefits replacement is that we are separating into the so-called social fund a number of the highly complex regulation arrangements which currently exist for meeting a variety of specific needs. These include the single payments arrangements, the urgent needs arrangements and, to a significant extent, those arrangements which are directed towards community care needs. We believe that these new arrangements will provide flexibility in dealing with the needs of special cases—their needs as whole people—which now prove extremely difficult in the detailed regulation system, particularly the detailed regulations for single payments.

Very much part of our thinking which has helped develop our ideas on the social fund is the belief that by operating with specially trained officers we can build on the experience which the Department has gathered since 1980 through the work of special case officers. We can also work more closely than has sometimes been the case in the past with those who are often concerned with the needs of the same claimants in local authority social services departments. That will enable us to build up policies which, for example, are much more effectively directed towards helping people who might need special help because they are coming out of institutions or hospitals and back into the community. It could be that they need special help, in conjunction with local authority social services departments, to ensure that they do not require institutional or hospital care.

Mr. Heffer: This sounds absolutely marvellous, but what are the limits in relation to the social fund? If there are clear cash limits, what happens if a number of people at a given moment have special needs but the limit is reached? Those of us who live with grass roots people —*[Interruption.]* Some of us do live with grass roots people, and many of them are our constituents. Can we have an assurance that, when there are genuine special needs, such people will receive benefit under the new system?

Mr. Newton: We intend that the social fund should operate within an annual budget. That will entail our making arrangements similar to those we make in health authority funding, where many of the same problems can arise. The budget will be allocated to local DHSS offices and the pattern of expenditure, priorities and the need to hold reserves at regional level will be assessed. Nothing that I have seen of existing social provision, where the concept of annual budgeting is part and parcel of annual operations, leads me to believe that we cannot devise effective arrangements for a flexible system which meets needs.

Alongside the simplified and, I believe, significantly improved structure of supplementary benefit which we are proposing we also propose a system of housing benefit which is much simpler, clearer and, we believe, more effective in meeting needs. In response to the hon. Member for Birkenhead, I said that for the first time the proposed income support system and the proposed revised housing benefit system will be based on the same assessment of income and in accordance with consistent rules. It is significant to pensioners and others that, for the first time, we shall have a system of housing benefit that deals even-handedly with those on income support and those who are not.

As the hon. Member for Birkenhead has obviously spotted, people on supplementary benefit have 100 per cent. of their housing costs reimbursed whereas those not in receipt of supplementary benefit but perhaps have only fractionally more income have only 60 per cent. of their housing costs met. That gives rise to the problems which have led to the extreme complication of housing benefit supplement. We are proposing equal treatment for people on the same income, whether it is derived from supplementary benefit or another source. That is a major gain in fairness and equity.

The right hon. Member for Tweeddale, Ettrick and Lauderdale will have realised that I cannot give figures that he wanted. [HON. MEMBERS: "Ah."] I am not running away and will try to avoid the temptation of repeating everything that I have already said.

In addition to those common rules and the common basis for assessment of income for housing benefit and supplementary benefit, the premium rates for pensioners on the new income support scheme will carry through into housing benefit. They will become what are known as housing benefit needs allowances.

Everything I say about structural questions and the folly of attempting now to set benefit rates for April 1987 also applies to the calculation of housing benefit because that will be determined by the income support rates set in the replacement supplementary benefit system and by the rate of taper that we are proposing.

In any structural reform such as we are proposing there will be swings and roundabouts. Some people will gain and others will lose. We have made it clear that we intend to ensure that there are no cash losers in the change to the income support scheme. We have stated our anxiety to make effective transitional arrangements to protect those who need to be protected, as any reform is bound to affect entitlement. We shall consider the implications of the proposal, which I believe is right in principle, for everyone to pay about 20 per cent. of their rates. The proposal has widespread support on the Benches behind me and, I believe, elsewhere, as it will restore people's interest in what their elected councillors do. We have said several times that we shall give appropriate consideration to what is required in that regard as it affects people on supplementary benefit.

We intend to answer the question posed by the right hon. Member for Tweeddale, Ettrick and Lauderdale. The proposal for payment of 20 per cent. or so of rates should apply to people on income support and to those who

receive only housing benefit and have no income support. I hope that our stance is clear. I cannot give the House an absolute guarantee that there will be no losers, because of the nature of the changes. I am giving an assurance that we shall have in mind what the right hon. Gentleman said when setting rates and establishing the transitional arrangements.

I have taken a lot of the House's time—fairly, I hope I can claim—responding to questions. I will leave it to my hon. Friend the Parliamentary Under-Secretary to wind up the debate and to comment on death grant. I should like to observe, however, that everyone gets only £30, which is of very little use and that it is unsatisfactory that only those on supplementary benefit receive full help with funeral costs. We are proposing that genuinely adequate help should be available to those who need help to meet funeral costs rather than only to those on an existing means-tested benefit. The right hon. Gentleman's proposal would not achieve that end. His proposed £250 for everybody would not be enough help for people with no means. I hope that the right hon. Gentleman will reconsider his proposal.

The review's purposes are to meet the social conditions of today and those which we can foresee for the rest of the century, to create a simpler and fairer system so that people, not least pensioners, genuinely get the benefits to which they are entitled, and to create a soundly based system that can deliver the promises it makes. Nobody has a greater interest in our achieving those objectives than pensioners, and we mean to see that they are secured.

5.40 pm

Mrs. Margaret Beckett (Derby, South): It is right that the first aspect of the Green Paper should be the proposals that affect the elderly, because, leaving aside the rhetoric, the Government's attitude to pensions most clearly reveals the twin purposes of their reviews. First, there is the obsession with cutting public expenditure for the sake of cutting, or, perhaps, for the sake of the few individuals —the better off—who alone have reaped the benefit of the cuts. Secondly, there is the obsession with destroying public services—financial or otherwise—simply because they are public services.

The most significant change that the Green Paper has proposed is the phasing out of the state earnings-related pension scheme. The more we consider the matter, the more extraordinary this decision seems. Already it appears that contributors to the scheme — the few who are allowed to stay in SERPS—will, at best, pay slightly more without receiving improved benefits. The vast majority of people will pay substantially more and receive substantially less, especially as those in occupational schemes will lose the state's hedge against inflation and the standards against which those schemes have been measured.

We have yet to learn the costs of abolition in terms of tax concessions on the compulsory private pensions with which the Government plan to replace SERPS, although there seems every likelihood that they will run to several thousand million pounds. We are aware that the Government have argued during and before this debate that massive and unforeseen changes have made the abolition of SERPS necessary. The Government have not explained at all—never mind to our satisfaction—why these changes were not understood, not only in 1975, as the Government now suggest, but in 1981 when the bulk of the statistics on which this policy is based were published. The Government have not explained why the conclusions were not understood in 1983 when the Prime Minister gave one of her famous assurances or even in 1984 when the Secretary of State gave his assurance. The statistics for pensioners and for the contributory population that are used now are almost identical in every respect to those that were used years ago.

What happened between the assurance in 1984 by the Secretary of State and June 1985 to bring about this massive change in understanding and in policy? It is not that there has been a massive change in the anticipated number of pensioners or in the ratio of contributors to non-contributors. The Secretary of State produced a half-baked, half-thought-out plan, justified by reference to a misinterpreted opinion poll, for what he called "personal portable pensions." That is not even easy to say. It was a plan not just for privatising, but for individualising pensions. The trouble with the plan was that, the more people looked at it, the more they pointed out that no one in his right mind would buy the right hon. Gentleman's portable pension when he could get a much better deal from the existing state scheme. Full transferability, guarantees against inflation and a pension with a decent maturity period were all provided in the state pension scheme. That scheme was a much better bet than any private scheme. One after another individuals and the institutions that advised the Secretary of State published articles or wrote privately pointing out to the right hon. Gentleman that no one would buy a personal portable pension unless the Secretary of State first abolished the superior state scheme.

We all realise to our cost that telling the Prime Minister that the state is doing something better than the private sector—that the administrative costs are lower so that the state scheme gets even better value for money than the private sector—is like a red rag to a bull. The Prime Minister knows what she believes and she does not want to be confused with the facts. She knows that anything that the state provides must be bad—that it must be worse than the private sector. If, by some chance, the state scheme is better than the private sector scheme, her motto is "Get rid of it quickly before anyone finds out."

Because the Government must acknowledge that they are replacing a good pension scheme with a worse one at a higher cost, it has been necessary to preach doom and gloom about how SERPS has not really been a good scheme because it has been so wickedly over-generous to pensioners. We have heard before, and no doubt shall hear again, reservations about the necessity for and the wisdom of the Government's proposals — whether it is the example of the Phillips committee howlers in 1954 or the Government's own Social Security Advisory Committee's devastating criticisms a year or so ago.

Even leaving aside all the other questions about the accuracy or truthfulness of the Government's claims about the problems with SERPS, one major issue remains. The Government Actuary points out, and is quoted as saying in the background paper to the reviews, that the possible rise in contributions that he identifies will occur at the level given only if the link between pension upratings and earnings is restored — the link that this Government abolished in 1980 and that they have always refused to restore. While the basic pension remains linked only to prices, its value over the years will be so eroded that, even

[Mrs. Margaret Beckett]

if the Government do not lay a finger on SERPS, eventually the total pension will be sufficient to equate only to the value of the pension today.

Those who have no entitlement to SERPS because they have not yet found a job, or those who are not wanted by the private insurance companies because they are on the dole or sick, will remain heavily or totally reliant upon the basic pension and will end up completely reliant on whatever scheme replaces supplementary benefit by the end of the century or later. Even on the Government's own predictions before they decided to abolish SERPS, at the end of the century there will still be a million pensioners on supplementary benefit. I shall not bother to ask the Minister how many more he thinks there will be if the Government abolish SERPS, because I do not suppose that he can tell us that either.

Apart from the value of the pension itself, the Government's argument that we cannot afford to let SERPS continue has been severely damaged. If the Government continue to link the basic pension only to prices, the contributions will ultimately reach not even the predicted 20 per cent.—the figure that the Government love to cite—but

"less than half of that",

in the Government Actuary's words. We can forget all the weeping and gnashing of teeth about the cost of SERPS. The Government did a demolition job on SERPS five years ago, in 1980, and it is totally gratuitous for them to return to it now.

That is not the point of this proposal. The point is that SERPS, plus an eroded basic pension, is still better than a private pension plus an eroded basic pension, and that is why SERPS has to go.

My hon. Friend the Member for Birkenhead (Mr. Field) asked the Minister whether he could give an assurance —wisely, the Minister was not drawn on that point— that the personal portable pension, or whatever the new plan is, will give as good a pension provision as or better than SERPS would have provided. The Minister knows that the answer is, "No, it will not." The Government, in their consultative document, specifically ruled out giving any guarantees on the value of personal portable pensions. Indeed, they said that anyone who took out such a pension could not rely upon any fallback or guarantee from the state—presumably, other than supplementary benefit or the basic pension—because that person would be taking an individual risk and would be out on his own. If the new scheme is as good as or better than SERPS, there would be no need for the Government to warn the people whom they wished to remove from those pensions that the Government would not pick up the pieces.

The Minister said a good deal about the Government's record and how grateful pensioners are. I do not know whether the hon. Gentleman has tried recently asking pensioners how grateful they are. He is fond of pointing out the dangers of inflation. We all recognise that inflation has undesirable consequences, but under the Labour Government the real value of the pension increased by 20 per cent. It seems to be difficult for Conservative Members to grasp that simple fact. Despite the problems that we faced, we managed to help those drawing the pension then and, by establishing the scheme that the Government attack in these reviews, to provide for the pensioners of the future. This Government are attacking both.

Mr. Newton: I hesitate to interrupt the hon. Lady, but, in view of her remarks, I must ask whether she would care to comment on the adjustment in 1976 to the uprating method, which did not take account of several months of rapidly rising inflation and cut what in today's money would be at least £1 billion from the amount that pensioners would otherwise have received. I remind the Liberals, since they introduced this debate, that the Lib-Lab pact was made the following year.

Mrs. Beckett: Whatever may be the criticisms of the record of the Labour Government, we still improved pensions in real terms by 20 per cent., which is more than the present Government have managed to do.

I remind the Minister of another simple fact which I have drawn to his attention on other occasions. In our whole period of office, we had only as much from the North sea in terms of income as the Government have received every month throughout their period of office. Even with our problems, we managed to increase the real value of the pension by 20 per cent., so perhaps we should hear rather less about how great the Government's record has been. The first thing that the Government did was to erode the basis of the improvement, the link with earnings, although they still paid lip-service to their concern for the elderly.

Although SERPS is most significant in the sense of revealing the purpose of the reviews, neither the proposals on SERPS nor the reviews themselves represent the whole of the attack on the elderly that we have seen in recent years. I am not even referring to what the Minister said about changing uprating. He knows that his Government have saved money by changing the basis of uprating. They have saved money on three occasions by postponing by a week or two the payment of pensions. They have saved money by reducing heating allowances.

Most of all, the Government have saved money on pensioners by the massive cuts in housing benefit. I might have said more about the cuts that we have already seen — and predicted — in housing benefit, except that previous debates have shown that there is very little point in asking Ministers to give us more indications of who will be affected and to what extent. We know that the Government have the figures but do not intend to reveal them to us. As they are, according to the Minister, so good, it is surprising that we have not been told about them. The Government are not usually reluctant to claim credit for being generous to the populace. As I have said, we know that there will be cuts in housing benefit, and we strongly suspect that occupational pensioners in particular will be the sufferers.

The most vulnerable among the elderly have been consistently among the hardest hit. The leader of the Liberal party referred to the forced increases in water rate which are being brought about by the Government. They follow hard on the heels of a series of forced increases in fuel costs, which have fallen particularly hard on pensioners. The pensioners who are poor enough now to be drawing supplementary benefit are precisely those pensioners who often fall foul of the system of single payments to which the Minister referred.

A wide range of problems which affect everyone who is poor bear even more harshly on the elderly. I have recently received some communication from chiropodists —I hope that Minister will be able to comment on it later — about the hardships caused to pensioners in

regard to single payments, and the wholly inadequate grants which are received—if, indeed, they are received at all. Some people have too many deformities of the feet to wear ordinary shoes but are not sufficiently severely affected to justify the wearing of surgical shoes. Many pensioners find that, if they can get assistance, it is wholly inadequate to meet the cost which they have to bear. In that context, as in many others, it was pointed out to me very forcefully that the cost to the state of chiropody charges and the cost to individuals in pain and discomfort greatly outweighs the cost of a more sensible system.

Although the Minister spoke with touching confidence in his new proposals for a social fund, which he seems to think will be better than the single payment system, the Opposition have even more worries and concern about his proposals than we have about the existing scheme—and, heaven knows, that is saying something.

The leader of the Liberal party referred to problems connected with the death grant, and I am aware that the Parliamentary Under-Secretary of State will be replying on that point. When the Secretary of State for Social Services made his recent statement, my hon. Friend the Member for Oldham, West (Mr. Meacher) referred to people having to have a pauper's funeral. Conservative Members sought to discount what my hon. Friend said. If they do not like that term, they may be more touched by the term "parish funeral." In the folklore of our parents and grandparents, that was always something devoutly to be avoided. To be buried by the parish was regarded as a great stigma and source of shame. The more I hear about the Minister's proposals for a social fund, the more it seems to me that they will result in the reintroduction of the stigma.

I was entirely unconvinced when I heard the Secretary of State say that the lack of an appeal process will not fall foul of the European Court. I noticed that the Secretary of State was prepared to put the blame on the Minister for Social Security if that did not turn out to be the case.

We are also concerned about the staff at the DHSS. I am not sure whether they will retire early, die of heart attacks, have nervous breakdowns, be murdered or lynched, but I am sure that there will be a substantial increase in the turnover of DHSS managers.

Mr. Newton: The entire basis of the scheme was largely discretionary until it was put into regulations in 1980. The notion that a modest return to discretion, in an area in which regulations have not worked very well, will defeat a system which operated largely on the basis of discretion for so many years cannot be supported.

With regard to death grant, the terms "pauper's funeral" and "parish funeral" refer to something which can still, in theory, exist—burial by the local authority. The local authority still has that duty in certain cases. In my experience, supplementary benefit single payments are not seen as being the same as a pauper's funeral. The hon. Lady is drawing a misleading and wrong parallel in suggesting that they are the same.

Mr. Deputy Speaker (Mr. Harold Walker): Order. It would be better if, instead of having ministerial interventions, particular points were dealt with in the reply at the end of the debate.

Mrs. Beckett: The elderly are also severely affected by the changes in the provisions concerning board and lodging. The elderly are affected, as are other groups, by the ceilings imposed on board and lodging. If the lodging in which the elderly have been staying has charges above the ceiling, or if there is a wish to increase the charges, which would take them above the ceiling, that is a matter of considerable concern to them. Assurances were given that such matters would be looked at.

A particular problem which has been drawn to my attention recently, affects handicapped people who are just under 65 and eligible to have varying sums paid to their account, the maximum being £198, because they are under 65. It is my understanding that on the day people become 65—if it happens to be more than a year since the regulations became law—they are now eligible for a payment of only £138·60. That is a reduction of £60 in the payment which can be made. I am told that that has already begun to happen to people in nursing homes. Indeed, I have a case—I shall pass it on to the Minister—of a home in which two or three such people are already affected. Obviously, it is a very serious matter, not only for the homes which are trying to provide proper nursing care but for the individuals who are affected. I find it hard to believe that even this Government intended that there should be such appalling side effects.

There are also the problems which arise where margins in homes for the elderly are cut to the bone. There is a fear that it may be necessary to reduce the level of provision of the very services that the Government have asked them to provide under the code of practice, such as proper training for staff and proper care for residents.

I understand that there are considerable differences of opinion arising between local offices as to who is to decide whether the level of fees is appropriate for the area concerned, although I recognise that the whole intention was to take some of the discretion away from local offices. In some areas, it is being said that payment above the ceiling can be made for a substantial period, while in others it is being said that the new figures must be implemented immediately. I hope the Minister will look into the question of how much discretion is being permitted.

Our main concern in the debate is the overall problems faced by the elderly of today. They include those who struggled to bring up their families before the introduction of the welfare state, the men—all too few—who fought in one or perhaps two world wars, and all too many of their widows. They include those who worked and struggled to establish a better society and who hoped to crown the victory that we commemorated this year with a society dedicated, for the first time in our history, to the principle of from each according to his or her ability and to each according to his or her needs—in other words, the principle of the welfare state.

It is a tragedy that, towards the end of their lives, they should be seeing a Tory Government who are not only trying to undo everything that most of them worked for but are making it plain, by their attitude to the pensioners of the future as well as to those of today, that they reject that fundamental principle of the welfare state.

It is still among the most elderly that the greatest reluctance exists to claim the benefits to which they are rightfully entitled—even benefits for which they and their families have paid—because they feel the stigma of charity, not rights, hanging even over the welfare state.

I must tell the Minister frankly that, in my opinion, the real meaning of the reviews, for the elderly and for everybody affected by them, is that, whatever the

[Mrs. Beckett]

Government may say, their desire is to reintroduce that stigma. They may not use those words, but that is what their words mean.

Not long ago a comedy show ran on television for almost as long as the present Government have run. It was called, "Never mind the quality, feel the width." The proposals that we are debating today are, unfortunately, as poor in quality as we fear they will be narrow in generosity.

6.2 pm

Mrs. Virginia Bottomley (Surrey, South-West): Today's debate is concerned with the problems of the elderly. In my constituency, the elderly deeply resent being referred to only in relation to their problems. Indeed, some may feel that an advantage of televising the debates in another place is that all can see the contribution to public life that is made by many over retirement age. Most pensioners are fit and able to assist their families. More importantly, they are able to make an enormous contribution, in voluntary organisations and other types of service, to the community.

When talking to pensioners today one discovers that income maintenance is not their greatest fear, though it is understandable that the right hon. Member for Tweeddale, Ettrick and Lauderdale (Mr. Steel) should have referred to income. After all, at the time of the Lib-Lab pact, with inflation running at more than 25 per cent., many pensioners were afraid that they would not have sufficient income to see out their lives.

In fact, pensions have kept up with the cost of living, and during the past 30 years there has been a substantial shift in resources in favour of pensioners. The result is that today many pensioners are better off per head than the households of those in work.

Pensioners are worried mainly by the fear of isolation and alienation. It is clear from recent census returns that many more elderly now live alone. With people living much longer, there has been a dramatic increase in the number of over-80s, and these are causes for concern.

In recent years, under Conservative rule, there has been a 15 per cent. increase in resources devoted to the personal social services, a 20 per cent. increase in real terms in expenditure on the health services and there are more nurses, district nurses, doctors, health visitors and so on. All of that has made for a great improvement in assisting the elderly. More important than even those services is the way in which they are used, and there have been many initiatives in care in the community, with people being brought into voluntary organisations so that the elderly can be helped to live at home.

I am vice-chairman of the National Council for Carers and their Elderly Dependants, an organisation with approaching 50 branches throughout the country, helping informal carers such as those to whom the leader of the Liberal party rightly referred. These people selflessly look after those who, wherever possible, can live at home. The Department has given assistance to the NCCED and incorporated them in plans and initiatives. There are, however, many other groups in the community helping to make the elderly feel valued and important. They include the WRVS and Age Concern, whose members know a great deal about training and the needs of the elderly.

Last week I visited some housing developments for the elderly in my constituency. I saw with pride the great variety of provision that is being made, including sheltered housing, cluster housing and good neighbour schemes. I was made aware of the way in which developments are embracing some of the new technologies. For example, it is possible to have a radio link with a headquarters so that those in difficulty can call for help.

It is all too easy to polarise provision and only to consider whether it is provided by the state or the private sector. The provision of old people's homes has been a controversial area, and I welcome the new regulations for the registration of homes for the elderly. Over the years there have been many articles and research projects highlighting the treatment of people in homes for the elderly. Recent research at the university of Bath made it clear that under the new procedures many such homes in the state sector would have difficulty getting registered and becoming approved as private homes.

Recent events in Southwark at the Nye Bevan home have provided a particularly appalling example of what can happen under local authority provision. We need a partnership and balance between private, voluntary and local authority homes, and it is wrong to suggest that there is some type of hierarchy.

The elderly want to feel acknowledged and valued members of the community. They want the Government to sustain their policies for the Health Service, making sure that patient care is given priority and that the resources available are used effectively. They want to see the social services maintained and, where possible, improved. They want support for informal carers, for all those who voluntarily, giving their own time, help others. Above all, they want flexibility and choice so that they may have dignity in their old age, making a contribution to the community while in their active years of retirement, then being supported with the help they need on becoming more frail towards the end of their lives.

6.8 pm

Mr. Frank Field (Birkenhead): It is customary to comment on points made by the previous speaker. I hope that the hon. Member for Surrey, South-West (Mrs. Bottomley) will forgive me if I do not do that on this occasion, though I confess that if I were a Conservative Member speaking in this debate, following the announcement of a major review of the welfare state, I should have made a contribution similar to hers. It was clever in the way it distracted attention from some of the immediate plans of the Government.

I shall refer to some matters that were raised by the right hon. Member for Tweeddale, Ettrick and Lauderdale (Mr. Steel) and my hon. Friend the Member for Derby, South (Mrs. Beckett), the first being to question how the Secretary of State was able to boast that his review of the welfare state, which will result in another Beveridge, could be presented to Parliament without one figure to show how individual groups of claimants would be affected.

The Minister of State answered that question today by saying that the Government were concerned with the structure of benefits and that once the consultation period was over the figures would be provided. I have a suggestion which puts a different light on what is really going on. We have read much in the press about the success of the Secretary of State and his team in fighting

off Treasury attacks on the welfare state. Is it possible that it was a clever ploy by the Secretary of State to make his statement on Monday without giving any figures? Is it possible that that was part of a deal that he had to strike with the Chancellor of the Exchequer? Is it possible that the efforts of the Treasury to cut welfare provision will continue as we embark on this year's review of public expenditure?

Has all that resulted in Ministers at the Department of Health and Social Security being forced to talk only about the structure, when hon. Members in all parts of the House want information about the rates of benefit so that we can work out who among our constituents will be better off and how many thousands among them will be worse off?

The Minister's clever ploy was no mere accident. He was pushed into it. It takes more than nerve for the DHSS team to come to the House and behave in this way because only a few weeks ago the Secretary of State and the Minister of State savaged my hon. Friend the Member for Oldham, West (Mr. Meacher) for presenting proposals which he had not fully costed. We were told that it was outrageous, irresponsible and typical of the Labour party. Today the Government propose a major overhaul without providing a single figure.

Perhaps the Minister can say whether my analysis is correct. I do not wish to score points, but if I am right and the Treasury is still after cuts of £2 billion or £4 billion the support of Government Back Benchers will be needed to fend off an attack. Ministers must not take pleasure in mystifying themselves and their own Back Benchers about what they are up to.

The state earnings-related pensions scheme is to be abolished. That will mean a worse deal for women and for low-paid workers. Despite the Minister of State's debating skills, when asked whether the alternative will be superior in terms of tackling poverty he was reticent. The private sector says that if workers are to build up contributions over their lifetime to afford a pension which will prevent them from being in need in old age, contributions must be between 12 and 14 per cent. of their earnings. The Government are talking about contributions of 4 per cent. SERPS is to be abolished, but the alternative will not achieve the Government's objective of taking people off means tests and making fewer people less dependent on state support.

The Government are loose in their use of language. Certain phrases appeal to their Back Benchers and many people in the country. They say that we must target resources to those in greatest need. That is a good phrase, but let us examine what the Government are doing—although that is difficult since we have no figures.

Let us examine the simplification involved in replacing the supplementary benefit scheme with the income support scheme. The Government intend to simplify the scheme by abolishing all the additions to basic benefit which are currently given for heating, diet and special laundry needs. According to Government language, there could not be better targeting than that because the extra allowances are given only if a dietary, heating or laundry need can be shown.

The Government's alternative is a premium that will apply to everyone at present in that category. The jam which was spread less thickly amongst those in greatest need is to be spread more thinly amongst all people in that category. Even without the figures, we can see that some of the Government's objectives will not be achieved.

I hope that two clear messages result from the debate today. One reason why the Goverment have not provided any figures in connection with this major overhaul of the welfare state is that the struggle about the level of welfare support is continuing between the DHSS and the Treasury. Once that dispute is settled and the figures are available we shall know the extent of the cuts. Whenever hon. Members ask how many people will be better off and how many millions will be worse off, Ministers will not reply with a straight answer. It is right for the leader of the Liberal party to sound a note of worry that millions will be worse off as a result of the review, although we may not be able to put exact numbers on it until later in the year.

SERPS has faults and the Government are correct to say that we have a problem with an aging population which is increasing relatively faster than our working population. Despite those problems, the Government are abolishing SERPS which is the only method on the statute book which guarantees bridging the link between poverty and old age for most people. The Government's alternative will not achieve that. There will be many more poor pensioners in the future. I hope that the messages are received loud and clear in the country.

6.16 pm

Mr. Anthony Steen (South Hams): If I were a Labour Member — I hope that I never shall be — I should probably make a speech similar to that made by the hon. Member for Birkenhead (Mr. Field) if I understood the subject as he does, but I shall not follow his line. I want to explore the wider issue discussed by the leader of the Liberal party.

The debate has tended, like so many others, to focus on money. The hon. Member for Birkenhead concentrated on money. He is an expert on such matters, but money indicates something about attitudes. The extent of Government expenditure on the elderly tells us something about the Government's attitude.

Last year £6·5 billion, or 40 per cent. of the Health Service budget, was spent on the elderly. Does that mean that the Government care about the elderly? Would the Opposition say that the Government were more caring if they spent 50 per cent. of the budget on the elderly? What is the cut-off point or the starting point of caring?

Hon. Members on both sides of the House are caring, and even if we spent a few more billion pounds it would not mean that we were more caring. The Labour party thinks that it has a monopoly of caring. It has a habit of championing minority groups such as the elderly, the handicapped and the disadvantaged. Anyone who is not quite up to the next man is labelled "disadvantaged" and immediately attracts the Labour party's interest.

Today the Liberal party is trying to upstage the Labour party by arguing that it can do even better for the elderly than the Labour party and that it cares even more. No party has a monopoly of caring. The test of who cares most is not decided by who spends most. The elderly must have opportunities for maintaining good health and human dignity. The dignity of the elderly is most important.

Society in various parts of the world views its elderly in many different ways. In the east the elderly are still revered as the heads of the family. In developing countries the elderly play a full part in family life. In many European countries they continue to head the family business. The elderly have the status of experience, wisdom and prudence.

[Mr. Anthony Steen]

In Britain, the elderly and their problems are seen as something with which the state must deal—it is not for the family to look after the elderly, but for the Government. The trade union movement continues to fight to lower the retirement age, but unwittingly it is compounding the problem. There is an ever-growing number of retired and elderly people. The term "elderly" tends to be synonymous with being retired from paid work.

Old age begins in Britain when one becomes a pensioner, and pensioners are becoming pensioners as early as 50. They switch from being part of society to being an adjunct to society. It is rather like Cinderella. One day one is in a job and the next day one is old—someone who attends Christmas parties and wears funny hats.

Rather than being revered, our elderly tend to be patronised. They receive concessions for travel and special prices at cinemas. Yet the major problem is life expectancy, which is increasing in leaps and bounds. We are spending £17·4 billion a year on health care and as a result it has improved dramatically. Whereas in 1985 there were about 3·5 million people over the age of 75, by the year 2050 there will be nearly double that number—6 million people. Whereas this year just over 500,000 people are more than 85, by 2050 there will be nearly 2 million—three times as many. That is one aspect that has not been mentioned in the debate. We must consider the scale of the problem and the increased life expectancy of society. We therefore have the prospect of increasing numbers of people spending a quarter of a century or more of their lives as pensioners.

There are two problems. First, where will all those retired people live for a quarter of a century of their lives? Secondly, what will they do with their time? What will they do day after day when they are retired and have nothing to do? A large majority of retired people will continue to live in their own homes—whether owned or rented. However, there will be an increasing need to build special-purpose bungalows and warden-controlled complexes, and that entails an increase in public expenditure.

There has been a growth in the number of residential homes. In 1982-83, expenditure on the care of the elderly in residential homes rose from £39 million to £102 million. Expenditure for last year is estimated at £190 million. While private homes provide better value and lower costs than local authority homes—*[Interruption.]* Oh yes they do. I do not know why Opposition Members are making a noise. They know that what I am saying is absolutely right. Private homes provide very much better value than local authority homes. I shall not bore the House with statistics, but I have them to hand, as does my hon. Friend the Minister. Although private homes provide better value than local authority homes, the cost of keeping the elderly in private homes rose from £39 million in 1982-83 to £190 million this year.

There is a further advantage: caring for the elderly in private homes entails half the cost of keeping an elderly person in a geriatric bed in a hospital, the current cost for which is £243 a week. As the population lives longer, the burden and the cost on the state will continue to increase——

Mr. Willie W. Hamilton (Fife, Central): What burden?

Mr. Steen: It is a very real burden on the state. The state will not refuse to accept that burden, but it is a burden.

I am sure that Opposition Members will agree that the one way in which the Government can endorse their family policy is to encourage more people to look after their own. I have never understood why the Government do not give some benefit and tax relief to those devoted people who look after their elderly and frail parents. They dedicate their lives to looking after their families. And it need not be only parents; it could apply to uncles and aunts. It is a better way for retired people to live, and would not be a strain on the state. Yet the Government continue to refuse to give tax relief to those looking after their families.

Mrs. Beckett: The hon. Gentleman is making a comment that Opposition Members often make. The reason why the Government do not provide such help is simple: they seem to be quite incapable of distinguishing between cutting public expenditure and getting value for money.

Mr. Steen: I should have expected a helpful remark like that from the hon. Lady, and I am sorry that I gave way.

Not only will the Government save money by giving tax benefits to those who look after their own, but it is far better that the elderly should live with their families. I hope that my hon. Friend the Minister will say something about that when he replies.

Money and housing appear to be the nitty-gritty of the problem facing the elderly, but I believe that there is a more sinister problem—loneliness. The House has not addressed that point in the debate. The problem of loneliness will eclipse all other problems as the elderly live longer. They need a purpose in life. I have met few who are ecstatic at the prospect of retirement, especially early retirement. They see little future in their lives, there is little prospect of paid work to augment their pensions and they have few opportunities to do something in society. I am grateful to my hon. Friend the Minister for what he said about voluntary work.

Loneliness is one of the worst and most intangible conditions of our time, especially for the retired living in our large urban areas. What are they supposed to do for a quarter of a century? They cannot travel on a bus with their concessionary fares all the time; they cannot play bridge or visit the museums or eat at luncheon clubs all the time. What are they supposed to do other than watch television and wait for a knock on the door? The Government need to help them find a new purpose, a new role and a new aim. People will be increasingly out of paid work at a younger and younger age.

We have a vast and increasingly fit army of young retired people who have a wealth of experience, knowledge and skills. We have to find a task and a purpose for them. There is a tremendous waste of resources. *[Interruption.]* The hon. Member for Birkenhead appears to be either anxious to leave the Chamber or in some discomfort. Although he is very good at juggling with statistics, he overlooks the importance of the humane aspect of caring for the elderly. It is all about the real problems of living, rather than simply playing around with statistics and money. It is the problems of loneliness, caring and having a part to play in society. I am sure that the hon. Gentleman will understand that——

Mr. Frank Field: The hon. Gentleman appears to be advocating a charter for busybodies.

Mr. Steen: The hon. Gentleman may say that, but this evening we are airing the grievances and problems of the elderly. We must tackle those.

I asked what an elderly person would do for a quarter of a century. He cannot travel on a bus the whole time, or watch television the whole time. What is he supposed to do?

Mrs. Kellett-Bowman: Does my hon. Friend accept that the Government's plans for a flexible decade of retirement would go some way towards meeting my hon. Friend's point?

Mr. Steen: Yes. My hon. Friend always puts her finger on it. I am glad she is joining in the debate.

We have debated many matters this evening, and I hope that I have made a short but helpful contribution. It was right for the leader of the Liberal party to raise the problems of the elderly. I regret that so few Opposition Members feel that this is a topic of such importance that they wish to join the debate. I am glad that a few members of the Liberal party, though only a few, are present and also that a few members of the Social Democratic party are here. I am pleased that many of my right hon. and hon. Friends have spoken in the debate. I support the Government amendment. We are on the right path towards helping the lonely and the elderly.

6.31 pm

Mr. Michael Meadowcroft (Leeds, West): I am sure that the hon. Member for South Hams (Mr. Steen) will be pleased to hear that I intend to put the other side of the coin. I do not know why he regards six Back Benchers of his own party as a large number. If he does, he is innumerate or is exaggerating. I do not accept that if people do not pay rates directly through their rates bill they are not contributing to rates income. I fear a cop-out by industry if it regards rates as being paid simply by ratepayers. Every customer and employee of a company pays its rates. The Confederation of British Industry recognises that fact and has pointed out to its employers and customers that high rates affect viability. It wishes to alter that position.

The social security reviews are defective because they do not tackle linkages. Although I agree with the hon. Member for South Hams that a case can be made for extra expenditure upon the social services or social security, there are many other problems that can be tackled without spending extra money. Normally they can be dealt with by linkages. Some houses are under-occupied and could be used by families. They remain under-occupied because there is insufficient sheltered housing for single people. It is a waste of resources which the single elderly deplore. The clearance of inner city areas has contributed towards the huge escalation in costs. The small, old houses that people prefer to live in have been demolished. Clearances are still taking place and ought to be stopped.

If elderly people wish to remain in their own homes, an adequate attendance allowance might make it unnecessary for them to enter institutional care. An attendance allowance would be far cheaper than institutional care. The social services have a part to play by providing day centres which enable the elderly to be fed properly. The voluntary sector can help. The community transport project takes people to the day centres. The National Health Service can also play its part by providing community nursing. If all these services were pulled together, better and cheaper care would be provided for individual needs. The social security reviews have failed to deal with the problem in that way. They have simply shifted money around from one needy pocket to another.

6.34 pm

Mr. Charles Kennedy (Ross, Cromarty and Skye): This has been a very useful and worthwhile choice of subject, particularly since the social security reviews were published this week. The alliance has chosen the problems of the elderly as one of the first subjects to be debated. This is the first opportunity to scratch the surface of the debate that will take place between now and the publication of the White Paper.

I appreciate the lengths to which the Minister for Social Security went to listen to the views which were expressed and then, with great skill, to skirt around the answers that were sought. The Minister should not rest too much upon this Government's apparent laurels. My most enduring impression of the day when the reviews were published was not of the Secretary of State for Social Services being given a characteristically easy time because of the hysterical reaction of the Opposition Front Bench spokesman. It was of several pensioners marching outside carrying placards saying, "Pensioners say 'No' to Fowler".

When he opened the debate, my right hon. Friend the leader of the Liberal party rightly criticised the lack of figures. The lack of figures in the published volumes compounds the error that was pointed to by many people at the time of the reviews: that they were being conducted on a revenue-neutral basis, which meant that examination of the hidden welfare state provided by tax benefits would be precluded. Therefore, it is difficult to make constructive comments about the suggestions. The Minister for Social Security engaged in an almost theological discussion about the relationship between the financial aspect and the structure at which we should aim. He seemed to be trying to make a virtue out of a vice. At least, he said that the absence of vice in itself constituted a virtue. The Minister claimed that the absence of damning figures about who would lose and at whose expense some gains would be made was to be welcomed. It is rather like the words of the old song:

"I've danced with a man, who's danced with a girl, who's danced with the Prince of Wales."

Nobody has seen the culprit but everybody has passed by at some point. The review figures seem to have passed through several hands, but they are not available when we want to debate them.

The hon. Member for Birkenhead (Mr. Field) made a similar point. He pointed out that the Government actuaries have been both for and against SERPS. My right hon. Friend the leader of the Liberal party said that we could not back the Government's course of action over SERPS because of the way they have gone about it. SERPS was set up after all-party consultation. If it is to be restructured, modified or done away with completely, it should take place only after there has been all-party discussion. We also oppose its modification because there is to be no major increase in the basic flat rate pension. Most people accept that this would be an important counter-balance if there were to be any change in SERPS.

[Mr. Charles Kennedy]

Finance is one of the great defects of the social security reviews. The social fund will be a major contributor to the view that the public form about the reviews. There is interaction in the social fund between the benefits system and the personal social services. It will be cash limited. A system of discretionary grants and loans will be operated. The Secretary of State for Social Services wants the social fund to be used as a pump-priming mechanism in order to move people through the care in the community programme. This demonstrates that the Government tacitly acknowledge that the amount of money available to help the elderly through the care in the community programme is insufficient, that it is being damaged by the rate capping proposals of the Department of the Environment and that the joint funding arrangements are unsatisfactory because of the tapering financial arrangement and the relationship between the health authorities and the local authorities on account of the local authorities having to shoulder more of the burden. The Government are trying to find an additional source of money to help to prop up joint funding and the financing of the care in the community programme. That highlights the difficulties in funding and the fact that there will be an even greater drain on the social fund, which will be under great pressure.

The hon. Member for Surrey, South-West (Mrs. Bottomley) spoke about the role of the voluntary organisations. As my right hon. Friend the leader of the Liberal party has said, it is important to remember that much can be done. The voluntary organisations have a great role to play. However, as the hon. Member for Surrey, South-West knows through her patronage of the National Council for Carers and their Elderly Dependants, the role that can be played is threatened and made more difficult by the financial pressure under which the statutory sector now has to operate. Directors of social services who are faced with difficult choices are more likely to reduce or contract in the voluntary rather than in the statutory sector.

The other points that have come out of the debate are closely linked to what have been described by the Liberal leader as the "pessimistic assumptions" underlying the entire report. In an interview in the *Daily Telegraph* towards the end of last year, the Leader of the House said that he thought that there was great room for increasing employment in the front-line caring services. Instead of considering further cuts in the social services network, we should be trying to create jobs in that area. Indeed, during the last election campaign, the alliance suggested that 100,000 jobs could be created within the front-line caring services.

As has been pointed out, more needs to be done to locate, recognise, and then introduce mechanisms of support for those who care for others on an unrecognised and informal basis. The welfare state may be in difficulties now, but it would be in a state of total collapse and disorder without their contribution. The extension of the invalid care allowance to married women is another area in which we should like progress to be made. Unfortunately, however, that seems unlikely as a result of the reviews.

I appreciate that the Minister will specifically deal with the death grant. The Minister for Social Security stated his concern or objections about the system that we would propose, which would involve a higher £200 or £250 death grant, available across the board and reclaimable from the estate. He fairly pointed out that even that would not be enough for some people. But it is surely not beyond the wit of the DHSS to devise a structure whereby at the time of burial and of greatest distress to the relatives and dependants there would be no need to go through the difficulty and indignity of having to make some special application, perhaps subject to interview. They could receive the initial payment as of right. If it then proved to be too much, the money could be reclaimed from the estate, but if the sum proved to be too little, the discretionary element could come in later and additional payments could be made. I do not see why that should sit so uneasily beside the Government's proposals.

We are glad to have had the opportunity to raise issues concerning the elderly that arise from this week's social security reviews and from the problems which all hon. Members see every day in their constituencies. We are only sorry that social security reviews which could have been radical and genuinely reformist and more redistributive will not be so. As the Institute of Fiscal Studies has already said, the elderly will be one of the groups to suffer most from those reviews.

The points that have been made, coupled with the difficulties over rent support and having to contribute to a rating system with which the Government themselves are dissatisfied, give us little confidence that the problems of the elderly are fully recognised and appreciated, or that they will receive due attention from the Government. The SDP/Liberal alliance will certainly continue to bring the problems and the priorities of the elderly to the fore both in the House and elsewhere.

6.46 pm

The Parliamentary Under-Secretary of State for Health and Social Security (Mr. Ray Whitney): I am happy to start on at least one note of agreement with the hon. Member for Ross, Cromarty and Skye (Mr. Kennedy), in that the debate has been useful and interesting. Within a short time many important points have been made by hon. Members on both sides of the House. In the 15 minutes left to me, it will obviously be impossibl to reply to all of them, and so I hope that hon. Members will understand if I do not try to do so. However, I shall certainly try to respond in writing to any points that I cannot touch on now.

We welcome the use that the Liberal party has made of its Opposition day, particularly as it gives us the opportunity to set the record straight. Since 1979, we have had a proud and creditable record of caring for the elderly. The debate gives us an opportunity, however, to shed yet more light on the important and exciting proposals introduced on Monday by my right hon. Friend the Secretary of State in his social security review. But given the opportunity that the Liberals had, it is surprising that they should have decided to focus on such a subject, especially when one considers their record and their collaboration in keeping the Labour Government in office through the notorious Lib-Lab pact. I well understand that the hon. Member for Stockton, South (Mr. Wrigglesworth) is doubly responsible, because he was not then in the SDP; he had not forsaken his allegiance to the Labour party. But it is important that people should be reminded again and again of the dangers of inflation. Those dangers apply to everyone, but particularly to the elderly. A party that collaborated with another party that

succeeded in achieving an inflation rate of 112 per cent. over five and a bit years has much to answer for to the elderly.

Mr. Steel: I do not wish to lessen the time available to the Minister, but he must recall that during the 18 months of the Lib-Lab pact inflation was reduced from 20 per cent. to 8 per cent.

Mr. Whitney: I should point out that the hon. Member for Stockton, South was quite happy with the deal when the change from the method of accounting in effect denied over £1 billion in today's terms to this country's pensioners.

My right hon. Friend the Minister has already responded to most of the points raised by the leader of the Liberal party, but he has left me to comment on the personal social services. It is important to put the Government's achievements on the record. I agree with the right hon. Gentleman that the personal social services are a vital element in the Government's aid to the elderly, and that is why we take great pride in the fact that between 1979-80 and 1983-84 expenditure increased, in real terms, by 18 per cent. For example, net expenditure on local authority residential homes amounted to something approaching £365 million in 1983-84, an increase of about 12 per cent. I could go through the list, and I should be happy to write to the right hon. Member to explain still further the significant increases that have taken place in this sector, which he recognises as important.

Mrs. Beckett: As this is the second time that Conservative Members have taken credit for the Government's record in social services, I should remind them that most of that record comes from the spending of Labour councils, for which they have been criticised. The Conservative councils have a pretty rotten record.

Mr. Whitney: If the hon. Lady looks at the facts, she will understand that that is not the case, but I hope that she will not object to the fact that spending has increased by 18 per cent. in real terms. Therefore, it is a little puzzling to know why—except for the right hon. Member for Tweeddale, Ettrick and Lauderdale (Mr. Steel) who seems to have some understanding of the impact of inflation on the pensioners—hon. Members are constantly pressing us for yet more.

When we talk about pensions, what is referred to as the alliance becomes an even more puzzling creature than it usually is—it is more like a hydra-headed amoeba than an alliance, and most of the heads are quite small. In the Liberal party's response to my right hon. Friend's pension inquiry, it suggested that the target should be to raise the basic pension of a married couple to two thirds the average male earnings. The cost of that would be about £10 billion. It would increase the load of national insurance contributions on employer and employee by about 50 per cent. I wonder whether either pensioners or the working population have any concept of what that Liberal party proposal would mean both for employment and the national economy.

I understand that there are two separate parties within the alliance, but the puzzle is that there seem to be two parties within the SDP. We were pleased to notice that the SDP spokesman in the other place, Lord Roberthall, recognised the tremendous subject that had been opened up. He said that he wanted

> "to congratulate the Government on grasping this nettle at last, which is so full of promise.
>
> I think that most important in what the noble Baroness has said is the reference to the problems of the future. I think our grandchildren are living in a fool's paradise, because the rapid change in the age structure"——

Mr. Speaker: Order. I am reluctant to stop the hon. Gentleman, but I trust that he is not quoting a Member of the other place.

Mr. Whitney: I apologise, Mr. Speaker. I was seeking to paraphrase but it became something more than that.

The noble Lord was pointing out the dangers of living in a fool's paradise because the rapid change in the age structure means, as was pointed out earlier, a much smaller number of workers having to pay for a larger number of pensions. It is with that problem that we sought to deal through the proposals that we have made on the phasing out of SERPS.

I am happy to deal with some of the points that the hon. Member for Derby, South (Mrs. Beckett) made because clearly she has failed to understand the impact of our present economic commitments. It is necessary for any sensible Government, as has been widely recognised, to take a careful look at these obligations. The assumptions to which the hon. Lady referred showed a wide variation, but the arguments do not rest on these assumptions alone. If SERPS were to continue unchecked, that would earmark a large slice of public expenditure, and not necessarily direct it where it is most needed. Part of the cost of SERPS would go to boosting occupational pensions, and the central question is not whether we can afford SERPS, but whether the state should be in the business of providing second tier pensions.

Mr. Steen: I do not wish to disturb my hon. Friend's recitative, but will he deal with the point — *[Interruption.]* If my hon. Friend can hear me above the Liberal party's bad behaviour and rabble-rousing, will he direct his mind to my idea that the Government could save quite a bit of money and do a lot of good in developing family and community care by encouraging elderly people to live at home and giving the people with whom they live tax concessions and benefits?

Mr. Whitney: I recognise that as an objective, and some of the moves that the Government have made suggest that we are moving in that direction. I am seeking for the figures, which I cannot find, but the community programme that we have already suggests that we are moving in the right direction and that we recognise the importance of that.

I hope that my hon. Friend will recognise as well that a balance has to be struck. For example, the extension of the invalid care allowance, as my hon. Friend the Minister for Social Security has made clear on a number of occasions, is regarded as one of many desirable objectives. However, the problems of the Government as opposed to those of the SDP or the Liberal or Labour parties is that we have to have the responsibility of making choices. We understand the dangers of inflation, not least to retired people.

The hon. Member for Derby, South made an interesting claim about the importance of Beveridge. I think that she was seeking for the quotation:

> "From each according to his abilities, to each according to his needs."

[Mr. Whitney]

However, she seems to be opposed to any proposal that we are making within the review to target more effectively the available resources. If she would think a little more carefully about

"to each according to his needs";

she would see that better targeting, which is promised in the review, will achieve exactly that.

I am seeking to answer as many as I can of the important points that have been made, but it will be difficult for me to cover them all in the available time. The hon. Member for Ross, Cromarty and Skye spoke about the need for integration of taxes and benefits, and we recognise that as a desirable objective in many ways. However, there are serious problems, with which my right hon. Friend the Chancellor of the Exchequer is looking forward to dealing.

There has been much talk of Beveridge and I refer hon. Members and particularly the right hon. Member for Tweeddale, Ettrick and Lauderdale to what Sir William Beveridge, himself a Liberal, said:

"The State in organising security should not stifle incentive, opportunity, responsibility; in establishing a national minimum, should leave room and encouragement for voluntary action by each individual to provide more than that minimum for himself and his family."

Those are the objectives that my right hon. Friend the Secretary of State's review will achieve.

Question put, That the original words stand part of the Question:—

Question accordingly negatived.

Question, That the proposed words be there added, *put forthwith pursuant to Standing Order No. 33 (Questions on amendments), and agreed to.*

MR. SPEAKER *forthwith declared the main Question, as amended, to be agreed to.*

Resolved,

That this House recognises the Government's achievement in increasing the value of the retirement pension and welcomes the Government's continued commitment to protect its value; congratulates the Government on carrying out a thorough review of the social security system; and endorses the aim of ensuring a coherent and soundly based benefit structure to meet the needs of pensioners and others.

Wages Councils

7.12 pm

Mr. David Penhaligon (Truro): I beg to move,

That this House agrees with the conclusion of the Employment Committee that wages councils should not be abolished.

Mr. Speaker: I have selected the amendment in the name of the Prime Minister.

Mr. Penhaligon: The legislation on wages councils is of some maturity. It dates back to 1909, which shows a level of endurance, and, I believe, a civilisation by Parliament. We believe that the legislation enshrined in the law the concept that within our capitalist, entrepreneurial society there will be a level beyond which people will not be exploited. That was fundamental to the argument in 1909, and it is fundamental to the argument that I wish to present today. That argument was good enough for the House in the 1920s, 1930s, 1940s, 1950s, 1960s, and 1970s, but today we live in a different era. Even such basic concepts as that have to be argued and fought for.

In principle, the wages councils set for several categories of employees minimum rates of pay and minimum employment conditions that should be obeyed. Most of the regulations insist upon adult pay rates of about £65 to £72 a week. A single person receiving that would have a take-home pay of £61 a week and a married man £65 a week. The average for the whole lot is just short of £70 a week.

The issue whether we should abolish or reform has, in one form or another, been the subject of political debate and argument for a least two or three years. The Government played with it under pressure from their own Back Benches, and eventually produced a consultative document, which comes up with the alternatives of abolish or reform. Everyone in the House knows what abolition means; that is a simple state to deal with. However, reform can mean anything. It can mean virtual abolition. At the same time, it can mean a great extension and strengthening, so I suppose that the optimist in me must say that there is at least some hope for a civilisation on this issue.

Several arguments are paraded in favour of abolition. The favourite one, in the era in which we live, is not surprising—it is jobs. Various documents and economic theories suggest that if there were a 1 per cent. reduction in average pay that would create up to about 150,000 jobs. Therefore, one does not lightly dismiss arguments in this area. It is worth remembering relative to the figures of £65 to £72 a week that average pay is currently £178 a week. My hon. Friends and I believe that some wage settlements currently being made mitigate against the national recovery, and certainly against a reduction in unemployment. That is my honest, candid view. However, those pay increases are in the higher categories. They are not for the people earning the income that I have mentioned. We believe that if one extrapolates that basic argument, in which there is some truth, to this category, it is standing all logic on its head, and possibly putting several people in a position that we find unacceptable.

As I have said, we do not dismiss the possibility that there is some substance in the argument to which I have just referred. However, we find little evidence that reducing wage rates from between £65 and £72 a week to between £55 and £62 a week would create a significant number of extra new jobs. The best estimate that I can find is that if the wages councils were abolished 8,000 jobs would be produced. To put it in perspective, that is fewer than 16 jobs per constituency. Average unemployment is now over 5,000 per constituency. Even if that figure underestimated reality by a factor of two, 32 jobs relative to 5,000 is of very little significance.

Mr. Dave Nellist (Coventry, South-East): Is the hon. Gentleman aware that the Department of Employment has given me the following figures in relation to the average wages of young people, at whom is often aimed the assertion that if their wages were reduced more jobs could be created? The average wage for school leavers relative to adult rates has fallen by 8 per cent. for boys and 12 per cent. for girls during the lifetime of this Government, yet youth unemployment has trebled. In other words, the evidence from the Department showing falling wage rates has shown no increase in employment but a trebling of unemployment.

Mr. Penhaligon: I have seen those figures before somewhere. It might be because the hon. Gentleman produced them. I shall refer to youth pay. I do not totally dismiss what the hon. Gentleman says.

A few people believe that the abolition of wages councils would allow pay to increase. I have heard few hon. Members argue that in the House. I do not know whether that is the view of the Minister or his Department. I regard it as fantasy of the first order.

Let us ask ourselves what would happen if wages councils were abolished. What evidence can one produce? The truth is that little can be produced. I believe that their abolition would reduce pay. Many low-paid jobs are already not covered by wages councils. One can examine the pay structure in that area and judge what might happen in similar jobs that happen to be inside wages councils. Let me give the Minister an example. In my constituency, a young woman who is a qualified florist came to see me. She had been through the course to become a florist, and was highly regarded in that skill. Her employment boiled down to preparing wreaths and sprays and making the flowers that are grown in my part of the country, among others, into a more attractive item to persuade people to part with their money. In another part of the same enterprise, a young woman of similar age works behind the counter of the shop.

Reason suggests that the person behind the scenes doing the skilled work should be paid more than the person behind the counter taking the orders, but that is not so because the young woman on the counter is defended by the wages council to the tune of £67 to £72 per week whereas the other is not. I believe that if wages councils were abolished many more people would be in the position of the qualified florist who is paid less than her colleague at the counter.

Mr. John Butterfill (Bournemouth, West): I believe that 17 wages councils have been abolished since 1960. Can the hon. Gentleman give evidence to show that wages in those industries have been reduced?

Mr. Penhaligon: One of the wages councils that were abolished protected the minimum pay of whalebone corset manufacturers. From observation in my constituency and

in the House, I suspect that the outlet for those products is somewhat limited nowadays, so the three people still making them may well be paid less than in the past.

Mr. Tony Baldry (Banbury): The wages council for the cutlery industry was abolished in 1969.

Mr. John Evans (St. Helens, North): Why was it abolished?

Mr. Baldry: It was abolished because it was thought that under the legislation collective bargaining was adequate to protect the employees in that industry, but research by the Department of Employment into the impact of abolition concluded that there had been no significant improvement in wage determination, no catching up with the rates achieved by voluntary collective bargaining in similar industries and, indeed, sufficient evidence of underpayment of female workers to suggest that protection had deterioriated since abolition.

Mr. Deputy Speaker (Mr. Ernest Armstrong): Order. There are three Front-Bench speakers in this short debate and a number of other hon. Members wish to catch my eye. Interventions from Members waiting to catch my eye do not improve their chances of doing so.

Mr. Penhaligon: One likes to encourage maximum participation on these occasions, but I think that there have been five speeches so far, and I note your comment, Mr. Deputy Speaker.

Another example of which I have experience is the village sub-post office with a retailing business attached. If an employee's duties include the selling of Mars bars and the like, that person is defended by a wages council to the tune of £67 to £72 per week; but the person employed only behind the post office counter dealing with large amounts of state money in pensions and benefits is not protected and in many cases the wages are lower. There are many other examples. I know of tyre fitters being paid between £45 and £50 per week.

It may be argued that these are fringe examples and that hard cases make bad law, but I argue that they are not fringe cases. The Minister's own document states that of the 2·7 million people covered by wages councils about 1 million earn the wages council minimum or just a pittance more, so all those people are influenced by wages council settlements. With regard to the impact on employment, subparagraph 8 of the Government document states that

"those figures suggest that the wages council rates are now higher than would be necessary to recruit and retain workers."

That is the Government's own view, and I agree with it entirely. There is thus no argument between us and the Minister — there may be some argument from Conservative Back Benchers, although not from the hon. Member for Banbury (Mr. Baldry)—that the abolition of wages councils will do anything other than reduce wages. In this context, I remind the House that we are talking about minimum wages of £67 to £72 per week.

There are a couple of documents supporting abolition. The document submitted by the Institute of Directors advocates outright abolition. I put some energy into trying to discover any categorisation of directors' pay in the new earnings survey but was unable to do so. I suspect, however, that their earnings are nearer £70 per day than £70 per week. The institute baldly states that 54 per cent. of its members believe that they would employ more people if wages councils were abolished.

One does not simply dismiss evidence of that calibre, so let us consider the way in which that magnificent figure was produced. Of the 2,000 members of the institute consulted about the Government's document relating to abolition, only 130 responded, 30 per cent. of whom said they had no experience and therefore no knowledge of this area and thus had no strong view one way or the other. The great Institute of Directors survey thus comes down to just 91 people's responses, 70 of whom said that they might take on more staff. That is 3½ per cent. of the institute's membership, not the 54 per cent. suggested on the front page of the submission.

That is a disgracefully shoddy piece of work by a body which, on the whole, one respects and it shows no interest in or understanding of the circumstances that we are discussing. If the business decisions of members of the Institute of Directors are based on such flimsy evidence, it is no wonder that Britain is in trouble. Some of them should try living on £70 per week rather than £70 per day.

The other substantial body in favour of abolition is the National Federation of Self-Employed and Small Businesses, which tends to major on the complexity of some wages council regulations. Paragraph 12 of the Government document refers to a set of wages council regulations comprising 30 pages of closely typed instructions, and the wages inspectorate concluded that half the underpayments discovered in its random survey —not its detailed survey—were due more to ignorance than to malice, and that is the wages councils' own view. That suggests that there is room for simplification, so I do not defend every detail of the present situation.

The wages councils' own evidence states that 35 per cent. of visits found evidence of underpayment. That figure contrasts with the 6 per cent. found in the random survey, but visits occur largely when problems have been brought to the attention of a wages council by employees, other employers or, no doubt, Members of Parliament. I make no complaint about that. One recognises that the sample for visits is skewed and I do not know whether the figures are exactly 35 per cent. or 6 per cent., but let us take the 6 per cent. It shows beyond question that the current regulations are more complicated than they need be. Therefore, some simplification may be suitable.

Some of the members of the National Federation of Self-Employed and Small Businesses to whom I talk are aware that, in many cases, the wages councils protect them. If, for example, business A is offering the community a service and paying its employees £70 a week, and business B comes along to compete and pays its employees £50 a week, I have news for the owner of business A: he is likely to be in some difficulty fairly soon. Many people recognise that, at the end of the economy, wages councils operate to their advantage.

Some of those who claim that they could produce extra jobs if wages councils were abolished seem to base that suggestion on their ability to undercut their competitors. They say, "If I pay my employees £60 a week, I can employ more, because I will undercut the man up the road and grab some of his business." The employer up the road is likely to hit back in the obvious way. Therefore, I believe that few jobs will be created by the abolition of the wages councils.

The major complaint is about wages for the young. I note that all the categories of business pay what is called in the document the adult rate at the age of 18, except for the boot and shoe repair industry, which pays it at 20; the

[Mr. Penhaligon]

hairdressing industry, which pays it at 20; the retail food trade, which pays it at 19; and the sack and bag industry, which also pays it at 19. Logic suggests that if an employer is given a choice between employing a 28-year-old with eight or 10 years' experience, and an 18-year-old with only one or two years' experience, at the same rate of pay, regardless of all the surveys and the comments of the philosophers who analyse such matters, the 28-year-old stands a better chance of getting a job.

Part of the problem is that we define adulthood legally as the age of 18, but an 18-year-old is not always trained and experienced. In other European countries, the main rate recommended by minimum wage legislation — Britain is by no means unique in having such legislation — is paid only to older people. For example, in Denmark, the consolidated rate is paid at the age of 23. I believe that that is too old, and would suggest 21 as the most suitable age. However, I warn the House that changes in this area will not create more jobs. All that will happen is the substitution of mature workers by younger workers, but there is some justification for arguing that the system should be changed. In some areas, the consolidated — or experienced — rate should apply to 21-year-olds, not to 18 or 19-year-olds.

Some believe that the Government will abolish all protection for those aged under 21. That would go tragically too far. The justification for this legislation is that it protects the vulnerable in society, and we all know that probably the most vulnerable section of society is the under-21s. It stands logic on its head to abolish protection for them. Furthermore, if protection is removed completely, when many people reach the age of 21 they will be sacked. Hon. Members should realise that some people suddenly lose their jobs simply because they have moved up a bracket in the pay range. I beg the Secretary of State not to introduce as a compromise the scrapping of regulations governing employees aged under 21.

Mr. Baldry: What proportion of the adult rate would the hon. Gentleman suggest those aged between 16 and 21 should get? At present, 22 of the 26 wages councils pay a disproportionately higher rate to young people than 16-year-olds receive elsewhere in the economy.

Mr. Penhaligon: I have made it clear that there is some necessity for movement in that area. I do not dodge the hon. Gentleman's question. However, he cannot expect me to come up with a figure for wages should the basic regulations be changed. That is a matter for negotiation by the wages councils within their spheres of influence. But if the House says that it wishes the consolidated rate to operate from the age of 21, I believe that action would be taken to implement it.

The Secretary of State produced a consultative document mainly to try to quell the hard core on the Conservative Back Benches. He knows already that the Select Committee on Employment is against total abolition. The Auld report, at page 66, came out firmly against abolition of the wages councils. The CBI is against it. One is not surprised, but one does not dismiss it for that, that the Low Pay Unit and the Child Poverty Action Group are against it. The Labour party, the Liberal party, the Social Democratic party and the nationalist parties are all against total abolition. The citizens' advice bureaux are certainly against abolition, and they have day-to-day experience of dealing with the problems that arise in this area. The British Institute of Management is against abolition.

There could be a much more intelligent debate on the subject if the Government accepted the Liberal motion, which is simplicity itself. Let us make it clear that total abolition is not an option, and that doing nothing is not an option. Between those two extremes, we could have a much more sane, sensible and civilised debate. We believe that there is a case for simplification, and that not all workers are experienced and mature at the age of 19, but that there is no case for abolition. Indeed, it may be worth considering an improvement in the endorsement procedure in some areas.

The Liberal party has used one of its rare Supply days to raise this subject because it believes that the Parliament of our capitalist, competititive society should send out the clear message that there is a point beyond which people shall not be exploited. The miserable wages that we are defending range between £65 and £72 a week. The alliance is defending that, but the Government, by issuing their consultation paper, are attacking it, or at least putting it under scrutiny. The Secretary of State probably agrees with much of what I said, but some of the hard men on the Conservative Back Benches will have different views.

This legislation was good from the 1920s to the 1970s. It is a reflection on our Government, on the era in which we live and on the ideas that are foisted upon the British people that we must spend parliamentary time defending such miserable wages. I invite the House to vote for our motion and to clear up this matter once and for all.

7.38 pm

The Secretary of State for Employment (Mr. Tom King): I beg to move, to leave out from "House" to the end of the Question and to add instead thereof:

'notes that the period for consultation on the consultative document on wages councils is only just ending and representations are still being received; and asks the Government to take into account the views of the Employment Committee, together with the very many other responses from interested organisations and individuals.'.

The Government's amendment makes it clear why we cannot accept the motion introduced by the hon. Member for Truro (Mr. Penhaligon). We do not intend to set aside, at the moment of their reception, the many representations and comments that have been made in response to our consultative document. Despite the hyperbole of his peroration, the hon. Gentleman must realise that it would be a disgrace for the House — I hope that the Liberal party would have nothing to do with it — to treat with contempt the representations of people who are informed and involved. They will certainly be considered by the Government, although the hon. Gentleman seems to be prepared to ignore them.

The hon. Gentleman knows that 31 May was the date set for the end of the consultation period. We are just ending that consultation period, and six further serious representations were made today. They are still coming in, and I am sure that the House would wish us to continue to consider all the representations that can be taken into account, even if, technically, they fall just outside the deadline. I hope that all those who believe in a serious consultation of this nature will support our amendment and realise that that must be the right way to proceed.

As I have said, we are still receiving a massive number of representations. The lunch-time score today was 667.

I therefore welcome the opportunity provided by this debate for the House to make its comments, and I shall certainly take note of them.

I apologise for the fact that there has been a discontinuity of Ministers. There was a debate in the early hours of the morning during the proceedings on the Consolidated Fund, but at present my hon. Friend the Parliamentary Under-Secretary is attending a meeting of the ILO in Geneva. I hope, therefore, that the House will accept me as an inadequate substitute for him on this occasion.

The House will recall the background to the consultative document. It was originally announced in the Budget speech as part of a range of measures specifically targeted towards the issue of unemployment. It will also be recalled that in the Budget debate the Chancellor and I announced a series of measures, including the development of the two-year youth training scheme, the expansion of a further 100,000 places in the community programme to help the long-term unemployed and new pilot projects as a means of providing further valuable work for the long-term unemployed. They include schemes managed by the private sector and those that involve work in charities.

We also looked at ways in which we could remove any obstacles to the creation of the maximum number of jobs. In that connection, there was a general welcome in the House for the proposals to reduce the starting rate for national insurance contributions at the lower level as a means of reducing the cost of taking on new employees. In addition, we have tried to ease the burden or remove any obstacle which might exist in relation to employment protection. That has already been carried through. We also identified the problem of the wages councils. As a result, I announced our proposals and published a consultative paper.

In the Budget debate I set out the reasons why the Government believed that the changes were needed. As we know, wages councils specify rates of pay and detailed conditions for 2·75 million workers in 26 industries. The hon. Member for Truro said that the system was first introduced in 1909, against a background of much public concern about "sweating", the three components of which were inadequate wage rates, excessive hours of labour and the insanitary state of the houses in which the work was carried out. That was the background against which the original trade boards were established.

However, economic conditions have changed significantly since that time. The welfare state has been established, real average pay is much higher and average hours of work are much lower. There is now an extensive range of legislation aimed at protecting the welfare and health and safety of employees. The development of systems for family support—and the further developments announced by my right hon. Friend the Secretary of State for Social Services are relevant in that regard—has made a significant new impact on the situation.

I have said that one of the original concerns was the extremely long hours of work, but it is worth remembering that two thirds of the employees covered by wages councils are part-time workers. A significant number produce a second family income, particularly women who work part-time and represent a significant number of those covered by wages councils.

The system has developed piecemeal and is extremely uneven in its application. I read with interest the article in *The Guardian* by the right hon. Member for Tweeddale, Ettrick and Lauderdale (Mr. Steel), and it is without offence that I say that the speech of the hon. Member for Truro covered many of the points made in that article. However, I challenge hon. Members to walk down any high street in the country and to identify which shops are covered by wages councils and which are not. The application of wages councils is piecemeal, and it is extremely difficult to identify any great distinction between those for whom the wages councils are supposed to provide protection and those for whom they do not operate.

Mr. Ray Powell (Ogmore): I am one of two elected Members who represent 400,000 shop workers. How many of them will not be covered if wages councils are abolished? Why are the Government not prepared to accept the Auld report's recommendation on the retention of the wages councils?

Mr. King: I am, of course, aware of that relationship, and my right hon. and learned Friend the Home Secretary has already made our position clear. In advance of legislation on the Auld report, the Government recognise the need to make clear their position on wages councils As the hon. Gentleman rightly said, that was raised in the Auld report.

Against that background, a range of complaints is widely recognised. One concern often expressed is the problem of the levels of pay of young people, and there is evidence that they are above the going rate that may exist in other industries. The mistake that was made by the hon. Member for Truro—it was a point in his right hon. Friend's article with which I disagreed—was to suggest that somehow there would be competition for a job between a 28-year-old at a fixed rate of pay and a 17-year-old at the same rate of pay. Instead, we should consider whether there is an alternative job at a lower rate of pay. I make no apology for saying that, because in Germany and other countries rates of between 30 and 40 per cent. of adult pay are considered reasonable as the starting rate. That gets more young people into jobs. However, so long as the adult rate is satisfactory, the problem of the starting rate for young people must be looked at very seriously. It should not just be considered in the context of substitution between the older and the younger person.

Mrs. Jill Knight (Birmingham, Edgbaston): Does my right hon. Friend also agree that people at that age and with such a short amount of experience cannot possibly be worth the amount which employers are asked to pay at that stage in their working lives? Is it not totally unrealistic to force an employer to pay more money than an employee is actually worth?

Mr. John Prescott (Kingston upon Hull, East): Do not be so arrogant, you mean and silly woman:

Mr. King: I am appalled by the reception given to my hon. Friend the Member for Birmingham, Edgbaston (Mrs. Knight). It is obvious that Opposition Members do not understand that in certain cases what she said is undoubtedly true. In certain cases, a 16-year-old is not worth £55 a week when starting out. I am anxious that youngsters should get training and jobs. It is acceptable to trade unions and all political parties in, for example, West Germany that youngsters should start on about £27 a week. Why is there much lower youth unemployment there?

[Mr. King]

Why do some people here, who are living in the past, insist on negotiating wages of £50 or £60 a week? By doing that, they are condemning a lot of young people to unemployment. I care about that and about a blinkered attitude which just shouts down a perfectly constructive comment.

There are anxieties about the wages councils and about the complexity and length of the reports. The wages inspectors bear out the fact that many offences arise out of misunderstandings because of the length of the reports. Considerable difficulties have been caused by the practice of some wages councils of making retrospective awards. Employers suddenly discover that they have a bill for which they have not budgeted.

As the hon. Member for Truro said, employment is at the heart of this debate. We put employment at the top of our list of priorities. Every responsible right hon. and hon. Member must take that view. We have decided that there is an urgent need to tackle the problem of unemployment by abolition or reform of wages councils. We have had a staggering response to our consultation document. I do not wish to anticipate what conclusions we should draw, but I should like to give a summary of the responses. I acknowledge the response of the Select Committee on Employment and the minority report of my hon. Friend the Member for Bolton, North-East (Mr. Thurnham). We had 667 responses by lunch-time today, and they are still coming in.

The Trades Union Congress and the unions have made clear their opposition to abolition, although some unions have joined the reform lobby because they think that simplification is important for more effective enforcement. Employers, the Institute of Directors and the National Federation of Self-Employed and Small Businesses obviously favour abolition. The Confederation of British Industry has suggested abolition, unless there is a request from both sides to retain wages councils, but maintains that there should nevertheless be radical simplification. The Association of British Chambers of Commerce wants radical reform. There is significant pressure in the hotel and catering industry for abolition. Organisations which advocate reform but not abolition have concentrated on issues mentioned in the consultation paper, such as the exclusion of young people, the setting of a percentage of the adult rate as a maximum, simplification involving a single rate for adults, amalgamations or reductions in the numbers of wages councils, and the elimination of retrospection and of independent members as a means of simplifying the operations of wages councils.

Mr. Peter Thurnham (Bolton, North-East): Has my right hon. Friend considered representations on behalf of the 3 million unemployed, because they suffer most from the effects of wages councils?

Mr. King: It is precisely because of the potential for extra jobs that we are considering the matter. The consultation period is ending. We have received many representations and we are reviewing them, so the debate comes at an opportune moment.

Mr. Michael Foot (Blaenau Gwent): As the right hon. Gentleman has attempted to give us some of the figures, will he tell us how many representations he has received in favour of outright abolition?

Mr. King: I have only the figure of representations received—667. I have picked out a few views which are already public. [HON. MEMBERS: "Ah!"] There is no secret about this. I shall be anxious to disclose the results of the consultation. Representations are still coming in. We have received six more today. I do not have a breakdown, but the right hon. Gentleman knows that the total includes representations from major institutions such as the CBI and the TUC. We have had one representation from the alliance. A Liberal councillor has written to us. That is the only representation that we have had from the alliance so far, and I welcome it. That is why the debate has been so valuable. It is important to measure the merits or quality as well as the numbers of representations.

I am sure that the House agrees that it is important to reach an early decision. With the leave of the House, I shall respond to the debate. In the meantime, I shall listen with interest.

7.47 pm

Ms. Clare Short (Birmingham, Ladywood): I should like to make clear the Labour party's opposition to the threatened abolition of wages councils. We have outlined our stance in our amendment, which states that the Labour party

"rejects the Government's claim that reducing the pay and conditions of low-paid workers will create more jobs; condemns the Government's deliberate weakening of the Wages Inspectorate by cutting their numbers by one-third"—

the Government are already undermining the system and now we are discussing whether it should be undermined further—

"thus encouraging bad employers to break the law".

We hear much from the Government about law and order and respect for the law, but there are some laws such as those which are supposed to protect the wages of the lowest paid for which they have no respect. As the motion continues, the Labour party

"calls for the strengthening of wages councils to improve the protection of these workers, most of whom are women, young people and ethnic minorities."

It was not clear whether the hon. Member for Truro (Mr. Penhaligon) spoke for the Liberal party or for the alliance, but the motion is enormously weak. The Government have manipulated the press and public opinion time and again—their method seems to work, although it is crude. They always threaten more than they intend to do, and do less. I do not believe that they intend to abolish all wages councils. That would be too unpopular and they would pay too high a political price. They intend to exempt major groups from their protection—young people and perhaps part-time women workers—and to undermine further the system which they have already weakened by cuts in the inspectorate. It is clear from the consultative document that this is one possibility that the Government are considering. The Liberal motion says nothing about that, perhaps because of the difference on this question between the Liberal party and the Social Democratic party. As usual, there seem to be grave differences between the two parties.

On 23 May 1985, writing in *The Times*, the leader of the Social Democratic party told us how new technology could lead to full employment and jobs for everyone—a thesis with which I agree. He said that there is one grave threat to the possibility of the restoration of full employment, and that is that some of the new jobs will be low-paid jobs in the services sector. He said:

"not all new jobs in the service sector will be high-skilled, high value-added, high-wage jobs. Along with the professional jobs and the jobs in IT will also be a lot of traditionally lower wage jobs in areas such as fast foods, retailing and health care.

This has two critical policy implications. It is imperative not to prevent these jobs emerging by minimum wage legislation".

There is minimum wage legislation in the wages council system. On 23 February, the leader of the Social Democratic party was not in favour of minimum wage legislation. I have always suspected that he makes up his party's policies in the bath and announces different policies depending upon how he feels.

The National Union of Tailors and Garment Workers is deeply worried about the prospect of the abolition of wages councils. It represents workers in the textile industry who work in sweatshops—some of which are in my constituency—which are increasing in number. The union has sent us a letter that the leader of the Social Democratic party sent to one union member. On 22 May, the day before the article in *The Times*, the right hon. Gentleman seemed to be in favour of retaining wages councils but thought there might be scope for reform. He thought there should be less protection for school leavers and people with a second income. We know that he meant women but, just to show that the Social Democratic party favours sexual equality, the right hon. Gentleman referred to

"perhaps the second wage earners in the family household—male or female—if wages were more flexible."

Mr. Thurnham: May I help the hon. Lady with some comments on the Liberal party's views? She mentioned the garment industry. I think that she would accept that the wages of garment workers are determined by the world prices of their goods. The Liberal party has differing views on world prices—the hon. Member for Yeovil (Mr. Ashdown) says one thing about the multi-fibre agreement and the hon. Member for Rochdale (Mr. Smith) says the opposite.

Ms. Short: I understand that the hon. Gentleman wants all controls to be abolished. I suppose that he wants Britain's textile workers to compete for wages with workers in Bangladesh.

The leader of the Social Democratic party seems unable to make up his mind between one day and another whether he favours any minimum wage legislation. On Monday 3 June, in an article on the agenda page in *The Guardian*, as a trailer for this debate, the leader of the Liberal party tells us that we must retain and expand wages councils. A major difference between the views of the two parties is found in that statement. He stated:

"there is definitely a case for saying that wages councils may"

—

"may" is an interesting word—

"deter some firms from taking on young people by insisting that they are paid the same £63-£72 per week as older employees."

The right hon. Gentleman is mistaken in thinking that young people must be paid the adult rate. It seems that young people should be exempted from the protection offered by wages councils.

The Government assert that the evidence suggests that abolition or major reform is needed. When the Government discuss reform in the consultative document, they mean further weakening of the wages council system. Let us be in no doubt about that. The Government assert that weakening the system or abolition will produce jobs. Despite enormous efforts by the Government to produce evidence to support this prejudiced and dogmatic view, as Centre Forward calls it, the Government have failed to produce convincing evidence of this case. The Select Committee's report shows that clearly, stating in paragraph 17:

"Thus the empirical evidence submitted to the Select Committee does not provide unambiguous support for the notion that the elimination of Wages Councils would have the sort of employment effect which would provide an overwhelming case for abolition."

In paragraph 19, the Select Committee states:

"Ministers did not give an estimate of the increase in the number of jobs which might be expected to result from abolition; when pressed to do so in respect of young people, they were unable to: the message was 'try it and see'."

Why do we not try it? Why do we not cut the wages levels of people on £60 a week, just in case it will provide a few jobs? That is the proposition that is put before us.

It is incredible how the Government have managed to make the senior Civil Service—an old part of the British establishment—so deviant that it constantly leaks documents. One leaked document tells us something very interesting. The Government have been trying to move in this direction since taking office in 1979. The Government keep commissioning research that does not prove their case. If Ministers will not act as desired, it is a case of chuck them out, get new academics and Ministers and try again. Here we are, the third time round. In a minute dated 12 February 1981, Mr. M. Wake says that, in November 1980—the Government got on to this matter quite quickly after 1979:

"E(EA) Committee . . . accepted the Secretary of State's arguments for retaining the Wages Council system".

A report covered by the minutes states:

"The inter-Departmental report by officials which was considered by Ministers at E(EA)"—

that is a Cabinet employment sub-committee—

"found no evidence of any significant loss of employment directly attributable to the setting up of minimum rates by wages councils."

It seems that the Cabinet was persuaded. Following that decision, the Secretary of State was asked to

"examine whether it might be possible to remove young people and part-time workers from the scope of Wages Council awards".

The draft paper prepared for submission to that Cabinet sub-committee shows the conclusions of the review by the Secretary of State. It states:

"The case for exclusion is based on the suggestion that job opportunities for young persons and part-time workers would be increased if employers were free to take them on at less than the statutory minimum rates set by the wages councils. When made, the suggestion usually comes from small shopkeepers."

There are more and more of them in the House.

"Exclusion of these groups has not been advocated by the employers' associations represented on the Councils (including those predominantly representing small businesses) although the National Federation of Self-Employed and Small Businesses Ltd. has recently urged the total abolition of the wages council system.

The facts are that statutory minimum rates for young persons and part-timers are lower than comparable collectively bargained rates, and rates actually paid frequently exceed the statutory minima. In practice, therefore, there is unlikely to be any very significant scope generally for increasing job opportunities thereby. To whatever extent this did happen, it would be largely at the expense of the jobs of full-time adult bread-winners"—

that means throwing the parents out of work and giving the low paid work to their kids; this is the way in which we are going forward to Britain in the 1990s—

"since there is no plausible evidence that it would significantly increase job opportunities overall in the wages council sectors."

That Secretary of State—no longer a member of the Government—was asked to review the question whether

[Ms. Short]

wage councils should be abolished. He reviewed an interdepartmental report and found that there was no case for abolition. The Cabinet committee accepted that. He was asked to look at the possibility of excluding young workers and part-time workers and found that there was absolutely no case for it. But he was thrown out, so here we are looking at it the second or third time round. The Government were determined. If the facts did not fit their prejudices, never mind, kick out the Minister and try again, commission more research and find some academics who will say the right thing.

Yesterday the Low Pay Unit issued a briefing which makes very serious allegations about the way that the Department of Employment has been conducting its academic research. The briefing was prepared by Mr. Frank Wilkinson, a research economist at Cambridge university, who has carried out a number of research studies for the Department of Employment over the years. We understand what it means to that man. He will not carry out any more research studies while this Government are in power, so obviously he really means what he says in his report.

Mr. Butterfill: Will the hon. Lady give way?

Ms. Short: I am sorry; I am very short of time.

Mr. Wilkinson makes the serious charge that the Government are fabricating and distorting the evidence that comes from the research that they commission. I will briefly summarise the case that he made.

The Department of Employment commissioned a study of the effects of the retailing wages council from independent academics, but when the results became available last year they were embarrassing. Contrary to ministerial researches, the research found that minimum wages had had no effect on employment.

The Department of Employment did not publish the report until this May, and in the meantime hurriedly assembled its own report on the effect of wages councils in the clothing industry, which it then published on the same day. The clothing report came to remarkable conclusions for an industry in which relative wages had fallen since the 1950s by 20 per cent. for men and 13 per cent. for women. The Department of Employment concluded that wages were to blame for unemployment. Mr. Wilkinson points out that that conclusion could have been reached only by the improper use of data and a muddled methodology. Certainly the report bears all the signs of being put together very quickly and with a decided lack of competence.

The Department of Employment report ignored completely the effect of falling demand and imports in looking for an explanation of the decline of the clothing industry, preferring instead to place the blame on the industry's wages councils, but its conclusion is at odds with the perception of firms within the industry, 86 per cent. of which attributed the fall in employment to lack of demand and import penetration. So much for the research that we now get from the Department of Employment.

The final point from Mr. Wilkinson is that, using methodology and data considerably more reliable than that used in the Department of Employment study of clothing, the Ministry of Agriculture, Fisheries and Food analysed the impact of the minimum wage for farm workers. The report concluded that an increase in the value of the minimum wage increased both the demand for and the supply of labour, and hence employment. Again, the findings were in complete contradiction of the views of Ministers on the effect of minimum wages. The Department of Employment is quite unjustified in suggesting that the research findings demonstrate convincingly the potential for minimum wage increases to affect employment adversely. The Department is saying exactly the opposite of what it found in its research.

Mr. Jim Lester (Broxtowe): Will the hon. Lady give way.

Ms. Short: No, I am so short of time. *[Interruption.]* I am not scared of Conservative Members. I may give way later if I find that I can get through my speech in time. *[Interruption.]* I have more to say than the Secretary of State. On the Labour Benches we care about the wage levels of low-paid people. Conservative Members can sit there smugly and richly while wanting to cut the wages of people who work 40 hours a week for £67.

The consultative document produced by the Government is enormously biased. It does not ask openly for a discussion of the effect of wages councils, whether they destroy jobs or not, or whether people want them to be strengthened, weakened or modified. In the light of the research evidence, what the consultative document says is disgraceful. Paragraph 7 says that

"Wages councils interfere with the freedom of employers to offer, and jobs-seekers to accept, jobs at wages that would otherwise be acceptable. This restricts job opportunities, particularly for young people".

Paragraph 8 says that

"A number of studies support the view that statutory minimum rates jeopardise employment."

I have just dealt with the studies that prove that statement to be wrong.

Tory Back Benchers pretend that they care about the low paid, but they are quite prepared to sacrifice young people on the altar. They are going for the young people. The consultative documents suggest that they should be removed from protection, even if the wages councils stay. That means that, even if we retain wages councils, we must denounce the International Labour Organisation convention. But what does the ILO tell us about the position in the rest of the world? It says that

"Almost all countries in the world now operate minimum wage systems, and none to our knowledge excludes young workers. The latter are entitled to such protection as any workers, and even more so because they are more vulnerable to possible exploitation due to their inexperience and perhaps because of their very desire to earn a living by finding a first job."

Since 1979— *[Interruption.]* Conservative Members should look at the evidence instead of showing their prejudices. Since 1979 youth unemployment has doubled but the relative pay of young people has fallen sharply over the same period. Young males have received pay rises 23 per cent. lower than the average increase for adult males. Young women's pay has fallen 20 per cent. behind the equivalent increase for adults.

A Department of Employment research — *[Interruption.]* I have only 15 minutes and Conservative Members will have their opportunity later. A Department of Employment research paper, published in 1980, concluded that

"variations in youth unemployment do not appear to have any systematic relationship with changes in the relative earnings of young people".

That is a fine piece of research by a man called Makeham. It shows that youth unemployment grows faster than

general unemployment and that it falls faster when unemployment is falling. It has nothing to do with wage levels, and there is no evidence for that.

A more recent paper, published by the Department of Employment in 1983, contradicts the earlier finding. This is one of those pieces of academic research that the Department of Employment hunted for in trying to find some academic who would provide a case in support of its prejudices. The paper tentatively suggests that the employment of young people under 18 years of age appears to have been reduced by increases in their average earnings. The author warns, however, that the analysis relies on data which are already fraught with problems and that therefore the results are extremely tenuous. His warning that the results should be viewed with caution appears to have been wholly ignored by Ministers, and it has been quoted in this House repeatedly. The final point in that piece of research is that, to the extent that cuts in youth wages did result in new jobs, that would be largely at the expense of adult workers. What is the point of that?

The Department of Employment study that I have just quoted estimates that eight out of 10 new jobs created for young people, if their wages were cut, would be jobs lost by adults. It costs more to keep an adult on the dole, so it does not even make economic sense from the Government's point of view.

The Public Accounts Committee found that 77 per cent. of the jobs subsidised under the young workers' scheme that the Government are now getting rid of, but which was deliberately used to try to cut youth wages, would have existed anyway, even without the subsidy. The vast bulk of the additional jobs that were created were taken away from adults.

It is not just that there is no case for abolition of wages councils, or weakening the position of young people or excluding them. There is a strong case against doing so, not just on the basis of social justice—to which I shall refer in a moment — but on the ground of the inefficiency that is encouraged.

In the words of Mr. Frank Wilkinson,

"Employers' attempts to escape from competitive pressure by attempting to reduce their wage costs can only be temporary and in the long run are counter-productive. The ability to protect profits by reducing wages allows producers to avoid any long-term solution of their lack of competitiveness by reinvesting in improved efficiency or developing new products. Moreover, the availability of lower wages as a strategy creates a particularly destructive form of competition which undermines product market stability, upon which favourable expectations depend. The consequent uncertainty militates against long term solutions."

We get the bad employer paying rotten wages, not investing, and not training his staff. They undermine each other, lower the conditions of employment, and increase Britain's chronic unemployment problem and the problem of very low investment. The road that we are going on is to cut wages to such a degree that we shall be competing with Third world countries for jobs.

I come now to social security. Two days ago, the Secretary of State for Social Services told us—and the Prime Minister repeated it—that in the review of the social security system they were deeply concerned about the needs of the working poor. Yet the Government are suggesting that it would be a really good idea to cut the wages of the working poor.

Mr. Baldry: Who said that it would be a good idea to reduce the wages of the working poor?

Ms. Short: The proposal to abolish wages councils is a proposal to cut the wages of some of the poorest workers, otherwise there would be no point in the Government making the proposal.

The new family credit scheme, which is to replace the family income supplement, is a subsidy to bad employers paying low wages and lacking investment and training. If the Government want to subsidise British business, they should put money into firms which invest in training, higher technology and so on. Instead, they propose to spend more of the taxpayers' money on subsidising the worst employers in the land.

Who are the people protected by wages councils whose conditions the Government are anxious to undermine? We are speaking of 2·75 million people, 11 per cent. of the work force. About two thirds of them work part time. Any threat to remove protection from part-time workers is a threat to the majority of those people. Four out of five of them are women and half of all women workers are protected by wages councils. This, therefore, represents an enormous threat to women.

About 5 per cent. of people protected by wages councils are young. That may be a small percentage of the total, but it represents 20 per cent. of all young workers, and 90 per cent. of them work in retailing, catering and clothing. Large numbers of them are black workers — *[Interruption.]* Conservative Members may smirk and grin at the evidence, but prejudice is all that they are interested in.

We are told by the Select Committee that 25 per cent. of families classified as poor have a low earner at their head, and that proportion rises to 40 per cent. when pensioner families are excluded. In other words, although 40 per cent. of poor families in Britain have a low paid worker at their head, the Government want to cut their wages.

Would anyone dare argue that, because most women work, they really work only for pin money? I am sure that many Conservative Members think that. Would they dare say it openly? In one in four households the main breadwinner is a woman. These are households in which there are single women, sometimes with dependent relatives, and one in eight women look after an elderly dependant. Alternatively, a single parent is bringing up children on her own. One in 10 households is headed by a single-parent mother. Women are the sole earners, because of the unemployment of their partners, in 400,000 families.

In addition, women's earnings equal or exceed those of their male partners in one in seven of all married couples. If it were not for the earnings of married women, four times as many families would be living in poverty. The low wages that those women earn are absolutely crucial to enable them to look after their dependants and families.

What, then, are the princely wages that the Government want to cut? We are told in the consultative document:

"Most minimum full-time rates at March 1985 for adults ranged from £63 to £72."

For young people we are told that 16-year-olds

"get roughly 65 per cent. of the adult maximum"

and that 17-year-olds

"get 75 per cent. of the adult maximum."

That represents £40 to £50 a week, yet Conservative Members have the cheek to suggest that that is too much for young people to earn. Among those who claim that is

[Ms. Short]

the hon. Member for Birmingham, Edgbaston (Mrs. Knight), who represents a neighbouring constituency but who, unfortunately, is not in her place.

Since 1979, the lowest paid have taken major pay cuts. According to recently published Treasury figures, the highest paid men have enjoyed increases in real net pay 10 times as large as the wages enjoyed by the poorest, and the Government want to increase still further the wages of the better paid and, at the same time, to reduce the wages of the poorest.

The Government have no case for suggesting that the abolition or weakening of wages councils will create jobs. The claim is false and there is no evidence for it. *[Interruption.]* Conservative Members may laugh, but they cannot laugh away the evidence. What the Government propose will simply encourage bad employers and bad employment practices, low investment and a lack of training. This move is opposed by the public.

Several Hon. Members *rose*——

Ms. Short: I have taken too long already. [HON. MEMBERS: "Hear, hear." Tory Members may not care about the low paid or try to laugh off the evidence that my hon. Friends and I have been adducing, but I wonder whether they care about public opinion. A survey carried out by Mori in 1983 found that 66 per cent. of adults, including 62 per cent. of Conservative supporters, favoured a minimum wage for all workers. A recent opinion survey in the north-west conducted by Granada TV showed that 89 per cent. were in favour of retaining wages council protection.

The Labour party will fight the Conservative party every inch of the way on this issue. We shall fight to retain the protection that low-paid workers have through wages councils and, when we take power, we shall ensure that they have improved protection.

Several Hon. Members *rose*——

Mr. Deputy Speaker (Sir Paul Dean): Many hon. Members wish to take part in the debate, so short speeches, please.

8.25 pm

Mr. Peter Thurnham (Bolton, North-East): I am grateful for this opportunity to speak, having found myself in a minority of one in dissenting from the Select Committee's report. I am disappointed that the Chairman of the Committee, the hon. Member for Newham, North-East (Mr. Leighton), is not in his place. Indeed, it is extraordinary that the Chairman is not present, especially as I am bound to comment on the way in which the report was put together.

It was surprising that we had a report at all because at one stage it was thought that there would not be one. It was produced at remarkable speed, and that was probably why there were no amendments. At one stage I began to think that I was at a SOGAT meeting, considering the way in which the matter was progressing. I had had a difference of opinion with the Chairman on a previous occasion about GCHQ, and I found that I was getting the same sort of treatment this time. However, I managed to register my dissent before the report went to press.

It was a pity that matters proceeded so quickly because three important items were missed. I am not sure whether I am a believer in the conspiracy theory or the cock-up theory of history, but an important report from the Department of Employment arrived just hours after the Select Committee had had its last meeting. That report was on the clothing industry, and it showed, from an examination by me of the figures, 50,000 job losses. That is significant because the report itemised the big rundown in employment in that industry in the last 30 years. Jobs dropped from over 500,000 to about 250,000, and 50,000 of those were lost because of minimum wage legislation.

Mr. Kevin Barron (Rother Valley): Did the report to which the hon. Gentleman is referring add that the wages in the industry had gone down by 20 per cent. over the same period?

Mr. Thurnham: The principal point was that the wages of people starting in the industry, including youngsters, had been pitched at such a level that the industry could not train people to take the places of those who were leaving. In my constituency there is a shortage of skilled machinists because there is no incentive for employers to train people in such skills.

The Select Committee missed another important document. That was a report by Dr. Stanley Seibert of Birmingham university which showed that as many as 230,000 job losses could be attributed to minimum wages legislation for youths.

The Select Committee's report is disdainful about the figures for job losses and speaks at one point of "only 25,000 jobs" having been lost. Even 25,000 must be worth concern. After all, who would like to choose the 25,000 people involved? Even the Labour party's economist, Neuburger, referred to "only 8,000 job losses." Who on the Opposition Benches would care to name those 8,000 people?

Mr. Prescott: Is the hon. Gentleman aware that unemployment in Britain has increased by 4,000 a week and that he has regularly voted for the policies that have brought that about?

Mr. Thurnham: Unemployment in Britain has resulted from mistaken policies over many years — *[Interruption.]*—policies which have been followed by the Labour party and which are still advocated by Labour Members.

The third item which, unfortunately, the Select Committee did not examine was the report by the Minister for Health and Social Security this week in which he makes interesting proposals for the reform of the welfare state, including the new family credit scheme. That scheme finally makes wages councils totally obsolete.

Wages councils were introduced for three reasons— wages, hours, and unsanitary conditions. Unsanitary conditions have been dealt with by health and safety legislation; hours are no longer a problem because most of the people are part-time workers; and wages will now be taken care of by the family credit scheme proposals, which are excellent and which will cover what people want. People want a good take-home pay. They do not want legislation for a wage that employers cannot afford to pay from which massive deductions are made to cover the cost of payments to the unemployed which are caused by a ridiculous policy.

What is the problem? We want to see the unemployed back at work. If 200,000 extra jobs are possible, what is

holding them up? I think that there is a conspiracy between the employed and the unemployed fed by fears fostered by the Opposition that there will be wage cuts. The hon. Member for Birmingham, Ladywood (Ms. Short) said that there would be wage cuts. That demonstrates her misunderstanding, because there will be no proposed wage cuts.

Mr. Baldry: Does my hon. Friend think that bodies such as the Association of British Chambers of Commerce, which represents many employers, are part of the conspiracy?

Mr. Thurnham: It is cosy to be able to get together with other employers and keep the current wages and to say that it does not matter about the unemployed because they do not come into the argument. That is a nice little restrictive practice.

Mr. Jim Lester: It seems unfair that in every sector any employer can pay what he will and the family's wages are made up by the taxpayer. It is a question of employers who seek to pay as little as possible knowing that the wages of family workers will be made up. That does not apply to women workers or young workers. That is an unfair way of treating the taxpayer.

Mr. Thurnham: If my hon. Friend looks at the booklets produced this week, he will see that what will happen is that take-home pay will increase with gross pay. If someone is paid more by his employer, he will have more to take home and he will not be interested in employers paying less. That should not apply in any case.

The fear has existed since the measure was introduced in 1909 when the welfare state did not offer protection. The Under-Secretary of State is not here tonight because he is in Geneva — I hope doing a good job. In the middle of the night in our previous debate he said that if the wages councils were to be totally abolished

"I have no doubt that some people would find themselves, at least temporarily, in circumstances which would be difficult to defend."—[*Official Report*, 26 March 1985; Vol. 76, c. 416.]

I have asked myself what he meant by that, and it crossed my mind that he might have been thinking of the wages councils' inspectors themselves. I accept that other employment would have to be found for them. However, perhaps my hon. Friend was thinking of people who might have their wages cut, but I do not understand that. In manufacturing industries wages are determined by the prices of the goods produced based upon world markets, and employers will compete among themselves to set the wages of people who can work profitably. There will not be any wage cuts for people who are occupied in profitable manufacturing industries.

The service industries are not the same, because world prices do not apply, but employees still have the protection of their employment contract. After two years their wages cannot be cut. That would mean constructive dismissal, so I do not see how people's wages will suddenly be cut. We are talking not about cutting wages but about bringing in people lower down the ladder of earnings opportunities. I do not see why we should take away the bottom rungs. People on the bottom rungs will not affect the wages of those on the higher rungs who have the skills to command higher wages. Average wages might come down but there is no reason to believe that people working in the service industries should suddenly have their wages reduced. Obviously, by mutual agreement their wages could be reduced.

I find it most difficult to defend the circumstances of workers who have no mutual agreement and who lose their jobs through redundancies. About 250,000 jobs in the clothing industries have been lost. I find that difficult to defend.

Hon. Members talk about reform and say that youngsters set their own wages to keep a semblance of the wages councils. What happens when someone is 21 years of age? The hon. Member for Truro (Mr. Penhaligon) talked about redundancy at 21. That is ridiculous. He suggests that the person of 21 should be told that Parliament has legislated that he must now have protection and that that means that he must be made redundant. We talk about protection of wage levels, but not about the protection of the job itself.

I am in favour of the protection of the unemployed against obsolete laws which can stop people starting work on the bottom rung of the ladder. What is the point of being on the dole and without a job? Everybody should be able to start a job at whatever wages they can command. I believe that the unskilled should be protected so that they can gain skills. If someone is taken on at too high a wage, what incentive has he to gain extra skills? They must be given the incentive to improve their skills and the employer must find the means to train people.

Mr. Michael Forsyth (Stirling): My hon. Friend has been generous in giving way, unlike the hon. Member for Birmingham, Ladywood (Ms. Short). In the course of his deliberations in the Select Committee, did he come across the document produced by the TUC which states:

"There must obviously be some truth in the proposition that, all other things being equal, an individual employer will tend to employ more people if wages are lower and fewer people if wages are higher"?

If my hon. Friend has a copy of that document, perhaps he will give it to the hon. Member for Ladywood.

Mr. Thurnham: I am grateful to my hon. Friend—that is exactly it. When talking about the national minimum wage, the Opposition do not seem to be able to make up their mind whether they want a national minimum wage. The document "In Place of Strife" was put down by people who thought that they knew better. That is probably the main reason for today's unemployment. The Department of Employment was commissioned in 1969 to produce a document on a national minimum wage. Paragraph 186 of that document states the effect on employment. It states that the national minimum wage would increase the level of unemployment, and that the worst impact would fall on the less prosperous areas, including the development areas; Northern Ireland could be particularly affected. That is why there was no minimum wage legislation in 1969. That is why the Opposition play around with the words and go no further.

I am grateful for the opportunity to make points which were not included in the Select Committee report. I am learning at every stage. In future when I have differences with a Chairman I shall be able to include my points in the report. I am all in favour of proposals which ensure that people have a proper take-home pay, but I am totally opposed to legislation which tells the employer what he should pay at such a level that the employer cannot pay it, and therefore cannot provide the job.

8.39 pm

Miss Joan Maynard (Sheffield, Brightside): Wages councils exist to protect those who cannot protect

[Miss Joan Maynard]

themselves because they are not unionised to give them real strength. Because they are not strongly organised in their appropriate trades unions, they rely on the law and the inspectorate to enforce their wages. That is always a dicey business under capitalism. It is clear that a Tory Government can always pull away the prop, which is what this Tory Government propose to do in pursuit of their policy of driving down wages. They have created mass unemployment as a strong stick with which to beat the workers. They brought in the youth training scheme with low remuneration, and now propose to extend it.

The introduction of Sunday trading is part of the strategy of driving down wages. It will mean more part-timers on lower rates, although God knows that part-time working on lower rates has already vastly increased. There is nothing wrong with part-time work, provided that the hourly rates and conditions are the same as those for full-time work. Indeed, there are many arguments in favour of part-time work. However, the truth is that part-timers are paid lower hourly rates and usually have worse conditions than full-time workers.

Doing away with wages councils — which the Opposition will certainly resist — will not only drive wage rates which are already too low even lower, but will bring back sweated labour. Talk about Victorian values —they will be with us with a vengeance.

The consultative document claims that wages councils' orders are difficult to understand. Of course, there are none so dense as those who do not want to understand. It is alleged that the difficulty in understanding the orders is one reason for underpayment. If people believe that, they will believe anything. There must be few employers who fail to obtain the grants to which they are entitled because they do not understand the regulations. The wages inspectorate continually report flagrant violations of wages board orders. Therefore, there is a case for more enforcement, not less. Few union members and no officials have difficulty in interpreting the orders.

It is argued that more jobs would be created if wages were lower. I want to re-emphasise the point made by my hon. Friend the Member for Birmingham, Ladywood (Ms. Short). The Minister of Agriculture, Fisheries and Food analysed the impact of the minimum wage for farm workers, and the report concluded that increases in the value of the minimum wage

"increased both the demand for, and the supply of, labour and hence employment."

Ministers have found themselves arguing the case for abolition of wages councils against mounting opposition from public opinion, employers and some of their own Back Benchers as well as trade unions and the poverty lobby. The weight of evidence is that abolishing the councils or rendering them ineffective would have little or no effect on unemployment.

In the absence of credible evidence beyond unsubstantiated anecdotes, the Department of Employment appears to have tried to cover Ministers' embarrassment with spurious and misleading claims for the likely effects of abolition. It is now time for the Government to admit that the king really has no clothes.

Ministers have given no estimate of the increase in jobs likely to flow from the abolition of wages councils. When pressed to do so in relation to young people, they were unable to produce any figures or evidence. Paragraph 11 of the consultative paper claims that the wages set by the councils make it more difficult for those who wish to take up employment to do so. That is absurd because paragraph 7 notes that the minimum rates range from £63 to £72 a week, which respectively are 41 per cent. and 46 per cent. of national average earnings.

The majority of employees covered by wages councils are women, and their average earnings hover around 53 per cent. of national average earnings. Therefore, women will suffer from any abolition of wages councils. The fact that 37 per cent. of workers covered by wages councils are paid the minimum only does not support the argument that rates are too high. Indeed, as has been made clear in many inspectorate reports, it suggests that underpayment is rife.

My union, the Transport and General Workers Union, will continue to fight for low-paid workers, including farm workers, regardless of the fate of wages councils. Our principal interest is in the agricultural wages board. We are especially concerned about the consultative paper's attack on younger workers aged 18 or under. We appreciate that that could so easily be read into the agricultural wages board provisions.

We see the attack on wages councils as a veiled attack on the wages board, and we shall certainly resist any such attack, as we resist the attack on wages councils. I make it clear that we shall also resist the so-called reforms, because I believe that they will be almost as bad as abolition.

8.47 pm

Mr. Richard Alexander (Newark): All that we have heard from Opposition Members so far has had an element of unreality. No one has yet used the words "employer" and "customer". They ignore the fact that it is the employer who pays the wages. If wages councils regularly award unrealistic rates, employers will not be able to pay them and firms will go out of business. The employer will become unemployed, as will the employee. I should have thought that Opposition Members would have been only too anxious to direct their minds to that.

Everyone in this House is greatly concerned about unemployment. None profess to be more concerned than Opposition Members. It is therefore surprising that they do not understand that wages councils are a straitjacket on employer and employee alike.

Reference has been made to youth unemployment. The effects of wages councils' demands in that area are so obvious that I am surprised that anyone feels able to stand up and justify them.

I want to concentrate my few remarks on wages councils generally. The rigidity of some of their awards prevents the development of sensible wage structures and systems of remuneration tailored to the needs of industry and business. Wages councils concern themselves not only with pay—if they did, perhaps there might be a little more justification for them—but with hours of work, holidays, part-time working, overtime wage rates and a host of things that sensible employers and employees in other businesses and industries not covered by wages councils manage to settle by themselves.

In today's highly competitive world, businesses will fail unless they can make sensible and realistic forward planning forecasts. Few businesses can organise themselves and settle the difference between a profit and a loss without knowing precisely what their overheads will be during the next 12 months.

The biggest question mark against any employer's forecast is labour costs. It is a crucial factor. The fact that that should be decided by other people, many of whom have no direct business experience whatever, and without regard to whether that business will continue profitably, is tying the business man's hands behind his back. Nor is it any more satisfactory for the person who is employed. An able worker with years of seniority and experience finds his wage differentials annually eroded as a result of these awards, particularly to young workers, to the point where seniority and responsibility are counted as of little worth and there is no incentive left to achieve either.

It is essential that there should be economic recovery. That could be achieved by more flexible hours and by encouraging efficient, low cost businesses which can compete with foreign competition. It is a truism that the new small businesses of today will be the big businesses of tomorrow. If their growth is stunted at this stage, we shall do no service to employment prospects.

Since the recession, more and more small business employers have had to pay themselves less and less in order to satisfy the ever increasing and ever more unrealistic requirements of the wages councils. The uncertainty of those awards—the fact that they can be backdated — is a terrifying prospect for the small employer who has limited capital. These requirements are a very large factor for an employer in deciding whether he can afford to take on extra staff. In practice, each new wages council award has meant a cut in the hours that an employee may work. The corollary is an increase in the hours that the employer has to work if he wishes to stay in business. When the Opposition hear of businesses failing, they are the first to say that it is the Prime Minister's policies that are creating unemployment. They never consider that it might be the result of the unfeeling, appalling bureaucracy which is interfering with the day-to-day operations of businesses which are trying to do their best.

We are still one of the least efficient industrial nations. We still pay more but produce less than most of our competitors. The essential problem of keeping costs down in order to remain in business does not concern the wages councils and the academics who serve on them. The fringe benefits that they award become more and more unreasonable every year — for example, increased holiday allowances for workers who may work for only two days a week or who may even work from home.

The contact with reality of many who serve on wages councils is tenuous. Wages councils were formed to protect those who work in small enterprises where at one time union organisation was impracticable. In industries where there are unions a settlement is reached between management and union, but that does not happen in industries which are covered by wages councils.

Wages councils are answerable to nobody — not to employers, to employees, or to this House. Working in their ivory towers, the only jobs that they protect are their own. If they succeed in raising wage levels beyond what the market will bear, employers will be unable to continue profitably in business. Wages councils will harm the ability of employers to provide better working conditions and fringe benefits. They are costly and expensive items in the day-to-day business of any employer.

In any group of people there are variations in ability, self-confidence, application and usefulness to the employer. If the cost of offering work constantly goes up, the less able and useful will suffer. Those who are highly skilled will get the jobs. If wages councils continue in existence, the less able will be permanently barred from having the chance of a job. The abolition of wages councils would not entirely solve our unemployment problem, but would help to solve it. It would bring greater flexibility to the labour market. The wages councils would cease to do a job which ought to be done by the social services.

8.56 pm

Mr. D. E. Thomas (Meirionnydd Nant Conwy): The abolition of the wages councils would discriminate against women, because a high proportion of women are covered by them. Their abolition would also increase the amount of racial discrimination against the black community. There is also a regional dimension to this problem. The economies of Northern England, Wales and Scotland are already low-wage economies. If it were true that low wages created jobs, the boom areas would be the low-wage economy areas, but that is not the case. The low-wage economy areas are also the high unemployment black spots. Far from employment being created by low wages, unemployment is to be found alongside stagnant wages levels and low productivity.

The Government have not produced figures that show the number of workers who are covered by wages councils in Wales. When I asked the Secretary of State about the number of jobs that would be created by the abolition of the wages councils, he was unable to produce any figures. Eight thousand jobs in Wales could be created over five years. This would be one twelfth of the jobs lost in Wales since 1979. As a proportion, this would produce perhaps 500 jobs in Wales.

The Government's monetarist policies are creating unemployment. The decision to abolish the wages councils is a product of supply side fanaticism, but it is the fall in the aggregate demand in the economy caused by monetarism which is the cause of unemployment. The supply siders believe that the poor and the unemployed cause unemployment by pricing themselves out of jobs and that if the wages councils are abolished wages will be cut and more jobs created. This fantasy is deliberately nurtured by the Government to obscure their intentions.

When we debate the substantive legislation, I hope that this debate will herald a major campaign throughout Britain, particularly in the industrial sectors which already suffer from depressed wage levels and in the regions where for [illegible] there have been low-wage, depressed economies. We must mount an effective campaign against these sexist, racist, anti-working class proposals.

8.58 pm

Mr. Lewis Stevens (Nuneaton): I rise to speak in support of wages councils, but perhaps in company that I did not anticipate. I shall still speak in favour of them, but not with the same fervour or with the same views as Opposition Members. The case that could be made in support of them has been overshadowed by strong political rhetoric and by claims that cannot be justified.

At present there are 26 wages councils, which represent about 2·75 million people. However, seven of them represent as many as 2,600,000 people. Thus there are two different types of wages council. A small group of them represent the majority, and many smaller wages councils represent a wide range of other employees. That is why

[Mr. Lewis Stevens]

there is a need for reform. Hon. Members should bear in mind that two thirds of the units involved employ fewer than 10 people. Consequently, wages councils, which are very rigid and have many rules, do not give many of the small employers any opportunity to understand their real purpose. I believe that wages councils should be restricted to looking at the basic wages of adult employees and some of their basic conditions.

However, it is too easy to say that all young people have priced themselves out of work. In general, they have not done so. At present, wages councils set the adult rate. Many of the industries that are covered employ people who need comparatively little training before they can achieve a reasonable rate of work. That level is rightly, in some cases, set at 18 or 19 years of age, and that is only sensible.

However, industries gradually change. Demand changes, and consequently there are manufacturing and technological changes which may mean that wages councils have to be more flexible in their approach. However, the argument that young people price themselves out of jobs is no more true than the argument that low wages automatically lead to greater benefits, more jobs. It is true that higher wage rates can price people out of work, but the converse is not automatically true. In some areas, exploitation already exists. Inspectors have already reported on cases of people being underpaid. Sometimes that is accidental, but sometimes it is not. If we remove all regulation, that exploitation will increase —perhaps not greatly but sufficiently.

Many of the 2·75 million people covered by wages councils are already subject to various collective bargaining arrangements within their industries. Thus, fewer than 2·75 million people are genuinely dependent on the results achieved by wages councils. I do not think we can risk removing all such regulation in anticipation of the fact that more competition at the bottom will lead to genuine benefits. When young people have achieved a certain level, they should be paid the rate for the job, but until then they cannot expect anywhere near the full rate. It is productivity that matters. The employer must see a return, because otherwise he will ask himself whether it is worth employing a person at a certain rate. If an employer is not obtaining £62 worth of work, it is not economical for him to pay that rate.

Mr. Frank Field (Birkenhead): The hon. Gentleman has made several valuable points, but is there not a danger in trying to explain all pay levels by productivity levels? Agriculture is a high productivity industry, but the wage rates are low.

Mr. Stevens: I accept that one cannot pursue that argument to its end. However, the difference between employing and not employing people must depend to some extent on how much work is done. For example, in the case of certain shop jobs, there must be a time when people are not fully employed as otherwise they could not be brought in to deal with big queues.

I support wages councils. I hope that they will not be abolished and that we shall continue to give them a valuable role to play. However, there is a tremendous need for them to be reformed. Much of the bureaucracy that goes with them is not acceptable to many small businesses. The value of wages councils is not recognised, so they are not used and therefore they cannot help the people whom they are there to protect. The most worthwile thing that we do is reform the councils, streamline them, make them more efficient and reduce the bureaucracy while keeping the basic regulations of protection for the ordinary working people.

9.5 pm

Mr. Dave Nellist (Coventry, South-East): This debate arises out of what was described by the Chancellor of the Exchequer as a Budget for jobs. In reality, the purpose of the measure, announced in that Budget, of which the abolition, or changing the structure, of wages councils is but one, was to provide a sweatshop Budget, designed to produce low wages. That is in line with the Tory Government's philosophy. Over the past six years, they have used mass unemployment in an attempt to cower the trade union movement, to limit wage rises and to reduce the direct and indirect wages paid to working people.

The employers and the industrialists whom the Tory Government represent, having failed to invest in new machinery in the past 30 years, and having realised that they have lost world markets and are now losing their share of the domestic markets whether in fridges, vehicles, televisions, radios or textiles, are cutting the share of wealth that goes to working people to restore or enhance their profit levels. They are cutting direct wages or, through the Government, cutting the social wages of education, housing and other social services. The threat is now extended to the wages councils.

The wages councils cover almost 3 million workers in shops, hairdressing, clothing, catering and hotels. Significantly, despite what Tory Members have said, the wages councils do not cover manufacturing or the export industry. Therefore, the Tory Government's logic—that cutting wages for those covered by wages councils will help the British capitalist economy—is spurious. It will only increase the number of workers who have to survive on poverty wages.

That 3 million is part of an army of 8·5 million workers living on or below the poverty line. One third of the workforce is living on a financial tightrope and the abolition of the wage councils would shred it. We are talking about wages of £60 or £70 a week. How can Tory Members understand what it is like to live on such a wage when for many of them it is the price of a week's gin and tonics in the Bar or Banqueting Rooms?

The Tories have argued in this debate and elsewhere that the wages councils price workers out of jobs. We have had that tonight from a Member of Parliament who has seven jobs. Where is his evidence? In the past 10 years, wages council rates as a percentage of average wages have fallen from 73 per cent. to 65 per cent., but unemployment has rocketed. Tory Ministers and the Secretary of State have argued that YTS youngsters on £26 a week, hairdressers on £45 a week, check-out lasses and lads on £69 a week are getting too much.

If high wage increases automatically lead to a destruction of jobs, why is there no condemnation from the Tory party of the chairman of ICI, who took a 63 per cent. increase in his wages last year? The *Financial Times* commented that, compared with some company chairmen, he is a pauper. He is on only £171,000 a year—£3,300 a week. Why is there no condemnation for the chairman of the British Oxygen Company, on £13,000 a week for selling fresh air? Why is there no condemnation of Cabinet

Ministers, who gave themselves a 9·4 per cent. increase last year or of company directors with an 11 per cent. increase?

Under the Tory Government, the number of millionaires has doubled to over 8,000. Over 1 million people now earn over £20,000 a year. How many jobs of ordinary working people have been destroyed by those high salaries? According to the register of Members' interests, many Tory Members cannot survive on the salary for an MP. They have to have five, 10 or 15 jobs. The argument that wages of £60 or £70 per week authorised by wages councils destroy jobs is obviously rubbish in the light of what some Tory Members are getting. The argument of the Tories could be summed up by saying that the poor are not yet poor enough for unemployment to fall and the rich are not yet rich enough for investment in industry to take place.

Mr. Thurnham *rose*——

Mr. Nellist: Because of the time, I am not giving way.

We on these Benches oppose the abolition of wages councils because the Labour party is against low pay. I have a private Member's Bill before the House which expresses TUC and Labour party policy. I hope that it will be implemented speedily by the next Labour Government to provide a national minimum wage for £115 per week for all workers for a maximum 35 hour week; that wage would start at the age of 18. There should be a pro rata wage for part-timers and increases should be linked to inflation. For 16-year-olds the rate should be 75 per cent. of the adult rate and for 17-year-olds it should be 85 per cent. For those in Government training schemes, no one should receive less than the £55 per week that a trade union member would get.

We are arguing not just against the abolition of wages councils but in favour of a campaign by the trade union movement to get the 3 million workers covered by wages councils into trade union membership so that we may fight for the enhancement of their conditions.

Wages councils are by no means perfect. In 1983 the wages council inspectors visited 23,000 work places. In 9,000 cases employees were being illegally underpaid, but there were only seven prosecutions. In 1984 there were two prosecutions. We have in government the so-called party of law and order, the Tory party. When the Tory Government see evidence of massive avoidance of the law in regard to the payment of wages, do they strengthen the wages inspectorate? No; they cut its number by one third. Do they give the inspectors more tools to do their job? No; they restrict their activities by reducing the miles they are allowed to travel. They change the law to allow their friends off the hook.

If wages councils were to be abolished, it would be a direct attack on women and young workers. Four fifths of all workers covered by wages councils are women, and one in five of all young workers are covered. The Secretary of State said that wages councils price young people out of jobs. Even the consultative document on which the debate arises says:

"there is a growing body of evidence that the employment prospects of young people are adversely affected by the level of their pay relative to adults."

What evidence exists for that? Youth wages have fallen sharply over the last six years. Relative to adult rates, wages for boys are 8 per cent. lower and for girls 12 per cent. lower than they were five years ago. Yet youth unemployment has trebled.

What sort of conditions are the young people working in? Just under two weeks ago I had an article in a magazine called "Just 17". As a result of that article over 80 girls aged 16 to 20 have written to tell me about their employers. *[Interruption.]* That seems to provoke laughter on the Tory Benches. I heard about a 19-year-old in the Black Country who is working for a stockbroker who no doubt has many friends on the Tory Benches. She is working from 9 am to 5.15 pm. During the three months she was training she received £30 per week. Now she has been taken on permanently at £32·50 per week.

I heard from another young girl who was lured to Devon to work in a shop by a bloke who promised her a flat and wages of £50 per week plus commission. Now she finds that she is working seven days a week from 10 in the morning until 9 at night. For all those hours she gets £10 per week plus her board. She is to get commission only if the shop takes over £400 per week, but while she has been there the takings have never been more than £200 per week. I heard from another young girl in Rhyl in Clwyd who is working alongside someone who receives £78·50 per week as a typist; she is on YTS and is getting £26·50 for doing the same job.

Have those wage rates created massive increases in new jobs for young people, as the Tories have said tonight and in previous arguments? Earlier today in business questions, I gave some figures showing the true picture of youth unemployment now. Fourty-six per cent. of all England's careers offices have 10 or fewer vacancies for this year's school leavers. Ninety-four per cent. of Scottish careers offices and 95 per cent. of Welsh careers offices have 10 or fewer vacancies. Five hundred and seventeen thousand people will leave school this summer. Fifty-one careers offices do not have a single job available. Another 36 have only one job. Those 517,000 school leavers are chasing 12,355 vacancies—42 kids to every vacancy. In England the figure is 37 to one, in Wales it is 129 to one and in Scotland it is 144 to one.

In only two places in Wales, Cardiff and Shotton, are there more than 10 jobs for the school leavers. Some 40 offices in Wales have fewer than 10 vacancies. In only five places in Scotland are there more than 10 jobs for school leavers. The statistics go on and on.

Mr. Evans: Will my hon. Friend confirm that in Brecon and Radnor, where an important election is due to take place, young people are doing very well because there are 10 vacancies at their centre?

Mr. Nellist: My hon. Friend is absolutely correct. In Wales, Brecon is one of the four offices with 10 or more vacancies. It just gets itself into double figures for the hundreds, if not thousands, of school leavers chasing those vacancies.

The British capitalist economy under this Tory Government is in tatters. Some 5 million people are denied the right to a job. Some 6 million live in damp houses and 8·5 million live on poverty wages. The Government come forward with the idea of reducing the wages of people on £60 or £70 a week, claiming that there is not enough money in the economy to pay decent wage rates. Under this Government, over £50,000 million has left this country in the past four or five years and gone to the real

[Mr. Nellist]

low-wage economies of South Africa, Korea, Brazil and Argentina, where the wage rates are kept low at the barrel of a gun often of a military police dictatorship. That is what is at the back of the minds of some Tory Members. They want to emulate the wage rates and conditions in Singapore, Bangkok or Bangladesh to compete with the textile manufacturers of those far eastern countries, affecting the young workers and women in those industries in this country.

We are against the abolition of wages councils. We are even more interested in getting rid of this Tory Government and giving every worker a more decent week's wage for his job than he receives now.

9.13 pm

Mr. John Butterfill (Bournemouth, West): Few hon. Members can have a constituency with more workers who are under the auspices of wages councils than mine. In Bournemouth, many workers are in the leisure, hotel, catering and retail industries. In fact, they are the backbone of employment in that town. Since I was elected I have been inundated with complaints about wages councils, and nearly all the employers in my constituency would like to see them abolished.

Mr. Evans: What about the employees?

Mr. Butterfill: It was not unnatural that I approached the matter with that view. There is no doubt that if we were to abolish wages councils there would be a considerable improvement in employment. Indeed, all the academic studies that I have seen show that to be the case.

Mr. Evans: Which ones?

Mr. Butterfill: I shall tell the hon. Gentleman which ones. The study giving the lowest figure comes from Henry Neuburger, who I believe is employed by the Labour party. In the Low Pay Unit report of 1984 he suggested that here would be 8,000 new jobs if the wages councils were abolished. The highest figure that I have seen is in the study by Dr. Stanley Siebert who suggested in 1985 that there would be 230,000 more jobs. A study by the Department of Employment last month suggested that there would be 50,000 more jobs. I do not know which of those figures is right.

Mr. Evans: Will the hon. Gentleman give way?

Mr. Butterfill: No, I do not have time to give way.

Whichever figure is correct, surely those jobs are worth having. There has been an enormous volume of representation to the Government and also to me because I have taken a particular interest in this as secretary of my party's sub-committee on tourism. Many employers, the Institute of Directors, the National Federation of Self-Employed and Small Businesses and the CBI have all made representations urging us to proceed with abolition. The hon. Member for Truro (Mr. Penhaligon) said that the CBI did not favour abolition, but its parliamentary brief for this debate states in capital letters:

"Each wages council should be abolished unless employers make a substantial case for its continuation."

Mr. Evans: What about employees?

Mr. Butterfill: Many other employers have suggested reform rather than abolition, including the Institute of Personnel Management, ACAS and the National Chamber of Trade. The Auld committee, too, recommended reform rather than abolition. Given the differing views, the Government are right to say that there should be a considerable period of consultation before any decision is made.

If wages councils are retained, there must be substantial reforms.

Mr. Evans: To strengthen them.

Mr. Butterfill: The hon. Member for Truro referred to the ridiculous position of young workers. Young and inexperienced people are automatically paid the same as more experienced workers. That is not the situation in Holland, Denmark or Germany. Protection for young workers should be either abolished or subject to graduated stages up to the age of, say, 23 as in Holland.

I am also concerned about the rules for Sunday working. If, as it seems, we are to proceed with Sunday trading there will be considerable problems, as there are already in Scotland. It is ludicrous to insist on payment at double time for Sunday working. If there is any differential at all, it should not be more than time and a half for Sunday working.

There is also considerable concern about the independent members of the councils. That, too, must be urgently considered if reform is to take place.

The scope of the wages councils should be strictly limited to minimum wage levels. Very small firms with, say, fewer than five members should be excluded. Larger firms with existing trade union agreements or satisfactory collective bargaining agreements of other kinds should be allowed to come out of wages councils because they are adequately protected already.

To do all that, it may be necessary to repudiate ILO convention No. 26. If that is necessary, the Government should do so.

9.24 pm

Mr. Paddy Ashdown (Yeovil): As my hon. Friend the Member for Truro (Mr. Penhaligon) and others have said, two options were placed before us in the Government's consultative document. They are that we should abolish the wages councils, as stated in the Chancellor of the Exchequer's Budget speech, or that we should reform them. No hon. Member who believes that wages councils have an important part to play, as I and my right hon. and hon. Friends do, would deny that progressive action for reform would be welcome. The right hon. and learned Member for Monklands, East (Mr. Smith), in a debate on 15 February 1984, said, on behalf of the Labour party, that wages councils should be changed in some respects.

There are many ways in which the effect of the wages councils could be strengthened, and perhaps some of the worst aspects of what they do to small businesses could be limited. Assistance could be channelled more effectively towards the most vulnerable. The observance of statutory minimum rates could be better policed. We could encourage more dialogue between both sides who sit on the councils, and it may be essential to lessen the burdens placed on small firms by the wages councils. For instance, the time lag between giving decisions and their being implemented could be shortened.

If the Government produced a genuine package of reforms aimed at some or all of those objectives, we would have to consider them constructively. But the central issue

is either abolition or emasculation in the guise of reform. Wages councils are not necessarily the best way to protect the low-paid, but there is no doubt about the need for some mechanism for such protection. At present, the wages councils are all that we have.

The abolition of wages councils would be an act of pure ideology unsupported by the facts now available to us. We have heard arguments from the Secretary of State and from Conservative Members that their abolition or emasculation would increase employment. But where is the evidence for that? The largest industry covered by a wages council—the clothing industry—together with the retailing and catering industries, represent 90·3 per cent. of all employees who are protected by wages councils. Between 1950 and the late 1970s, wages in the clothing industry decreased by 20 per cent. compared with average wages, and at the same time employment was halved. There is no evidence that a reduction in wages causes increased employment. In the other direction, I note that a 1982 report from the Ministry of Agriculture, Fisheries and Food stated that increases in average earnings appeared in that industry

"to have increased both demand for and supply of labour, hence employment."

The Department of Employment's in-house employment market research unit has produced evidence that points in the other direction, but, as the hon. Member for Birmingham, Ladywood (Ms. Short) said, the Low Pay Unit has completely discredited that research. It employed many unscientific statistics for its conclusions, and even included the footwear industry, which is not covered by a wages council. Many believe that that research was slanted to support some previously chosen prejudices.

The matter is brought into clear relief by the Government, whose senior members seem completely unconvinced of the fact that the abolition of the wages councils will have no effect on employment. One need look no further than the speech made in April 1984 by the chairman of the Conservative party. He said:

"It is not possible to estimate in any precise way how employment might be affected if wages councils were abolished." —[*Official Report*, 11 April 1984; Vol. 58, c. 255.]

There we have it. There is the admission that the Government at the most senior level are not convinced that the abolition of the wages councils would have any effect on employment. Clearly revealed in that statement is the idea that this has been done for ideological purposes.

If the wages councils go, we shall see the end of organisations which provide safeguards for 2·7 million people. In no sense can it be said that they provide high wages. In some areas—for example, hairdressing—the rates are as low as £1·18 per hour. Such wages are set at 25 per cent. of average earnings. Can it really be countenanced that those wages should be allowed to fall even lower? Is it really proposed that, with benefit to the economy and without exploitation of the people concerned, such wages should fall lower than that level?

If one extrapolates the 1983 checking figures, it can be seen that there may be as many as 170,000 people who are underpaid. It will also be discovered from the 1983 survey that the amounts of underpayment are not insignificant. Indeed, it appears that on average each employee was underpaid by about £118.

We would lose a structure which all too inadequately limits exploitation. Do the Government say that there is no wage exploitation? Surely they cannot be so blind. If wages councils are abolished, how will they safeguard those who are vulnerable to low wage exploitation, or do they intend that there should be no such safeguards—that they do not intend to safeguard the wages of those earning as little as £1·18 an hour? As my hon. Friend the Member for Truro said, do they intend to abandon a safeguard which as a civilised society we have accepted for nigh on 80 years? Is that what they mean by returning to Victorian values and Victorian practices?

There is no doubt that wages councils perform an important function. They are part of a civilised society. They safeguard the wages of those who are vulnerable to wage exploitation. They provide a mechanism which protects employers as well as employees from unfair competition based on wage undercutting. That is undoubtedly one of the reasons why many employers welcome their existence. They provide a framework within which orderly industrial relations and a voluntary collective bargaining system can operate.

There is no evidence that the abolition or the emasculation of wages councils would produce anything but the most insignificant increase in employment. Is the questionable gaining of that worth so much sacrifice? The answer must be, "No". If the Government go for such substantial reform as will further weaken the powers and effectiveness of the wages councils, we shall see the triumph of prejudice over the facts, the triumph of dogma over compassion and the triumph of ideology over common sense and common humanity. Let the Government now announce that they do not intend either the abolition or the emasculation of the wages councils. If they fail to do so, let those Conservative Members who believe that wages councils have a part to play—I know that there are some—vote for our motion tonight.

9.34 pm

Mr. Ian Wrigglesworth (Stockton, South): We have had a debate in which the arguments for and against wages councils have been wide ranging, and the strong feelings on both sides of the House about this issue have been put on the record. However, one voice has been notable by its absence. When I picked up the *Daily Telegraph* this morning—which I do not normally do with any great enthusiasm—I was pleased to find that the Conservative Centre Forward group had chosen its four priority issues which it intends to press in the House over the coming months. They are unemployment, the reform of the welfare state, the financing and organisation of local government, and the future of wages councils. The House will confirm that, despite that announcement, not one voice from that group has defended wages councils today.

Another group, which might have been associated with the Centre Forward group, has also been missing today—the majority of those who supported the Employment Select Committee's report which recommended that wages councils should be supported. Three of the four members of that Committee who voted for the report are Conservatives. Unfortunately, we have had no speech supporting the Committee's report from the hon. Member for Banbury (Mr. Baldry), the hon. Member for Cornwall, North (Mr. Neale) or the hon. Member for Batley and Spen (Mrs. Peacock). We shall be interested to see whether they support their views later today.

Mr. Butterfill *rose*——

Mr. Wrigglesworth: It is most regrettable that those voices have been absent from the debate.

The Government have brought wages councils into the firing line because of their desire to divert attention away from the failure of their other policies on unemployment. They have tried to give the impression that abolition of wages councils will in some way which has not been proved today or elsewhere overcome unemployment. Indeed, they have tried to give the impression that the very existence of wages councils is a major reason for high unemployment. One need only consider the activities covered by wages councils to see what palpable nonsense that is.

Two thirds of employees covered by wages councils work part-time and four fifths of them are female. The majority are covered by just six wages councils concerned with hairdressing, hotels, restaurants and the retail trades. The Secretary of State and his colleagues constantly tell us they are areas of expanding employment and, in many cases, increased efficiency and considerable success. Indeed, all the forecasts suggest that they will continue to prosper. One can hardly suggest that restaurants and retail trades are not expanding or that they are being restrained by wages councils. We have only to consider the extension of chains such as McDonalds, ASDA and Sainsburys to see that activity is not restrained by wages councils.

It is unfortunate that, in the Budget, the Government tried to parade wages councils as one of the causes of high unemployment and suggested that their abolition would reduce unemployment. We have had a useful discussion about the reform of wages councils. Some useful reforms on simplification and on the pay structure laid down by the wages councils could be introduced. We accept that, but unfortunately the debate has not predominantly been about that. The Select Committee members examined this aspect as dispassionately as we would expect. There is no clear evidence to support the employment claims put forward by those who advocate abolition.

Various pieces of evidence have been bandied about. For every piece of evidence that demonstrates that employment increases if wages councils are abolished, there is another to show the opposite.

Mr. Evans: Anecdotes.

Mr. Wrigglesworth: Much of that evidence is anecdotal. The report on clothing also dealt with the footwear industry, which is not covered by a wages council. Conservative Members should refer to the hon. Member for Macclesfield (Mr. Winterton) who, for many years, has argued for the textile industry as vociferously as anyone. The wages councils have not been the cause of the problems in the clothing industry. Management, lack of investment, poor marketing, design and product development and international trade have affected the industry. The Labour Government and the present Government have been criticised by hon. Members on both sides of the House for not acting more stringently to protect our home industry from unfair imports. Those factors have given rise to the loss of employment in the clothing industry much more than the marginal effect of wages councils.

Hon. Members cannot rest upon that case to claim that wages councils should be abolished. No case has been proved during this debate or in evidence to the Select Committee showing that there is an employment case for abolishing the wages councils. The overwhelming case for the retention of the wages councils is based on the argument for equity and for protecting the most vulnerable people within our society.

What do the Government seek to do in relation to pay? In recent years, one of the divides between the two sides of the House — all Opposition parties and the Government — has concerned pay and productivity. Members on the Government Benches seem hell-bent on bringing about a low-pay, low-productivity economy, whereas Members on the Labour and alliance Benches want a high-pay, high-productivity economy, which they know is the only solution to our long-term problems and the only hope of beating overseas competition and having low unemployment in the future. The two major industrial countries that have succeeded so much where we have failed are Germany and Japan. In Japan especially pay and productivity have been rapidly increasing. The Japanese have succeeded in beating the competition and, therefore, in keeping unemployment low.

Mr. Thurnham: Will the hon. Gentleman give way?

Mr. Wrigglesworth: I cannot give way, because my time is limited.

Instead of aiming for the type of economy that exists in Germany and Japan, the Government seem hell-bent on going for a low-pay economy and competing with economies that have low technology, low skill and low education bases. I am sure that the Opposition agree that that is not the direction in which we should move.

The Government are at their weakest in their response to the case for protecting the most vulnerable people—workers who are earning very low rates of pay, between £65 and £72 a week. In some trades such as hairdressing, wages are even lower than that. Those are not the sort of people who are causing problems to the British economy. They are the sort of people who need the protection of this House to ensure that their standards of living are not curtailed even further.

As hon. Members on both sides have said, it is interesting that the wages councils make a contribution to industrial relations. If there is not a collective bargaining system in an industry, the wages councils system provides a framework for an orderly determination of wages and conditions that would otherwise not exist. As the Select Committee pointed out, if the wages councils were abolished, that orderliness would go, and the consequent competition, wage cutting, and worsening in the conditions of workers would be very damaging to industry as a whole and not only to the workers.

Therefore, there is an overwhelming case for retaining the wages councils, albeit with some of the reforms to which my right hon. Friend the Member for Tweeddale, Ettrick and Lauderdale (Mr. Steel) referred when he opened the debate. I hope that, despite the lack of speeches from those Conservative Members who believe that the wages councils should be retained, the Secretary of State will be able to tell the House that, in taking note of the weight of arguments in the debate, he is prepared to give us an early decision that the wages councils will be maintained.

I believe that the Government's policy towards the wages councils is a pathetic and dishonest attempt to divert attention from the failure of their other policies. Today's high unemployment is caused not by the levels of wages

but by the lack of demand within the economy. We made that quite clear to the Government in the Budget debates and in other economic debates in this House.

More and more people are coming to realise that the only way in which we shall be able to cut unemployment is not by tinkering around with bodies such as the wages councils, or with the rates of pay of the lowest paid members of our community, but by changing the Government's economic strategy.

Ministers must not suggest that by dealing with the so-called problem of wages councils they will be able significantly to reduce unemployment from 3¼ million. It has been suggested that the maximum number of people who could be employed as a result of the abolition of the wages councils would be 25,000. That would hardly make any impact on the problem of unemployment, even if that figure could be attained. There is conflicting evidence on that figure in the Select Committee report, and 25,000 is the highest figure that I have seen. It is much more realistic to suggest that, if all the wages councils were abolished, it might result in creating about 8,000 jobs. That has been the number of jobs lost month by month as a result of the Government's economic policies. Why are we wasting all this time, effort and money in investigating the future of the wages councils when the number of jobs that might be created, if the councils were abolished, is so small and puny and would make so little impact on unemployment?

What we are witnessing is a charade in an attempt to divert attention from the high level of unemployment and its true cause—the Government's economic policies. If the Secretary of State were to announce tonight a change in the Government's policy towards the wages councils, he would get much more support than he is likely to get in the Lobbies.

9.50 pm

Mr. Tom King: With the leave of the House, I will respond to the points that have been made in this short debate.

I said in my opening remarks that I appreciated the House having an opportunity to discuss this subject because the consultation period had just ended in terms of the formal public consultation. I said that we had received 667 responses from a range of organisations and individuals. I am, therefore, grateful for the opportunity that has been afforded for hon. Members to make their contributions as well.

Mr. Foot *rose*——

Mr. King: I think that I can answer the right hon. Gentleman, before he has even asked his question, by saying no.

Mr. Foot: I intended to ask——

Mr. Speaker: Order. We cannot have two right hon. Gentlemen on their feet at the same time. Is the Minister giving way?

Mr. Foot: Will the right hon. Gentleman now answer the question that I asked earlier? Are there any objections or support for his view in the representations that he has received?

Mr. King: The consultation paper suggested two alternatives, abolition or reform, and I assure the right hon. Gentleman, as I said in my opening remarks, that there was support for both possibilities.

It would be wrong of me not to say that I have received from some employers' bodies strong arguments for the retention of wages councils. Those bodies have included the Federation of Merchant Tailors, and I feel that I should put that on the record early in my contribution.

The House will have noticed the vigour with which the debate has been conducted and I am under no illusions about the strength of feeling that exists in quarters of the House on this matter. There is a real difference of view. There are those who hold strong views about the present pattern of wages councils, covering an erratic series of shops in the high street. Earlier, I challenged any hon. Member to walk with me down a high street and be able to speak with certainty about which shops were and were not covered by the existing wages councils provisions. That point was clearly recognised by the hon. Member for Truro (Mr. Penhaligon).

If I were to take a theme that has carried certain common ground across the Chamber, it would be that there is, without doubt, room for action. The hon. Member for Yeovil (Mr. Ashdown), part of whose speech I missed, referred to the case for sensible reform. The case for reform undoubtedly exists, and we start from that common ground.

I cannot say that I am absolutely sure about the position of certain Labour Members, least of all those on the Labour Front Bench, who would oppose almost any change in any situation, no matter how obvious the case for it. In this situation, however, we have established a case at least for reform, and the argument that we now face is whether it should be reform or abolition.

I am sorry that the hon. Member for Birmingham, Ladywood (Ms. Short) is not at present in her place. She referred to a leaked document and she seemed to chase every story on the subject. She referred to the obvious fact that there had been a leaked document on the pressures from senior civil servants unhappy with the policy. That was an unfortunate phrase for her to use. She is in a position to know—because the person concerned is with an organisation with which she is connected—that a document has been removed from my Department.

Sadly, it meant the end of the career of a young junior civil servant because he leaked the document of a senior civil servant, in this case the permanent secretary. I say that only in sorrow, and Opposition Members who gloat with great delight about leaked documents must have regard—*[Interruption.]* This applies particularly to the Labour Member who has aspirations to be in government. He should not gloat too much about the readiness of civil servants to hand out Government documents. If that hon. Member were in a different situation he might not think that to be in the best interests of Government organisation.

My hon. Friend the Member for Bolton, North-East (Mr. Thurnham) was a member of the Select Committee and issued a minority report. He made his arguments clear to the House. The hon. Member for Ladywood promised that her party would fight the proposal all the way, but she cannot bear to be here for the closing speeches. I am sure that there is a reasonable explanation for her absence. I see that she has returned. She makes a late return to the battlefield and we are delighted to welcome her back. Not a single Labour Member of the Select Committee took part in the debate tonight.

My hon. Friend the Member for Bolton, North-East emphasised the heart of the issue—employment and jobs. My hon. Friend the Member for Bournemouth, West

[Mr. King]

(Mr. Butterfill) made it clear that even the Leader of the Opposition's advisers accepted that extra jobs will result. One can argue about how many extra jobs. That is important, but the key question is about the level of protection—if that protection is necessary for those in work—and about what impact it will have on preventing those out of work from having the chance of a job. Those issues are at the heart of the matter.

My hon. Friend the Member for Bolton, North-East also raised another matter which I am sure that the House will consider further. He asked what was the relevance of such a form of wage protection in a society in which there might be family credit or some other form of family income support.

I sought earlier to explain the different criteria against which the original trade boards were established and the different categories involved—the long hours and the insanitary nature of the working conditions. They are two of the three criteria on which the trade boards and the wages councils were established. The criteria are dealt with in different legislation and protected in different ways.

I have listened to most of the debate. I shall study all the contributions. After the extensive consultation we shall reach decisions, not because of the vote tonight, but by giving serious consideration to representations. I do not intend to dismiss with contempt, as the motion invites, the 667 responses. They deserve serious consideration.

The Government's amendment makes clear that those representations, with those from hon. Members, from the Select Committee and from the minority report by my hon. Friend the Member for Bolton, North-East, will be seriously considered. I commend the amendment to the House.

Question put, That the original words stand part of the Question:—

The House divided: Ayes 155, Noes 194.

Question accordingly negatived.

Question, That the proposed words be there added, *put forthwith pursuant to Standing Order No. 33 (Questions on amendments), and agreed to.*

MR. SPEAKER *forthwith declared the main Question, as amended, to be agreed to.*

Resolved,

'That this House notes that the period for consultation on the consultative document on wages councils is only just ending and representations are still being received; and asks the Government to take into account the views of the Employment Committee, together with the very many other responses from interested organisations and individuals.'.

Nuclear Non-Proliferation Treaty

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Durant.]*

Mr. Speaker: I have to tell the hon. Member for Bristol, East (Mr. Sayeed) that the digital clocks are incorrect, and that he should time his speech on the clocks at the end of the Chamber.

10.15 pm

Mr. Jonathan Sayeed (Bristol, East): I shall look at the right clock.

The debate on super power nuclear arms control is rarely out of the news, and rightly so. The waste of resources and the fear engendered by escalating nuclear arsenals is the frightening consequence of our inability to agree on a reversal of the nuclear arms race. The super powers' massive overcapacity in nuclear weapons, unbalanced though it is, will mean suicide for all, whoever initiates a nuclear war. Therefore, I believe that neither of the major powers, East or West, has people in control who are so malignant, so unfettered by the party or Government apparatus, to wish or to be permitted to consign his own countrymen and the rest of the world to ultimate destruction.

Monstrous though the arms race is, I believe that our over-preoccupation with it, to the exclusion of all else, blinds us to the greater and growing danger of nuclear and atomic proliferation. I am convinced that if nuclear war ever broke out it would be initiated not by the super powers but by a nation without any sense of responsibility, where power is concentrated in the hands of the evil, the insane, or the bigoted dictator.

That threat is real. To understand why that is so it is necessary for me to digress, and briefly explain how bombs are made, who has them and the effectiveness or otherwise of past and current controls.

There are two methods to producing these weapons —the plutonium route and the separated uranium 235 route. The plutonium method originally required large plant and considerable expenditure, but utilised only moderately sophisticated technology. Nowadays, the plant is cheaper, but the technology is considerably more complicated and the plutonium bomb is difficult to explode.

The uranium route previously required large and complex plant and was very expensive. Today, the plant is relatively cheap and compact, and the technology is well known to those who have the expertise to look it up. In a room the size of a large drawing room, one could make enough fissile material for one bomb a year, and that bomb is relatively easy to explode.

Initially the control of nuclear and atomic knowledge went well. It was difficult to produce separated uranium 235 from uranium 238 by the diffusion process, the plant was cumbersome, expensive, fraught with technical difficulties, and the countries that had discovered uranium effectively controlled its export. Consequently, those nations that wanted to beat a path to the nuclear door were forced to follow the more expensive plutonium route by building heavy water research reactors, and in time a classic route developed for nations wishing to build a nuclear weapon. That route was that a state first obtained its natural uranium, then announced a civil nuclear programme to produce electricity and stated that it needed to undertake research into its production. To do that, it had to build a heavy water reactor, which would make plutonium and hence the material for the plutonium bomb. That is what India has done at Trombay — using Canadian technology. It is what the Israelis say that Iraq was doing — using French technology — before Israel blew its reactor to pieces. It is what has been suggested that Argentina is doing, and Israel and Pakistan are alleged to be doing.

However, there are drawbacks to this method. The technology is sophisticated, and hence costly, and because of their size a plutonium production reactor and associated reprocessing plant takes time to construct and in consequence its operation can be monitored externally and its capability quite easily estimated by experts.

The passage of time and the advances in technology have made the second route, the uranium route, far more insidious. Using centrifuges or the jet process or lasers, uranium 235 is technically easier to produce than plutonium 239, the consequent bomb is easier to explode and, as I have indicated, the plant can simply be hidden or disguised.

Thus the technology is known and the material is available, and Third world countries have grasped the opportunity. India exploded a weapon in 1974; Pakistan and Argentina have embarked on the centrifuge route to an uranium bomb; South Africa has embarked on the jet process route; Brazil and Israel are using a variety of methods. Some may have already reached their goal.

It is sometimes simplistically suggested that if the major nuclear powers denied nuclear technology to other nations and removed the assistance they are already giving, all would be well. If the answer had been that simple, the world is still sane enough, and its leaders sensible enough, to have ensured that such a moderately simple action would have been taken. Indeed, that is what they have attempted. To begin with, the United States was able to impose controls to prevent other nations from acquiring a nuclear capacity by gaining a monopoly over the technical know-how and uranium deposits, and it worked—for a short time.

As other western nations invested huge sums in gaining nuclear expertise, they felt the need to recoup part of their investment, and assist exports, by passing on their knowledge to Third world countries. In 1956 the Americans, through the United Nations, attempted to ensure that all countries in receipt of nuclear technology opened their programmes to inspection by the new International Atomic Energy Agency. The Soviet Union and other countries since have refused, although the Soviets may well be changing their mind because I have little doubt that they are as frightened about proliferation as we are.

Many countries, including major suppliers such as France, refused to sign the non-proliferation treaty in 1968, for sovereignty or commercial reasons, or in the case of non-nuclear states, because they felt that by signing it they would not necessarily enhance their ability to obtain the promised benefits of civil nuclear power. Meanwhile, we and the United States recognised the problem but failed to deal with it. We have demanded "full scope safeguards", in other words, the right to inspect all nuclear facilities including those we have not assisted with, if we are to provide assistance with future civil nuclear plant. Many nations have refused to accept such conditions and, despite the cost, have gone it alone. Even

those countries that have signed the 1968 non-proliferation treaty, such as Japan and West Germany, find it easier under the terms of the treaty to sell nuclear technology to non-signatories such as Brazil, Argentina, Israel and Chile, than to those that have signed the treaty.

Therefore, the treaty is failing in two ways. First, there are significant omissions among the countries subscribing to it—India, Pakistan, Israel, Argentina, South Africa, France, China, Chile and Brazil. Secondly, commercial considerations appear to persuade signatories to sell to non-signatory nations in preference to those who are signatories. Furthermore, the non-weapon states do not believe, or at least use as an excuse, that the nuclear states are complying with article 6, the disarmament clause. In addition, non-nuclear states fear that nuclear states will use the threat of cutting off nuclear supplies as an element of non-nuclear foreign policy if they deal with an NPT signatory. But all the countries that have recently obtained the technology to produce nuclear and atomic weapons attest that their only reason for investing in this technology is to enable them to have a civil nuclear programme. Maybe the best way to curtail proliferation is to take them at their word.

The paradox is this. Whilst the major nuclear powers deny other countries access to nuclear technology, these countries always have the excuse that they require fissile material-producing research reactors in order to develop their own expertise in civil nuclear power generation.

But the Soviets supply their Communist satellites with all nuclear services on the provision that all spent fuel is returned to the USSR for reprocessing, and they ensure that that happens. That is the model that we should adopt. By supplying the technology for nuclear reactors to Third world countries, but only leasing the nuclear fuel, which would have to be returned for reprocessing, there would be no excuse for building a pilot reprocessing plant, or for producing uranium 235 from uranium 238. Indeed, any country building such a plant would be doing so only in order to gain the facility for producing nuclear or atomic weapons. The existence of a plutonium plant would be difficult to hide from external view, and by ensuring that all spent fuel was returned, none of the plutonium could be purloined for the manufacture of weapons.

I therefore believe that the non-proliferation treaty must be amended to permit the major nuclear nations to supply the technology required for the construction of nuclear power plants and the associated fuel cycle services on the understanding that: first, the nuclear fuel is only leased and must be returned for reprocessing; second, the recipient agrees not to engage in a uranium or plutonium weapons-building programme, or develop its expertise in those directions; and, third, an internationally agreed inspectorate is permitted to examine all civil nuclear plants as part of the "nuclear fuel leasing service".

As the recipient country will know that its development of plutonium bombs can be monitored, it will be put off from doing so by the certain knowledge that it would lose assistance with its civil nuclear programme. Once the recipient invests in that programme, the power generated and other trade and commercial considerations will be so great that the donor nations will be able to exert an effective pressure if the recipient ever appeared to be undertaking the atomic bomb route.

But the donor nations will also have to provide assurances. They will have to agree not to curtail nuclear supplies or services for reasons other than non-compliance with the three reasons I have given, or in the event of war. They will need to do that to reassure the eventual recipient that he will not be cut off from nuclear power generation.

Some have suggested that the non-proliferation treaty needs to be enforced more rigorously, and that that is all that is necessary. I do not agree. I believe that entrenching failure — because I believe that the non-proliferation treaty has failed, and I have demonstrated that it has failed —is not the answer. There is not time between now and September to rewrite and renegotiate a new treaty. Let us keep the current treaty and renegotiate a new treaty in a year's time or perhaps later. I feel that the Soviets would be interested in that.

While the world is in the midst of recession and while development of civil nuclear programmes is so expensive, my suggestion might have some chance of success. But with the world coming out of recession and nuclear expertise becoming more widespread, that chance is slipping away. It is not too late for our world to limit nuclear and atomic weapons, but it could soon well be.

10.28 pm

The Minister of State, Foreign and Commonwealth Office (Mr. Richard Luce): I warmly congratulate my hon. Friend the Member for Bristol, East (Mr. Sayeed) on raising this debate on what is undoubtedly an extremely important issue relating to the nuclear non-proliferation treaty. He has done a great service. I assure him that I shall consider carefully the detailed and well-thought-out points that he raised. If I cannot answer them all in the debate, I shall write to him in more detail.

The spread of nuclear weapons to countries that do not now possess them would have the gravest consequences for mankind, as my hon. Friend said. The chief barrier against such proliferation is the non-proliferation treaty, which bans the transfer by nuclear weapon states of nuclear weapons to any other recipient, and their acquisition or manufacture by non-nuclear weapon states. The treaty therefore increases the security of the world and the Government are strongly committed to supporting and strengthening it.

Negotiating the treaty in the 1960s was a major diplomatic achievement and Britain can be proud of having helped to draft it and of having been among the earliest to sign it. As my hon. Friend has said, the third review conference of the treaty will take place this August. We attach considerable importance to this meeting and have played our part as a depository Government in convening it.

I differ from my hon. Friend in his judgment about the success or failure of the treaty. I believe that it has been successful. In the 1960s it was predicted that there would be up to 20 additional nuclear weapon states by 1985. In fact, only one further state—India, which is not a party to the treaty in 1974 — demonstrated the capacity to detonate a nuclear explosive device. That may be partly because nuclear proliferation is not so straightforward technically as my hon. Friend suggests, but much of the credit must go to the existence of the treaty. The treaty is the most widely supported arms control agreement in existence, with nearly 130 parties or four fifths of the United Nations membership, and no state has exercised its right to withdraw from the treaty.

I do not entirely share my hon. Friend's view that the treaty is failing simply because there are significant non-parties, although the non-participation of those states is

[Mr. Richard Luce]

clearly a weakness. The vast majority of the world community has adhered to the treaty and that fact alone is of the greatest importance to the security of all states whether or not they are parties to the treaty.

Clearly the treaty would be even more effective if membership were universal. In collaboration with other states party to the treaty, we have been lobbying most of the 40 or so non-parties to accede to the treaty. In the past year, eight have done so, four of them in London, thus demonstrating the treaty's continued vitality.

Two states which possess nuclear weapons—France and China—are not parties to the treaty, but France has said that she will act as though she were a party and China has stated that she does not advocate or encourage proliferation.

Among the non-parties which do not possess nuclear weapons several have significant nuclear facilities not open to international inspection. My hon. Friend has referred to some of them. They are Argentina, India, Israel, Pakistan and South Africa. We attach particular importance to membership of the treaty by those countries and will continue to co-operate in international efforts to urge them to accede to the treaty. Pending their accession or their acceptance of internationally supervised safeguards on all their nuclear facilities, our policy is not to export nuclear materials, equipment or technology to them except for unambiguously peaceful purposes and then only on a very carefully controlled basis.

Article 3 of the treaty refers to safeguards, on which my hon. Friend has expressed some interesting and important views. He suggests that the treaty should be amended so that fuel would be leased to recipient countries and returned to the supplier for reprocessing, that the recipient should agree not to build nuclear weapons and that an internationally agreed inspectorate should examine all civil plants as part of what my hon. Friend described as nuclear fuel leasing services.

I sympathise very much with my hon. Friend's motives in putting forward those ideas, and I certainly appreciate his concern for adequate safeguards, which is at the heart of the agreement. Nevertheless, I believe that we should be very cautious about any proposals to amend the treaty itself. Any amendments must be approved by a majority of the nearly 130 parties to the treaty. Even if it were possible to win sufficient support, any proposed change would give rise to floods of other amendments that we might not be able to support. I believe, therefore, that it is much better to leave the text of the treaty unaltered so as not to endanger the whole treaty which has served us well.

I remind my hon. Friend of the vital role already played by the International Atomic Energy Agency safeguards in verifying the binding international legal obligations which the treaty imposes on non-nuclear weapon state parties not to manufacture or acquire nuclear weapons or other nuclear explosive devices. Article III requires such safeguards to be applied to all source or special fissionable material anywhere in the territory of the state concerned or under its jurisdiction or control. Safeguards are designed to detect the diversion of such material away from peaceful uses. All our exports of fissionable material or equipment designed for its processing or use to any non-nuclear weapon state have been subject to safeguards under the existing terms of the treaty. I pay tribute to the valuable role of the IAEA in administering the safeguards system. The United Kingdom will continue to co-operate fully with IAEA safeguards and will assist the agency's efforts further to improve the system. I shall be visiting Vienna next week to learn more about the agency's work.

My hon. Friend may also wish to be reminded that we are one of 22 countries which apply the Nuclear Suppliers' Group guidelines to our exports of nuclear materials, equipment and technology to any non-nuclear weapon state for peaceful purposes. The guidelines reinforce the treaty. In addition to requiring IAEA safeguards on the items transferred, the guidelines require formal governmental assurances to be obtained from the recipient that the exported item will not be used to manufacture nuclear explosive devices, that it will be protected against theft or sabotage, and that if it is re-exported the new purchaser will be required to give the same assurances as the original customer. In the case of enriched uranium or plutonium, the prior consent of the original supplier must be obtained before re-transfer can take place. The guidelines also urge restraint on the transfer of sensitive technology such as reprocessing or enrichment facilities. I believe that the existing requirements go far to meet my hon. Friend's concerns.

As to the specific proposal for fuel leasing, the suggestion is not entirely new and certainly has some attractions. However, the system could not now be watertight because the treaty member states are not the exclusive suppliers of nuclear fuel. As for the establishment of an international inspectorate, that already exists in the form of the IAEA. We should continue to support efforts to extend IAEA safeguards to cover all nuclear facilities in all non-nuclear weapon states that are not parties to the treaty. We are doing all that we can to promote universal adherence to the treaty.

Article IV is an important part of the treaty, which deals with the peaceful use of nuclear energy. When the treaty was negotiated, many non-nuclear weapon states believed that if they were to forgo the option to manufacture or acquire nuclear weapons, this should not be at the expense of their right to use nuclear energy for peaceful purposes. For that reason, article IV of the treaty both reaffirms that right and enjoins all parties to facilitate the fullest possible exchange of equipment, materials and technology for peaceful purposes.

In association with the safeguards required for article III, article IV seeks to promote the safe expansion of peaceful nuclear trade, but minimises the risk of nuclear proliferation. That can help the economic development of many of the member states. We have fully complied with our obligations under this article. As one of the first countries to use nuclear energy for peaceful purposes, we have considerable experience in the area and will continue to share our expertise with other countries, within the limits imposed by our overall non-poliferation policy.

The other important article in the treaty—article VI—deals with disarmament negotiations. It embodies the common determination of the parties to work for nuclear disarmament. The Government are strongly committed to the goals of this article. Therefore, we warmly welcome the arms control negotiations in Geneva between the United States and the Soviet Union. We fully support the agreed objective of preventing an arms race in outer space, and terminating it on earth. Negotiations between the superpowers, which possess 95 per cent. of the world's

nuclear weapons, are the first priority in pursuing the effective nuclear disarmament measures prescribed by the treaty.

Some critics maintain that the first step towards fulfilment of article VI is the negotiation of a comprehensive test ban. I hope to explain the Government's views on this issue at greater length in the Adjournment debate which is planned for tomorrow and is to be raised by the hon. Member for Edinburgh, East (Mr. Strang). All I say at this stage is that, in my view, it would serve no one's interest for progress towards a comprehensive test ban—which is of great importance—to be artificially linked to the continued adherence to the non-proliferation treaty and its future. The non-proliferation treaty is important in its own right. We must not jeopardise it by holding it hostage to progress in other areas, however important they may be.

We are actively preparing for the treaty review conference which begins at the end of August. We have taken a full part in the work of the preparatory committee in which we chaired the group of Western countries. We have maintained close contact with other member states, including in particular the United States and the Soviet Union. It is worth emphasising that non-proliferation is an area of foreign policy where the views of both East and West largely coincide, as my hon. Friend acknowledged in his speech. As a Government we approach this review conference in a positive and constructive spirit.

I shall be attending the conference and will deliver the main British statement in the general debate. Our aim is to provide an outcome which maintains, and if possible strengthens, this arms control treaty. This will be facilitated if the parties review the treaty as a whole in a balanced manner, recognising its success in preventing horizontal proliferation and promoting the peaceful use of nuclear energy. We are not complacent about the review conference but are encouraged by the progress made by the preparatory committee and the flexibility and good will displayed by those member states which participated in its work.

I believe that the arms control talks in Geneva between the United States and the Soviet Union will improve the atmosphere of debate on article VI; because such negotiations are precisely what this article requires. Once again, we urge all non-parties to reconsider their position and to adhere to this indispensable treaty which has done so much to make the world a safer place.

I am grateful to my hon. Friend for raising this issue, and I assure him that I shall give very careful thought to the specific points he has raised.

Question put and agreed to.

Adjourned accordingly at eighteen minutes to Eleven o'clock.

House of Commons

Friday 7 June 1985

The House met at half-past Nine o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

9.35 am

Mr. Speaker: Today is a Back-Bench motions day, and the hon. Member who has won the first place in the ballot has the right to have his motion put to the House. Equally, other hon. Members have the right to speak and vote for or against that motion. I am well aware of the strong feelings aroused by the motion. I remind the House that it is a procedural one, and not primarily about the merits or otherwise of the Unborn Children (Protection) Bill.

I have selected the amendment in the name of the right hon. Member for Blaenau Gwent (Mr. Foot) and 53 other right hon. and hon. Members. I have received notice, perfectly properly, of other business to come ahead of today's principal debate. I hope that proceedings on those matters will not be artificially prolonged, and that today's proceedings will be conducted in the best traditions of the House of Commons.

New Writ (Brecon and Radnor)

9.36 am

Mr. Dennis Skinner (Bolsover): I beg to move,

"That Mr. Speaker do issue his Warrant to the Clerk of the Crown to make out a new Writ for the electing of a Member to serve in this present Parliament for the County Constituency of Brecon and Radnor in the room of Tom Ellis Hooson, Esq., deceased."

I mention Tom Hooson, and I think that it would be appropriate at this stage to remind hon. Members of his untimely death and pay a tribute to the service that he gave to the House. I must admit that to me Brecon and Radnor does not immediately suggest Tom Hooson, because I had a great friend from that area, Caerwyn Roderick. I believe that the name of Caerwyn Roderick is synonymous with Brecon and Radnor, and that is how I managed to get to know a little bit about the place and about the magnificent service that he gave to our party, the Labour party, and to my right hon. Friend the Member for Blaenau Gwent (Mr. Foot), the then leader of the Labour party, in his capacity as parliamentary private secretary.

Therefore, when I heard that there was the possibility of the writ for Brecon and Radnor being delayed, and I read the usual outpourings in the press—it must have been about a fortnight ago—I thought that it would be a good idea to get the thing hurried along. It so happened that at that time there was the suggestion that other matters would be moved this Friday. I am not sure whether I was thinking of moving the writ early, before the shock waves of the suggestion of the right hon. Member for South Down (Mr. Powell) hit the House of Commons, or whether it came after that, but it was about that time. I must make that point, because I am trying to show that it is purely a coincidence that my application falls on the day when other matters might have been discussed.

Mr. Tam Dalyell (Linlithgow): Before my hon. Friend leaves the question of Caerwyn Roderick, may I also mention Tudor Watkins? Only three days ago, I visited Lady Watkins in Brecon. He gave great service to the House between 1945 and 1970, and anyone who is interested in agriculture and hill farming should respect the memory of Tudor Watkins.

Mr. Skinner: I, too, remember Tudor Watkins. He had left by the time I came to the House, but I used to see him at Labour party conferences. I know that my hon. Friend the Member for Linlithgow (Mr. Dalyell) went to see Tudor's widow the other day while on his tour of the Falklands, the General Belgrano and Miss Murrell. He goes all over the country on a solo campaign which is gaining ground, and I am pleased to say that the General Belgrano and all those other matters will become an issue in the by-election.

Mr. D. N. Campbell-Savours (Workington): Is my hon. Friend aware that Mr. Tom Hooson was a great advocate of life issues? He voted in all Divisions in favour of life issues. Does not my hon. Friend believe that the use of this procedure in this way does a great disservice to his memory?

Mr. Skinner: My hon. Friend has a bit of a cheek, because he is part of a small group in the House which proposed to change the business of the day in a way which many people—not me—thought was an abuse of the procedures. Now he is trying to chide me for doing something to which I plead not guilty. In any case, Mr. Speaker, I think you would agree with me—I know you would—that we should talk about the issues that will be discussed during the by-election campaign, and not become involved in genetic engineering and other matters. I should say in passing that it is a bit rich that there is all this complaint about genetic engineering, yet the right hon. Member for South Down is acting as the master scientist and pottering about with that young embryo, the hon. Member for Brighton, Kemptown (Mr. Bowden).

Mr. Speaker: Order. I am not sure that that has much to do with the writ.

Mr. Skinner: No, but I think that you would agree, Mr. Speaker, that that might become an issue in the by-election. It is fair to say that anything that can be discussed in the House of Commons will become an issue in the Brecon and Radnor by-election. The Labour party candidate, Richard Willey, is only too anxious to get on with the job of raising those issues——

Mr. Campbell-Savours: What solidarity.

Mr. Skinner: My hon. Friend suggests that Mr. Willey may not be the greatest Left-winger of all time, but I shall be down there campaigning for him because he is the Labour candidate. I rest in the knowledge that our standard bearer in Brecon and Radnor will do a first-class job in raising all the issues that I may mention later, including the economy, the welfare state, and the countless other matters that may affect that rural area. It is between 30 and 40 miles wide——

Mr. Robert Adley (Christchurch): It is perhaps nothing more than a coincidence, but I had a premonition that this might be a suitable day to raise the subject that the hon. Gentleman has raised, and I happened to come in armed with several books about the ralway history of

[Mr. Robert Adley]

central Wales. Will the hon. Gentleman refer during his speech to this vital consideration in the forthcoming by-election? If he does not, I hope that he will not consider it wrong of me to take up the point later in the morning.

Mr. Skinner: On page 6 or 7, I have a section dealing with transport, especially the Transport Bill and privatisation. I am not sure whether the hon. Member for Christchurch (Mr. Adley) voted with the Labour party against the Transport Bili, but I shall let that pass. I know that our candidate, Richard Willey, will be campaigning on the Transport Bill and its effects on rural constituencies.

I am looking forward to Richard Willey sitting here, because I will advise him, as others advised me when I entered the House, that what one must get to know in this place, apart from all the politics, is the procedure. I shall suggest to Mr. Willey that he reads "Erskine May", because it may help him one day. He may need some background knowledge one unusual Friday. He will no doubt be campaigning about rail cuts and rail closures. I have no doubt that he will not be so parochial——

Mrs. Elaine Kellett-Bowman (Lancaster): On a point of order, Mr. Speaker. Is it in order for the hon. Member for Bolsover (Mr. Skinner) to open the campaign of the Labour candidate?

Mr. Speaker: The hon. Gentleman should be, and I think he is, advancing his case as to whether I should issue my warrant in respect of this by-election. But I ask the hon. Gentleman not to go into too much detail of the issues in the campaign, and to stick to the writ and to the question whether I should grant my warrant.

Mr. Skinner: You are absolutely correct, Mr. Speaker. Today is not a day to become engaged in argument and hassle. It is a day on which we must consider this serious issue. It may be that, after I have heard comments on my motion from the Government and certainly from my right hon. Friend the Member for Bethnal Green and Stepney (Mr. Shore), who may advance other arguments about the nature of the writ and whether it should be accepted, on this rare occasion, I may take all those suggestions into account and come to a different conclusion myself. Today, I am ready to listen to alternative arguments.

Mr. Andrew F. Bennett (Denton and Reddish): As many hon. Members are not clear about the procedures involved in his application, will my hon. Friend make it clear that if we must vote on this matter we have a choice of setting a by-election date within 28 days or not setting a date for this Session since the Standing Orders state that the motion may be made only once? Therefore, will he make it clear that his application is not necessarily designed to be voted upon, but simply to persuade my right hon. Friend the Member for Bethnal Green and Stepney (Mr. Shore) to think of an alternative approach?

Mr. Skinner: My hon. Friend has read "Erskine May", and I, too, have studied the matter. There may be an opportunity for other hon. Members to move motions that could affect the issue. But it does not matter because, as the right hon. Member for South Down, who is an expert in procedure, would be the first to agree, whatever happens today on a vote, the House is sovereign and it could, within the next few days, decide to overturn that decision.

This is one of the few areas, Mr. Speaker—I think that you will agree with me on this — where the Common Market has not ripped away our sovereignty. The House retains that power, and the Leader of the House could, if he wished, irrespective of the outcome of a vote today, decide to say that the House is sovereign and that we shall set a new date. The House has the power to do that, as it has power in many other areas, although sadly it is affected in many areas by Common Market regulations, which will no doubt become a feature of the by-election campaign, whenever it takes place.

A further reason why I believe that we can get this matter——

Mr. Norman Buchan (Paisley, South): My hon. Friend raised an important point about the Common Market. Will he bear in mind that there is a problem there in relation to majorities and the exercise of a veto? Has he considered whether he wishes to exercise a veto on matters coming from the Government side of the House, or to rely on a majority?

Mr. Skinner: I kept my eye firmly on you, Mr. Speaker, while my hon. Friend made that point, and I saw a little bit of a nod, which suggested that we should not travel down that road. There are areas where we should not tread today. We should keep to the straight and narrow. One thing is certain — the Common Market is not straight and narrow. It has gravy trains, but it is not straight and narrow.

Mr. Dave Nellist (Coventry, South-East): When my hon. Friend develops that argument about whether a by-election in Brecon should take place within the next 28 days, possibly after a decision today, will he take up the point which I raised twice yesterday? Within that period of 28 days, there will be several thousand 16 and 17-year-old school leavers in Wales. One hundred and forty-four school leavers will chase one vacancy at a careers office in Wales. In Brecon there are only 10 vacancies for the hundreds of school leavers there. Brecon is one of only four careers offices in Wales which has 10 or more vacancies. Only the offices in Cardiff and Shotton have 11 vacancies or more. In Wales, 38 of the 42 careers offices have fewer than 10 vacancies. Indeed, eight of them have not a single job for young people, and seven have only one job each. Will my hon. Friend develop the question of the need for a speedy by-election so that the Labour candidate can give hope to those thousands of young school leavers, and attack the Government for their mass unemployment policies?

Mr. Skinner: Although I am sure that others will do so, I intend to see to it that our friend in Brecon and Radnor will receive a copy of the report of today's debate while he advances the cause of our party in the election campaign. He will then be able to read all the comments made, including those of my hon. Friend the Member for Coventry, South-East (Mr. Nellist) in his description of what I have loosely termed on other occasions Yosserland. Young people in Brecon and Radnor and elsewhere cannot get a job when they leave school, even with all their O-levels, A-levels and other certificates. Unemployment will become a big factor in the campaign.

Mr. Doug Hoyle (Warrington, North): My hon. Friend referred earlier to Caerwyn Roderick. Will he bear in mind our friend's robust knowledge of the education needs of the Welsh people? Does he believe that, together with the problem of youth unemployment, education will figure largely in the by-election campaign? Does he agree that that needs to be brought to the fore?

Mr. Skinner: The Government's education policy will be a prominent issue in the campaign; no one can deny that. I have some figures for Brecon and Radnor, and they are more pertinent than the general arguments.

I was about to say that another reason why we can have a fairly early by-election is that the parties have already lined up their candidates. I believe that the Welsh nationalists are dealing with the selection of their candidate this weekend. The hon. Member for Caernarfon (Mr. Wigley), if he catches your eye later, Mr. Speaker, will probably tell us what the position is. I am told that the Social Democratic and Liberal parties are ready for the by-election.

Mr. John Home Robertson (East Lothian): Which one is standing?

Mr. Skinner: I am not sure, as I have not gone into that matter. However, I have told the people of Brecon and Radnor to ask the alliance candidate which party and leader he supports, and to ask him whether he is in favour of getting rid of cruise or keeping cruise, as the Liberals and Social Deomcratics think respectively. That will be an important factor in the campaign.

Mr. Donald Coleman (Neath): The people of Brecon and Radnor would give a simple answer to that if they remembered that at one time their Member of Paliament was Mr. Tudor Watkins. His advice would undoubtedly have been "No" to cruise.

Mr. Skinner: My hon. Friend, who represents a Welsh constituency, is better versed in these matters than I am. He keeps a close eye on all things Welsh—even the choirs. He also knows a bit about them. Perhaps my hon. Friend will be able to catch your eye, Mr. Speaker, and present the special Welsh considerations. I do not intend to use all the pages of my speech because the matter would be better debated. In view of the unusual number of hon. Members present this Friday, they should take part and make some additional points.

I know that the alliance has its candidate ready and, therefore, that is all right in terms of the general electoral considerations. I believe that it has transported people to Radnor on a semi-joint selection basis. I do not think that they voted on a one person, one vote system. The SDP sent representatives from the regions, but the Liberals adopted a different tactic. It was called joint selection, but those of us in the know understand how it works. I believe that the alliance bussed those people in with British School of Motoring money.

Mr. Jack Straw (Blackburn): Before my hon. Friend leaves that important point, can he say from his expert knowledge of the internal workings of the SDP and Liberal parties in Wales whether their candidate has the support of the leader of the SDP in Wales or of the leader of the SDP in the United Kingdom? As my hon. Friend knows, the leader of the SDP in Wales, Mr. Gwynoro Jones, has no confidence in the leader of the SDP in the United Kingdom as a whole. Indeed, he is on record as thoroughly criticising the leader of the SDP in the United Kingdom. Does he agree that that is a crucial matter, of which the people of Brecon should become aware?

Mr. Skinner: That will blow up during the campaign. When the writ is issued, many people will jump on that bandwagon. There is a great deal of comment in the local press about Gwynoro Jones. I managed to get hold of some of it many weeks ago. He became a Member of the House at the same time as me—I mention that en passant. I remember him well. The problem, to put it crudely and simply, is that Gwynoro Jones was the satellite of the right hon. Member for Glasgow, Hillhead (Mr. Jenkins). When the right hon. Gentleman lost the job as leader, it created friction, and Gwynoro Jones cannot settle down with the new leader of the SDP. Sparks will undoubtedly fly, and I look forward to them because it will help our candidate.

Mr. Thomas Torney (Bradford, South): My hon. Friend has made several references to "Erskine May". Will he read the paragraphs of "Erskine May" which are relevant to the writ, and explain what they mean?

Mr. Skinner: I understand that a Conservative Member may deal with that matter.

Mr. A. J. Beith (Berwick-upon-Tweed): Allies!

Mr. Skinner: The hon. Gentleman says that we are allies, but there is plenty of evidence that I began the campaign for the writ many days ago purely in an attempt to accommodate the candidates down in Brecon and Radnor. If the hon. Gentleman listens carefully, he will find that that issue is dealt with. I know that he is upset because he is on the other side.

Mr. Campbell-Savours: In what?

Mr. Skinner: In nearly every respect. I have said from the outset that we are not involved in a game. This is a serious matter. We are debating this issue to give hon. Members an opportunity to discuss important topics on a Friday, when most hon. Members are around.

I have just seen where the Tory candidate was nominated.

Mr. David Alton (Liverpool, Mossley Hill): There are two of them.

Mr. Skinner: One of the Liberals behind me who keeps rabbiting on says that there are two Tory candidates. If there are, all well and good. No doubt the hon. Gentleman will justify that comment in the campaign. He will be able to say so in his *Focus* leaflet which floats under doors day after day—their content will probably change day after day. By and large, the candidates of the main parties are ready for action. Our candidate has his troops massed on the Black mountains and on the Brecon Beacons.

There is another point which I referred to earlier but which I should like to re-emphasise in case some of my hon. Friends are a little worried about my moving the writ. There is a motion on the Order Paper which refers to using Friday as suggested by the hon. Member for Kemptown and which says that it is an abuse to do such a thing. There are differences between some of us who take an alternative view about that matter. I have not signed that——

Mr. Speaker: Order. That comes when the hon. Gentleman has finished his submission. I welcome this new-found establishment figure. The hon. Gentleman is

[Mr. Speaker]

otherwise absolutely in order and I pay tribute to him for that. If other hon. Members who may be called to speak follow his example and watch me nodding or shaking my head, I shall not need to interrupt too often.

Mr. Skinner: I shall shortly finish to enable Liberals, Tories, Welsh Nationalists and some of my colleagues from Wales to speak. It is a good idea to keep the Government up all weekend, but I am not too keen on the idea of keeping Back Benchers up and not causing the Government any trouble.

Mr. Speaker *rose*——

Mr. Skinner: Yes, I am moving on now.

Mr. Speaker: Order. That has nothing to do with the motion.

Mr. Skinner: I have discussed the matter with my hon. Friend the Member for Bow and Poplar (Mr. Mikardo). We were talking about Friday. It has been a topic of conversation in the Tea Room and elsewhere. I asked him the other day, "What are the odds, Mik?" He said, "We have not got a book on it—the odds are so long that we shall be there all weekend." I said, "Well, I shall slip anchor on Friday." To which he replied, "That's running on Wednesday." Do not get me wrong, Mr. Speaker. I am not trying to score a victory by seven or eight lengths—a short head will do—but we need to have a little in reserve.

It will be a lively by-election. It will be about the fact that monetarism has failed—the Prime Minister's brand of monetarism, that is. There is a place for monetarism somewhere, but it is hardly likely to be developed in a highly technological country such as ours. I believe in my simple fashion that standing on one's own two feet went out with Robinson Crusoe—he had to get Man Friday to bail him out. The Government's philosophy and their record in the past six months will become a great feature of the campaign, as will their record on unemployment and the massive cost of it.

Mr. Roland Boyes (Houghton and Washington): I think that my hon. Friend will appreciate what I have to say. When talking of the Government's record, he will recall his activities during the coal miners' strike. I do not want to raise that matter, but my hon. Friend may not be aware that one of the leaders of the Durham Miners Association, Jimmy Inskip, died last night. In view of my hon. Friend's interest in the mining industry, perhaps he would like to pay a short tribute to the leadership of the Durham miners, including Jimmy Inskip, who I do not doubt would have been joining my hon. Friend in the by-election had he still been alive.

Mr. Skinner: I shall not make too much of that. My hon. Friend has got his name recorded and I suppose that that will suffice. Many miners will participate in the campaign, as they did in the county council election campaign. Many more than we expected participated and some of the results in the coalfields were exceptionally good. That includes parts of south Wales, of which Brecon and Radnor is a part.

I was discussing the main issues in the campaign and, as hurriedly as possible, mentioning the dole queues, education, state earnings-related pensions, the threatened abolition of wages councils and the Common Market, which is always a good runner in by-elections. We shall give our candidate some advice on that.

Mr. Laurie Pavitt (Brent, South): Another issue will be how the nurses are being short-changed on the phasing of their pay award as announced yesterday.

Mr. Skinner: My hon. Friend will be pleased to know that I have, in my notes, details about hospital closures in Powys. I am skipping across such information on hospitals and education, for example, so that others can go into more detail. My hon. Friend the Member for Brent, South (Mr. Pavitt) is a long-standing hon. Member who I believe will be going at the end of this Parliament. I hope that he catches your eye, Mr. Speaker, as he can speak on behalf of the disabled and others as he has done so well during his many years in the House. I am sure that he could shed some light on the problems of nurses and others. The election campaign will be about the Health Service, pensions and the closure of railways.

Dr. Norman A. Godman (Greenock and Port Glasgow): My hon. Friend has mentioned several substantial issues that will be debated in the election campaign. Does he believe that political devolution will also feature largely in the campaign?

Mr. Skinner: It has not done so for some years in Wales or Scotland. I shall not get involved in a matter which may not be significant in the campaign. I am sticking to the general issues. All the issues that I have mentioned will be debated at length. At the end of all that, we shall have a new Member of Parliament to represent that constituency.

Mr. Andrew F. Bennett: Will my hon. Friend give way?

Mr. Skinner: My hon. Friend may be about to ask some awkward questions, so perhaps I would do better to suggest that, as he knows so much about procedural matters and once nearly moved a writ himself, he may wish to catch your eye, Mr. Speaker, during this very lengthy debate.

The House of Commons is an unusual place. There are many heartaches and few blessings, but one thing is certain. This place, like life generally, is full of surprises. One comes here one morning and the unexpected happens. In a way, that is reinvigorating. Just as one is beginning to lose faith a little, something new happens. This Friday has been one of those unusual days. It was started by the right hon. Member for South Down, who put the cat among the pigeons. I know that the motion is in the name of the hon. Member for Kemptown, but I think that the right hon. Member for South Down will agree with me that there are days when we win and days when we lose and I have a sneaking feeling that this day will belong to those of us who are arguing for this writ and for an early by-election. That is the important point.

I am prepared to be flexible in these matters——

Mr. Beith *rose*——

Mr. Skinner: All right; I know that the hon. Gentleman has been trying.

Mr. Beith: Has not the hon. Gentleman ascertained whether his own Chief Whip and the Government Chief Whip have arranged to introduce a motion to prevent the

House from reaching a decision about the writ and thus to prevent the early by-election that we should welcome as much as the hon. Gentleman claims?

Mr. Skinner: When the current leader of the Liberal party in the House today starts talking like that, I worry about his position vis-a-vis you, Mr. Speaker, because I do not want any unnecessary trouble and what the hon. Gentleman has just suggested borders nigh on heresy. He has suggested that plans have been made when we know that everything today has been spontaneous. I must admit that I had a little help from the Clerks in the Table Office. I shall not name them because they did a good job and I do not want to hamper their promotion.

I look forward to the continuation of this debate, Mr. Speaker. Having spent a few moments making the argument, I bring you this little blue form and rest my case.

10.13 am

Mr. Gwilym Jones (Cardiff, North): I oppose the suggestions made by the hon. Member for Bolsover (Mr. Skinner) and perhaps two personal reasons qualify me to do so. I might easily have entered the House as a result of a by-election, because immediately before the last general election I was the Conservative candidate for Cardiff, North-West and a writ for a by-election would have been announced but for the calling of the general election. Therefore, I well understand what is involved in the organisation of a by-election and all the considerations that go with it.

I am somewhat appalled, however, that the hon. Member for Bolsover should proceed in this way today. It seems to have slipped his memory and that of certain other right hon. and hon. Members that our late colleague, Tom Hooson, who was an excellent Member of Parliament and a first-rate representative of the constituency of Brecon and Radnor, died only on 8 May. It was a sad, cruel and untimely death for a man who almost until the end worked extremely hard and assiduously on behalf of his constituents. That was just four short weeks ago. I suggest that in seeking this morning to move the writ for a by-election the hon. Member for Bolsover is proceeding with somewhat indecent haste.

I assure the hon. Member for Bolsover and the whole House that there is no reluctance on the part of the Conservative party to fight this by-election. As the hon. Gentleman has said, our candidate is already in place. Chris Butler is an excellent candidate and may be the only Welsh-speaking candidate to fight the by-election. He is also a constituent of mine, and I cannot speak too highly of him.

Mr. Andrew F. Bennett: Does the hon. Gentleman accept that it would be completely unacceptable if the electors in that constituency could not elect a Member of Parliament before September, as they would be left unrepresented for a long period? It is important that the election should take place before people start going away on holiday, as the new proposals for holiday voting are not yet in operation. Does the hon. Member accept that the sooner the election takes place the better will be the opportunities for most people in the constituency to participate?

Mr. Jones: I do not disagree entirely with the hon. Gentleman's suggestion. He intervened earlier to point out the difficulties that would arise if the motion moved by the hon. Member for Bolsover were defeated. We do not want that to happen. As I have said, there is no reluctance on the part of the Conservative party to proceed to a by-election. I agree that it should take place relatively early, but I do not believe that today is the right time to pursue this. The hon. Member for Bolsover pointed out that the Welsh nationalists do not have a candidate in place yet. I have no brief to speak for Plaid Cymru, so I had better give way to its former leader.

Mr. Dafydd Wigley (Caernarfon): Our candidate will be in place by tomorrow night, so that is no reason for holding back the election. More important, if the writ is moved today the by-election could take place on, say, 4 July, before the main holiday period begins. That is important not just from the point of view of people in Brecon and Radnor going away on holiday, but because of the impact of the tourist industry on the constituency, which would be a major problem if the by-election were held towards the end of July. In practice, that would mean holding the by-election over until the autumn and leaving the constituency without representation for the intervening period.

Mr. Jones: I know the significance of the remarks of the hon. Member for Caernarfon (Mr. Wigley), for we were both in the Brecon and Radnor constituency recently when the Select Committee on Welsh Affairs was investigating tourism in Mid-Wales. That visit took place just before the sad death of Tom Hooson. I agree that an early by-election is needed, but this is not the right moment to pursue it. I assure the Opposition that the Conservative party has an excellent organisation locally as well as an excellent candidate who is looking forward to contesting the seat at an early date. If the writ is moved today, Plaid Cymru will inevitably be at a disadvantage if its candidate is not adopted until tomorrow, because the announcement will not filter out until next week. I know that Plaid Cymru has a very small party organisation and has to save up for the deposit, which it will certainly lose yet again.

I suspect the motives of the hon. Member for Bolsover. He has rightly referred to all the important issues which will be fully debated and explored during the by-election campaign. Attention will be focused upon who comes third in the by-election. Will the Labour party be able to keep the alliance in third place or will Labour go down to that place? Is the hon. Member for Bolsover seeking to take a mean advantage by jumping the gun on Plaid Cymru, which is at present in fourth place, and trying to make sure that Plaid Cymru stays below the Labour party?

Mr. Adley: A moment ago the hon. Member for Caernarfon (Mr. Wigley) mentioned tourism and holidaymakers. Does my hon. Friend the Member for Cardiff, North (Mr. Jones) believe that an issue at the forthcoming by-election should be the legislation passed by the House during this Session, which implements a pledge made by our party at the last general election to give votes to holidaymakers? Does that not demonstrate the serious intention of the Conservative party to increase the franchise and enable people to vote at elections?

Mr. Jones: My hon. Friend is quite right. That important reform of our electoral system is widely welcomed throughout the country, particularly in the

[Mr. Jones]

constituency of Brecon and Radnor, which is an important constituency for tourism. It is also a very important agricultural constituency. Because of the constraints placed upon the agricultural industry, those involved can have rather different holiday commitments. I assure the hon. Member for Bolsover that the Conservative party is looking forward to an early by-election in Brecon and Radnor. I am looking forward to Mr. Chris Butler, our excellent Welsh-speaking candidate, joining me on these Benches.

Mr. Richard Holt (Langbaurgh): Does my hon. Friend agree that one of the issues in the forthcoming by-election will be the pledge by both Opposition parties to introduce the rating of agricultural land?

Mr. Jones: My hon. Friend has referred to a dangerous and emotive issue — the threat by the alliance to introduce the rating of agricultural land. It will be a very important by-election issue. It is unnecessary to debate today the issues which will be fully covered in the by-election campaign. The Conservative party is not reluctant about the holding of an early by-election, but this matter ought to be dealt with in the proper way.

Therefore, I urge the hon. Member for Bolsover not to pursue his motion. I anticipate that what both he and the Conservative party want to happen will happen very shortly.

10.24 am

Mr. Dafydd Wigley (Caernarfon): I rise to support the motion that the writ be moved for the Brecon and Radnor by-election. Whether or not the by-election could be held on 4 July is another matter. If it could be held earlier—say on 27 June—that would be even better. The Brecon and Radnor constituency should be represented.

I rise to speak from no party political motive. As has already been mentioned, our candidate will not be selected until tomorrow evening. From a narrow party political point of view, it could be argued that we ought to wait longer before holding the by-election, so that the candidates can get to know the constituency. Brecon and Radnor parliamentary candidates need time in which to get to know the constituency, but it is even more important for the electors of Brecon and Radnor to have somebody to speak on their behalf. They ought not to be unrepresented throughout the summer.

Plaid Cymru is under no illusion about the outcome of the by-election. My party is unlikely to win it. Therefore, we can viewtion the by-election dispassionately. Nevertheless, a by-election presents an important opportunity for issues that are of concern to the community to be debated. Plaid Cymru wants to take part in that debate and to use the by-election as a means of impressing upon the Government, the Welsh Office and the House the pressing problems that face the constituents of Brecon and Radnor.

I know a fair amount about the constituency. Before I became a Member of Parliament I lived in the borough of Merthyr Tydfil. Part of the old borough of Merthyr Tydfil is now, as a result of the change in boundaries, part of Breconshire. When I was a councillor on the old county borough council, I was aware of the major problems that faced the people of Breconshire. Breconshire forms the hinterland to Merthyr Tydfil. The problems of 1974 are even more acute now, and the mechanism of a by-election is needed to focus upon them.

It would be right for me at this stage to add my tribute to the late Tom Hooson. He was a friend of many hon. Members. I got to know him well when we both sat on the Select Committee on Welsh Affairs but I knew him for many years before he became a Member of Parliament. He contested the Caernarfon seat in 1959 and obtained the highest number of votes that the Conservatives had had for several decades in that constituency. I am glad to say that the Conservative vote has subsequently declined.

Tom Hooson was held in very great respect in Wales. He served the Brecon and Radnor constituency with great diligence, as did his predecessors Caerwyn Roderick and Tudor Watkins. Both Caerwyn Roderick and Tudor Watkins knew in detail the problems of this constituency. Geographically, Brecon and Radnor is the largest constituency in England and Wales. Any candidate who takes part in an election there needs to have close knowledge of it. Tom Hooson succeeded in gaining that knowledge. Before he became the Member of Parliament for Brecon and Radnor, he worked in it for a period, and learned about its problems. He was a good constituency Member of Parliament, and it provided him with the base for his support in the last General Election. It will be a challenge to his successor to live up to the standards set by Tom Hooson and also by Caerwyn Roderick and Tudor Watkins. Tudor Watkins was also involved in local government. He held office on the old Breconshire county council.

The writ needs to be moved as early as possible before the election so that the campaign can be as long as possible. Every candidate ought to try to visit every community in the constituency. There are 93 villages in my constituency. I try to visit all of them during an election campaign. The constituency of Brecon and Radnor is substantially larger than mine. A candidate who wishes to visit all those communities during an election campaign needs as much time as possible in which to do so. Therefore, the writ ought to be moved as early as possible.

Mr. Cyril Smith (Rochdale): I understand that, if the election is to be held on a Thursday, the last Thursday upon which it could be held is 27 June.

Mr. Wigley: There are precedents for holding by-elections on days other than Thursday. That is a point to which we ought to apply our minds. Tom Hooson worked in detail on constituency problems. He was aware of them when he made his maiden speech on 23 May 1979. He raised a number of issues which inevitably will arise in the by-election for which we are pressing today. Those issues still need to be raised. One of the issues which he raised, to which I referred in an intervention during the speech of the hon. Member for Cardiff, North (Mr. Jones), was the importance of tourism. He said of the town of Brecon that more people were coming into the tourist office there than anywhere else in south Wales. That shows the major importance of the tourist industry to the Brecon and Radnor constituency, and it is a factor that we should bear in mind in considering the moving of the writ and a suitable date for the by-election.

Tom Hooson was a member of the Select Committee on Welsh Affairs, which is currently studying tourism in

Wales. In recent months Tom Hooson's presence has been greatly missed in that Committee. There is a need for him to be replaced and for the by-election to take place, to ensure that Brecon and Radnor has a voice at this important time when we are considering matters such as tourism.

Mr. Adley: The hon. Gentleman is talking about tourism in Wales and its relevance to the by-election campaign. Would he agree that the policy of the Wales tourist board in promoting farmhouse tourism has been particularly successful in the Brecon and Radnor constituency? Would the hon. Gentleman care to pay tribute to the Wales tourist board?

Mr. Wigley: Although, perhaps, I should not refer to the work of the Select Committee and the study that is currently in progress, it is correct to say that, as Members of this House, we have had an opportunity recently to see at first hand the developments in farmhouse tourism. We have seen the way in which the Wales tourist board in the Brecon and Radnor constituency — and in the Montgomeryshire constituency — has developed the training, back-up and facilities for those involved in farming who want also to undertake tourism. Very high standards of provision have been developed in that way. Farms working in a cluster of 12 or more market themselves to get the maximum benefit for their area. It is a major development and it is of importance to the farmers of Brecon and Radnor.

During July, August and early September, the farmers of Brecon and Radnor will be very busy with their farming but they will also be involved at that time in tourism, and I accept what the hon. Member for Christchurch (Mr. Adley) said about that work of the Wales tourist board.

Before the hon. Gentleman's intervention I referred to Tom Hooson's work in the Select Committee on Welsh Affairs. I do not think that there can be many hon. Members of this House who, in their maiden speech, have referred in detail to a Select Committee as a major point. Tom Hooson regarded the Select Committee on Welsh Affairs as a body

"in which we can achieve discussion that is realistic and formative to enable us to make pragmatic decisions."

The Select Committee needs people such as Tom Hooson and we certainly need to have the seat filled.

In his maiden speech, Tom Hooson also referred to an issue that is of immense concern to Brecon and Radnor when he said:

"all hon. Members are anxious to see unemployment figures coming down".—[*Official Report*, 23 May 1979; Vol. 967, c. 1157-8.]

Unemployment in Wales at that time stood at 85,000. Today the admitted figure in Wales is over 170,000, so it has doubled since Tom Hooson made his maiden speech. Tom Hooson was right in 1979 to underline the importance of unemployment. With the figure now at more than 170,000, how much more does the issue of unemployment impact on the constituency?

Unemployment is not only a scourge of many urban areas; it is a pressing problem in rural areas. One of the major issues that will arise in the by-election is the problem of travel to work, because of the lack of a public transport system. I have correspondence from people living in Brecon and Radnor who fear the effects of the Transport Bill on communities. Unless there is a public transport system to serve the communities, it is next to impossible for many young unemployed people who are seeking work to go after the few jobs that may be available.

Tom Hooson often referred in his speeches to the fact that his constituency has the highest ownership of cars of any constituency in Wales. That is not because it is the richest constituency or the constituency with the greatest disposable personal income or wealth per capita. It is because a car is a prerequisite for people to get to and from work and about their normal everyday business. But, of course, many people—especially the young—may not be able to afford cars. That underlines the need to bring work to the people, rather than expecting them to travel to work in outside areas.

Another problem in Brecon and Radnor is the standard of the roads. The county of Powys has 261 miles of trunk road—more than any other county in Wales. My own county has 206 miles. Dyfed—a very large county—has 233 miles. Some counties, such as West Glamorgan, have only 28 miles; South Glamorgan has 26 miles. Yet the expenditure by the Welsh Office on trunk roads has been very small indeed in the Powys area in which the Brecon and Radnor constituency lies. I accept that there has been expenditure on the M4 in south Wales, going through Gwent and the Glamorgans, and there has been expenditure in north Wales in Clwyd and even in Gwynedd. But the county of Powys has been deprived of proper expenditure on roads. I have no doubt that in the forthcoming by-election the provision of roads will be an important issue and that many people will want to address themselves to it.

I realise that other hon. Members wish to speak, so I will move rapidly to the issue that concerned Tom Hooson most of all, and on which he made frequent contributions to debates in this House. I refer to the rate support grant structure in Wales, particularly as it affects the county of Powys and the area of Brecon and Radnor.

In the period before the by-election takes place, candidates of all parties would do well to study the mechanisms of the rate support formula. It is a complicated formula. Many people in Brecon and Radnor rightly feel that insufficient emphasis is given to the sparsity of population and the effect that it has on the cost of maintaining essential services such as roads, education and social security. As a result, the expenditure per capita on many services in Brecon and Radnor has to be much higher than in other areas to maintain the same level of service. Yet the grant that is given to the Powys county council has been inadequate, and it has been necessary year after year to bring in special devices and safety nets to avoid the full impact on Brecon and Radnor of the logic of the present rate support grant formula.

The safety nets, however, have not been sufficient to safeguard the residents of the constituency from continuing increases in the rate burden. There is a need to maintain services in the communities and to distribute the burden in an equitable fashion. If any of us were trying to pay tribute to Tom Hooson's work in this House, the best means of doing so would be to continue to put the arguments on rate support grant. Obviously, other rural areas of Wales are affected, as are areas in England such as the south-west and the north-west, although there the details of the formula are slightly different.

All the issues that I have mentioned require attention in the by-election. It needs to be held at an early date, so

[Mr. Wigley]

that the new Member, from whatever party he or she may be, will have an opportunity to speak on the important issues before the summer recess.

10.39 am

Mr. Douglas Hogg (Grantham): The House owes a great debt of gratitude to the hon. Member for Bolsover (Mr. Skinner) for moving the writ.

Mr. Peter Bruinvels (Leicester, East): My hon. Friend speaks for himself.

Mr. Hogg: My hon. Friend says that I speak for myself. I do, but I also speak for many other hon. Members.

There are cogent reasons why we should pay tribute to the hon. Member for Bolsover. He has reminded us of the responsibility and power of Back Benchers. He has moved a writ. For far too long in the House the moving of a writ has been the subject of a cosy relationship between the Whips Offices. *[Interruption.]* I note an aspirate noise from the Liberal Chief Whip who has rather attenuated, not to say presumptuous, ideas of one day occupying the position of my right hon. Friend the Leader of the House.

There is no reason why the movement of a writ should be the subject of a cosy relationship between the Front Benches. Election to Parliament is as much a matter for Back Benchers as for the Government. The hon. Member for Bolsover has therefore done a great service in moving the writ. Although I am against the House granting the writ, I hope that the precedent will be borne in mind.

Mr. Simon Hughes (Southwark and Bermondsey): Windy.

Mr. Hogg: No, I am not windy. I am a constitutionalist.

Mr. Adley: My hon. Friend appears to have made up his mind how he will vote on the motion as to whether we should move the writ for the Brecon and Radnor by-election. At the moment, I am unsure how I shall vote. I am therefore listening to the debate with great interest. Does my hon. Friend agree that it is important that we should know where the official Opposition and the Government stand on the issue? Does he therefore hope that we shall hear from our right hon. Friend the Leader of the House what advice he has to give to those of us who at the moment may be uncertain as to how we should vote?

Mr. Hogg: I have always found my hon. Friend to be a fair-minded man. I am therefore not in the least surprised to hear that he is approaching the debate with an open mind. That is precisely what I should expect. Knowing him as I do, I am aware that he approaches the matter with not just an open mind, but an informed mind. I see the volumes on railways that he has beside him. I hope that my right hon. Friend the Leader of the House and the right hon. Member for Bethnal Green and Stepney (Mr. Shore) will express their views, and that my hon. Friend the Member for Christchurch (Mr. Adley) will express his views because the issue of railways in Wales is a matter of the utmost interest to the people of Grantham and to the House. We need some specialised advice about railways.

The House needs the guidance of my right hon. Friend the Leader of the House. He has been in his place for much of this morning. I am sure that he will give us his guidance. The right hon. Member for Bethnal Green and Stepney has a great contribution to make to the debate. I hope that it is not presumptuous of me, Mr. Speaker, to say that if the right hon. Gentleman rises in his place at about 11.30 or 12 o'clock, you might feel it appropriate to call him.

Those points, however, are at the margins. We must decide the holding of a by-election. The Conservative party is extremely anxious, in principle, to hold a by-election.

Mr. Simon Hughes: I am sure that the House would love to know why, in practice, the Government may not be keen to have a by-election, despite their principles. Is it something to do with the result?

Mr. Hogg: No. The hon. Gentleman is too interested in trivial matters. We are interested in having a by-election because to begin with—for reasons that I shall deploy—I am a constitutionalist, and I am against upsetting carefully contrived arrangements that have stood the House in good stead. Although it happens to be coincidental, I am against, for example, the motion that has been promoted by the right hon. Member for South Down (Mr. Powell).

Mr. Andrew F. Bennett: Does the hon. Gentleman accept that our procedures for calling by-elections are not exactly tried and tested and that they are, on the whole, a series of squalid deals? The most useful thing that could emerge from this debate would be for the matter to be referred to a Speaker's Conference on electoral law so that we could obtain a formula for calling by-elections which did not involve the Whips, but which brought about a by-election automatically fairly rapidly, so that people in the areas involved would obtain their rights to be represented in the House as quickly as possible.

Mr. Hogg: I have never heard of an arrangement in the House which did not involve the Whips, other than today's debate, of course, which has been singularly untampered with by the Whips.

Mr. Cyril Smith: Has it?

Mr. Hogg: If the hon. Gentleman wants to make a contribution and can get to his feet, I shall willingly give way.

Mr. Smith: I am grateful to the hon. Member for giving way. His contribution is much more suited to a university knockabout than to the House of Commons. He said that the Whips have not been involved in the debate. If I were him, I should wait until about 12 o'clock and see how it unfolds. He can then satisfy himself that the Whips have not been involved.

Mr. Hogg: I may have a premonition as to how the debate will unfold. I say with considerable confidence that this is not a debate about which the Whips have become unduly worried. It is a debate in which Back Benchers are interested, and they are interested in the other matters that the House is minded to discuss. However, at the moment, we are talking about the writ.

The Conservative party is anxious, in principle, to have a by-election—for a good reason. We have been in power in this Parliament for some two years. At that point, it is not surprising that, as a Government, we are less popular than previously. A by-election is a good moment for a party to deploy and explain its policies and to answer

criticisms. I welcome the principle of by-elections, because we have good arguments on jobs, the economy, health care and education.

Mr. Robert N. Wareing (Liverpool, West Derby): Although the hon. Gentleman discounts arguments from the Opposition, does he feel that the Government are delaying the by-election because they are worried about the inevitable result? Does he think that there is another matter to which the House should turn its attention—the fact that the deposit paid by candidates has not yet been affected by the Representation of the People Bill which is in another place at the moment? Does he believe that the Government are delaying their decision until the deposit can be increased? That will be a long time, because the Bill has to be dealt with in another place and there has to be a statutory instrument. Does he think that some constitutional jiggery-pokery is going on to which he should be addressing himself and about which the House should be worried?

Mr. Hogg: I am grateful for that most ingenious point, which requires careful consideration. It is one upon which we might need the advice of a Law Officer.

Mr. Speaker *indicated dissent.*

Mr. Hogg: Mr. Speaker does not think that we do. Other hon. Members may think that we do, in which event it would be proper for other hon. Members to suggest that we need the advise of a Law Officer. It would then be for Mr. Speaker to rule upon the matter. It is a most interesting point. Do we need the advice of a Law Officer? I think not.

The Government have decided—in my view, rightly—to increase deposits in by-elections, but that does not go to the essential nature of the by-election to which we are addressing ourselves. The Conservative party is likely to win the by-election at Brecon and Radnor, whatever happens. It is not anxious to exclude anyone from participation. Why should the Conservative party wish to do that? It has nothing to fear from a by-election. The House should realise that the Conservative party welcomes the prospect of a by-election, which raises the question——

Mr. Nicholas Lyell (Mid-Bedfordshire): Does my hon. Friend agree that there are probably two reasons why the Labour party may be especially keen to hurry on the by-election at Brecon and Radnor? First, the deposit may be cheaper in the immediate future than by the autumn. If it is to lose its deposit, it would rather lose £150 than £500. Leaving aside that sort of trivia, does my hon. Friend agree that in mid-term an Opposition think that they may be able to score points or win by-elections? However, as time goes on, the Labour party, the Liberal party and other parties recognise that the Government's fortunes, especially when backed by such excellent policies, are likely to improve in the mind of the electorate. Therefore, with the passage of time, the prospect of the Government winning the by-election at Brecon and Radnor becomes all the more certain.

Mr. Hogg: My hon. and learned Friend has made two important contributions to the debate. We know that the Labour party's funds are at a low ebb. We know also that its support in the country is not as powerful as it would like. We are aware that its finances are in dicky order. The best advice that we can give to the Labour party is that it is likely to lose its deposit in the by-election. It is clear that it wants to hurry on the by-election so that its loss is minimised.

My hon. and learned Friend was right to speak about the acceptance of the Government's policies. The policies that they have been implementing are achieving success. For example, we are told by the Opposition and others that we have a stagnant economy. Yet growth last year was about 3 per cent. Investment increased by about 9 per cent. and exports increased by about 10 per cent. We know that 613,000 jobs have been created since June 1983. These are matters to which the electorate needs to have regard.

Sir John Biggs-Davison (Epping Forest): Is my hon. Friend aware that I fully share his confidence that the Conservative party will do extremely well in the by-election which is the subject of the motion before the House? However, I have one little worry — that the prospects for the Conservative party in the forthcoming by-election are likely to be damaged by the addiction of persons on the Treasury Bench to the Warnock report and hostility to the Bill that has been introduced by the right hon. Member for South Down.

Mr. Hogg: I always listen to the remarks of my hon. Friend the Member for Epping Forest (Sir J. Biggs-Davison) with the greatest respect. However, I think that he is wrong to say that the opposition to the Powell Bill, if I may so describe it—the Bill promoted by the right hon. Member for South Down—emanates solely from the Treasury Bench. There is widespread opposition to the Bill in this place. However, that does not alter the fact that that issue is not relevant to the motion that is before us.

Sir Bernard Braine (Castle Point): I am sure that my hon. Friend would not wish to mislead the House. The Bill to which he has referred had an overwhelming majority on Second Reading. It completed its Committee stage and enjoyed a procedural majority of some size when it started on Report. The Bill has overwhelming support in the House and in the country.

Mr. Adley: On a point of order, Mr. Speaker. I seek your guidance. You properly ruled at the beginning of the debate that we are discussing the Brecon and Radnor by-election writ, which has been moved by the hon. Member for Bolsover (Mr. Skinner), and you properly informed the House that we should not indulge in any discussion of matters which may be reached later today. However, there has been discussion, quite properly, of the issues which may be raised during the forthcoming by-election, should it be held on an earlier date than may have been anticipated. Bearing in mind the interventions of my hon. Friend the Member for Epping Forest (Sir J. Biggs-Davison) and my right hon. Friend the Member for Castle Point (Sir B. Braine), will you rule whether an issue that might be raised during the by-election is the one that has been raised by my right hon. and hon. Friends so that those who participate in the debate know whether they are in order?

Mr. Speaker: We are discussing a writ for the Brecon and Radnor by-election. It may be that an allusion during this debate to the subsequent debate is in order, but it must be a passing allusion. It would not be in order to address the main issues that will feature in the later debate. It will be appropriate to deal with those issues when the House deals with the motion of the hon. Member for Brighton, Kemptown (Mr. Bowden).

Mr. Hogg: I am grateful Mr. Speaker. I listened carefully to what my hon. Friend the Member for Epping Forest and my hon. Friend the Member for Castle Point (Sir B. Braine) had to say. I understood that they were raising the issue of the Warnock report in the context of the by-election. If I had not thought that, I should not have responded to their interventions. To have done so otherwise would have been grossly out of order. My right hon. and hon. Friends made their interventions in the context of the by-election that we all hope will take place within the foreseeable future, but both are wrong in asserting that the House, by an overwhelming majority, supports the Bill that has been introduced by the right hon. Member for South Down.

Mr. Speaker: Order. That is not the issue. I ask the hon. Member for Grantham (Mr. Hogg) to return to the writ.

Mr. Hogg: Indeed, Mr. Speaker. We were dealing with the Bill introduced by the right hon. Member for South Down in the context of the by-election. During the by-election the electorate will wish to make clear by letters, questions and by the ordinary processes available to it that it does not, as was suggested by my right hon. and hon. Friends, support the Bill by an overwhelming majority—a Bill for which they are devoted advocates.

Sir John Biggs-Davison: Then what is my hon. Friend frightened about?

Mr. Hogg: I am frightened of nothing; but I object —I am sure that the electorate in the by-election will share my objection—to a misuse of parliamentary time, which is what I believe the electorate in the by-election may believe.

Mr. Speaker: Order. If the hon. Gentleman is called to speak in the subsequent debate, that will be the appropriate time for him to raise the objection that he has voiced.

Mr. Cyril Smith: On a point of order, Mr. Speaker. The hon. Member for Grantham (Mr. Hogg) has told us that he is opposed to a misuse of parliamentary time. While the hon. Gentleman has been sitting in his place during points of order I have heard him ask for how long certain Opposition Members wish him to speak and whether it would be all right if he continued until 11 o'clock. Is that not an misuse of parliamentary time?

Mr. Speaker: Fortunately, I cannot hear everything that goes on in the Chamber, even at this end of it.

Mr. Hogg: I have always done my best, Mr. Speaker, to enable you to hear everything that I say. However, on occasions I think it prudent to speak in a somewhat lower voice. I am always anxious, Mr. Speaker, as you know so well, to meet the convenience of the House, the convenience of yourself, the convenience of other hon. Members and especially the convenience of the two Front Benches.

As we are now close to 11 o'clock, I wish to make only one or two more points. I am in favour of an early by-election, but I am not in favour of twisting conventions out of shape. Our conventions and practices are designed to safeguard us all. Despite my enthusiasm for a by-election, I think that the long-established practice of leaving the moving of a writ to the Chief Whip of the party who has suffered the loss of a Member is, on the whole, the best procedure. I am grateful to the hon. Member for Bolsover for enabling us to discuss the matter and for reminding us of the power of Back Benchers, but I hope that at the end of the debate—if it is pushed to a Division—the House will decide that the writ should not——

Mr. Ernie Roberts (Hackney, North and Stoke Newington): Does the hon. Gentleman agree that his case, that a writ be issued so that the electorate at Brecon and Radnor can make its views known on the Government's policies, means that he ought to agree that it would be even better if the whole Government resigned and allowed the country to express its views on their policies?

Mr. Speaker: Order. That is certainly not an issue in this debate.

Mr. Hogg: I felt that you were likely to take that view, Mr. Speaker, and that it would be improper for me to respond to the hon. Gentleman.

I merely invite the House to take the view that, nothwithstanding the eloquence of the hon. Member for Bolsover, we should not accede to his suggestion.

Mr. Dalyell: On a point of order, Mr. Speaker. At business questions yesterday, I supported my hon. Friend the Member for Motherwell, South (Dr. Bray) in pressing the Leader of the House for a statement on Eurolex, the computer database of English, Scottish and European law. The Leader of the House said that he suspected that a statement today would be "trivialising the matter". I give the House my word that, whatever the business today, I would have tried to raise the desperate anxieties of Dr. Norman Price and 52 other sacked members of staff and the need for an urgent referral to the Monopolies and Mergers Commission.

The matter is urgent because the Eurolex database could be removed and——

Mr. Speaker: Order. This sounds like a Standing Order No. 10 application, which we do not have on Fridays. What is the point of order for me? The matter was raised at business questions yesterday and dealt with. There cannot be a point of order for me.

Mr. Dalyell: Further to that point of order, Mr. Speaker. At business questions yesterday the Leader of the House gave the impression that he would at least contact Trade Ministers on this desperately urgent issue, with a view to a statement being made. I will not abuse your agreement to take my point of order, but will simply list the issues involved.

Mr. Speaker: Order. The hon. Gentleman cannot do that. The matter was dealt with yesterday. I have had no request from the Government for permission to make a statement. What the hon. Gentleman is doing is totally out of order, and he knows that.

Dr. Jeremy Bray (Motherwell, South): Further to that point of order, Mr. Speaker. This is a serious matter. The Leader of the House undertook yesterday to convey to the Secretary of State for Trade and Industry a matter that may involve not only the future of computer databases for legal information services, but, by precedent, the growth of information services of any kind in this country. The present action may make it impossible for any computer information service in this country to grow——

Mr. Speaker: Order. That is as may be, but we had the matter out in business questions yesterday. The hon.

Gentleman must find another opportunity to raise it. He must not do so on this private Members' motions day. That is totally out of order and I cannot allow it.

Mr. Dalyell: Further to that point of order, Mr. Speaker.

Mr. Speaker: No. I call Mr. Madden.

Mr. Max Madden (Bradford, West): On a point of order, Mr. Speaker. You and the House will recollect that the Home Secretary confirmed yesterday that a young Tamil had been returned to Sri Lanka by mistake. The Home Secretary said:

"The high commission in Colombo has been asked to contact the person in question".—[*Official Report*, 6 June 1985; Vol. 80, c. 435.]

I understand that the Home Office has received telegrams overnight from the high commission in Colombo confirming that the young man has been located.

I have two questions. May I urge the Home Office to make a statement to confirm the facts and what the Home Secretary said yesterday about ordering an urgent and thorough investigation? We need to know the outcome of any such investigation. Secondly, as Speaker and the honorary president of the Commonwealth Parliamentary Association, will you consider contacting the Speaker of the Sri Lanka Parliament to see whether he will reinforce the assurances given by the President of Sri Lanka that no Tamil seeking entry to this country need have any fear for his well-being?

Mr. Speaker: Order. That is enough on that subject. I have had no requests for permission to make a statement on this matter. The hon. Gentleman's second point is not within my responsibilities, which are to this House.

Mr. Dalyell: On a point of order, Mr. Speaker. In view of what was said at business questions yesterday, is it understood that if there is not a referral to the Monopolies and Mergers Commission, the database could easily——

Mr. Speaker: Order. The hon. Gentleman is seeking to carry on a discussion that we had at business questions yesterday. I cannot allow that during private Members' time. The Government have not come forward with a statement and I cannot allow this discussion to go on.

The Lord Privy Seal and Leader of the House of Commons (Mr. John Biffen): Further to that point of order, Mr. Speaker. I hope that a few words of mine will facilitate the passage of business, because I believe that the House wishes to get on to the issues raised in the motion of my hon. Friend the Member for Brighton, Kemptown (Mr. Bowden).

In respect of the matter raised by the hon. Members for Motherwell, South (Dr. Bray) and for Linlithgow (Mr. Dalyell), I am advised that the merger does not qualify for investigation under the Fair Trading Act. However, it is obviously a matter of great concern and I suggest that we continue the discussion through the usual channels.

11.6 am

Mr. Andrew F. Bennett (Denton and Reddish): Before the points of order were raised, the hon. Member for Grantham (Mr. Hogg) urged the House to reject the motion. The hon. Gentleman was misguided, because, in effect, he was agreeing that we should not have a by-election in Brecon and Radnor until after the end of this Session. That would be singularly unfortunate.

Although my hon. Friend the Member for Bolsover (Mr. Skinner) pointed out that this is a sovereign House which is always able to undo things that it has done, I do not believe that the hon. Member for Grantham would suggest that we should go on to even more unusual procedures. Therefore, we should spend a few minutes looking at the principles involved in the motion.

All our rights and privileges as hon. Members stem from the fact that we are elected. They can be rights and privileges only if everyone in the country has the right to participate in elections. Therefore, it must be a fundamental principle that as soon as possible after the death of an hon. Member or after a vacancy is created for other reasons, a by-election should be held so that people have the opportunity to be represented in the House.

However unfortunate it may be that the matter has to be debated today, we should spend some time looking at the principles involved. Anyone who studies *Hansard* will see that there have been many arguments and perhaps wrangles about the way in which by-elections are called.

In the 1960s there was considerable abuse because by-elections were not called until nine or 10 months — sometimes even longer — after a vacancy had been created. That was obviously unsatisfactory. In 1973, a writ was moved to speed up the calling of a by-election and, although the motion was defeated in the House, a Speaker's Conference considered the matter and produced the compromise that is now in operation. However, it is clear from some of the arguments that we have heard today that that compromise has not worked particularly well. Certainly, the procedures for calling by-elections in recesses are particularly unfortunate.

Therefore, I wonder whether my hon. Friend the Member for Bolsover, who has suggested that he is moving towards becoming an establishment figure, will look at the practices of establishment figures and try to manoeuvre a deal that would involve the Government giving a clear commitment that the by-election will be called speedily, and certainly by July?

Perhaps my hon. Friend the Member for Bolsover might then consider withdrawing his motion so that no vote was necessary and we would not have to choose between 27 June or 4 July and not having an election until November. Perhaps he would also press that the Leader of the House and other parties should agree, with your approval, Mr. Speaker, that the matter be referred back to an electoral conference so that we can find a procedure for calling by-elections automatically rather than as a result of manoeuvrings between the usual channels. We could have rules under which you, Mr. Speaker, set the procedure in operation automatically.

Mr. Skinner: I wish to remind my hon. Friend that the event on 10 July 1973 to which he referred, when an attempt was made to move a writ for the by-election at Berwick-upon-Tweed, was overtaken when the then Leader of the House moved a motion to move on to the Orders of the Day. As a result, we voted upon the motion to move to Orders of the Day rather than on the moving of the writ.

I agree with my hon. Friend's general outline of the way in which we should proceed with by-elections. I hope that my contribution today will assist. His point about ensuring that the holding of a by-election is not prolonged is uppermost in my mind, as it was in the mind of the person who moved the writ for Berwick-upon-Tweed on behalf

[Mr. Skinner]

of the Liberal party and the Social Democratic party—although that was not really invented then, but was only a small force.

I have taken on board all the points raised by my hon. Friend because I know that he, like me, has been interested in these matters for many years.

Mr. Bennett: I thank my hon. Friend for his helpful intervention. There is a growing belief that there should be an automatic procedure for by-elections. I hope that when the Leader of the House speaks he will give the House a clear indication of the date of the by-election. If he does so, and if he can persuade us that we can look forward to some automatic procedure to resolve these matters in future, we may feel it possible not to vote on a matter that could result in only two choices of by-election date.

11.12 am

Mr. Stephen Dorrell (Loughborough): Like my hon. Friend the Member for Grantham (Mr. Hogg), I believe that the House owes a debt of gratitude to the hon. Member for Bolsover (Mr. Skinner) for providing a relatively rare opportunity to have a full discussion of the proper time for a by-election. As has been suggested by several hon. Members, more often than not the date is agreed in the form of a deal between the Front Benches, from which Back Benchers, by definition, are excluded.

The House will agree that this morning's debate has thrown some light on some important issues about the way in which our democracy functions. It is right and proper that such a debate should take place. Those interested in the proper functioning of parliamentary democracy therefore owe a debt of gratitude to the hon. Member for Bolsover.

Far from being an abuse of the procedures of the House, such a debate strikes at the very heart of what the House is all about. It provides an opportunity to discuss one of the most crucial issues raised by the functioning of parliamentary democracy. The House will understand if I say that it raises in my breast a certain wry amusement to hear the hon. Member for Bolsover give a stirring speech about the urgency of holding a ballot. I hold the elevated, unpaid and utterly powerless post of parliamentary private secretary to the Secretary of State for Energy. That has led me to become something of a connoisseur of the hon. Gentleman's speeches about the proper timing of ballots.

The hon. Gentleman's view on ballots is not consistent. For the past 18 months I have sat behind the Treasury Bench listening to him, on many occasions, rehearsing the arguments that I have come to know almost as well as he knows them, about the propriety of holding a ballot as a result of the decision of the executive of the National Union of Mineworkers to call a national strike.

I believe that this point is relevant to the consideration by the House of the proper timing of a by-election in Brecon and Radnor. It throws some light on the thinking of the person advancing the argument for an immediate ballot in that constituency. His arguments for immediate ballots on important issues have not been entirely consistent.

The argument for an immediate ballot has not been powerfully maintained either by Opposition Members or by those of my hon. Friends who have said that they support an immediate or hasty move towards calling a by-election. There has been what I regard as an unhealthy confusion between haste and democracy. Haste is not necessarily democratic. It is as easy to hold a ballot that is too early as it is to hold one that is too late. That is precisely why, in the legislation surrounding——

Mr. Stuart Bell (Middlesbrough): Does the hon. Gentleman accept that one powerful reason why the writ should be moved today is the workload that each Member of Parliament has to bear on behalf of his constituents—those who visit the House, who write letters or who come to our surgeries? The longer the delay in the issuance of the writ, the longer that Brecon and Radnor will be deprived of a Member of Parliament. Is that not a wrong element of the enfranchisement of the electorate? Is it not in their interests that there be an early moving of the writ so that they can be properly represented?

Mr. Dorrell: Of course, that is one of the issues that the House must take into account when deciding on the proper time to hold a by-election in Brecon and Radnor. But other issues surround the timing — issues that, presumably, were taken into account when it was decided that there should be a minimum period as well as a maximum period between the dissolution of Parliament and polling day in the calling of a general election. Therefore, it is perfectly possible for the period to be too short as well as to be too long.

Mr. Coleman: May I refer the hon. Gentleman back to the point made by my hon. Friend the Member for Middlesbrough (Mr. Bell)? Those of us whose constituencies neighbour Brecon and Radnor are finding that the constituents in Brecon and Radnor are coming into our constituencies. While we are happy to help them, such a position cannot continue because they must be properly represented in Parliament.

Mr. Dorrell: The hon. Gentleman is coming perilously close to suggesting that the date of the by-election in Brecon and Radnor should be decided to suit the convenience of neighbouring Members of Parliament. While I entirely concede that the representation of the constituents of Brecon and Radnor is important, it is also important that when they go to the polls they should understand the choice that is available to them. It is important that the candidates presenting themselves for election in that constituency have had the opportunity to deploy the arguments which, in the end, the election is all about.

Mr. Gwilym Jones: On the points raised by the hon. Members for Middlesbrough (Mr. Bell) and for Neath (Mr. Coleman), I can tell my hon. Friend that my hon. Friends who represent Welsh constituencies have been helping out with the constituency burdens in Brecon and Radnor. Indeed, my hon. Friend the Member for Newport, West (Mr. Robinson) has been dealing with the correspondence left by our late colleague, Mr. Hooson, and actually spent last weekend in the constituency.

Mr. Dorrell: I am grateful to my hon. Friend. I am sure that what he has said is in the best tradition of the House of Commons. Hon. Members on both sides of the House would wish to ensure that where urgent constituency cases arise in a constituency that is, for the moment, not represented in the House, we should all do our best to ensure that the constituents do not suffer.

Mr. Frank Cook (Stockton, North): Will the hon. Gentleman concede and clearly state that this has nothing to do with sharing the burden of a constituency? The point made by my hon. Friend the Member for Middlesbrough (Mr. Bell) was that, by delaying the election, we are effectively disfranchising a whole constituency comprising about 60,000 people. Will the hon. Gentleman admit that?

Mr. Dorrell: I shall not admit that, because I am arguing not for indefinite delay but for sufficient delay to allow the issues that will be at stake in the by-election to be properly argued and deployed by the candidates. The issues that will be at stake are not simple. Brecon and Radnor is not a simple homogeneous constituency and it will take a significant period for the arguments to be deployed and the candidates to make themselves known.

Mr. Eric S. Heffer (Liverpool, Walton): To take this point to its logical conclusion, there could be an argument that by-elections should be held after the party conferences, because those conferences will give the people of Brecon and Radnor the opportunity to see the various leaders on television displaying their talent or lack of talent. That might be a good thing. I do not know; I am not arguing one way or the other. It is a point that the hon. Gentleman should consider.

Mr. Dorrell: I am grateful to the hon. Gentleman for his open mind on this point, although I cannot help but feel that it might be regarded as unduly partisan for a Tory Member to argue that the by-election should wait until after the Labour party conference.

Mr. Alfred Dubs (Battersea): The hon. Gentleman said — I think that I have followed his argument correctly—that it was necessary to have sufficient time before calling the by-election to enable the issues to be considered and the candidates to establish themselves. Why is this necessary in a single by-election when it is never the case when a general election is called? I should have thought that the same arguments apply.

Mr. Dorrell: It is in the nature of by-elections that they are called more suddenly than most general elections.

Mr. Dubs: Not true.

Mr. Dorrell: It is true. Few general elections are called with the public completely unaware of them. In a general election the issues are more generally deployed in the national press than is the case in a by-election.

Mr. Peter Thurnham (Bolton, North-East) *rose*——

Mr. Dorrell: Hon Members on both sides of the House wish to participate in the debate. I want to finish this argument so that other hon. Members have the opportunity to speak.

Mr. Coleman: Will the hon. Gentleman give way?

Mr. Dorrell: I have given way to the hon. Gentleman once already.

The constituency of Brecon and Radnor is not a simple constituency. I know it perhaps better than most hon. Members, because I held my first paid employment in the town of Brecon. The southern end of the constituency contains people who work in the coal mines of south Wales and the northern end contains people involved in hill farming and agriculture. It is almost inconceivable that any candidate, however accomplished his previous career, will have a background and degree of recognition in that constituency sufficient to allow his views and the electorate's reaction to them to be established without a reasonable period of debate during the election campaign.

Mr. Wigley *rose*——

Mr. Dorrell: I am drawing my remarks to a close.

I commend the hon. Member for Bolsover for giving the House the opportunity to discuss the proper time scale in which a by-election should take place. I hope that, in reaching its decision, the House will not confuse haste with democracy and will ensure that the decision is made in sufficient time to enable the constituents to be properly represented in the House. I hope that the matter is not so speeded up that the issues and personalities in the campaign are not given a proper airing.

Several Hon. Members *rose*——

Mr. Speaker: Order. I propose to call one more Back Bencher, and then I shall invite the Front Bench spokesmen to speak. The House has had a good run on this matter.

11.24 am

Mrs. Ann Clwyd (Cynon Valley): I believe that the electors of Brecon and Radnor will be eternally grateful to my hon. Friend the Member for Bolsover (Mr. Skinner). I say that with some knowledge, unlike some hon. Members who have spoken in the debate. From 1979 until I was elected to the House last year, I represented in the European Parliament the electorate of Brecon and Radnor. I believe that I have particular knowledge of the electors' wishes, especially since part of that constituency is now part of my constituency of Cynon Valley.

Mr. Colman: In view of my hon. Friend's experience as the MEP for that area and the fact that her constituency borders Brecon and Radnor, does she agree that we are looking to the convenience not of candidates but of electors? Brecon and Radnor contains many villages. Does she agree that these villages require individual attention and that, therefore, it is essential that they have representation by a Member as soon as possible?

Mrs. Clwyd: I thank my hon. Friend for making that important point. That is precisely why the Opposition favour the motion to issue a writ for this by-election so that the election can take place as soon as possible.

Mr. Beith *rose*——

Mrs. Clwyd: During the past 12 months, Brecon and Radnor has had the highest unemployment rate of any Wales constituency. That speaks for itself.

Mr. Beith: Will the hon. Lady give way?

Mrs. Clwyd: In a moment.

I pay tribute, as other hon. Members have done, to Mr. Tom Hooson, the former Member for Brecon and Radnor. I worked with him for five years. As might be expected we did not always see eye to eye. In fact, he took considerable dislike to a poll that I took in the constituency on attitudes towards the Common Market. My hon. Friend the Member for Bolsover rightly said that the constituents in Brecon and Radnor have become increasingly hostile towards the Common Market.

Much reference has been made by hon. Members to the importance of having a Welsh-speaking candidate in

[Mrs. Clwyd]

Brecon and Radnor. As a Welsh speaker, I do not believe that it is necessary in that constituency, because only 17 per cent. of the electorate speak Welsh. The EEC has acted in a particularly punitive manner towards an important industry in the constituency — Welsh whisky. The production of Welsh whisky could have been a very important industry.

Mr. Frank Cook: That's the spirit.

Mrs. Clwyd: I am told that some people believe that Welsh whisky is superior to Scotch whisky. [HON. MEMBERS: "Oh!"] The Common Market objected not to the whisky's flavour but to the fact that it was labelled in the Welsh language. It was called not Welsh whisky but Welsh chwisgi. The Common Market said, "This important product of Brecon and Radnor cannot possibly be called Welsh whisky. It must have a bilingual label." The producers of Welsh whisky were forced——

Mr. Speaker: Order. This is a fascinating matter, and one that I shall personally look into. However, the motion is about a writ for an English by-election.

Several Hon. Members *rose*——

Mr. Speaker: Correction—a Welsh by-election.

Mrs. Clwyd: I advise those who are thinking of spending some time during the next few months in this particularly beautiful constituency that, although it is not essential to speak Welsh, it is essential to be able to pronounce Welsh place names.

I make this point to hon. Members who intend spending time canvassing in the election. It is important, not to be able to pronounce Llanfairpwllgwyngyllgogerychwyrndrobwll-llandysiliogogogoch, but at least to be able to say Llandrindod Wells, Builth Wells and Brycheiniog, which is the Welsh name for Brecon, and Ystradgynlais, which is a very important town in the constituency of Brecon and Radnor because of its coal mining connections. There are strong feelings in that town about the rundown of the coal industry and the effect of lack of investment in the coal industry in Wales. That is a bit of advice to those who may be considering going to the by-election in the near future.

Mr. Adley: In view of what Mr. Speaker has just said about the hon. Lady being the last Back Bencher to be called in this debate, does she realise that she has a heavy responsibility? I may be deprived of the opportunity to concentrate on the transport aspects in the constituency. Therefore, will the hon. Lady, in her capacity as a former Member of the European Assembly and the representative there for the Brecon and Radnor constituency among others, say what importance she attaches to the continuance of the central Wales line as a railway artery through the constituency?

Mrs. Clwyd: I thank the hon. Gentleman for making that point. It is of great significance to the economy of the whole of Mid-Wales, and particularly Brecon and Radnor, that that railway continues in its present form. Not only the railway, but a good bus transport service is needed, and the constituents of Brecon and Radnor are most concerned about those services.

There is another liquid of great importance in this by-election which I have no doubt will be referred to continually throughout the campaign, and that is water.

Mr. Heffer: Can my hon. Friend tell us a little more about Welsh whisky? I can think of nothing better than going to Hay-on-Wye, browsing round the bookshops and then nipping into the local boozer for some Welsh whisky. Is that possible?

Mrs. Clwyd: I thank my hon. Friend for raising that point. I would be glad to provide him with a sample of that whisky, and one for you, Mr. Speaker. Once you have sampled this Welsh whisky, even if you have another favourite brand, you will soon switch to this one.

Mr. Wigley: Will the hon. Lady confirm that this particularly good whisky is manufactured by a former Plaid Cymru candidate in the constituency? I do not know whether his name has been selected for this by-election but Mr. Dafydd Gittins has had considerable difficulty because of the EEC and deserves all support in the by-election to ensure fair play in the future.

Mrs. Clwyd: The fact that this Plaid Cymru producer is a good publicist does not detract from the whisky. He obviously has an ally in the hon. Member.

Water is of particular importance in this constituency. It has some of the largest reservoirs in the whole of Wales and it supplies Birmingham. Unfortunately, the electors of Brecon and Radnor, like many other people in Wales, pay more for their water than people in Birmingham. This is a strong issue and a bone of contention in the area.

Ms. Clare Short (Birmingham, Ladywood): The people of Birmingham are extremely grateful to Wales for the beautiful flow of sweet water that we have. If the payments that we make to the people of Wales are not adequate, I am sure that some arrangement can be made.

Mrs. Clwyd: I thank my hon. Friend for that generous offer. I am sure that it will be looked at with great favour by the electors of Brecon and Radnor, who feel particularly aggrieved by the difference in pricing.

Mr. Beith: Does not the hon. Lady realise that the electors of Brecon and Radnor may just as well be aggrieved by these proceedings, which are not designed to result in the issuing of a writ, to be brought to an end by other proceedings, but are designed to delay the by-election? Will they not also be aggrieved by the fact that they see the House of Commons being prevented from discussing issues on which either side may have strong views by a deliberate diversion?

Mrs. Clwyd: I am pointing out some of the issues that are of pressing importance in the impending by-election, and to show why I think that the suggestion of my hon. Friend the Member for Bolsover should be backed by all hon. Members.

A massive increase in water charges, which recently came into force, has made water a political issue in Wales once again. That is why we should pay considerable attention to the problem.

Brecon is renowned for another important production —Brecon bubbly. Recently, we have had considerable problems with the water supply in Norman Shaw South. As a show of support for an area that is suffering from massive unemployment and for a developing industry, we may introduce the beautiful Brecon-produced water known as Brecon bubbly into the restaurants of the House.

Mr. Speaker: Order. Although I hope that the hon. Lady is right, what she is saying is going rather wide of the by-election.

Mrs. Clwyd: I respect your ruling, Mr. Speaker.

Tom Hooson was a perceptive man. However, he objected to the poll on the EEC that I carried out in the constituency. It showed that the majority of people were worried about the EEC's policies and the way that they were affecting the constituents of Brecon and Radnor. Mr. Hooson said in a debate on the economy and employment of Wales:

"I would have very little confidence in the competence of even the present Cabinet to create jobs."—[*Official Report*, 6 May 1982; Vol. 23, c. 320.]

His words have, unfortunately, been shown to be true.

Mr. Hooson said—to those who will be considering whether to support the motion, this may be of some relevance—in his maiden speech:

"In numerous post-war elections my party strove hard to win this seat. It is a remarkable tribute to Mr. Roderick and Lord Watkins, his predecessor . . . that between them they successfully fended us off for over 40 years. The best prizes in life are those that are hard to achieve, and this prize is quite simply the loveliest constituency in the country . . . I invite hon. Member to take their holidays in the constituency if they wait until we have completed the Brecon bypass."—[*Official Report*, 23 May 1979; Vol 967, c. 1156.]

The Brecon bypass is one of the few roads in Wales that have been completed while the Government have been in office. The time is now appropriate for hon. Members involved in the by-election to go to that constituency and use that wonderful bypass, unless they happen to be on the right side of the House, when they will obviously wish to linger a while in Brecon and Radnor.

It gives me great pleasure to support the motion. It is in the interests of the constituents of Brecon and Radnor, particularly the aggrieved farmers, who are suffering from the effects of milk quotas and the other cuts imposed by the Government to hold a by-election as soon as possible so that they can show their support for the Labour candidate.

Several Hon. Members *rose*——

Mr. Speaker: Order. Mr. Peter Shore.

Mr. David Crouch (Canterbury): On a point of order, Mr. Speaker. I listened to your statement before the hon. Member for Cynon Valley (Mrs. Clwyd) addressed the House that she would be the last Back Bencher that you intended to call in the debate. Normally, when under the ordinary procedures of the House we are engaged in debate, we know exactly when Front-Bench spokesmen will rise. Today, we have had very little warning. May I ask whether, on this very important matter of democracy in practice and at work, it is your intention to call those Back Benchers who feel deeply about representing their views to the Front-Bench spokesmen? There are strong feelings among Back Benchers about the moving of a writ and the representation in the House of constituents who at present are unrepresented. Will you be calling Back Benchers after the interventions of the two Front Bench spokesmen?

Mr. Speaker: The hon. Member for Canterbury (Mr. Crouch) is an experienced Chairman. In my view he should listen to what right hon. Members on the two Front Benches say. I hope that the hon. Gentleman was here at the beginning of the debate. I draw his attention to what I said then, which was that I hoped that proceedings on these matters would not be artificially prolonged and that today's proceedings would be conducted in our best traditions. If I now call the Front-Bench spokesmen, I think that the hon. Gentleman may be satisfied.

11.41 am

Mr. Peter Shore (Bethnal Green and Stepney): This has been an important and very interesting debate, and I can understand why other hon. Members wish to make further contributions to it.

Like others, I listened with interest and enjoyment to what my hon. Friend the Member for Bolsover (Mr. Skinner) said in his characteristically pungent speech when moving the motion for the writ for a by-election at Brecon and Radnor.

Hon. Members will know that the custom and practice of the House is for any new writ to be moved by the Chief Whip of the party to which the Member vacating the seat belonged. That is not a rule of the House, but it is and has been a long-entrenched custom. The question that has been very properly debated is whether we should depart from that custom on this occasion.

As I listened to the debate and the reasons advanced for holding an early by-election by moving the writ today, I found the arguments very compelling. They were put most persuasively. I believe that my hon. Friend the Member for Bolsover has good reason to suspect that there is considerable nervousness on the part of the Government about the holding of an early by-election. [HON. MEMBERS : "Rubbish."] They have every reason to be nervous, because there is no doubt that the outcome of an election will be determined in part by their neglect of the rural areas, especially Welsh rural areas, to which attention was drawn in a debate earlier this week. There is a clear and adverse swing against them occurring in the country as a whole, and this has been enormously reinforced, as Government supporters are beginning slowly to recognise, by statements about the future dismantling of so much of the welfare state.

Mr. Adley: I do not want to trespass on the party political part of the right hon. Gentleman's comments, but may I take him back to what he said a moment ago, because he moved rather quickly from the procedural aspect of the motion? If some of us who had hoped to catch Mr. Speaker's eye are not able to do so—we may have to wait for another occasion — will the right hon. Gentleman say from his experience whether, if today's motion is lost, it is open to the hon. Member for Bolsover (Mr. Skinner) or any other hon. Member at any time to seek again to move the writ for this by-election?

Mr. Shore: I bow to authorities greater than my own on this, but that is my understanding.

I want to return to the reason why I found the arguments for the moving of the writ and an early by-election so compelling. I have mentioned what I believe to be the undoubted anxieties of the Government. For several months now they have been anxious to avoid by-elections whenever possible. However, I have been impressed by the fact that hon. Members representing all parties have supported the moving of the writ. The hon. Member for Caernarfon (Mr. Wigley) gave it his support on behalf of Plaid Cymru, the hon. Member for Cardiff, North (Mr. Jones), a Welsh Conservative, said that he was in favour of going ahead, and many Opposition Members obviously said the same. The only exception to this almost

[Mr. Shore]

unanimous view was the Liberal Chief Whip, the hon. Member for Berwick-upon-Tweed (Mr. Beith), who seemed not at all anxious that we should even debate whether the writ should be moved. I can only assume that this reflects the undoubted anxiety that his party has because it has not even worked out its own arrangements with its alleged alliance partner in the area.

Mr. Gwilym Jones: I am afraid that the right hon. Gentleman misquoted me quite dramatically in that I sought to reassure the hon. Member for Bolsover (Mr. Skinner) and the House that the Conservative party in Wales was not reluctant and was looking forward to an early by-election but that most emphatically I did not support the moving of the writ today, because I felt that these matters should be conducted in the proper way.

Mr. Skinner: It is easy to tell that he is a lawyer.

Mr. Shore: In that case, I take it that the hon. Gentleman has given the motion his qualified support. He is very much in favour of the matter not being delayed beyond the minimum time reasonable for the election to be held. I take that to be broadly in support of the motion that the writ should be moved at an early date.

Mr. Beith: It may be that from where the right hon. Gentleman is sitting he was unable to see that, before he rose to speak, I sought to catch Mr. Speaker's eye so that I could assert that Liberals would like the by-election as soon as possible so that our candidate could win it and that this morning's proceedings were not intended to bring that about, as he knows perfectly well.

Mr. Shore: Unfortunately, the hon. Gentleman did not make that speech. If he had made it, he would have found himself contradicting what he said in his earlier intervention.

As I say, I was impressed by the obvious support from all parties, with the exception of the Liberals, that the writ should be moved today. I was also impressed and was bound to be by the fact that so many hon. Members who represent Welsh constituencies and who know Wales backed the moving of the writ. I refer of course to the hon. Member for Caernarfon, my hon. Friend for Cynon Valley (Mrs. Clwyd) and, if he will allow me to, the hon. Member for Cardiff, North.

There is undoubtedly a strong feeling in the Principality and among the Members of Parliament who are associated with it and who represent it, that there should be an early election. It is my belief from all that I hear from the area that the people of Brecon and Radnor want an early election, both because they want to be represented here in Parliament and because they wish to have the opportunity to pass their own judgment upon this Government. I think that the country would wish that also. I think that there is a strong wish throughout Britain that an opportunity should be provided to fire a warning shot across the bows of the Government as they plunge ever further into controversial and damaging policies in this Parliament.

My hon. Friend the Member for Denton and Reddish (Mr. Bennett) referred to this. In the past there have been scandalous delays in the holding of by-elections. In July 1973 a former Member, Mr. Dick Taverne, whose general political conduct we in the Labour party have good reason to condemn and deplore, did a useful service to the House by drawing attention to the conventions of the time in the case of the Berwick-upon-Tweed by-election. He said that, unless a move was made, there would be a delay of no less than five months before that by-election could be held. He attempted to move a writ and to bring forward the by-election to make sure that the people of that constituency were not left unrepresented for such a long time.

In that same debate in July 1973 I recall the leader of the Liberal party drawing attention to a longer delay of six months affecting the by-election in Orpington in 1962, because the Government Chief Whip at that time was too frightened to move the writ. All that contrasts sharply with other occasions. For example, in June 1973 only three weeks were allowed to elapse before the by-election in Ripon took place.

The defence of the then Leader of the House our former colleague, Mr. James Prior — [HON. MEMBERS: "What?"]—I meant the former Leader of the House and our continuing colleague in the House the right hon. Member for Waveney (Mr. Prior). He said in the debate in 1973 that if Mr. Taverne moved the motion, it could not be moved again that Session. He therefore proposed an amendment to the effect that the House should pass to the Orders of the Day, which was carried. Mr. Taverne returned to the matter on 19 July 1973, but the debate was adjourned without a Division.

A most important factor influencing hon. Members on both sides of the House at that time was the work then going on in the Speaker's Conference, which was sitting at the time. It was properly argued that the issuing of writs and the delay in holding by-elections should be a subject for its consideration and report, and that the House should await the outcome.

That was a very important Speaker's Conference. I remind the House that it reported in November of that year and put forward several guidelines of which we should take note today. The most important were, first:

"The motion for a writ for a by-election should normally be moved within three months of a vacancy arising".

and second:

"The total period (from vacancy to the moving of the writ) should not be more than four months."

The Speaker's Conference also considered the custom of allowing the party that formerly held the seat to move the new writ and thus decide the date of the by-election. That was found to be reasonable. I have no reason to believe that any of the parties in the House have departed from that broad conclusion since then. No change was recommended, except for when a vacancy occurred during the recess.

No formal resolution was made to give legal standing to those guidelines from the Speaker's Conference. However, the rule has been observed in almost every by-election since 1974.

Mr. Andrew F. Bennett: Does my right hon. Friend accept that, because the House made no formal resolution on that matter, several other matters that were considered by that Speaker's Conference, especially the calling of by-elections during recesses, were never altered? Therefore, is there not a strong argument for having another Speaker's Conference so that this formal agreement and the other recommendations that came from the Speaker's Conference can be made part of the Standing Orders of the House?

Mr. Shore: My hon. Friend makes a serious point, but he will forgive me if I do not give him an off-the-cuff reply. I wish to consider his suggestion more carefully.

In most cases, by-elections have been held well within the time limit recommended by the Speaker's conference and, as we know, the vacancy in Brecon and Radnor occurred on the death of its Member on 8 May, which was only one month ago. If my hon. Friend has reason to fear that the Government will not move the writ for a by-election within three months of that date, it could well be right for us to support his motion. However, having listened carefully to what he said, I believe that on this occasion at least he has not established his anxieties with the evidence that I would need to convince me that the by-election would be unreasonably delayed. Although I do not know when the Government intend to move the writ, I have no evidence that they wish to break with the established convention, but that is a matter on which the Leader of the House could easily give us a cast-iron assurance.

For that reason, and because in a later debate today I shall try to persuade the House not to change its established rules and procedures without the fullest possible consideration and discussion, I urge my hon. Friend the Member for Bolsover to withdraw his motion.

Mr. Skinner: As I said at the outset, the main reason for my moving the writ was to test the opinion of the House. I also said that I might not secure the approval of the House for the withdrawal of my motion. If that were the case, other action would have to be taken. Of course, if we are assured of a relatively early by-election, my purpose will have been achieved. Another major reason for doing it was to show Back-Bench Members that they have the power to move writs for by-elections. Perhaps in the future other hon. Members will take a hand in matters when the Government of the day, of whichever colour, seem to be unwilling to move a writ.

I shall make the necessary withdrawal — [HON. MEMBERS: "No."] — but I should also say that, if the House objects, I can do nothing about it. I am trying to be obliging today. Mostly it is revolution, but today it is roses, so I shall make the necessary withdrawal—[HON. MEMBERS: "No."] Do you hear the voices, Mr. Speaker?

Mr. Speaker: Order. I have not put the Question yet.

Mr. Skinner: I beg to ask leave to withdraw the motion.

Hon. Members: No.

11.59 am

The Lord Privy Seal and Leader of the House of Commons (Mr. John Biffen): I am sorry that the desire of the hon. Member for Bolsover, (Mr. Skinner), who has had such a good morning, to withdraw his motion has been thwarted by the House. I hope that on further reflection the House will feel that the matter has been considerably canvassed and that we should proceed to consider other business.

I thank the hon. Member for Bolsover for opening his remarks with generous tributes to Tom Hooson who, during his time in the House, earned and deserved a friendship which ranged across all parties. I had the privilege of knowing him long before he came to the House, and I felt great personal sadness on his death.

The right hon. Member for Bethnal Green and Stepney (Mr. Shore) reminded the House that the debate has been a repeat of one held in 1973, which was initiated by Mr. Dick Taverne. It is an interesting commentary on the changing nature of politics that the hon. Member for Bolsover so easily sits with the Taverne arguments in this respect. The twin faces of Socialism doubtless will be fashioned and reconsidered as necessity requires. I congratulate the hon. Gentleman on the skill with which he is becoming a member of the Establishment.

I have only two observations to make, because the debate has to some extent answered itself. First, the time may have come to resolve the matter so that we can move to other issues for consideration later this morning. Secondly, how one resolves the question of calling by-elections is an important issue. As the right hon. Gentleman said, we are served by established conventions in this respect. Since 1911 it has been the convention that the Chief Whip of the party holding the seat should move the issuing of the writ, and that the writ should be moved within four months of the vacancy occuring. On the latter, I assure the House that there is no question of the Government doing anything other than abiding by that convention. On the former, my right hon. Friend the Patronage Secretary having the responsibility for moving the writ on behalf of the Government, which is being challenged, the House is invited this morning to substitute the hon. Member for Bolsover for my right hon. Friend the Patronage Secretary. With all the generosity in the world, I do not call that a fair switch. I cannot recommend that to the House.

On this occasion I suggest that we remain with our normal conventions and, therefore, I advise the House not to accept the motion. To negative the motion would, however, prevent it from being moved again in the present Session, unless the House agreed to overrule that decision. Therefore, I beg to move, to leave out from "That" to the end of the Question and to add instead thereof:

"this House do pass to the Orders of the Day."

12.3 pm

Mr. Ian Mikardo (Bow and Poplar): I rise to oppose the amendment with all the strength that I can command and whatever eloquence I can muster. I oppose it for two reasons. First, it derives from a point put a little while ago by the hon. Member for Canterbury (Mr. Crouch), who asked whether it would be proper for more Back Bench Members to express their views upon the matter which was before us—that is, the main Question. He was right. You will recall, Mr. Speaker, that when you called my right hon. Friend the Member for Bethnal Green and Stepney (Mr. Shore) to speak, a considerable number of Back Bench Members on both sides of the House sought to catch your eye to speak. I know that we have spent some time on it, but this is a matter of great importance and I should have liked to make some observations on it. At least one dozen other hon. Members, divided pretty equally among the parties, also wanted to speak. Those hon. Members should have a chance to say what they want to say on the main Question before we proceed to the Orders of the Day.

My second reason for objecting to the amendment is that the Orders of the Day contain a motion which is a gross abuse of the privileges of the House and which contains the seeds of considerable danger — *[Interruption.]*

Mr. Heffer: On a point of order, Mr. Speaker. I am sure that the whole House wants to hear what my hon. Friend has to say. He is making an important point and there are all sorts of conversations going on. May we be allowed to hear what my hon. Friend is saying?

Mrs. Kellett-Bowman: The House does not want to hear what he has to say.

Mr. Speaker: I could hear quite clearly what the hon. Gentleman said. I am sorry if the hon. Member for Liverpool, Walton (Mr. Heffer) could not.

Mr. Mikardo: You probably did not hear it, Mr. Speaker, but the hon. Member for Lancaster (Mrs. Kellett-Bowman) said that the House does not wish to hear what I have to say. Any hon. Member who does not wish to hear what I have to say, including the hon. Lady, is free to depart. I shall be so arrogant as to assume that those who choose to remain rather than go for a coffee or a pre-lunch sherry do so because they want to hear what I have to say.

Mrs. Kellett-Bowman: The hon. Lady does not wish to hear what the hon. Gentleman is saying; she wishes to remain to see whether a more intelligent speech comes next.

Mr. Mikardo *rose——*

Mr. Speaker: Order. I do not think that the hon. Member is lost for words, but I hope that the House will keep the temperature down. That is very important.

Mr. Mikardo: I was about to say, when you kindly intervened, Mr. Speaker, that I thought that you and the House would take the view that that type of observation was not worthy of being credited with a rejoinder. It was intended to raise the temperature, and it lowered the tone of our proceedings. We can live without yah-boo stuff in the House, whether it comes from a male or a female hon. Member. Yah-boo stuff just lets us all down.

I shall continue to make my serious point, irrespective of interruptions. There were complaints earlier from my hon. Friend the Member for Workington (Mr. Campbell-Savours) and from the hon. Member for Berwick-upon-Tweed (Mr. Beith) that the motion was an abuse of the time of the House. I should like to tell them, and anybody else who thinks like them, that those who have concurred with and connived in the use of a private Member's motion not to express the view of the hon. Member but to alter the arrangements for the business of the House and who then talk about others abusing the procedures of the House should remember the proverb about people in glasshouses not throwing stones. I oppose the amendment and our proceeding to the Orders of the Day because one of those orders is a clear abuse of the privileges and procedures of the House.

Mr. Stefan Terlezki (Cardiff, West): What is this?

Mr. Mikardo: The order also sets a dangerous precedent. In the next Session of Parliament the chance of a private Member's Bill being adequately debated in the House could depend not on the place of that Bill in the ballot, as it does under our regular rule, but on whether the promoter can persuade an hon. Member who has drawn a place in the ballot for private Member's motions to use that opportunity to create a timetable or non-timetable motion for the Bill. That is a fiddle; there is no other word for it. It is a crooked piece of procedure and we ought not to condone it. *[Interruption.]* Conservative Members usually need a little rest with a meal and some other refreshment before they get into this public school yah-boo attitude. They must have had a more than usually expansive breakfast.

We must be very careful about this matter because it could seriously interfere with the rights of private Members and the chance of private Members' Bills getting through. I believe that there is a case for examining whether there should be more private Members' time than there has been in recent Sessions, but that will come afterwards. If we accept the precedent in the motion of the hon. Member for Brighton, Kempton (Mr. Bowden), I believe that in the next Session private Members' Bills will not get the priority that they should have under the balloting method that we have always adopted and which, until it is changed—if it is ever changed, which I doubt—governs and always has governed our procedures on private Members' Bills.

Just think of all the undignified arrangements that there could be in the next Session. Whoever draws first place in the ballot for private Members' motions will be faced with a queue of Members with Bills at various stages asking him to put down a business motion to facilitate the passage of their Bills. That Member will then have to choose between the various Bills and the real object of private Members' motions will disappear.

It has been one of the great traditions of the House that Members lucky enough to draw a place in the ballot for private Members' motions express an opinion and ask the House to concur in that opinion about some important issue of policy which specifically affects their constituents. As we know, private Members' motions are very often concerned with the particular problems of individual constituencies.

If we reached the Orders of the Day on this occasion, it would be rather nice if the first two motions could be disposed of quickly so that we can proceed to the third motion which relates to conditions in Brighton, and especially in Kemptown. That would allow the hon. Member for Kemptown to do his duty by his constituents, who must be wondering why the hon. Gentleman has not used this great opportunity which comes at most once in a Parliament. I have been here for 35 years, but I have never yet drawn a place in the ballot. His constituents must be wondering why, having done so well, he has not taken advantage of it in order to seek policy changes which would benefit his constituents.

Mr. Adley: Does not the hon. Gentleman consider that he may have underestimated the danger? He appears to assume that the collusion which might take place with somebody who has been successful in the ballot would be restricted to that person and to the person who came top of the ballot. May I put to him an alternative proposition which could be a good deal worse. The hon. Gentleman, who is an experienced Member of Parliament, knows that one does not have to win a place in the ballot to present a Bill. The hon. Gentleman, or any hon. Member, can present a Bill for First Reading at any time. It is a very simple procedure. Far from the collusion having to depend upon an hon. Member who has been successful in a ballot working with the hon. Member who has been successful in the ballot for private Members' Bills, it could be much more sinister if the hon. Member who was successful in the ballot introduced for First Reading a Bill upon any

subject that he chose. That would be an even greater corruption of the parliamentary procedure than that to which the hon. Gentleman has referred.

Mr. Mikardo: I was coming to that point. I am grateful to the hon. Member for Christchurch (Mr. Adley) for making it. He has made it perhaps more clearly than I could have done. Therefore, I shall not abuse the time of the House by repeating what the hon. Gentleman said. There is a danger that this could be done with ten-minute Bills. All one would have to do would be to get a ten-minute Bill through the House unopposed and then go to an hon. Friend who had won first place in the ballot and get him to put down a business motion for that day. It would mean that ten-minute Bills which were passed on the nod in a thin House at midnight on a Wednesday could jump the queue ahead of all the balloted private Members' Bills. The hon. Gentleman is right to draw attention to this danger, and I am grateful to him for doing so.

Mr. Douglas Hogg (Grantham): Does the hon. Member for Bow and Poplar (Mr. Mikardo) accept that there is another danger to which he has not yet referred —that the Government of the day could use this as a precedent? They could use the motion to introduce Government legislation by this means, which would prejudice private Members' legislation.

Mr. Mikardo: I do not know what divine inspiration has descended from Heaven upon Conservative Members. It is manifest that some of them have become mind readers. Like his hon. Friend the Member for Christchurch, the hon. Member for Grantham (Mr. Hogg) has anticipated precisely the point that I was about to make. It is within the knowledge of all hon. Members that occasionally Government Whips have been known sub rosa to seek to influence the course of private Members' business. They are not supposed to do so. I was very shocked when for the first time in the last Parliament, shortly after 1979, a Conservative Member asked me to pair on a private Member's motion. He was a new Member of Parliament. I said, "You cannot pair on private Members' business because you cannot be whipped on it." He said, "I've been." I was shocked. As the hon. Member for Grantham rightly said, there is great danger in this procedure. It is because the motion, which forms part of the Orders of the Day, opens the floodgates to that sort of procedure that I oppose the motion.

Mr. Nellist: I accept that my hon. Friend has a far greater knowledge of procedure than I have. He may well have noticed that there is an amendment on the Order Paper in my name and that of the hon. Member for Grantham (Mr. Hogg). It is designed to bring before the House today the Minimum Wages Etc Bill, to provide a minimum wage of £115 a week for the 8 million workers —one third of the work force—who are on low pay.

I accept my hon. Friend's arguments about precedent and the desirability or otherwise of that precedent, but will he agree that there are certain Labour Back Benchers who, if the precedent is set, will be more than happy to keep the House sitting for the whole weekend if that will mean that 8 million workers can have a decent rate of pay?

Mr. Mikardo: Here there are signs of yet another danger. My hon. Friend has referred to the amendment that he has tabled to the motion of the hon. Member for Kemptown. As we all know, the selection of amendments is within the discretion of Mr. Speaker. Therefore, in a situation such as my hon. Friend envisaged, Mr. Speaker would be faced with the task of having to decide between a number of different private Members' Bills and whether they should be given special time for debate. I am sure that neither you, Mr. Speaker, nor any of your successors—may the first of them be long distant—want to be faced with the obligation of having to make that choice.

Mr. Dorrell: I fear that the hon. Gentleman may have mislaid a page of his notes, because there is a further danger that he has not yet covered and that he might want to mention. I refer to the pressure that is brought to bear on hon. Members by outside interest groups. We are all familiar with the letters that are received by people who win high places in the ballot for private Members' Bills every November. The pressure groups outside are well aware that, depending on the result of that ballot, that is the one time of the year when a private Member has a realistic chance of introducing a Bill that will get on to the statute book.

Does the hon. Gentleman agree that, if the precedent were accepted and became a permanent part of the parliamentary process, every six weeks, when there is a ballot for private Member's motions, all those pressure groups would immediately write to hon. Members commending particular measures which it would be possible for a successful Member to introduce under the timetable motion proposed by my hon. Friend the Member for Brighton, Kemptown (Mr. Bowden)?

Mr. Mikardo: What the hon. Gentleman says is right, but I would not look upon it as a grave danger, because I think that hon. Members are grown-up people and should be willing to deal sensibly with pressures upon them in relation to what they conceive to be the merits. I know that what the hon. Gentleman says is right because, although I have never drawn a place in a ballot for private Members' motions, I once drew No. 2 in the ballot for private Members' Bills, and I had 83 different proposed Bills presented to me in the course of 72 hours, some of them with huge bundles of documents which had obviously taken months to prepare. It is a problem, but I do not regard it as a danger.

Mr. Dorrell: I am sure that it is right to say that hon. Members can resist the pressures, but surely the hon. Gentleman should consider the effect on the groups outside. It is one thing for a group to know that once a year it has to make the sort of effort to which I referred. It is quite another thing every six weeks to have to organise and present an argument to the House of Commons. Under the present system it happens once a year, and if pressure groups are unsuccessful they know that they have to wait another year.

It has become increasingly evident while I have been speaking—not so much from what I have said as from the helpful and constructive interventions of hon. Members — that the procedure contained within the motion tabled by the hon. Member for Kemptown opens a whole can of worms. On those grounds, therefore, we should not proceed to the Orders of the Day. I apologise to any hon. Member who finds that my speech has been of a lower intellectual quality than his or her standard of speech, but I can only do my best, and I rest my case.

12.25 pm

Mr. David Crouch (Canterbury): Yesterday, when I addressed a question to my right hon. Friend the Leader of the House, I was at a loss for words because they were not my words; they were those of Shakespeare. I shall not weary the House by doing that now. I know what I want to say today.

I am glad that I have caught your eye, Mr. Speaker, because I was worried that we would move to the business of the House before we had properly considered the matter which I believe to be of much greter importance—the moving of the writ for the by-election in Brecon and Radnor. I speak as a Back Bencher who is reluctant to give ground to anyone on the Front Benches, much as I respect the wisdom of leaving some matters to the judgment of the Front Bench.

I listened to the right hon. Member for Bethnal Green and Stepney (Mr. Shore) recommend to the hon. Member for Bolsover (Mr. Skinner) that he should withdraw his motion. I do not agree with that. I feel that we should have an opportunity today to consider a matter of the greatest importance — the representation in this Parliament of constituents deprived of such representation by the death of an hon. Member.

I should like to pay my tribute to the late Tom Hooson whom I so greatly respected, not just as a friend but as a wise counsellor in my party, and for his political activities here. He was a man of great diligence and activity in his constituency. The constituency is now deprived of the work of a Member of Parliament. I am not content to leave that matter in the hands of the Patronage Secretary without some debate.

For the first time that I can recollect in nearly 20 years, we have had a full debate about why there should be representation of all electors all the time in this Parliament. I abhor a vacuum, and there is a vacuum when there is even one person missing in the House. I am not interested in the 80 who sit on the Front Bench and have Government appointments, I am interested in the 650 Members. There should be 650 Members of Parliament to represent the electors.

It may be suggested that I have no right to interfere with judgments that are of importance to the Principality of Wales. I have no connection with Wales but I have a peculiar understanding of some of its problems. When I rose this morning on a point of order you referred to me, Mr. Speaker, as one of your panel of Chairmen of Committees. In a way, I represent you, Mr. Speaker, in Committee. I had the great and peculiar honour some months ago of chairing the Welsh Grand Committee. I was informed particularly and even peculiarly of the problems which face the people of Wales and their representatives in this place. It was a valuable experience for me. When I heard that it was felt by some that the interests of the electors of Brecon and Radnor should at least be aired in a debate I wanted to participate in it.

Ms. Clare Short: Does the hon. Gentleman agree that there are two ways in which constituents can fail to be represented in this place? They cease to be represented when there is a delay in moving a writ for a by-election. Secondly, they would cease properly to be represented if a procedure were used which tied us all down and kept us in the House throughout weekends. That would mean that we would be unable to return to our constituencies to represent the interests of our people. We must be able to meet them and to discuss their problems and troubles. We should not move on to the Orders of the Day. If we do so, we shall be in danger of diminishing our ability to represent our constituents. I speak for myself and the other 649 Members.

Mr. Crouch: I accept what the hon. Lady has said. She has brought us to the nub of the issue. I agree that it would be wrong for us to move on to consider the Orders of the Day. Following the initiative of the hon. Member for Bolsover, we should consider the writ and give it proper priority. The hon. Gentleman's move was not precipitate but it would be precipitate of us to move quickly to the other business, which would lead to many disadvantages for Members and electors. To do so would produce real disadvantages in the practice and working of democracy in this place. We should not do that. We should not even give ourselves the opportunity of doing so.

Perhaps we should provide an opportunity for consideration to be given to the procedure that has led to the appearance on the Order Paper of the motion of my hon. Friend the Member for Brighton, Kemptown (Mr. Bowden). We have a Procedure Committee and it could properly consider the innovation that has been brought before us by my hon. Friend, who, aided by some of his hon. Friends and, no doubt, by Opposition Members, has dreamed up the idea of prolonging the sitting of the House and, by the actions of one or two Members, enabling it to consider business over the weekend. If this procedure is adopted, we shall not be in our constituencies on Fridays, Saturdays and Sundays.

Mr. Nellist: The hon. Gentleman has given reasons why there should be a full attendance in this place. There is an additional reason for the lack of attendance that has nothing to do with the replacement of deceased Members and the moving of writs. I refer to the part-time nature of many hon. Members who moonlight in other jobs. Perhaps we should consider moving a motion that states that a Member of this place should have only one job and that that job should be the representation of his or her constituents.

Mr. Crouch: The hon. Gentleman will have an opportunity to introduce a separate debate on that issue if he is lucky in drawing No. 1 place in the Ballot.

Ms. Jo Richardson (Barking): Perhaps the hon. Gentleman will agree that we have overlooked another important aspect. We have been talking about the difficulties which face us as Members of this place, but we have not discussed the difficulties that face the staff. With only a couple of days' notice, they could be kept here over weekends. This would obviously infringe their rights to leisure time at the weekends. They already work enough unsocial hours. They would be on a nerve-wracking edge if they did not know whether they would have to remain in the House over weekends. I know that the House and its wishes take precedence over these considerations, but surely the interests of the staff should be taken into account and, therefore, we should not reach the motion of the hon. Member for Brighton, Kemptown (Mr. Bowden).

Mr. Crouch: I think that sometimes both Front Benchers and Back Benchers neglect to consider the servants of the House, who serve us so magnificently and diligently without so much as a whimper of complaint. They do not have the Floor of the House to make such

complaints. We should consider them and how we put them to disadvantage—even inefficiency—by making it almost impossible for them to carry out their task.

Inconvenience is caused not only to the servants of this House, but to the servant of my house — my wife. *[Interruption.]* I phoned her last night and she said, "Will you be in for dinner?" I said, "I do not know." She said, "What about breakfast on Saturday?" I said, "I do not know." She asked, "Should I buy a joint for Saturday lunch?" I said, "I do not know." She asked, "What about Saturday supper?" I said, "I do not know."

Sunday is a day of rest and the day of the family luncheon. It is impossible for me to decide what I can do at the weekend. My wife is in despair, wondering whether she will see me later tonight or not until the end of next week.

Mr. Kenneth Carlisle (Lincoln): Not being married, may I point out to my hon. Friend that he has not yet told us whether his wife wants to see this new procedure come about?

Mr. Crouch: I shall consult my wife. I hope that there will be no report about what I have said about the servant in my house, because that might be misinterpreted. We use words here that are understood my hon. Members and are parliamentary language, but they might be misunderstood by my wife.

You have pleaded, Mr. Speaker, that we should be serious, and I agree. I have said that I will not quote Shakespeare again, though, heaven knows, he is serious enough. He is certainly as serious as the hon. Member for Bolsover, who has prompted me to support him.

The hon. Member for Bolsover is smiling today and is a different man from what he was in the past. He used to use derisory phrases about me. He once called me Wilfrid Hyde-White. I cannot think why. As the House saw yesterday, I am not a very good actor.

This is a serious matter and I know that some hon. Members, including my right hon. Friend the Leader of the House, want to get on to the next business.

Mr. Nellist: Will the hon. Gentleman give way?

Mr. Crouch: I have given way and I want to draw my remarks to a close, but I will give way to the hon. Gentleman if he will be brief.

Mr. Nellist: The hon. Gentleman's response to my hon. Friend the Member for Barking (Ms. Richardson) should have been longer. She asked him about the conditions of those who work in this place. Like me, the hon. Gentleman will know that, as this place is a palace, it is not covered by the regulations that apply to shops, factories and so on. Fire regulations and the Health and Safety at Work etc. Act 1974 do not apply here.

The hon. Gentleman will also know that most accidents take place towards the end of shifts or in periods of overtime. We may have witnessed such an accident this week when chemicals were put into the water supply at the Norman Shaw South building. Does the hon. Gentleman agree that if the staff of the House are asked to work much longer than their normal working hours, not only will our working conditions be affected, but their health and safety will be put at risk?

Mr. Crouch: I shall not go far up that road, but I am concerned about health and safety and I take the hon. Gentleman's point.

I will draw my remarks to a close. On an unusually well-attended Friday sitting, the hon. Member for Bolsover has given us the opportunity to consider the most important question of all, which is the representation of the people. That is what we are here for.

Much as I admired the perspicacity and tenacity of the hon. Member for Bolsover——

Mr. Adley: Will my hon. Friend give way?

Mr. Crouch: No. I have admired the fact that the hon. Member for Bolsover has made such use of "Erskine May" in the past five days that few of us have been able to get access to it, but I agree with my right hon. Friend the Leader of the House that we would not swap the Government Chief Whip for him. I trust the judgment of the Chief Whip. We have seen on the front pages this week an example of the magnificent judgment of my right hon. Friend the Chief Whip.

On that happy note, and without any more references to anyone, I must say that I am unhappy to move on to the Business of the House, but I hope that I have made my point.

Mr. Peter Bruinvels *rose in his place and claimed to move,* That the Question be now put.

Question put, That the Question be now put:—

The House divided: Ayes 201, Noes 109.

Division No. 232] **[12.40 pm**

AYES

Alexander, Richard	Craigen, J. M.

Main Question, as amended, agreed to.

Resolved,

That this House do pass to the Orders of the Day.

Petitions

TOWER HAMLETS (HOUSING)

1.5 pm

Mr. Ian Mikardo (Bow and Poplar): I beg to ask leave to present a petition from many of my constituents, which states:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of UK Residents Sheweth:—

that the substantial reduction, resulting from the policy of Her Majesty's Government, in the funds available to the London Borough of Tower Hamlets for the maintenance and repair of the public housing stock in the Borough is causing a large and growing number of the families in that stock to live in conditions intolerable in a civilised society;

that there is an unduly high incidence of leaking roofs, walls growing condensation-induced fungus, defective plumbing, broken windows, peeling wallpaper, lifts out of action and other unnecessary burdens on residents which could be lifted if adequate resources were available;

that overcrowding and homelessness are equally rife;

that not only people's homes but also their environments are deteriorating fast; and that all these defects and dangers continue to grow.

Wherefore your Petitioners pray that your Honourable House will demand that Her Majesty's Government begin to pay more attention to people's needs than to monetarist mathematical formulae, and provide the London Borough of Tower Hamlets, and other similar authorities, with adequate resources to maintain, repair, improve and extend their housing stock in order to make it possible for their citizens to live in safe, healthy and comfortable homes.

And your Petitioners, as in duty bound, will every pray, etc.

To lie upon the Table.

TOWER HAMLETS (RATE SUPPORT GRANT)

Mr. Mikardo: I beg to ask leave to present a further petition from many of my constituents, which states:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of UK Residents Sheweth:—

that the changes in Rate Support Grant made by Her Majesty's Government have seriously damaged the capacity of the London Borough of Tower Hamlets to care for those of its citizens who are disadvantaged by reason of age, infirmity, physical and mental illness and handicaps, unemployment, poverty, dependence and inadequate housing, particularly as the total number of those disadvantaged citizens in the Borough, as elsewhere, has grown substantially as a result of the policies pursued by Her Majesty's Government since 1979;

that this decline has aggravated, and continues to aggravate, the progressive rundown of an already deprived area, and places particular burdens on its women;

that this difficult, indeed sometimes desperate, situation is further worsened by the threat to the continued existence of the Greater London Council and therefore to the funding of a number of voluntary organisations on whom many people in the Borough increasingly depend;

that many of the members of ethnic minority groups who constitute a large part of the Borough's population are specially disadvantaged by the unfairness of nationality and immigration legislation and regulations and by the inadequacy of the legislation on racial discrimination;

and that young people are threatened with the rundown or closure of some training facilities in the Borough.

Wherefore your Petitioners pray that your Honourable House will demand that Her Majesty's Government will reverse its present policy designed to make the rich richer and the poor poorer, and ensure that adequate funds are available to the local authorities in deprived inner-city areas to halt their decline and move them up to higher standards.

And your Petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

LONDON DOCKLANDS DEVELOPMENT CORPORATION

Mr. Mikardo: I have a third and last petition which is as follows:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble petition of UK Residents Sheweth:

that some of the activities of the London Docklands Development Corporation severely disadvantage many of the people living in the area administered by the Corporation, in that land which is urgently needed as the sites of homes to let at rents which those people can afford is instead being used for luxury housing;

that certain developments on the banks of the River Thames initiated by the Corporation have the effect of denying public access to that river and therefore to the practice of water sports and recreations;

that such developments, and others, are carried out without consultation with the people living in the area and therefore without adequate consideration being given to the environmental consequences of those developments;

that the arrangements covering the Enterprise Zone have the effect of causing the price of land within the Zone to escalate, so that it is only the landowners who benefit substantially from those arrangements;

that those arrangements also create significant inequalities and injustices between the operators of premises just outside the boundaries of the Zone and those within those boundaries;

that the Corporation is not providing support for local community service organisations commensurate with that formerly provided by the local authorities at whose expense the Corporation has been funded;

and that the Docklands Light Railway of which the Corporation is a joint sponsor, is being planned with unmanned stations that do not provide adequate safety and comfort for those who use them, and especially for older people.

Wherefore your Petitioners pray——

Mr. Patrick Cormack (Staffordshire, South): How many of them?

Mr. Mikardo: I have not counted them.

The petition continues:

Wherefore your Petitioners pray that your Honourable House will demand that Her Majesty's Government will ensure that the London Docklands Development Corporation will not engage in any developments affecting the environment and other elements in the welfare of the people in its area without fully consulting in advance the community organisations representing those people; that it will return to the Council of the London Borough of Tower Hamlets as much of the land compulsorily sequestrated to it as that Council needs as sites of homes to be let at rents which fall within the means of many people in the area who desperately need such homes; that it will increase by a reasonable amount each year its grants to local community service organisations; that it will safeguard and increase the facilities for public access to the banks of the River Thames; and that it will ensure that the plans for the Docklands Light Railway will provide for safe and comfortable manned stations.

And your Petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

Several Hon. Members *rose*——

Mr. Speaker: Order. Before I call the next hon. Member to present a petition, perhaps it would be helpful if I were to remind the House of Standing Order No. 119, which states:

"Every Member offering to present a petition to the House, not being a petition for a private bill, or relating to a private bill before the House, shall confine himself to a statement of the parties from whom it comes, the number of signatures attached to it, and the material allegations contained in it, and to reading the prayer of such a petition."

That is what hon. Members should confine their remarks to.

BIRMINGHAM (RATES)

1.15 pm

Mr. Terry Davis (Birmingham, Hodge Hill): I should like to present a petition which has been collected by the Birmingham Labour party and signed by nearly 10,000 people who live in the city of Birmingham. They include my hon. Friend the Member for Birmingham, Perry Barr (Mr. Rooker), who regrets that he is unable to be here to present the petition himself.

The citizens of Birmingham are worried about the loss of £125 million by the city council. I should emphasise that the council has not mislaid the money — it has been robbed by the Government as a direct result of their changes to local government finance since 1979.

According to the city treasurer, these changes by the Government have taken a total of £125 million from the city council and have culminated in a loss of £47 million this year alone. That means that the city council has been forced by the Government to levy a rate which is 30p higher than it would otherwise have levied. That is on top of an increase of 23p as a result of the policies of the local Conservatives who used to control the city council.

This year, the city council has been forced to increase the rates by 43 per cent.——

Mr. Michael Brown (Brigg and Cleethorpes): On a point of order, Mr. Speaker. May I seek your guidance? When the hon. Member started to present his petition, I distinctly heard him hint that he was presenting it on behalf of the hon. Member for Birmingham, Perry Barr (Mr. Rooker), who has signed it. Is it not correct that an hon. Member may not sign a petition which he is presenting? I seek your guidance as to whether the petition is being presented on behalf of the hon. Member for Perry Barr.

Mr. Davis: Further to the point of order, Mr. Speaker.

Mr. Speaker: Order. It is in order for the hon. Member for Birmingham, Hodge Hill (Mr. Davis) to present a petition on behalf of the hon. Member for Birmingham, Perry Barr (Mr. Rooker).

Mr. Davis: The hon. Member for Brigg and Cleethorpes (Mr. Brown) raised a foolish point as, if he had listened more carefully, he would have heard me say that my hon. Friend the Member for Perry Barr is one of the signatories of the petition. I am not acting on his behalf. If my hon. Friend had been here he would have presented the petition, but he is not. I am presenting the petition on behalf of my hon. Friend as a citizen of Birmingham and 10,000 other citizens of Birmingham who have been robbed of £125 million by the Government.

The city council has been forced to increase its rates by 43 per cent. this year although it is spending £25 million less than the Secretary of State's civil servants admit is needed to preserve services in Birmingham.

Mr. Speaker: Order. The hon. Gentleman must not make a speech but describe what is in the petition.

Mr. Davis: I am describing the petition and what it is about. I shall not read all of it because that would take a long time. I am simply summarising the points of concern to the citizens of Birmingham. Civil servants admit that the council should spend another £25 million to provide the services that are needed. I do not want to describe those services now, even if you allowed me to do so, Mr. Speaker. Suffice it to say that services in the city of Birmingham must be improved. Even the Government admit that they should be improved, but they have taken money from the council.

Mr. Speaker: Order. The hon. Gentleman must put to the House what the petition says, not his views on it.

Mr. Davis: That is what I am doing, Mr. Speaker, as you will see when you read the petition. It concludes:

Wherefore your Petitioners pray that your honourable House do pass legislation requiring the return of this sum which is urgently needed to provide basic services and jobs for the people of the city.

In other words, the message of the Birmingham Labour party, Birmingham city council and the people of Birmingham is, "Give us back our money."

To lie upon the Table.

UNBORN CHILDREN (PROTECTION) BILL

1.20 pm

Miss Joan Maynard (Sheffield, Brightside): I wish to present a petition signed by 189 people from all over the country, including Sheffield. It reads:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of UK Residents Sheweth :—

That the Unborn Children (Protection) Bill will, if enacted, severely damage the treatment of infertile women, prevent much-needed research, encroach upon patient confidentiality and give legal protection to the embryo.

Wherefore your Petitioners pray That your Honourable House Do

Vote against the Unborn Children (Protection) Bill at Third Reading, realising that it pre-empts a proper consideration of the Warnock Report by charging for application for a named woman to be treated for infertility by *in vitro* fertilisation; it discriminates against poor women and brings the State into an area of private life by severely restricting the use of fertilised embryos; it damages research into infertility, causes of handicap, contraception, gene defects and treatment of infertility by giving embryos legal protection; it accepts the view of a minority of the population and opens the way to an attack on abortion and the use of some forms of contraception.

And your Petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

1.22 pm

Mrs. Ann Clwyd (Cynon Valley): With your permission, Mr. Speaker, and that of the House, I present a petition on behalf of 1,000 men and women from all over Britain who believe that if the Unborn Children (Protection) Bill becomes law the prospects for families who suffer from muscular dystrophy and many similar conditions could be adversely affected. If the Bill becomes law research work on early human embryos will be prevented altogether, which will preclude the use of important anticipated developments involving the testing of early human embryos for the prevention of handicap and malformation.

The petitioners note that research on human embryos in Britain has been held back for the past two years due to the deliberations of the Warnock committee and in anticipation of controlling legislation. At present, scientists depend on early prenatal diagnosis at two to four months of pregnancy to prevent the birth of handicapped children. The petitioners believe that before long it should be possible to select for reimplantation embryos which have been shown to be free from the abnormality under investigation, thus doing away with the need for selective abortion. Those developments could well lead to the elimination of a number of grossly handicapping

[Mrs. Ann Clwyd]

conditions such as muscular dystrophy, but before being introduced into clinical practice such techniques will need to be researched and tested on early human embryos. That is what the current Bill will ban.

The petitioners are convinced that the Bill represents a major step backwards in the fight against genetic disease. They accept that there is a need for legislation in this area but believe that it should be properly balanced, taking into account the needs of parents and children at risk. The petitioners pray that the far-reaching effects that this Bill could have both on medical research and on families suffering from genetic disorders should be properly considered and that this Bill should be defeated.

To lie upon the Table.

1.25 pm

Mr. Willie W. Hamilton (Fife, Central): Before I present the petition, may I put a point of order to you, Mr. Speaker. It relates directly to the petition that I am about to present. Since going through the necessary procedure, by taking the petition to the Journal Office and obtaining the signature of the Clerk there and subsequently taking it to the Lower Table Office, I have received several additional petition forms. There has been an enormous surge of opinion against the Unborn Children (Protection) Bill. It is very difficult to keep pace with the signatures that are constantly being received. I am in the difficulty that several additional forms were received after I had obtained the consent of the Journal Office and subsequently that of the Lower Table Office. They are in identical form. Will it be in order for me to add them to the original petition? If you so direct me, Mr. Speaker, I can extract them. It will not affect the force of the argument.

Mr. Speaker: It will be quite in order for the hon. Gentleman to include them if they are in the same form. He said that they are in the same form.

Mr. Hamilton: I am much obliged, Mr. Speaker. I made that point in case some of my hon. Friends find that they are in a similar predicament.

The petition is signed by approximately 1,700 people from all over Great Britain. The House might be interested to know that the signatures range from Aberdeen to Brighton and that they were received in a relatively short period of time. I received 500 signatures alone from Brighton, including the constituency of the hon. Member for Brighton, Kemptown (Mr. Bowden). They also came from Durham and Dorset, the Stirling royal infirmary, Lincoln college, Oxford, Somerville college, Oxford, St. Hilda's college, Oxford and Lady Margaret hall. A large number came from the Royal Free hospital in London, University college, London and the universities of Stirling and Edinburgh. That is a sufficient indication of both the quality and quantity of the signatories.

The petitioners assert that the Unborn Children (Protection) Bill will, if it becomes law, severely jeopardise the treatment now available to large numbers of infertile women who long to have their own children. They believe that the Bill will prevent much-needed research. They also say that the provisions of the Bill will encroach—the right hon. Member for South Down (Mr. Powell) knows this very well because we dealt with the matter at length in Committee—upon the well-known and respected relationship of confidentiality between a patient and his or her doctor.

The petition also says that the Bill seeks to give legal protection to all embryos as if they were all human beings. The petition ends:

Wherefore your petitioners pray that your honourable House will vote against the Unborn Children (Protection) Bill at Third reading—

we shall not reach that stage until 5 July, a point that is not mentioned in the petition, but that is what will happen—

realising that it pre-empts a proper consideration of the Warnock report; that by charging for application for a named women to be treated for infertility by in vitro fertilisation it discriminates against poor women and brings the State into an area of private life; that by severely restricting the use of fertilised embryos it damages research into infertility, causes of handicap, contraception, gene defects and treatment of infertility; that by giving the embryo legal protection it accepts the view of a minority of the population and opens the way to an attack on abortion and the use of some forms of contraception.

And your petitioners, as in duty bound, will ever pray.

To lie upon the Table.

1.31 pm

Mr. Alfred Dubs (Battersea): I should like to make it clear that, although this is the fourth occasion on which I have presented a petition to the House in connection with the Unborn Children (Protection) Bill, I have in the past always presented petitions, whether or not I agreed with their substance, because I have thought it right, when approached by constituents and others, that I should do so. On this occasion I am happy to present a petition that is critical of the Unborn Children (Protection) Bill. It is the second such critical petition that I have presented.

The petitioners are concerned about the effects of the Bill, and particularly that the debate on the Unborn Children (Protection) Bill might, if the Bill were passed, pre-empt proper consideration of the Warnock report.

The petition says:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.,

The Humble Petition of UK Residents Sheweth:—

that the Unborn Children (Protection) Bill will, if enacted, severely damage the treatment of infertile women, prevent much-needed research, encroach upon patient confidentiality and give legal protection to the embryo.

Wherefore your Petitioners pray that your Honourable House do vote against the Unborn Children (Protection) Bill at Third Reading, realising that it pre-empts a proper consideration of the Warnock Report; by charging for application for a named woman to be treated for infertility by in vitro fertilisation it discriminates against poor women and brings the state into an area of private life; by severely restricting the use of fertilised embryos it damages research into infertility, causes of handicap, contraception, gene defects and treatment of infertility; by giving the embryo legal protection it accepts the view of a minority of the population and opens the way to an attack on abortion and the use of some forms of contraception.

And your Petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

1.33 pm

Mr. Harry Cohen (Leyton): I have pleasure in presenting to the House three petitions which I think are of considerable importance. The first one, which I shall read to the House, says:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of UK Residents Sheweth:—

that the Unborn Children (Protection) Bill will, if enacted, severely damage the treatment of infertile women, prevent much-needed research, encroach upon patient confidentiality and give legal protection to the embryo.

Wherefore your petitioners pray that your Honourable House do vote against the Unborn Children (Protection) Bill at Third Reading—

Mr. J. Enoch Powell (South Down): Get on and do it.

Mr. Cohen: The right hon. Gentleman says, "Get on and do it." There is always a future date when it can come before the House on Third Reading without an abuse of procedure, which is potentially the case today. There are still opportunities. These petitions give an opportunity to consider the issues more closely. The petition continues: do vote against the Unborn Children (Protection) Bill at Third Reading, realising that it pre-empts a proper consideration of the Warnock Report; by charging for application for a named woman to be treated for infertility by in vitro fertilisation it discriminates against poor women and brings the State into an area of private life; by severely restricting the use of fertilised embryos it damages research into infertility, causes of handicap, contraception, gene defects and treatment of infertility; by giving embryos legal protection it accepts the view of a minority of the population and opens the way to an attack on abortion and the use of some forms of contraception.

And your Petitioners, as in duty bound will ever pray, etc.

To lie upon the Table.

That is signed by almost 200 citizens. When my secretary saw the petition, she felt moved to add her signature. I know that we are not supposed to make speeches, but I support the petitioners.

FOOD POLICY AND HEALTH

1.37 pm

Mr. Cohen: The second petition is from Leytonstone Labour party. It is addressed to the Commons of the United Kingdom and Northern Ireland in Parliament assembled, and states that there is an urgent need for a food policy to be adopted which will ensure healthier living. It reads:

Wherefore your Petitioners pray to your Honourable House to develop a food policy which integrates the priorities of health, agriculture and environment policy so as to provide a coherent approach for achieving good health and secure food in a suitable environment and that all necessary legislation and administrative arrangements be introduced as a priority for this purpose, particularly with the central aim of achieving a healthier, better-fed nation and a food industry based on sane economic and environmental policies. Furthermore that this be the single unified principle for all Government departments to apply in a co-ordinated manner as opposed to the present short-term, contradictory and often incoherent policies in this matter. That to this end, Her Majesty's Government to use its powers and influence, including those of improving food purchasing policy by itself and all other public authorities as part of a concerted approach by the State. That other elements of a healthier food policy to include: Creating social and economical conditions in which people can afford a good and healthy diet and are able to make sensible decisions about the food they eat and buy;

Helping people improve their own health by ensuring that healthy foods are readily available;

Setting out dietary goals as the basis for food policy;

Support for continuing research into relations between diet and disease, and the development of preventative strategies;

Requiring food labelling to be more informative about methods of production and to relate to dietary goals;

Making sure through health education, that people know enough to use the information on labels in choosing what to eat;

Promoting the development of standard, recognisable codes of symbols as part of the system of informative labelling;

Support the development of consumer surveys to discover attitudes to diet and health, to improve consumer understanding and enhance the trend towards a healthier diet;

Drawing up a new code of practice on food and drink advertising aimed at increasing the factual and informative role and limiting unsubstantiated claims;

Strengthening food regulations to ensure that food manufacturers improve the nutritional value of their product and willing the means of enforcement of such regulations and standards with an effective and sufficiently staffed inspectorate;

Expanding resources available to the Health Education Council to mount effective nutrition campaigns, including campaigns to assist special needs groups in society such as pregnant women, babies and children, the elderly and the chronically sick;

Co-ordinating existing health authority initiatives and laying down guidelines for extending their educational role in the community;

Involving family doctors, dentists, health visitors, district nurses and others in the primary and community health services in promoting a healthier diet;

Encouraging schools to give sound dietary advice in both examination and non-examination courses, this to entail examining boards for public examinations adopting the new dietary goals;

Revising the nutritional goals issued to public bodies involved in catering, such as schools, hospitals, prisons, government and local authority canteens and the armed forces, whether the body is directly involved or contracts out the catering;

Restoring——

this is the most important one—

the school meals service, which *The Lancet* has described as the sheet anchor of child nutrition, with new and improved dietary goals;

Refusing to allow——

this is another important one—

the Common Agricultural Policy of the European Economic Community to, in any way, block or impair the new dietary goals for the nation;

Support and encouragement of research and development into animal breeding and rearing so that far leaner meat and good quality low fat milk is produced to conform better with the new dietary goals;

Working out with those involved in food production and other sectors of the food industry how to safeguard jobs in farming, food processing and retailing, in particular, the trades unions to be involved in planning the changes and opportunities that will arise;

Undertaking a thorough and coherent review aimed at presenting a unified political response right across the spectrum of government.

In addition to these measures, which would have a major relevance to tackling dietary ignorance and over-indulgence, it is recognised that rebuilding the economy, including its restructuring with a redistribution of wealth, is necessary to provide better living standards. This is the single most important contribution to an effective food policy, particularly as poverty is a major cause of poor diets. Therefore, healthier food at prices people can afford is essential, and by improving economic conditions, by changing agricultural policies and by curbing the power of the food and agri-business, people will in effect be provided with a wider choice of healthier foods and also the information that they need to make sensible decisions about their diet.

And your Petitioners, as in duty bound, will ever pray, etc.

I think that you will agree, Mr. Speaker, that that is an important petition. I am pleased to present it to the House. It is signed by 29 members of the Leytonstone Labour party. However, they are representative of a vast number of people throughout the country. I was minded to support the petition.

M11 LINK ROAD

1.44 pm

Mr. Cohen: I wish to present a third petition to the House. It reads:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

[Mr. Cohen]

Again, this is a petition from the Leytonstone ward Labour party. It is relevant because it is a direct constituency petition. I cannot express more adequately than the petition the urgency of dealing with the matters contained within it. It states:

That improvements are needed to the Housing and Environmental conditions on the route of the M11 Link road.

The link road is due to go through my constituency. It continues:

"Wherefore your Petitioners pray that your Honourable House recognises that (1) Waltham Forest Council has paid £683,000 to the Department of Transport for rents and dilapidation payments over the past twenty years.

(2) The area is dilapidated and rat-infested.

(3) Many houses lack basic amenities and are in a bad state of repair.

(4) People have lived with uncertainty about the future for thirty-five years.

and that your honourable House takes action to

(1) reduce to peppercorn level rents on land and property payable to the Department of Transport to enable Housing Associations and co-ops to keep them in short-life use until demolition.

(2) Adequately fence and secure from intruders vacant land and properties and maintain boundary walls of properties in the Department of Transport's ownership.

(3) Allow Waltham Forest Council to spend more capital by increasing their H.I.P. allocation so that they can replace the homes they will be forced to vacate for demolition.

(4) Give grants to local organisations managing short-life properties in the area.

(5) Provide additional money for environmental improvements in the area.

(6) Make a decision to build a cut and covered road without further delay.

And your petitioners, as in duty bound, will ever pray, &c.

The petition is signed by 27 members of Leytonstone's Labour party who represent the vast majority of my constituents. I wholeheartedly support the petition.

To lie upon the Table.

UNBORN CHILDREN (PROTECTION) BILL

1.46 pm

Ms. Clare Short (Birmingham, Ladywood): I wish to present a petition signed by Estella Clarke who is the secretary of the Ladywood Labour party and 208 other people, men and women, from all parts of the country. It calls on hon. Members to vote against the enormously misleadingly titled Unborn Children (Protection) Bill, which would prevent many infertile couples — an estimated one in 10 of all couples — from having children. Indeed, the Bill should be called the Prevention of any Chance of Many Children Being Born and Many Families having Children Bill.

I strongly associate myself with the sentiments of the petition because, as well as preventing infertile couples from having children, it will—this may be even more important—prevent research from taking place to enable couples who know that they have a congenital handicap from being able to bear a healthy child. Any hon. Member who wishes to vote for the Bill will have to take full responsibility for that.

The supporters of the petition believe that research in this area should be tightly controlled, but we feel that a properly considered Bill should be brought forward by the Government and that the present Bill should not proceed any further.

To save the time of the House, I have not read out the petition and have simply summarised the sentiments of those who have signed it.

To lie upon the Table.

AMBULANCE SERVICES (GWYNEDD)

1.48 pm

Mr. Dafydd Wigley (Caernarfon): I have been asked by constituents to present a petition to the House. It is addressed to

"the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled

and is a petition from residents of the Dwyfor area, in my constituency. The petition concerns the plans of the Gwynedd area health authority for reorganising the ambulance service within the district. The plans are already in operation and are denying a psychiatric day centre the services of an ambulance, with the result that people who use the centre are unable to attend with the frequency with which they would otherwise attend. The coverage of the ambulance service in a widely scattered area has been reduced, leaving people vulnerable to illness, particularly as they have a long distance to travel to the district general hospital.

The petition has been signed by 70 residents, but it is a parallel petition to one signed by thousands of people which has been sent to the Secretary of State for Wales. This petition includes signatories from the centres of Pwllheli, Porthmadog, Criccieth, Tremadog, Abererch, Penrhos, Abersoch, Llanbedrog and Pentrefelin in my constituency. My constituents pray:

that your honourable House shall take the necessary steps to ensure that the Health Authority do not make any further cuts in the service and that they re-instate a full service in those places where cuts have already been made.

And your Petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

MATTHEW BROWN BREWERY

1.51 pm

Mr. Jack Straw (Blackburn): I beg to present a petition relating to the proposed takeover of Matthew Brown brewery by the Scottish and Newcastle brewery.

Because of the importance of petitions to constituents, I have always endeavoured to present them on a Friday morning. This is the first occasion since I was given this and another petition that I have been in the House on a Friday morning, as on other Fridays I have been in my constituency.

It is within the knowledge of the House that the Scottish and Newcastle brewery sought to make a takeover bid for Matthew Brown, which is based in my constituency, and which also owns the Theakston brewery based at Masham, with other breweries in Carlisle and elsewhere in Cumbria.

The bid was resisted by the board of Matthew Brown, by its employees and by all those who had ever had the opportunity to compare the products of Matthew Brown with those of Scottish and Newcastle. The bid was also resisted by hon. Members on both sides of the House, but especially by my hon. Friend the Member for Burnley (Mr. Pike), among others. I am glad to say that following that pressure, the bid was referred to the Monopolies and Mergers Commission—

Mr. Speaker: That sounds like an argument. I should like the hon. Gentleman to read the petition.

Mr. Straw: Of course, Mr. Speaker, I accept what you say. However, I took the opportunity to read "Erskine May", and I hoped that I was presenting what amounted to the brief statement that Members may make in support of a petition.

The petition is supported by 2,500 signatures. It reads:

To the Honourable the Commons of the United Kingdom . . . The Humble Petition of we, the citizens of Lancashire, showeth That the proposed takeover of Matthew Brown plc by Scottish and Newcastle plc would be against the public interest, and harm employment and consumer choice, and lead to monopoly. Wherefore your Petitioners pray that your honourable House should not permit this takeover.

And your Petitioners, as in duty bound, will every pray, etc.

To lie upon the Table.

TRANSPORT BILL

1.53 pm

Mr. Straw: I wish to present a second petition, from the Blackburn borough council. It bears the common seal of the council under the signature of the chief executive and mayor, Councillor Clifford West.

The petition relates to the Transport Bill and is supported by a bookfull of signatures of residents of Blackburn, Darwen and elsewhere in east Lancashire. It claims that the proposed legislation set out in the Government's White Paper on buses is a threat to bus services in Blackburn. It petitions the Secretary of State for Transport to withdraw the proposals.

The petition itself shows that the Blackburn borough council has examined the White Paper on buses and the Transport Bill and feels that, if implemented, it will mean that:

(a) concessionary fares for elderly, disabled and other people in special need, including schoolchildren, could disappear

(b) that the strict safety standards needed for public service vehicles will not be upheld

(c) that continuity, reliability and stability of services will end

(d) many bus services will vanish, especially socially desirable services for small schoolchildren together with those operated early morning, evening, Sunday and on Bank Holidays

(e) the few services that are left will no longer link and services will become less frequent

(f) passengers will not know which services should run at what times or what fares are to be charged

(g) operators will compete with old, unsuitable buses and coaches

(h) neither users nor ratepayers will have any say about their local transport services.

But there are wider aspects to the proposals—the ratepayers' considerable investments in the countrywide fare marketing and co-ordination schemes are in jeopardy. New buses will not be bought, which means more unemployment in the bus-building industry, socially needed transport services will be put under pressure, highway costs, road accidents and congestion will increase, and the business of the community as a whole will suffer. Public transport is needed as a social service and the proposals of the White Paper would destroy that.

Wherefore your Petitioners pray that your honourable House reject any legislation to implement the proposals of the White Paper on buses and the Transport Bill.

And your Petitioners, as in duty bound, will ever pray etc.

The bottom of the petition states that the common seal of the Blackburn borough council was affixed in the presence of the mayor and the chief executive.

To lie upon the Table.

UNBORN CHILDREN (PROTECTION) BILL

1.56 pm

Mr. Bob Clay (Sunderland, North): It gives me great pleasure to present a petition from 94 patients of the Bourn Hall clinic near Cambridge. Today we have heard many petitions from thousands of people against the Unborn Children (Protection) Bill—so-called. No people have a greater right to petition the House than those patients who are benefiting from in vitro fertilisation. The petition states:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of Patients at Bourn Hall Clinic sheweth that Enoch Powell's, Unborn Children (Protection) Bill will adversely affect the treatment of patients undergoing in vitro fertilisation. Wherefore your Petitioners pray that your honourable House vote against the Unborn Children (Protection) Bill at Third Reading.

And your Petitioners, as in duty bound, will ever pray, etc.

The petition was signed by 94 men and women from every part of the United Kingdom, from Scotland to the south-west of England—from London, Yorkshire, Derbyshire and Lancashire. The House should pause to think and take great note of their plea. It is a tragedy that this private clinic is not funded by the NHS. Unless the House takes note of the petition, it will not be——

Mr. Speaker: Order. I must stop the hon. Member, because he has already given his prayer. That is where he should finish. If the hon. Member wanted to make remarks, he should have done so before the petition was read.

To lie upon the Table.

SOCIAL SECURITY

1.58 pm

Ms. Jo Richardson (Barking): I have two petitions to present, both of which are brief. The first was organised and taken around by members of the Brighton Labour party. Significantly, it is signed by 10 members of the borough council. The petition reads:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled. The Humble Petition of United Kingdom residents sheweth that the proposals in the Green Paper on Social Security will, if enacted, severely disadvantage the people of Brighton. Wherefore your Petitioners pray that your Honourable House.

Vote against legislation to give effect to the Green Paper realising that Brighton has wage levels 12 per cent. below the regional average, some 4,500 people lost money as a result of the Housing Benefit reductions in 1984, and that Brighton Borough Council charges rates which are 40 per cent. above the national average.

And your Petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

UNBORN CHILDREN (PROTECTION) BILL

2 pm

Ms. Richardson: I beg to ask leave to present a second petition, signed by 200 residents and visitors to the town of Brighton. The signatures have been collected only over the past week, and one will see why the people are concerned in a moment. It reads:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled. The Humble Petition of UK Residents sheweth that citizens of and visitors to Brighton deplore the declared intention of the hon. Member for Brighton, Kemptown to make unprecedented use of

[Ms. Richardson]

his first place in Private Member's Motions on June 7 to permit proceedings on the Unborn Children (Protection) Bill. Wherefore your Petitioners pray that your Honourable House do vote against the Motion of the hon. Member for Brighton, Kemptown.

And your petitioners, as in duty bound, will every pray, etc.

To lie upon the Table.

AMBULANCE SERVICES (GWYNEDD)

2.1 pm

Mr. D. E. Thomas (Meirionnydd Nant Conwy): I beg to ask leave to present a petition. As hon. Members will know, I represent a rural constituency spread over north and mid-Wales and the petition concerns the grave threat to the ambulance services in the constituency, evidenced by the recent plans of the district health authority. The petition says:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled. The Humble Petition of residents of the Meirionnyd Nant Conwy area sheweth that they are gravely concerned about the Gwynedd Area Health Authority's plans for reorganising the ambulance service within the Constituency.

The concern of my constituents arises from the position of the high proportion of the elderly within the population and the fact that, within the health district itself, there are no district general hospital facilities. All the acute services are provided outside the district at the centres of Bangor, Llandudno, Wrexham, and Aberystwyth. The transport of acute patients to these centres is determined by an effective ambulance service, and the ambulance service also ensures that there is adequate provision for emergencies during the tourist season, when the district receives many outside visitors.

In addition, the maternity services and other acute services provided for people of working age within the constituency are located mainly outside the health district. The concentration of resources within the major district general hospitals should be supported by provisions within the communities for an ambulance service. The Welsh Office, through its formula of resource allocation to health districts, has not calculated properly for the ambulance service in the district and the petitioners feel strongly that the allocation made by the Welsh Office should include sufficient money for the provision of an ambulance service within the district. The alleged overspending of £400,000 by the health district on the ambulance service should form part of the allocation of the Welsh Office to the health district.

The petition ends:

Wherefore the Petitioners pray that your Honourable House should take the necessary steps to ensure that the Health Authority do not make any cuts in the service and that they continue to maintain a full service throughout the constituency as heretofore.

And your Petitioners, as in duty bound, will ever pray.

To lie upon the Table.

UNBORN CHILDREN (PROTECTION) BILL

2.3 pm

Mr. Jerry Wiggin (Weston-super-Mare): I beg leave to present a petition on behalf of the patients of Bourn Hall clinic. It reads:

The humble Petition of Patients at Bourn Hall clinic sheweth that Enoch Powell's Unborn Children (Protection) Bill will make it difficult to treat patients undergoing in vitro fertilisation. Wherefore your petitioners pray.

That petition contains 22 signatures from all over the United Kingdom.

I have a similar petition, which reads:

Enoch Powell's Unborn Children (Protection) Bill will slow down improvements in the treatment of patients undergoing in vitro fertilisation.

That petition contains 29 signatures, from all over the United Kingdom.

I entirely agree with the view expressed by the petitioners in this matter. I have had the privilege and blessing of three children, and I could not possibly be party to seeing any legislation passing through the House that deprived other people, who unfortunately are not so blessed, of that privilege.

To lie upon the Table.

2.5 pm

Mr. Dave Nellist (Coventry, South-East): You will be aware, Mr. Speaker, that this is the first time that I have sought to present a petition to the House, though, like my hon. Friend the Member for Battersea (Mr. Dubs), in the past I have received petitions and, even though I disagreed with them, I have put them in the bag behind your Chair. That, I understand, is where the expression "in the bag" comes from when describing a completed project.

The petition that I present today bears the signatures of nearly 300 people from all parts of the country—from Alloa and Stirling in Scotland, from London and Surrey in the south and, in the midlands, from Birmingham, Warwick, Leamington and Coventry, including my own constituency.

The signatories petition against the Bill presented by the right hon. Member for South Down (Mr. Powell). They talk of the one in seven couples who would be affected by the Bill were it to be passed by the House and its restrictions on the treatment to reduce infertility or to discover the causes of severe handicaps and genetic defects.

The petition notes that these attacks will affect poor working-class women especially, because the rich can always go abroad to the various private clinics of Europe for the solution of their problems. The petitioners see the Bill as opening the way to an attack upon abortion, weakening the 1967 Act. As a Coventry Member of Parliament, in what is already one of the most difficult areas of the country in which to obtain an abortion, I give my full support to the petition.

The petition reads:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of United Kingdom Residents sheweth:—

that the Unborn Children (Protection) Bill will, if enacted, severely damage the treatment of infertile women, prevent much-needed research encroach upon patient confidentiality and give legal protection to the embryo.

Wherefore your petitioners pray that your Honourable House vote against the Unborn Children (Protection) Bill at Third Reading, realising that it pre-empts a proper consideration of the Warnock Report. By charging for application for a named woman to be treated for infertility by *in vitro* fertilisation it discriminates against poor women and brings the State into an area of private life; by severely restricting the use of fertilised embryos it damages research into infertility, cause of handicap, contraception, gene defects and treatment of infertility, by giving the embryo legal protection it accepts the view of a minority of the population and opens the way to an attack upon abortion and the use of some forms of contraception.

And your petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

2.8 pm

Mr. David Crouch (Canterbury): I beg to present two petitions on behalf of patients at Bourn Hall clinic, near Cambridge.

I shall be brief as I am anxious for the House to get on to the business of the day—a debate in which I wish to speak.

The petitions contain 59 signatures and are concerned that

Enoch Powell's Unborn Children (Protection) Bill will have adverse effects on the treatment of patients undergoing fertility treatment.

The other petition refers to the fact that the Bill will seriously slow down the treatment of patients undergoing in vitro fertilisation.

I support the petitioners' prayer to the House.

To lie upon the Table.

2.9 pm

Dr. Michael Clark (Rochford): I beg leave to present two petitions on behalf of patients in Bourn Hall clinic in Cambridgeshire. Both petitions demonstrate that the patients feel that the Unborn Children (Protection) Bill would hinder work being done at Bourn Hall and that patients there are concerned about the Bill.

The first petition reads:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of patients at Bourn Hall clinic sheweth:—

that the Unborn Children (Protection) Bill will have adverse consequences for patients undergoing in vitro fertilisation.

Wherefore your petitioners pray that your Honourable House vote against the Unborn Children (Protection) Bill at Third Reading.

And your petitioners as in duty bound, will ever pray, etc.

The petition is signed by Richard Oram and is supported by 38 other patients at Bourn hall.

The second petition reads:

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The Humble Petition of patients who have received treatment for infertility at Bourn Hall, Cambridge, Sheweth:—

that the Unborn Children (Protection) Bill will make treatment almost impossible because of the time limitation.

Wherefore your petitioners pray that your Honourable House vote against the Unborn Children (Protection) Bill at Third Reading.

And your Petitioners, as in duty bound, will ever pray, etc.

The petition is signed by Diana Barbour and 23 other patients at Bourn hall.

I should like to comment——

Mr. Speaker: Order. The hon. Gentleman has now read out his prayer, so he cannot comment. He should have done that before.

Dr. Clark: I was going to comment on the people who signed the petition. Is that in order?

Mr. Speaker: Yes, all right.

Dr. Clark: The people who have signed the petition include two housewives who say that they are pregnant through the in vitro fertilisation technique.

To lie upon the Table.

UNWANTED PREGNANCIES

2.12 pm

Mrs. Margaret Beckett (Derby, South): I beg leave to present a petition:

To the Honourable Commons of the United Kingdom of Great Britain and Northern Ireland Parliament assembled.

The Humble Petition of U.K. Residents Sheweth:—

That to prevent unwanted pregnancies amongst young women under sixteen years of age, the DHSS Circular of December 1980 should be fully implemented.

This prayer comes not from any particular organisation but, as with other petitions that we have heard today, from ordinary men and women in all parts of these islands—literally from the north of Scotland to the south coast, and from Wales to East Anglia. All the petitioners—there are several thousand of them—are deeply concerned about the case brought in the High Court by Mrs. Victoria Gillick and the decision in the Court of Appeal on it. The petitioners are concerned at the many young women who will be in danger of unwanted pregnancies. They are concerned at the interference with what they see as the necessary right of doctors to give the treatment that they feel is necessary for the health of their patients. They are anxious that if the House of Lords upholds the decision of the Court of Appeal, the Government might take steps speedily to change the law allowing doctors to give the advice and treatment that they think is necessary, as set out in the Department of Health and Social Security circular.

The problem that the petitioners identify goes back to earlier attitudes in our law, when it was considered, in effect, that children were the property of their parents—an attitude which has, happily, changed in recent years. My petitioners are anxious about the dangers of bringing into the law the attitude of Mrs. Gillick, who seems to assume that becoming a parent automatically makes someone kind and wise, despite all the evidence that some parents physically and sexually maltreat their children. The petitioners therefore pray:

If the House of Lords upon Appeal in the case of Gillick v West Norfolk and Wisbech AHA and Another do Uphold the decision of the Court of Appeal this would leave many young women in danger of unwanted pregnancies and prevent doctors from giving treatment they felt necessary for the health of their patients and

The law should be changed to allow doctors to give abortion and contraceptive advice and treatment as set out in the DHSS circular on the organisation and development of a family planning service.

And your Petitioners, as in duty bound, will ever pray, etc.

To lie upon the Table.

Houses of Parliament (Terrace)

2.14 pm

Mr. Frank Cook (Stockton, North): On a point of order, Mr. Speaker. On Wednesday this week, I approached the most senior members of the Serjeant at Arms' Department to draw to their attention the scaffolding, staging and access ladders on the Terrace bordering the river Thames. I received a courteous hearing from officers in that Department, and got the prompt reply that they had drawn my complaints to the attention of the Property Services Agency, which would redress the problems. One item has been corrected.

During the presentation of petitions today, I took the opportunity to have a further look at the Terrace. Even more hazardous equipment is lying there, which puts hon. Members, staff and visitors to the House in serious jeopardy. It is the second time this week that people have been placed in that position. It would be remiss of me to allow today's sitting to close without bringing the matter to your attention, Mr. Speaker, with the exhortation that you add your support to the representations made on our behalf to the Serjeant at Arms' Department.

Mr. Speaker: I shall look into the matter.

Unborn Children (Protection) Bill

2.15 pm

Mr. Andrew Bowden (Brighton, Kemptown): I beg to move,

That at this day's sitting the remaining stages of the Unborn Children (Protection) Bill may be proceeded with until any hour though opposed and on Friday 5th July Lords Amendments to the said Bill may be proceeded with until any hour though opposed.

When I was fortunate enough to draw first place in the ballot for private Members' motions, I decided to table the procedure motion that is now before the House. I did so for several reasons. On 15 February this year, the Bill received a Second Reading by a majority of 238 to 66. It was supported by Members from the Labour party, the Liberal party, the Scottish National party and the Conservative party. Indeed, it was an all-party Bill. There was a long Committee stage, but the Report stage was not completed.

Although there are differences of opinion about the Bill, no one can deny the vital issues at stake. In view of those vital issues and the decisions that must be made, I believed it important that the House should have the opportunity to decide whether it should discuss the Bill again. I deeply regret the fact that that will not be possible today.

I have been accused of abusing the procedures of the House, but I reject that accusation. I used the procedures of the House, as other hon. Members have legitimately done today. To accuse anyone of abuse is to attack his integrity.

The amendment signed by some extremely distinguished hon. Members, including the right hon. Member for Blaenau Gwent (Mr. Foot), and my right hon. Friends the Members for Cambridgeshire, South-East (Mr. Pym) and for Brighton, Pavilion (Mr. Amery), is a seductive and clever amendment, but I would ask the House to consider the following point. What has arisen today is extremely rare and will probably not occur again for 50 years. Several factors had to come together. First, we had to have strong all-party support for a private Member's Bill. Indeed, we had support across the board, with the exception of the Welsh nationalists. Secondly, the Government had to be neutral. Thirdly, the Bill had passed through most of its stages in the House of Commons. Fourthly, and most remarkably, a supporter of the Bill had to win first place in the ballot for private Members' motions on a most critical day. The chance of all those things happening again will probably not occur in the rest of this century, and I suspect in most of next century.

Whatever happens to my motion, which is a use of procedure, not an abuse of it, it will almost certainly be submitted to the Select Committee on Procedure. That Committee will make a recommendation to the House, and the House will decide how the procedure should be used in the future. Had my right hon. Friend the Leader of the House made a speech this afternoon, I am sure that he would have been as seductive and persuasive as is the amendment.

Why are the Government and so many senior ex-Ministers so wary? My Back-Bench colleagues on both sides of the House should for once forget the issues of the Unborn Children (Protection) Bill and remember the powers and position of Back-Bench Members. If we are not careful, we shall hand over, bound hand and foot, all powers to decide about the future of private Member's

Bills. It will mean that no private Member's Bill will have a chance of reaching the statute book unless it is uncontentious or given Government time. I beg the House to think carefully about changing the present procedures.

I have cut my speech extremely short. There are few greater privileges than the opportunity to serve in this House. I should like the House to be free to exert its will. I do not want it to tie its hands or to allow the Front Benches and the usual channels to have the power always to prevail.

Mr. Speaker: At the beginning of this morning's sitting I announced to the House that I had selected the amendment in the name of the right hon. Member for Blaenau Gwent (Mr. Foot).

2.21 pm

Mr. Michael Foot (Blaenau Gwent): I beg to move, to leave out from 'That' to the end of the Question and to insert instead thereof:

'this House is of opinion that to exempt the Unborn Children (Protection) Bill for an unlimited period from the provisions of Standing Order No. 1 (Sittings of the House) would breach the longstanding practice of the House to sit on Saturdays or Sundays only in circumstances of national crisis, and the unanimous decision of the House in 1979 (following a report by a Select Committee on Procedure) to bring forward its hours of sitting on Fridays from 11 a.m. to 4.30 p.m. to 9.30 a.m. to 3 p.m. in recognition of the fact that many Members have to travel long distances to their constituencies.'.

The hon. Member for Brighton, Kemptown (Mr. Bowden) said that the Bill had all-party support. He will notice that my amendment also has all-party support, and for two reasons. Today has been a good day for the House. Everyone knows that there are extremely strong passions about this issue, the Bill itself and its passage through the House. Despite that, the House has discussed the matter sensibly in the circumstances of the day.

It would be extremely churlish not to acknowledge that a reason why the House has kept its temper sensibly today under your guidance, Mr. Speaker, was the remarkable speech by my hon. Friend the Member for Bolsover (Mr. Skinner), who opened today's proceedings. As everyone who heard it will agree, it was a credit to the House. I am not suggesting tht he will be seduced by the Establishment — nothing of the sort will ever happen to him. The House should congratulate him on the way in which he opened our proceedings earlier today.

The hon. Member for Kemptown put his case in moderate terms, but he is greatly mistaken. I do not blame him for introducing his motion. Every hon. Member has the right to use our procedures to his own ends and purposes. I used to take the view that everything in love, war and parliamentary procedure was in order. That applies to hon. Members on both sides of the House. The hon. Gentleman was right to put down the motion, as were all the hon. Members who tabled amendments to it.

A reason why the amendments were tabled was that if the hon. Gentleman's motion were carried the consequences would be entirely different from those which he forecast. Far from being beneficial to Back-Bench Members, it would be utterly ruinous to private Members' time in the months and years to come. It would mean that every Bill would be open to similar attempts to impose a timetable, that the balance between public business and private business would be altered, that almost every week we would be open to having the same sort of discussions as we are having now, and that soon the Government would have to table a motion of the character of my amendment. Indeed, I am surprised that they did not table such a motion on these proceedings. If they had, they would soon have found that control over parliamentary time would have been destroyed. That would not have been beneficial to private Members' time any more than it would have been to public business.

I strongly agreed with my hon. Friend the Member for Bow and Poplar (Mr. Mikardo) when he said that Members of Parliament must be prepared to withstand pressures. None of us should complain about pressures from outside the House. Indeed, part of our purpose is to be subjected to pressures. However, there are some distinctions about the pressures that are brought to bear, and I should like to give the example of one which is strictly apposite to the Bill.

Many hon. Members will have read the remarkable article written by Cardinal Basil Hume in *The Times* yesterday. He wrote:

"The Unborn Children (Protection) Bill is central to a debate about present-day society: how it shall take control of its own future"

He concluded with large claims which elevated the discussion to high altitudes, writing:

"The abandonment of objective moral principles and the dogmatism of permissiveness have combined in our day to undermine society. This is our crisis."

That is what he says the Bill is about. If that is what the Bill is about, this was not the proper way in which to get it through the House of Commons.

There is a good case for arguing that private Members' Bills open up subjects which should be dealt with by Government legislation. That is a perfectly proper procedure and helps guard against some dangers. If more private Members' Bills were put through the House by means such as these, that would not do much for the reputation of legislation.

I should like to quote the other type of representation that has been made and to contrast it with what Cardinal Hume said. One of my hon. Friends received a letter which ran:

"I have thought about your letter to me of 26th April regarding your absention at the second reading of Mr. Powell's Bill, and it has given me great cause for concern. I had previously sent you the guidelines issued by the Bishops on the matter, and these are quite clear, so that I have been troubled by your indecision, and have wondered whether or not I owe it to my people to put them in the picture on your position.

It is my hope that you will by now see clearly the vital point of principle which is raised, and that you will make yourself available in the House next Friday and Friday night and if need be on Saturday to support the Bill."

That is not the best kind of pressure. There will be discussions. Much the best course is for the Department of Health and Social Security to introduce a Bill after full discussions with the medical authorities. The matter, having been opened up, is bound to be proceeded with in that way.

I hope that, when we return to discussion of these matters in different circumstances, the pressures on hon. Members will be more in the terms of Cardinal Hume's article than in those in letters sent to some of my hon. Friends. Cardinal Hume would do the public discussion of the issue a great service if he repudiated representations made in the other terms that I have described, especially when they are directed not solely at the Bill but at changes in procedure such as the hon. Member for Kemptown is perfectly entitled to seek.

[Mr. Michael Foot]

The suggested changes in procedure would do great injury to how we conduct private Members' business and to the general discussion of legislation. It would alter the balance and, Friday after Friday, whenever such motions were put down——

Mr. J. Enoch Powell (South Down): Would they be passed?

Mr. Foot: If the motion that the right hon. Gentleman has supported — he may even have had a hand in devising it, who can tell?—were passed today, it might be too late——

It being half past Two o'clock, the debate stood adjourned.

Private Members' Bills

UNBORN CHILDREN (PROTECTION) BILL

Order for further consideration (as amended in the Standing Committee) read.

Hon. Members: Object.

Mr. Speaker: To be further considered what day? No day named.

HORSES AND PONIES BILL

Order for Second Reading read.

Hon. Members: Object.
Second Reading deferred till Friday 5 July.

UNSOLICITED NEWSPAPERS (LIMITATION OF DELIVERY) BILL

Order for Second Reading read.

Hon. Members: Object.

Mr. Speaker: Second Reading what day? No day named.

LAW REFORM (PARENT AND CHILD) (SCOTLAND) BILL

Order for Second Reading read.

Hon. Members: Object.

Mr. Speaker: Second Reading what day? No day named.

MEDICAL ACT 1983 (AMENDMENT) BILL

Order for Second Reading read.

Hon. Members: Object.
Second Reading deferred till Friday 5 July.

SOLICITORS (INDEPENDENT COMPLAINTS PROCEDURE) BILL

Order for Second Reading read.

Hon. Members: Object.

Mr. Speaker: Second Reading what day? No day named.

MEMBERS OF PARLIAMENT (MINIMUM AGE) BILL

Order for Second Reading read.

Hon. Members: Object.
Second Reading deferred till Friday 5 July.

Test Ban Treaty

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Garel-Jones.]*

2.31 pm

Mr. Gavin Strang (Edinburgh, East): It is convenient and appropriate that this Adjournment debate should follow that initiated yesterday by the hon. Member for Bristol, East (Mr. Sayeed) dealing with the treaty on the non-proliferation of nuclear weapons.

Progress towards a comprehensive test ban treaty is crucial to the future of the non-proliferation treaty. I say that at the outset because the most remarkable and disturbing element in the reply to yesterday's debate from the Minister of State, Foreign and Commonwealth Office, the hon. Member for Shoreham (Mr. Luce), was the statement that the non-proliferation treaty and progress towards a comprehensive test ban treaty should not be linked. In reality, progress towards a comprehensive test ban treaty is crucial to the future of the non-proliferation treaty on which the third review conference will take place in Geneva in September.

It should not be necessary to point out that adherence to a comprehensive test ban treaty would stop non-nuclear countries testing and developing their own nuclear weapons. At present there are five members of the so-called nuclear club — the United States, the Soviet Union, Britain, France and China—but a considerable number of other countries are on the brink of joining. The United Nations non-proliferation treaty is a bargain between three countries that have nuclear weapons—the United States, the Soviet Union and the United Kingdom —and 121 countries which do not. Article 6 of the treaty requires the nuclear states to make progress towards the cessation of the nuclear arms race. For the Minister to suggest to the non-nuclear Governments participating in the review conference that the present disarmament talks between the United States and the Soviet Union in Geneva are an adequate response to article 6 is unrealistic, to put it mildly.

Progress towards a comprehensive test ban treaty is crucial. The preamble to the non-proliferation treaty states:

"Recalling the determination expressed by the Parties to the 1963 Treaty banning nuclear weapons tests in the atmosphere, in outer space and under water in its Preamble to seek to achieve the discontinuance of all test explosions of nuclear weapons for all time and to continue negotiations to this end."

Third world participants in the 1975 review conference called for specific undertakings from the nuclear weapons states. Among them was a call for

"A comprehensive ban on nuclear tests, including those underground."

Failure to make progress in that area was one of the reasons for the break-up of the 1980 review conference.

We must take note of the debates taking place in countries that may become nuclear weapons states. We have to acknowledge that in those countries, whether or not they are signatories to the non-proliferation treaty, reference is rightly made to the progress that ought to be made towards banning nuclear tests.

Next week we shall discuss the Government's defence Estimates. Among other matters, we shall debate the respective positions of NATO and the Warsaw pact. Ministers will argue that the deployment of nuclear weapons by east and west has been a major factor, if not the major factor, in the avoidance of war in central Europe, but Ministers will not carry that argument to the point of suggesting that it is in the interests of the world that all states should have nuclear weapons. I hope that the Government recognise the danger to both this and future generations of the horizontal proliferation of nuclear weapons. I make no apology for dwelling at length upon the fact that these two issues will be linked in the minds of those Governments who have such an important nuclear role to play.

The House has debated on a number of occasions during the last two years the pollution that has been caused by the British atmospheric tests in the 1950s. We are aware of the controversy surrounding the pollution in the south Pacific. Underground tests are less of an environmental hazard than atmospheric tests, but underground tests produce radioactivity which seeps into the water table. Hon. Members know of examples of that kind.

In June 1963 President Kennedy unilaterally announced a halt to United States atmospheric testing and challenged the Soviet Union to do likewise. In 10 days the Soviet Union, Britain and the United States had negotiated a treaty prohibiting tests in the atmosphere, outer space and under water. This partial test ban treaty was the first significant arms control agreement. It committed the three depository signatories to

"seek to achieve the discontinuance of all test explosions of nuclear weapons for all time."

But, in fact, underground nuclear testing continued unabated.

In 1974 the threshold test ban treaty limiting underground nuclear weapons tests to yields of 150 kilotons was signed, followed in 1976 by the peaceful nuclear explosions treaty which extended this limit to nuclear tests for peaceful purposes. Although both sides have adhered to the conditions of these treaties, neither has been ratified by the United States Congress.

In 1977 Britain, America and the Soviet Union initiated a new round of talks for a comprehensive test ban treaty and by 1980 the main framework for a verifiable ban, including on-site inspection, installation of tamperproof seismic detection stations by each country in the territory of the others and international exchange of seismic data, had been agreed upon. But, after his election in 1980, President Reagan suspended the talks, and in 1982 he reversed what had for a long time been United States policy by announcing that the United States would not resume negotations for a CTBT, and that that could be only a long-term goal.

At the Geneva conference on disarmament in 1982-83, Britain and America prevented any progress being made towards a nuclear test ban by insisting that discussions were limited to problems of verification and compliance. Of course, verification is an important issue and, indeed, that was the argument that dominated the 1984 UN conference on disarmament. The Minister knows well the depressing report—in relation to the position of Britain and the United States — that emerged from that conference.

It is correct to say that real progress has been made towards verification. Many experts in various countries have expressed their views on that issue. The Minister does not need me to refer to important statements by senior figures. I shall simply confine myself to telling him that I had the privilege earlier this week, as chairman of the parliamentary Labour party defence committee, of

[Mr. Gavin Strang]

meeting Lord Carrington, the Secretary General of NATO. When I raised the issue of verifiction with him, he acknowledged that major progress had been made in that area. He certainly did not say that all the problems had been solved in terms of a comprehensive test ban treaty, but it was clear that the issue is whether we can now make progress and get down to a discussion of the banning of all but very small nuclear explosions — of perhaps 1 kiloton or somewhat higher than that. There is no point in being drawn at this stage about the size of explosions. It is no longer possible to sustain the case that there are sound scientific arguments for the lack of progress in this area. I hope that the British Government will desist from advancing that case, which is not a convincing one, in relation to their opposition—one might almost say—to a comprehensive test ban treaty.

There will be an important review conference in September on the non-proliferation treaty. There is a campaign in various countries of the world, including the United States, to try to bring pressure on the three nuclear weapon states which are signatories to the NTBT—the USSR, United States and Britain—to make real progress towards a comprehensive test ban treaty, and towards a reduction of the threshold from 150 kilotons to a much lower figure for underground nuclear tests. The proposal was put forward by a group in the United States, supported by Greenpeace and others, that a ban on testing should be a voluntary undertaking, with a moratorium to be announced by the United States. The Soviet Union responded in April, as the Minister knows, by saying that it would be willing to agree to a moratorium on underground tests from August this year, the date of the anniversary of Hiroshima. So the British Government have a chance to make a real contribution.

There is, of course, a limit to what we can do in the area of multilateral nuclear disarmament. I have not time to develop the indictment—I have to use that word—which can be advanced against the Government's record in the area of progress towards nuclear disarmament and a pulling back from the almost relentless drive by the world towards a nuclear abyss.

The case for Britain taking an independent stance on that issue and being prepared to speak as Britain as opposed to merely echoing the position of the Reagan Administration is overwhelming. We must see this debate as one element in the campaign towards a ban on underground nuclear tests and to help ensure that the review conference on a non-proliferation treaty in September does not break up in failure and lead to an outcome that could be even worse than that of 1980.

I hope that we can obtain a positive response from the Minister this afternoon. This is an important issue. Most Members will acknowledge that the threat of nuclear war, whether it be in the short, medium or long-term, is the overriding issue facing our people and all Governments. I urge the Government to reconsider their stance on this issue and to try to give a lead, at least, on the issue of banning underground nuclear tests.

2.45 pm

The Minister of State, Foreign and Commonwealth Office (Mr. Richard Luce): I congratulate the hon. Member for Edinburgh, East (Mr. Strang) on raising this important debate about the comprehensive test ban. I welcome the chance to set out the Government's position on that important objective. I appreciate the strength of the hon. Gentleman's feelings on the issue. I ask him, however, to acknowledge the fact that we in the Government feel equally strongly. We share that objective. We wish to make positive progress towards a comprehensive test ban. He is wrong to suggest, therefore, that the Government are opposed to such a treaty. We are interested in making progress towards a treaty and hope that we can reach agreement that will allow for a treaty that will hold and will not be eroded because of inadequate verification.

The Government, in accordance with their international obligations, remain firmly committed to the pursuit of a verifiable comprehensive test ban. We are actively working on the problems that remain in achieving one. Such a ban, in the context of the substantial reductions in the numbers of nuclear weapons which we and our allies are trying to achieve in other forums, such as Geneva, could be an important step. We should be proud of the fact that Britain played a leading and distinctive role in the early 1960s, in drawing up the partial test ban treaty.

Few countries have demonstrated fuller support for effective constraints in this field than ourselves, as our treaty commitments show. Together with the United States and the Soviet Union, the United Kingdom participated fully from 1977 to 1980 in trilateral negotiations on a comprehensive test ban treaty. The hon. Gentleman referred to that. These were adjourned following the failure to resolve a number of important compliance questions. Therein lies the enduring problem, on which I must spend a little time.

The United Kingdom has played a full and active part in relevant multilateral discussions at the Geneva conference on disarmament, where a nuclear test ban working group was established in 1982. In 1983, the Government tabled for consideration two important working papers on "Peaceful Nuclear Explosions in Relation to a Nuclear Test Ban" and "Verification Aspects of a Comprehensive Test Ban Treaty". As I said in my speech to the conference on disarmament on 12 March, it is paradoxical and disappointing that detailed work on those subjects was under way there during the 1982 and 1983 sessions but has since been interrupted by the refusal of some non-aligned and Warsaw pact delegations to agree a renewed mandate for an ad hoc committee on a nuclear test ban.

As a result, the technical issues raised in the two British working papers have not so far received the attention they deserve. Indeed, some countries have evaded these issues. In a spirit of compromise, the United Kingdom and the other western delegations proposed at the conference on disarmament last July a broader mandate for an ad hoc committee. This was designed to permit the

"detailed examination of specific issues relating to a comprehensive test ban, including the issue of scope as well as those of verification and compliance, with a view to negotiation of a treaty on the subject".

At the United Nations General Assembly last autumn, a large number of states voted in favour of the resumption of work at the conference on disarmament taking place on this very basis.

Unfortunately, a minority of other countries remain apparently reluctant to agree this. But we remain convinced of the value of further work in Geneva towards a comprehensive test ban. We continue to be closely

involved in the useful technical work performed by the ad hoc group of scientific experts appointed by the conference on disarmament, and we want to see this continue.

I shall deal now with verification. I know that the hon. Gentleman will acknowledge that it is a salient part of any treaty that we may draw up. I have already set out the efforts which have been made towards getting the problems of a comprehensive test ban thoroughly discussed in international forums, but what about the goal itself? On this, the Government are firmly convinced that no test ban treaty can be truly worth pursuing which does not contain adequate safeguards of compliance by all its signatory parties. The importance of resolving outstanding difficulties over how to verify such compliance lies at the very heart of discussions about a comprehensive test ban.

I should make it clear that we are not looking for perfect or 100 per cent. verification. But we must be absolutely clear about what verification we do require. When I addressed the United Nations first committee on disarmament last November, I made the point that the definition of adequate verification would always be a matter for careful political judgment, which must none the less rest upon technical factors. I then posed a number of questions which, in studying the verification provisions of any arms control agreement, we must be prepared to ask. First, will any undetected evasion of the agreement provide a significant military advantage? Secondly, will significant non-observance of the agreement be detected early enough to allow any necessary counter-measures to be taken? Thirdly, even if the evidence of such non-observance is available, will it be convincing enough to justify such counter-measures? Lastly, if we are confident that we can give the right answers to these questions, will we then be able to deter any temptation to depart from strict compliance with the agreement?

Let us consider a comprehensive test ban treaty in the light of these questions. It is clear that the clandestine continuation of nuclear testing at levels sufficient to confer a significant military advantage would have disastrous consequences for the treaty itself and for international security and stability. So it is an essential element of a comprehensive test ban that such clandestine testing is effectively precluded. I am sure that the hon. Gentleman will agree with that. I stress that an unverifiable comprehensive test ban would be no ban — a bogus disarmament measure of benefit to no one except those who might seek to violate it. That is the problem that has bedevilled our efforts to make progress since the 1960s.

Those very issues were directly addressed in the United Kingdom working paper on verification that I mentioned earlier. It identified seismic monitoring as by far the most promising, indeed virtually the only, technology for the long-range collection of those data on underground explosions which would be needed for any realistic verification arrangement. It drew attention to the fact that the current techniques of seismic monitoring require improvement before adequate verification of a treaty could be envisaged. We believe that any realistic progress towards a comprehensive test ban requires fuller examination of this aspect at the conference on disarmament. We hope in future, and provided work can be resumed, to make further substantial contributions on this subject.

It is not enough to assert that seismological means are already adequate to verify a comprehensive ban. There is no scientific evidence for that assertion, which ignores two of the most intractable problems on which our scientists, together with their colleagues abroad, are continuing to work. Those problems are, first, the detection of signals from seismic disturbances against background noise in the surrounding environment and, secondly, discrimination or identification of seismic signals caused by nuclear explosions from the signals emitted by earthquakes. I ask the hon. Gentleman to bear those problems in mind.

Our studies show that seismic disturbances have to register at least four on the Richter scale for them to be reliably detected. Without crossing this detection threshold, however, large nuclear tests could be conducted by employing a number of evasion techniques, which are well documented in scientific literature and which might appear attractive options to a state wishing to cheat on a CTB treaty. Moreover, the threshold for distinguishing nuclear tests from the many thousands of earthquakes that occur around the globe each year is significantly higher than for the mere detection of a seismic disturbance, and would not, under a CTB treaty, rule out the dangerous possibility of clandestine tests at yields of up to several tens of kilotons.

I have set out in detail our anxieties on technical questions, because adequate verification is at the heart of the matter and there are serious problems still to overcome.

So-called peaceful explosions cannot be distinguished in character from tests of nuclear weapons. That is why we attach importance to verification on peaceful nuclear explosions and we have tabled a paper on that issue.

I should like to deal more expansively than I did last night with what the hon. Gentleman has said about linkage with the non-proliferation treaty. Article 6 of that treaty requires nuclear parties to show that they are using their best endeavours to make progress towards nuclear disarmament. Indeed, that is the Government's objective. I do not want the hon. Gentleman to get the impression that the Government are not interested in seeking a comprehensive test ban treaty. I make it plain that we are interested in that; it is one of our objectives.

However, it would serve no one's interests for progress towards a comprehensive test ban to be artifically linked to continued adherence to the non-proliferation treaty and its future. That treaty is important in its own right and we must not jeopardise it by holding it hostage to progress in other areas, however important they may be.

However, I stress that that does not detract from the importance that we attach to the Geneva talks making progress. We give our fullest possible support to those talks and we hope that they will make progress. We hope that, by the time the review conference meets in the autumn, there will be evidence of progress. We also attach importance to making progress on a comprehensive test ban.

I have dwelt on the technical aspects of verification to save the House and the hon. Gentleman from falling into the trap of thinking that the signature of an effective test ban treaty is merely a question of political will and to dispel the suggestion that verification is no more than a political smokescreen. I hope that I have made it plain to the House that the technical problems are real and solid.

I reiterate that the premature conclusion of a treaty that did not contain adequate verification provisions would not serve our interests or those of our allies. However, we

[Mr. Richard Luce]

remain committed to seeking progress towards a comprehensive test ban, as does the hon. Gentleman, and we will continue to take an active part in the Geneva conference on disarmament in discussions about the problems of verification.

Question put and agreed to.

Adjourned accordingly at one minute to Three o'clock.

House of Commons

Monday 10 June 1985

The House met at half-past Two O'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

Oral Answers to Questions

TRANSPORT

Air Services

1. **Mr. Coombs** asked the Secretary of State for Transport what are the average fares per mile on scheduled air services between the United Kingdom and *(a)* Amsterdam and *(b)* Paris.

The Parliamentary Under-Secretary of State for Transport (Mr. Michael Spicer): Since our agreement last year with the Dutch, lowest fares between London and Amsterdam have fallen by as much as 44 per cent. The lowest fare to Paris has risen by 4 per cent. I have placed details of the fares in the Library.

Mr. Coombs: Does my hon. Friend agree that the figures are remarkable and demonstrate the importance of opening up European air routes to maximum competition? Does he recognise the need for continuing negotiations with the French about the London-Paris route, which has shown not a remarkable improvement but a deterioration? Will my hon. Friend tell the House how the negotiations are proceeding?

Mr. Spicer: My hon. Friend is right to say that the new liberal regime with the Dutch has had a dramatic effect on travel between London and Amsterdam, which in the last year has risen by almost 17 per cent., against the European average of 10 per cent. I am hoping to see in the next few weeks the French Minister responsible for aviation to discuss how to improve fare structures between Britain and France.

Mr. Skinner: Instead of spending so much time with his continental counterparts, will the Minister do something constructive for Swindon and stop rail closures which will result in mass unemployment?

Mr. Speaker: Order. The question is about Amsterdam.

Mr. Spicer: In the first part of his question the hon. Member for Bolsover (Mr. Skinner) implied that he did not agree with what we are doing to achieve lower fares for our country men who want to travel to Europe, but we shall press on.

Mr. Wilkinson: Will my hon. Friend approach these important negotiations with the treaty of Rome and its important free competition provisions in mind? Is it not prima facie the case that a number of countries, including France, are not acting according to the spirit of those provisions?

Mr. Spicer: Yes. The Government are becoming increasingly impatient over the fact that the provisions of the treaty of Rome, which apply to manufacturing, do not seem to apply to services—especially not to aviation.

2. **Mr. Robert B. Jones** asked the Secretary of State for Transport what steps he is taking to persuade other European countries to agree to more liberal air service arrangements with the United Kingdom.

The Secretary of State for Transport (Mr. Nicholas Ridley): We have negotiated liberal air services arrangements with the Netherlands, Germany and Luxembourg. We are in the course of discussions with France, Italy, Switzerland and the Scandinavian countries, and are maintaining pressure for the establishment of a liberal air transport policy by the European Community.

Mr. Jones: I am grateful to my right hon. Friend for, and congratulate him on, the progress that he has made. Which countries are dragging their feet? Would it not be a good idea to open negotiations with countries outside the EEC, such as those in Scandanavia, to bring home to them the benefits to their tourist trade of lower fares, and so hit in the pocket those countries which are being obstructive?

Mr. Ridley: We are approaching non-EEC countries, such as Norway, Sweden, Austria and Switzerland, to try to negotiate liberal arrangements with them. My hon. Friend will be reassured and pleased to hear that of the 10 new services to the Netherlands six serve regional airports in Britain, and that two out of six new services to Germany also serve regional airports.

Mr. Stephen Ross: May I encourage the Secretary of State to extend his negotiations to east European countries, such as East Germany? It seems ridiculous that we should not be able to fly direct to Berlin without having to go to Amsterdam or Brussels and then half way round the Baltic. Is there any chance of making progress with those countries?

Mr. Ridley: That is a rather different proposition. They are not used to liberal private enterprise competitive arrangements in those parts of Europe. I shall bear in mind, however, the hon. Gentleman's exhortation that I should persuade them to be so.

Sir Geoffrey Finsberg: When my right hon. Friend has his negotiations with the French Government on this issue, will he try to persuade them that it is crazy for them to keep a closed shop both on fares and services to Strasbourg, which is, after all, meant to be the headquarters not only of the European Assembly but of the Council of Europe? They are unduly restrictive in terms of fares and planes flying to Strasbourg.

Mr. Ridley: I agree with my hon. Friend. On the route to Paris and to other airports in France, including Strasbourg, there seems no reason why we should not have a completely liberal arrangement. We are continuing to urge that view on our French friends, and we can only hope that my hon. Friend's supplementary question will have contributed to that end.

Mr. Steen: Does my right hon. Friend agree that the major problem is the pooling arrangements which the state airlines enter into with each other? Will his measures and sensible White Paper help to liberalise the arrangements, provide more competition and help to break the cartel?

Mr. Ridley: I only wish that I could bring the pooling arrangements to an end. We have made that view clear in the Council of Transport Ministers and shall continue to do so. I am afraid, however, that I must tell my hon. Friend that it takes two to reach an agreement—it takes two to tango in these matters—and that until we can persuade the other European states to accept a more open transport regime we shall not succeed.

Sir Peter Emery: Will my right hon. Friend, when considering the whole matter of liberalisation, try to persuade his Department and foreign Governments to give greater encouragement to small independent airlines, BCal and others, to come forward and take up opportunities? Will he, at the same time, discourage British Airways from trying to hog the whole lot?

Mr. Ridley: I assure my hon. Friend that my Department needs no encouraging in that direction. Nor do I. He will agree that my record, both in connection with the civil aviation review and the airports White Paper, has been to try to find ways to encourage the smaller independent airlines to have more opportunities and more room for growth.

Nationalised Industries (Purchasing Policy)

3. **Mr. Evans** asked the Secretary of State for Transport if he will make it his policy to encourage nationalised industries for which he is responsible to buy from British firms wherever possible.

7. **Mr. Eastham** asked the Secretary of State for Transport whether he has issued any guidance to the British Railways Board concerning the nationality of companies tendering for new locomotive and carriage contracts.

Mr. Ridley: In line with the Government's purchasing policy, we would expect to see nationalised industries choosing to buy British, provided the products and prices are right. In the last few days the BR chairman has reaffirmed that that is indeed BR policy.

Mr. Evans: Will the Secretary of State acknowledge that it would be a disaster if major British companies such as GEC and its Ruston diesel works in my constituency did not win the contract for the next generation of British Rail locomotives? Will the right hon. Gentleman make it clear to the chairman of British Rail that it is essential that should there be any tenders from foreign companies for the next generation of locomotives, they must be subject to the most rigorous scrutiny to ensure that there are no hidden subsidies or unfair competition in those tenders?

Mr. Ridley: Two main locomotive orders are coming forward, one for the Electra class 91 electric locomotives and the other for the replacement of the freight diesel locomotives. There are now three contenders, as it were —three tenderers—for the first. British Rail has not yet gone out to tender on the second, although it is much the biggest programme. I assure the hon. Gentleman that BR is acutely aware of the desirability of getting competitive prices and standards of performance from British manufacturers, and I hope that it will succeed in doing so because we all have the same interests in mind.

Mr. Eastham: Is the Secretary of State aware that when Mr. Bob Reid, the chairman of British Rail, was interviewed recently about the locomotive orders he stated clearly that there are no inhibitions on placing orders abroad? Would it not be idiotic to see British Rail ordering those locomotives from France, America or Japan? Does the Minister believe that any of those countries would place orders in this country?

Mr. Ridley: On the hon. Gentleman's last point, many overseas markets are open to British Rail Engineering Ltd. If we are to be able to sell our railway stock overseas, we should be prepared to buy overseas. In relation to the hon. Gentleman's first point, I shall quote from *Railnews*, in which the chairman of British Rail said:

"the Board's policy is to buy British whenever the product and the price is right; we buy 95 per cent. of our goods, supplies and services from British firms."

So the chairman is aware of the sort of views that the hon. Gentleman expresses.

Mr. Adley: Is the problem not just the reliability of some British Rail engines, but the lack of extensive manufacturing runs available to British diesel engine manufacturers? Will my right hon. Friend study what was done by the Conservative Government in the 1930s when they gave assistance to private railway companies? Will he do likewise and place orders at Government expense with British manufacturers for some prototypes to enable British Rail to make detailed and extensive tests?

Mr. Ridley: My hon. Friend correctly mentions reliability. There are more complaints from hon. Members about punctuality on the railways than any other subject. If we are to improve punctuality, we must have reliable railway engines which do not break down. That is why it must be right for British Rail to ensure the reliability of the products that it is now seeking to buy. It is for British Rail to decide which prototypes it will purchase. It has been purchasing several prototype locomotives so that it can assess their performance.

Mr. Robert Hughes: The Secretary of State mentioned overseas orders available to British Rail. Is he not aware that foreign buyers will not buy British products if our railway system does not buy them? Why does he not put some investment into British Rail to help its workshops to develop new coaches and various things? Why does he not do something instead of whining all the time about the need for competitiveness?

Mr. Ridley: The hon. Gentleman is wrong. He will be aware that a number of foreign railways have purchased from British Rail Engineering Ltd. Mexico has recently ordered a number of International coaches. If we are to keep such markets open, we cannot declare a policy that our market will be closed. I am not remotely prepared to do that. If the engineering industry can sell to British Rail —winning competition on prices and standards—it can win orders overseas at the same time, because it will be in a superior position to do so.

Mr. Viggers: Does my right hon. Friend agree that attractive though protectionism may seem in individual cases, it is contrary to the European Community rules and would lead to disaster for us as a major trading and exporting nation? However, will he ensure that our European partners are as fair as we are?

Mr. Ridley: I agree with both my hon. Friend's points. A protectionist policy would not just be illegal under our obligations under the treaty of Rome, it would be

disastrous because it would encourage our industry to lose its competitive edge and thus be unable to earn more orders in the world market and create more jobs.

Mr. Snape: Does the Secretary of State accept that under this Government we have already seen the closure of Horwich railway works, that we are shortly to see the closure of the Swindon railway works and that outside the inter-city network British Rail is falling apart? Is it not about time that the Government started defending British railway engineering expertise instead of giving aid and comfort to our competitors, and started to protect British workmen and an industry which this country gave to the world instead of seeking continually to undermine it?

Mr. Ridley: The hon. Gentleman, as always, is wholly wrong. He should know that the high level of investment in British Rail for which he and his hon. Friends have been calling has been delivered by the Government. The result of that investment is that the products do not need so much maintenance and repair. That has been the cause of the lack of work for British Rail Engineering Limited. If the hon. Gentleman does not know that, he should ask the union that sponsors him to tell him.

Services (Signposting)

4. **Mr. Beith** asked the Secretary of State for Transport whether he has any plans to make it easier for restaurants, garages, hotels and guest houses in rural areas to have their facilities signposted on trunk roads.

The Minister of State, Department of Transport (Mrs. Lynda Chalker): The signing of hotels in rural areas is becoming progressively more established, along with the further development of holiday route signs. I have recently introduced a system of white and brown signs where facilities such as fuel, meals and accommodation can be found off the main road. I have also begun a general review of direction signing, and I will consider any suggestions for improvement.

Mr. Beith: I am grateful to the Minister for her answer, but in that case why is it that services in Northumberland, on bypassed sections of the A1, face endless obstruction in their attempts to get reasonable signs? Is the Minister aware of the extent to which the county council claims to be acting as the agent of the Secretary of State in refusing those signs? Does she realise how difficult it is for small businesses which want to maintain the passing trade that is available?

Mrs. Chalker: I am well aware of how difficult it can be for small businesses which want to maintain the passing trade. There is no obstruction, I hope, in Northumberland or anywhere else to the mounting of signs. I know that there was a case at a place called Scremerston recently, but that is very much in its early days, and we are looking at it with Northumberland county council.

Mr. Neale: I thank my hon. Friend for the careful consideration that she always gives to the matter, and for her recent announcement of a review. Nevertheless, will she accept that small businesses and tourism in areas such as the west country would gain immeasurably if there were an early announcement of the principles on which approved signs can be constructed? Does she agree that the evidence obtained from the trials of the brown and white signs supports the introduction of such signs far more quickly in areas such as the west country?

Mrs. Chalker: My hon. Friend is right about the review of direction signs. It is much needed, and I hope that, as a result of new measures that I am taking, it will be finished much earlier than we originally predicted.

With regard to the use of brown and white direction signs for communities that are now bypassed, I shall be happy for any county council—Devon and Cornwall or any other—to have the brown and white signs if that can be agreed with the British Tourist Authority.

Cyclists

5. **Mr. Dormand** asked the Secretary of State for Transport whether he is satisfied with the progress being made by local authorities in providing improved facilities for cyclists; and if he will make a statement.

Mrs. Chalker: I am encouraged by the progress being made by many local authorities, but facilities need to be accompanied by constant attention to safety on the part of all road users.

Mr. Dormand: Is the Minister aware that there is a growing desire among local authorities to provide facilities for cycling, but that they are unable to do so because of the Government's restrictive policies concerning local government finance?

As the Minister is such an enthusiast for cycling, will she say what action she is taking to try to end the contradictory situation in which the Government are urging local authorities to do something and are then preventing them from acting because they do not have the money to do it?

Mrs. Chalker: It would be wrong for us to dictate to local authorities exactly what, within the overall highways budget, their priorities should be. Every year they are asked to submit a transport policy and programme in which they are invited to give their criteria for cycling schemes. I shall be happy to note those and respond to such TPPs through the TSG. It is, of course, up to local councillors to decide what their priorities are within the overall highways budget.

Mr. Forman: My hon. Friend referred in her first answer to provision for safety, which is obviously very important. As a cyclist, I can assure my hon. Friend that it would help greatly if the Government were to make early progress with legislation dealing with motor vehicle emissions and black smoke from buses and lorries. That is one of the most unpleasant aspects of cycling in urban areas.

Mrs. Chalker: I agree with my hon. Friend about emissions from vehicles which are not properly maintained. The traffic examiners have a right to stop such vehicles. With our speedy progress towards lead-free fuel, we shall certainly make progress in the next few years.

Coach Services

6. **Mr. Parris** asked the Secretary of State for Transport how many long-distance coach services have been registered; and what has been the increase in passengers carried by express coach since October 1980.

Mr. Michael Spicer: Since October 1980 more than 900 new services have been registered, of which some 700 are still running. That is a 20 per cent. increase in the number of all-year services. Passengers on the National

Bus Company's national express services have increased by about 50 per cent. since 1980. We believe that the independent operators must have increased their carryings by an even greater figure.

Mr. Parris: What has been the effect of those remarkable improvements on fares?

Mr. Spicer: Since we liberalised long-distance coach services in 1980, fares have been reduced in real terms by between 15 and 40 per cent., and on some routes fares remain lower than they were five years ago. Fare reductions combined with greatly inproved services explain the dramatic increase in business for long-distance coaches.

Mr. Dobson: Does the Minister agree that the increase in passengers carried by the express coach services has been closely paralleled by a massive reduction in the number of passengers carried on rural stage carriage services? Does he further agree that if the Transport Bill is based on that principle people in rural areas know what to expect?

Mr. Spicer: As the hon. Gentleman knows, the decline in rural bus services has been a long-term factor, which is precisely why we have introduced the Transport Bill. It will bring back life once again to rural bus services.

Mr. Higgins: I welcome the improvement in long-distance coach services and the reduction in fares, but is my hon. Friend aware of the anxiety caused by some coaches which appear to exceed the 70 mph limit? As the tachograph does not provide an adequate means to check that, will he consider the installation of some other device that will do so?

Mr. Spicer: We must always be vigilant about exceeding speed limits. During the past year there have been signs of greater compliance with limits. That is a matter for continual vigilance by the police. The Bus and Coach Council has issued its own code of practice, and we hope that the bus industry will comply with it.

Mr. Cartwright: Is the Minister aware of the problems caused by the rapid growth in the number of coaches in central London? Even before we reach the height of the tourist season, many London streets are clogged by parked coaches, which causes major problems for other road users. Has he received representations about that, and what action will he take?

Mr. Spicer: I am informed that we are studying the whole question of congestion in the London area. It has as much to do with the great increase in tourism as with the liberalisation of coach services outside London.

Mr. Gregory: Bearing in mind my hon. Friend's comments about the deregulation of long-distance coaches, and the carping by the Opposition, and in particular unions, such as the Transport and General Workers Union, that we would see the decimination of long-distance coaches, can he draw any conclusions regarding the deregulation of short-distance coach and bus services?

Mr. Spicer: My main conclusion is that the Opposition are likely to be as inaccurate in future about short distance services as they have been in the past about long-distance services.

Mr. Stott: On the latter point, only time will tell. In addition to giving the number of long-distance coach operations that have been registered since 1980, will the Minister tell the House the number of small and intermediate-sized towns which prior to 1980 were served by long-distance coaches, but are no longer served by them? If he considers that fact, I am sure that he will conclude, as I do, that many towns are no longer served by long-distance coaches, as a direct consequence of the 1980 legislation.

Mr. Spicer: We know that the number of long-distance services between towns has increased considerably. I have already accepted that there has been a long-term decline in rural services, but we hope to increase those services in future.

Mrs. Virginia Bottomley: Has the deregulation of long-distance coach services had an effect on safety regulations?

Mr. Spicer: One must never be complacent about safety, but I assure my hon. Friend that the safety record of coaches is good and is improving all the time. For instance, during the past decade, fatalities of bus and coach passengers have halved. Therefore, the safety of coach travel is now about equal to that of rail travel.

A127

8. **Mr. Proctor** asked the Secretary of State for Transport what proposals he has to improve the A127; and if he will make a statement.

Mrs. Chalker: The general public are currently being consulted about a proposal for an underpass at Rayleigh weir. A proposed improvement at the "Fortune of War" is also under discussion with Basildon development corporation. More central reserve safety fencing is to be provided, completing provision throughout. Further improvements will be considered when the effects of the completed M25 have been established.

Mr. Proctor: I am grateful to my hon. Friend for that list of improvements. Will she confirm that the A127 is a heavily used road and that congestion occurs especially at peak commuter hours? Will not the proposal by development consortia to build a new town of more than 5,000 houses between Bulphan and West Horndon place incredible strains on the A127?

Mrs. Chalker: I have heard about the proposed development at Tillingham Hall. I am aware that an outline planning application has been made. I would expect the local planning authority to consult my Department on the traffic implications for the A127 and especially for the A128 interchange. We shall then consider carefully whether the volume of traffic on the A127 is likely to increase as a result, as traffic on the road between the junction with the M25 and the A128 has increased by about 9,000 vehicles a day since January 1984.

Mr. Amess: Is my hon. Friend aware that people from all over the United Kingdom wish to travel to Basildon but are hampered in so doing by the lack of road signs along the A127, the M25 and the M11? Will she please help us, and deny that this is a conspiracy to keep the whereabouts of Basildon a secret?

Mrs. Chalker: I lived for some time just down the line from Basildon, and I can assure my hon. Friend that there

is no way in which Basildon can be kept secret. I am well aware that the town wishes to be a primary destination. At present, we are conducting a major review of destination and direction signing, in which Basildon is being considered. We are improving the A127 at the junction with the B1007, which will help Basildon.

Mr. Robert Hughes *rose*——

Mr. Speaker: Order. I do not think that the A127 goes to Aberdeen.

London Regional Transport

9. **Mr. Greenway** asked the Secretary of State for Transport if he will have consultations with the chairman of London Regional Transport about its advertising policy; and if he will make a statement.

Mrs. Chalker: Advertising policy is a matter for the London Regional Transport board, but I would expect to discuss it with the chairman from time to time.

Mr. Greenway: Is my hon. Friend aware of the expensive advertising and misinformation campaign about the excellent work of LRT that has been carried out by the GLC? It includes mendacious stories about pensioners losing their concessionary passes after the abolition of the GLC. Is it not time that LRT was assisted in promoting its cause by means of advertising, and is it not time that the GLC stopped its mendacious behaviour?
